If the provider is claiming a payment under any of the circumstances described in the second paragraph of Items 65A, B, or C it enters the sex of the insured. The following codes are used:

M=Male
F=Female

Item 67A, B, C. Patient's Relationship to Insured
If the provider is claiming a payment under any of the circumstances described in the second paragraph of Items 65A, B, or C it may enter the code indicating the relationship of the patient to the identified insured, if this information is readily available.

Code	Title	Definition
01	Patient is Insured	Self-explanatory
02	Spouse	Self-explanatory
03	Natural Child/Insured has Financial Responsibility	Self-explantory
04	Natural Child/Insured does not Financial Responsibility	Self-explanatory
05	Step Child	Self-explanatory
06	Foster Child	Self-explanatory
08	Employee	Patient is employed by the insured.
09	Unknown	Patient's relationship to the insured is unknown.
11	Organ Donor	Code is used in cases where a bill is submitted for care given to an organ donor where it is paid by the receiving patient's insurance coverage.
12	Cadaver Donor	Code is used where a bill is submitted for procedures performed on a cadaver donor where they are paid by the receiving patient's insurance coverage.
15	Injured Plaintiff	Patient is claiming insurance as a result of injury covered by insured.

Item 68A, B, C. Certificate/Social Security Number/HI Claim/Identification Number
On the same lettered line (A, B, or C) that corresponds to the line on which Medicare payer information is shown in items 57-63, the provider enters the patient's HICN, i.e., if Medicare is the primary payer, this information is entered in item 68A. The number is shown as it appears on the patient's HI card, Certificate of Award, Utilization Notice, EOMB, Temporary Eligibility Notice, or as reported by the SSO.

If the provider is reporting any other insurance coverage higher in priority than Medicare (e.g., EGHP coverage for the patient or the spouse or during the first year of ESRD entitlement), the involved claim number for that coverage is shown on the appropriate line.

Item 69A, B, C. Group Name
Where the provider is claiming a payment under the circumstances described in the second paragraph of Items 65A, B, or C and there is WC involvement or an EGHP, it enters the name of the group or plan through which that insurance is provided.

Item 70A, B, C. Insurance Group Number
Where the provider is claiming a payment under the circumstances described in the second paragraph of Items 65A, B, or C and there is WC involvement or an EGHP, it enters the identification number, control number, code assigned by such health insurance carrier to identify the group under which the insured individual is covered.

GUIDELINES FOR
EMPLOYMENT INFORMATION

The following items are grouped together for ease in providing instructions on their completion: 71, 72, 73, 74, 75. Space is reserved for reporting the necessary employment data for up to two individuals. The following sequence of decision making is used in completing these fields.

INDIVIDUALS CLAIMING INSURANCE

- o If any of the insureds named under A, B, or C in the insurance section of the form (Item 65) has group insurance provided by an organization other than the employer, the insured's employment information is entered and the EID (Item 71) coded A, B, or C depending upon the payer line on which the indiviudal's insurance information is recorded. (For example, Item 69 records Group Name as Wasington Area Ford Dealers, Inc. but the insured's employer is Capital Ford, Inc. Because the insurance is held with a company other than the employer, the employer information is required for the insured.)

- o If any of the individuals recorded under A, B, or C in this insurance section of the form (Item 65) has group insurance coverage provided by an employer who operates from multiple locations, employment information (and location) is entered and the EID (Item 71) coded A, B, or C depending upon the payer line on which the individual insurance information is recorded.

Item 71. Employment Information Data

Where the provider is claiming a payment under the circumstances described in the second paragraph of Items 65A, B, or C it enters the code that indicates whether employment information given on the same line in Items 72-75 applies to the insured, the patient or the patient's spouse. Either the "A, B, C" codes or "P, S, F, M" codes, below, are used in this item, depending upon which set best handles the billing situation.

Code Structure

A=Employment Information relates to primary insured
B=Employment Information relates to secondary insured
C=Employment Information relates to tertiary insured
P=Patient Employment Information
S=Spouse Employment Information
F=Father's Employment Information
M=Mother's Employment Information

Item 72. Employment Status Code

Where the provider is claiming a payment under the circumstances described in the second paragraph of Items 65A, B, or C and there is WC involvement or an EGHP, it enters the code which defines the employment status of the individual identified on the same line in Item 71, if the information is readily available.

Code	Title	Definition
1	Employed Full Time	Individual stated that he or she is employed full time.
2	Employed Part Time	Individual stated that he or she is employed part time.

Item 73. Employer Name

Where the provider is claiming a payment under the circumstances described in the second paragraph of Items 65A, B, or C and there is WC involvement or an EGHP, it enters the name of the employer that provides health care coverage for the individual identified on the same line in Item 71.

Item 74. Employee Identification Number

Where the provider is claiming a payment under the circumstances described in the second paragraph of Items 65A, B, or C and there is WC involvement or an EGHP, it enters the identification nubmer assigned by the employer to the individual identified on the same line Item 71.

Item 75. Employer Location

Where the provider is claiming a payment under the circumstances described in the second paragraph of Items 65A, B, or C and there is WC involvement or an EGHP, it enters the specific location of the employer of the individual identified on the same line in Item 71. A specific location is the city, plant, etc., in which the employer is located.

Item 76. Principal and Other Diagnoses Descriptions
Not Required.

Item 77. Principal Diagnosis Code
The diagnosis codes shown and Items 78-81 must be the full ICD-9-CM diagnosis codes. including all five digits where applicable.

HCFA only accepts ICD-9-CM diagnostic and procedural codes which use definitions contained in DHHS Publication No. (PHS) 80-1260 or HCFA approved errata and supplements to this publication. HCFA approves only changes issued by the Federal ICD-9-CM Coordination and Maintenance Committee.

Inpatient--Required. The provider reports the principal diagnosis in this item. The principal diagnosis is the condition established after study to be chiefly responsible for this admission.

Even though another diagnosis may be more severe than the principal diagnosis, the principal diagnosis, as defined above, is entered. Entering any other diagnosis may result in incorrect assignment of a DRG and an overpayment to a hospital under PPS.

If an alcohol and/or drug-related ICD-9-CM code is used as the principal diagnosis, it must be accompanied by a specific additional diagnosis code in Items 78, 79, 80, or 81 and/or a specific procedure code in Items 84, 85, or 86 to indicate whether the type of treatment provided involved rehabilitation and/or detoxification therapy. (See §3610.13.)

Outpatient--Required. ICD-9-CM diagnostic coding is required in Items 77-81 of the bill. Hospitals report the full ICD-9-CM code for the diagnosis shown to be chiefly responsible for the outpatient services in Item 77. Hospitals report the diagnosis to their highest degree of certainty. For instance, if the patient is seen on an outpatient basis for an evaluation of a symptom (e.g., cough) for which a definitive diagnosis is not made, the symptom is reported (786.2). If, during the course of the outpatient evaluation and treatment, a definitive diagnosis is made (e.g., acute bronchitis), the definitive diagnosis is reported (466.0).

If the patient arrives at the hospital for examination or testing without a referring diagnosis and cannot provide a complaint, symptom, or diagnosis, the hospital reports an ICD-9-CM code for Persons Without Reported Diagnosis Encountered During Examination and Investigation of Individuals and Populations (V70-V82). Examples include:

- Routine general medical examination (V70.0);
- General medical examination without any working diagnosis or complaint, patient not sure if the examination is a routine checkup (V70.9); and
- Examination of ears and hearing (V72.1).

Items 78-81. Other Diagnoses Codes
Inpatient--Required. The provider reports the full ICD-9-CM codes for up to four additional conditions if they co-existed at the time of admission or developed subsequently, and which had an effect upon the treatment or the length of stay.

The principal diagnosis entered in Item 77 should not under any circumstances be duplicated as an additional or secondary diagnosis. If it is duplicated, eliminate it before Grouper. Proper installation of MCE identifies situations where the principal diagnosis is duplicated.

Outpatient—Required. Hospitals report the full ICD-9-CM codes in Items 78-81 for other diagnoses that coexisted in addition to the diagnosis reported in Item 77. For instance, if the patient is referred to the hospital for evaluation of his hypertension and the medical record also documents diabetes, diabetes is reported in Item 78.

Item 82. Procedure Coding Method
Not Required.

Item 83. Principal and Other Procedures Descriptions
Not Required.

Item 84. Principal Procedure Code and Date
Inpatient Required. The provider enters the ICD-9-CM code for the inpatient principal procedure. The principal procedure is the procedure performed for definitive treatment rather than for diagnostic or exploratory purposes, or which was necessary to take care of a complication. It is also the procedure most closely related to the principal diagnosis (Item 77). See §3626.4 for reporting outpatient procedures.

For this item, surgery includes incision, excision, amputation, introduction, repair, destructions, endoscopy, suture, and manipulation. Review this item against Items 50-53. It may alert you to noncovered services or omissions.

The procedure code shown must be the full ICD-9-CM, Volume 3, procedure code, including all four digit codes where applicable. See second paragraph under Item 77 for acceptable ICD-9-CM codes.

The date applicable to the principal procedure is shown numerically as MM-DD in the "date" portion.

Transmit to HCFA the original codes reported by the provider. If in the course of the claims development process you determine the codes are incorrect, transmit the corrected codes.

Pacemaker related ICD-9-CM procedure codes (37.70 and 37.73-37.85) require you to follow special procedures. (See §3678.)

Item 85 and 86. Other Procedure Codes and Dates
Inpatient Required. The full ICD-9-CM, Volume 3, procedure codes, including all four digit codes where applicable, must be shown for the two most significant surgical procedures other than the principal procedure (which is shown in Item 84). See Item 77 for acceptable codes. The date of each procedure is shown in the date portion of Items 85 or 86, as applicable, numerically as MM-DD.

Transmit to HCFA the original codes reported by the provider. If in the course of the claims development you determine that the reported codes are incorrect, transmit the corrected codes.

Pacemaker related ICD-9-CM procedure codes (37.70 and 37.73-37.85) require you to follow special procedures. (See §3678.)

Item 87. PRO/UR Approval Indicator
Required. The code entered indicates whether this claim has been reviewed and/or approved by the PRO. Providers will not report URC decision to you in this item.

Code Structure

Code	Title	Definition
1	Approved as Billed	Code indicates claim has been reviewed by the PRO and has been fully approved including any day or cost outlier.
2	Automatic Approval (Focused Review)	Code does not apply to Medicare claims.
3	Partial Approval	Code indicates the bill has been reviewed by the PRO and some portion (days or services) has been denied. The From/Through dates of the approved portion of the stay, excluding grace days and any period at a noncovered level of care (code "77" in Item 33), are shown in Items 88 and 89.
4	Admission Denied	Code indicates patient's need for inpatient services was reviewed and the PRO found that none of the stay was medically necessary.
5	Postpayment Review Applicable	Code indicates that any medical review will be completed after the claim is paid. The bill may be a day outlier, cost outlier, part of the sample review, reviewed for other reasons, or may not be reviewed.
6	Preadmission/Preprocedure	Code indicates that the PRO authorized this admission/procedure but has not reviewed the services provided.

Item 88 and 89. PRO/UR Stay Dates
Required. If a code "3" is in Item 87, the "From" date of the approved billing period is shown in Item 88, and the "Through" date of that period in Item 89. The fields contain MM-DD-YY, numerically.

Item 90. Number of Grace Days
Required. If a code "3" or "4" is in Item 87, indicating that the PRO has denied all or a portion of this billing period, the number of days determined by the PRO to be covered while arrangements are made for the patient's post discharge are shown. The field contains one numeric digit.

Item 91. Treatment Authorization Code
Not required.

Item 92. Attending Physician I.D.
Require. This is the State license number of the physician who has primary responsibility for the patient's medical care and treatment, except where the SUBC has agreed on an alternate identification number. If the State license number is used, it must be prefixed by the two position post office abbreviation of the State which issued the license.

Item 93. Other Physician I.D.
Required. This is the State license number of the physician who performed the principal procedure, except where the SUBC has agreed on an alternate identification number. If the State license number is used, it must be prefixed by the two position post office abbreviation of the State which issued the license. If this physician is also the attending physician shown in Item 92, the I.D. number is also shown here. "Same" is not an acceptable entry.

Item 94. Remarks
Required. For DME billings by HHAs, the rental rate, cost and anticipated months of usage are shown so that you may determine whether to approve the rental or purchase of equipment. In addition, special annotations may be entered where Medicare is not the primary payer because WC, an automobile medical or no-fault insurer, any liabilty insurer or an EGHP/LGHP is primary to Medicare. (See §§3679, 3680, 3681, and 3682.)

This space is also available to report overflow from other items.

Provider Representative Signature and Date.—No signature is required for a general care hospital unless a certification is required. (See §3315.2.) A provider representative's signature or facsimile is required on the bill of a psychiatric or tuberculosis hospital.

INTERMEDIARY USE ONLY AREA

Hospitals report the admitting diagnosis in block E under this area. The admitting diagnosis is the condition requiring hospitalization identified by the physician at the time of the patient's admission. This definition is not the same as that for SNF admissions. Providers report admitting diagnoses in 5 position ICD-9-CM codes.

The remainder of this space is available for your internal coding for bill processing or other specific needs. The following describes information to include on the UNIBILL which is not reported to you.

Verified Noncovered Stay Days.—Report the "From" and "Through" dates of any noncovered stay which extends or begins a spell of illness in field 77 (positions 1933-1938 for the From date and positions 1939-1944 for the Through date) of the UNIBILL. (See §3305 for special rules relating to spell of illness.) If more than one stay is involved, show the admission date of the first stay and the discharge date of the last.

Prior Psychiatric Days.—When the beneficiary is a patient in a psychiatric hospital at the time of initial entitlement to Medicare, report the number of days, not necessarily consecutive, in which he was confined to a psychiatric hospital in the 150-day period immediately preceeding entitlement. Show this information in field 70 (positions 1843-1845) of the UNIBILL. (See §§3104 and 3510.3.)

Amount Reimbursed.—Report the reimbursement amount for this bill in field 53 (positions 1707-1715) of the UNIBILL for outpatient claims, or field 42 (positions 1707-1715) of the UNIBILL for outpatient and HHA claims.

Nonpayment Code.—Report the appropriate nonpayment code in the UNIBILL where no payment is being made for the entire bill except in the situations where there is another insurer primary to Medicare. (See §§3679 through 3685.) Do not enter a code where benefits are exhausted but some payment is being made based upon the bill. Report one of the following codes as appropriate in field 73 (position 1853) of the UNIBILL:

B - Benefits Exhausted, including the situation where the regular spell of illness days have been exhausted and the patient elects not to use lifetime reserve days.

R - Spell of Illness Benefits Refused, Certification Refused, Failure to Submit Evidence, Provider Responsible for Not Filing Timely, or Waiver of Liability—the provider is at fault.

E - Cases Which are Denied Because the HMO out-of-plan services were neither "emergency" nor "urgently needed."

N - All Other Reasons for Nonpayment (e.g., entire bill is for noncovered services, emergency denied).

Date Approved.—Report the date the bill passed your computer edits in field 80 (positions 1961-1966) of the UNIBILL for inpatient claims, or field 61 (positions 1961-1966 of the UNIBILL) for outpatient and HHA claims.

Reporting Exceptions to the Transfer Requirement.—Report the appropriate code (see §3871, Item 36) for an exception to the 30 day transfer requirement in field 65 (position 1838) of the UNIBILL. This data is applicable only to SNFs.

UB-82 HCFA-1450 PAYER COPY

3606. FORM HCFA-1450 CONSISTENCY EDITS

In order to be paid correctly and promptly, a bill must be completed accurately. Edit all Medicare required fields for alphabetic or numeric characters as shown below. In addition, apply the MCE edits described in §3656.1 on diagnoses and procedures. If a bill fails these edits, return it to the provider for correction. If you edit bill data online, the edits are included in your software. When you receive magnetic tape or paper bills, either directly or through a billing service, ensure that these edits are made. Depending upon special services billed to you, you may require additional edits.

Item 4. Type of Bill. Must be three-position numeric. In addition, must be a valid code for hospital billing. Valid codes are:

a. First Digit - Type of Facility

1 - Hospital

NOTE: Hospital-based multi-unit complexes may also have use for the following first digits when billing nonhospital services:

2 - Skilled Nursing
3 - Home Health
4 - Christian Science (Hospital)
5 - Christian Science (Extended Care)
7 - Clinic (see special coding for second digit below)
8 - Special Facility (see special coding for second digit below)

b. Second Digit - Classification (if first digit is 1-5)

1 - Inpatient (Part A)
2 - Inpatient (Part B)
3 - Outpatient
4 - Other (Part B - includes home health bills not containing visit charges or where the plan of treatment is no longer in effect, or for nonpatient diagnostic clinical laboratory services

Second Digit - Classification (first digit is 7)

1 - Rural Health
3 - CORF or other rehabilitation facility

Second Digit - Classification (first digit is 8)

2 - Hospice (Hospital-based)

c. Third Digit - Frequency

0 - No payment
1 - Full billing (payment)
2 - First interim
3 - Continuing interim
4 - Final interim
5 - Late charge valid only with classification code "3"
7 - Correction
8 - Void/Cancel

d. For PPS bills, if the first and second positions of this item are "1," "2, 3 and 4" may not be entered in the third position.

Item 7. Medicare Provider Number.

a. Minimum six-position alpha/numeric field.

b. Cannot exceed eight positions.

c. Left - justified.

Item 11. Patient's Address.

a. The address of the patient must include:

City
State (P.O.'Code)
ZIP

b. Valid ZIP code must be present if the first and second digits of item 4 are "1."

c. Cannot exceed 48 positions.

Item 12. Birthdate.

a. Must be valid if present.

b. Cannot exceed eight positions allowing for separations (nonnumeric characters) in the third and sixth positions.

Item 13. Sex.

a. One alpha position.

b. Valid characters are "M" or "F."

c. Must be present.

Item 15. Admission Date.

a. Must be valid if present.

b. Cannot exceed eight positions allowing for separations (nonnumeric characters) in the third and sixth positions.

c. Present only if the first position of item 4 is "1, 2, 4, or 5" and the second position is "1;" or the first and second positions are "3" or the first position is "8" and the second position is "2."

d. Cannot be later than the "From" portion of item 22.

Item 17. Type of Admission.

a. One numeric position.

b. Required only if the first and second digits of item 4 are "1."

c. Valid codes are:

1 - Emergency
2 - Urgent
3 - Elective
4 - Newborn
9 - Information unavailable

Item 18. Source of Admission.

a. One numeric position.

b. Required only if the first and second digits of item 4 are "1."

c. Valid codes are:

1 - Physician referral
2 - Clinic referral
3 - HMO referral
4 - Transfer from a hospital
5 - Transfer from a SNF
6 - Transfer from another health care facility
7 - Emergency room
8 - Court/Law enforcement
9 - Information not available

Item 21. Patient Status.

a. Two numeric positions.

b. Present only if first position of item 4 is "1, 2, 4 or 5" and the second position is "1" or the first position is "3 or 4" or the first position is "8" and the second position is "2."

c. Valid codes are:

01 - Discharged to home/self care (routine charge)
02 - Discharged/transferred to other short-term general hospital
03 - Discharged/transferred to SNF
04 - Discharged/transferred to ICF
05 - Discharged/transferred to another type of institution (including distinct parts)

06 - Discharged/transferred to home care of organized home health service organization
07 - Left against medical advice
20 - Expired (did not recover - Christian Science patient)
30 - Still patient

d. The following codes are valid only if the first position of item 4 is "8" and the second is "2:"

40 - Expired at home
41 - Expired in a medical facility such as a hospital, SNF, ICF, or freestanding hospice
42 - Expired - place unknown

Item 22. Statement Covers Period (From-Through).

a. Cannot exceed eight positions in either "From" or "Through" portion allowing for separations (nonnumeric characters) in the third and sixth positions.

b. The "From" date must be a valid date which is not later than the "Through" date.

c. The "Through" date must be a valid date which is not later than the current date.

d. The number of days represented by this period must equal the sum of the covered days (item 23) and noncovered days (item 24), if the first position of item 4 is "1, 2, 4 or 5" and the second position is "1."

Item 23. Covered Days.

a. Cannot exceed three numeric positions.

b. Cannot exceed 150 if the first position of item 4 is "1 or 4" and the second position is "1."

c. Cannot exceed 100 if the first position of item 4 is "2 or 5" and the second position is "1."

d. When added to the number in item 24 (noncovered days) the sum must equal the number of days represented by the billing period in item 22.

Item 24. Noncovered Days.

a. Cannot exceed three numeric positions.

b. When added to the number in item 23 (covered days) the sum must equal the number of days represented by the billing period in item 22, unless entitlement to Medicare follows admission date.

Item 25. Coinsurance Days.

a. Cannot exceed two numeric positions.

b. Cannot exceed 30 if the first position of item 4 is "1 or 4" and the second position is "1."

c. Cannot exceed 80 if the first position of item 4 is "2 or 5" and the second position is "1."

d. Cannot exceed the number in item 23 (covered days).

Item 26. Lifetime Reserve Days.

a. Cannot exceed two numeric positions.

b. Cannot exceed 60.

c. Cannot exceed the number in item 23 (covered days).

Items 28, 29, 30, 31, 32. Occurrence Codes and Dates.

a. All dates must be valid.

b. Each code must be accompanied by a date.

c. All codes are two numeric positions.

d. Valid codes for hospital claims are 01-99.

e. If code 20, 21, 22, 23 or 26 is entered, the second digit in item 4 (Type of Bill) must be a "1."

f. If code 27 is entered, the first digit in item 4 must be "3" and the second digit "3" or the first digit must be "7" and the second digit "3."

g. If code 42 is entered, the first digit in item 4 must be "8" and the second digit "2."

h. If 02, 03 or 04 is entered, Medicare cannot be the primary payer, i.e., Medicare related entries cannot appear on the "A" lines of items 65-70.

i. If code 20 is entered:

- o Must either be earlier than admission date (item 15) or later than "Through" date (item 22).
- o Must be less than 13 days after the admission date (item 15) if "From" date is equal to admission date (less than 14 days if billing dates cover the period 12/24 through 1/2).
- o If admission date (item 15) and "From" date (item 22) are not equal, "Covered Days" (item 23), if present, must not exceed 12 days (13 days if the billing dates covered the period 12/24 through 1/2).

- This date plus the "Covered Days" (item 23) less the coinsurance (item 25 and noncovered days (item 24) cannot be greater than the "Statement Covers Period" Through date (item 22) (plus 1 if item 21 code 30 is completed).

j. If code 21 is entered:

- Cannot be later than "Statement Covers Period" Through date.
- Cannot be more than 3 days prior to the "Statement Covers Period" From date.

k. If code 22 or 23 are entered, they must be within the billing period shown in item 22.

Item 33. Occurrence Span Code and Dates.

a. Dates must be valid.

b. Code entry is two numeric positions.

c. Code must be accompanied by dates.

d. Valid codes are:

70
71
72
74
75
76
77

e. If code 70 is entered, the first digit of item 4 must be "2 or 5" and the second digit must be "1."

f. If code 70 is entered, the first digit of item 4 must be "1, 2, 4 or 5" and the second digit must be "1."

g. If code 72 is entered, the first digit of item 4 must be "1, 3 or 7" and the second digit msut be "3 or 4."

h. If code 75 is entered, the first digit of item 4 must be "1 or 4" and the second digit must be "1."

Items 35, 36, 37, 38, 39. Condition Codes.

a. Each code is 2 numeric digits.

b. Valid codes for Medicare are:

02
04
07
17 - (Not needed for EMC because of 4-position year of birth.)
20
36
37
38
39
40
55
56
57
60
61
62
63
64
65
66
71
72
73
74
75
76

c. If code 07 is entered, type of bill must not be hospice ("82X").

d. Invalid for PPS, codes 36, 37, 38 or 39 are entered and the first and second digits in item 4 are "1s."

e. If code "40" is entered: the "From" and "Through" dates in item 22 must be equal, and there must be a "0 or 1" in item 23 (Covered Days).

Item 40-43. Blood.

a. Entries for items 40, 41, and 42 cannot exceed two numeric positions.

b. Entry for item 43 is one numeric position.

- If the blood usage data is present, "Pints Furnished" must be numeric and greater than zero.
- Cannot exceed three pints minus the number of pints replaced.

Item 44. Special Program Indicator.

Only valid entry is "06."

Items 46, 47, 48 and 49. Value Codes and Amounts.

a. Each code must be accompanied by an amount.

b. All codes are two numeric digits.

c. Amounts may be up to eight numeric positions. (000000.00)

d. The valid codes are:

04-16
31
40

e. If code 05 is entered, the first and second digits of item 4 must be "1."

f. If code 06 is entered, there must be entries in items 40 and 43.

g. If codes 08 and 10 are entered, there must be an entry in item 26.

h. If codes 09 and 11 are entered, there must be an entry in item 25.

i. If codes 12, 13, 14, 15 or 16 are entered, data pertaining to Medicare cannot be entered in line A of item 57-70.

Item 51. Revenue Code.

a. Three numeric positions.

b. Should be listed in ascending numeric sequence except for the final entry which must be "001."

c. There must be an entry adjacent to each entry in item 53.

Item 52. Units of Service.

a. Up to three numeric positions.

b. There must be an entry in this column if revenue code series 10X, 11X, 12X, 13X, 14X, 15X, 20X, 21X, 45X, 51X, 52X, 54X, 55X, 56X, 57X, 58X, 59X, or 80X are entered in item 51. Revenue code series 41X, 42X, 43X, 44X, 91X and 943 require an entry only if the second digit of item 4 is "4."

c. Accommodation units must equal covered days (item 23).

Item 53. Total Charges.

a. Up to eight numeric positions (000000.00).

b. There must be an entry adjacent to each entry in column 51.

c. The last amount must be the sum of all the entries above it.

Items 57A, B, C. Payer Identification.

a. "Medicare" must be entered on one of these lines depending upon whether it is the primary, secondary or tertiary payer.

b. See item 46 i. above.

Items 60A, B, C. Deductible.

a. Each entry is up to eight numeric positions (000000.00).

b. May be blank.

c. There must be an entry if there is an 06 or 07 entered in Items 46, 47, 48 or 49.

Items 61A, B, C. Coinsurance.—Each entry is up to eight numeric positions (000000.00). May be blank.

There must be an entry if there is an entry in Item 25 or 26 or an 08, 09, 10 or 11 is entered in Items 46, 47, 48 or 49.

Items 65A, B, C. Insured's Name.—On the line corresponding to the line on which "Medicare" was entered in Item 57, the patient's name must be entered as it appears on his HI card. See Item 46 i. above.

Item 66A, B, C. Insured's Sex.—If present, must be "M" or "F."

Items 68A, B, C. Certificate/Social Security Number/HI Claim/Identification Number.—On the line corresponding to the line on which "Medicare" was entered, the patient's HICN must be entered.

It must contain nine numeric characters and at least one alpha character as a suffix. The first alpha suffix is entered in position ten, the second in position eleven, etc. The first three numbers must fall within the range of: 001 through 588, or 700 through 729 only.

The alpha suffix must be A through F, H, J, K, M, T or W. Alpha suffixes A and T must not have a numeric subscript. Alpha suffixes B, D, E, M and W may or may not have a numeric subscript.

If the alpha suffix is H, it must be followed by A, B or C in position eleven. The numeric subscript (position twelve) must conform with the particular above for the A, B, or C suffix employed.

The RRB claim number must contain either six or nine numeric characters, and must have one, two or three character alpha prefix.

For prefixes H, MH, WH, WCH, PH and JA only a six numeric field is permissable. For all other prefixes, a six or nine numeric field is permissable.

A nine numeric character claim number has the same ranges as the SSA nine position claim number.

Item 77. Principal Diagnosis Code.—Must be four or five positions left justified with no decimal points. Validate with the MCE program in accordance with §3656.1.

Items 78-81. Other Diagnosis Codes.--If present, must be four or five positions, left justified with no decimal points. Validate with the MCE.

Item 83. Principal and Other Procedure Descriptions.--If Medicare is the only payor indicated in Item 57, this item should be blank. Otherwise, ignore.

Item 84. Principal Procedure Code and Date.--Not always required, but if present, date must be present and valid. Validate with the MCE.

Date must fall before the "Through" date in Item 22. (In some cases it may be before the admission date, i.e., where complications and admission ensue from outpatient surgery.)

For implants October 1, 1987 and later when ICD-9-CM Codes 37.70 - 37.77 and 37.80 - 37.89 are encountered or CPT-4 Codes 33200 - 33208, 33212, 33216, 33218, 33219, and 33232 pacemaker registry information is required. (See §3678 --Editing Pacemaker Records.)

Items 85, 86. Other Procedure Codes and Dates.—If present, apply edits for Item 84.9

Item 87. PRO/UR Approval Indicator.—One numeric position. Must be present if the first and second digits of Item 4 (Type of Bill) are "1".

Valid codes are:

1 Approved by the Medical Review Agent as billed
2 Automatic approval as billed based on focused review
3 Partial approval
4 Admission denied
5 Postpayment review applicable
6 Preadmission authorization

Items 88 and 89. PRO/UR Approved Stay Dates.—Must be present only if Item 87 contains a "3."

Neither the From nor the Through portion can exceed eight positions allowing for separations (nonnumeric characters) in the third and sixth positions of each field.

Item 90. Number of Grace Days.—Must be present if item 87 contains a "3" or "4." If present, it is one numeric digit.

Item 92. Attending Physician I.D.

a. May be alpha or numeric.

b. Must be present if the first and second digits of item 4 are "1."

Items 93. Other Physician I.D.

a. May be alpha or numeric.

b. Must be present if the first and second digits of item 4 are "1" and a procedure is shown in item 84-86.

c. Will identify the physician performing the principle procedure.

d. If item 84 is blank, this item will also be blank.

Intermediary Use Only Area.--Validate admitting diagnosis with the MCE program.

3610. HOSPITAL INPATIENT BILLS - GENERAL

A. Background.—The Social Security Amendments of 1983 (P.L. 98-21) provided for the establishment of PPS for Medicare payment of inpatient hospital services. Under PPS, hospitals are paid a predetermined rate per discharge for inpatient hospital services furnished to Medicare beneficiaries. Each type of Medicare discharge is classified according to a list of DRGs. These amounts are, with certain exceptions, payment in full to the hospital for inpatient operating costs. Beneficiary cost-sharing is limited to statutory deductibles, coinsurance, and payment for noncovered items and services.

The statute excludes several types of hospitals and hospital units from the PPS. These include psychiatric, long-term, children's and rehabilitation hospitals, as well as psychiatric and rehabilitation units operating as distinct parts of acute care hospitals. Hospitals located outside the 50 States and the District of Columbia are also excluded. In addition to these categorical exclusions, the statute provides other special exclusions, such as hospitals that are covered under approved State reimbursement control systems. These excluded hospitals and units are reimbursed on the basis of reasonable costs subject to the target rate of increased limits.

Hospitals and distinct part hospital units that specialize in alcohol/drug dependency treatments are included under PPS effective with the first day of their cost reporting period beginning on or after October 1, 1987. There is no special payment transition period for them. Treat bills for inpatients admitted prior to and discharged after the PPS implementation date as transition cases; not as transfer or discharge/readmissions. (See §3610.4 for instructions.)

As the facilities' cost reporting period ends, terminate alcohol/drug hospitals in the 1200-1299 series, and then establish them as short-term hospitals in the 001-0899 series using the next available provider number. If a hospital previously had a short-stay number, reactivate this number. The special identifer code is no longer needed for alcohol/drug units, and the"V" code must also be terminated.

The PPS standardized payment amounts are developed according to urban/rural descriptions in each of nine divisions and for the nation. The resulting 20 average standardized amounts are further divided into labor and nonlabor portions and are collectively referred to as the Federal portion of the rate.

For discharges occurring on or after April 1, 1988, separate standardized payment amounts are established for large urban areas, urban areas and rural areas. Large urban areas are urban areas with populations of more than 1,000,000 as determined by the Secretary of HHS on the basis of the most recent census population data. In addition, any New England County Metropolitan Area (NECMA) with a population of more than 970,000 is a large urban area.

Regional payment floors for the PPS standardized amounts are established for discharges occurring on or after April 1, 1988 and before September 30, 1990. The regional payment floor equals the higher of the national standardized amount or the sum of 85 percent of the national standardized and 15 percent of the regional standardized amounts.

There is a transition period where payment is based upon a blend of the Federal rate developed for the DRG and an individual hospital's specific rate. At the end of the transition period, the prospective payment will be based on national DRG payment rates. (See HCFA Pub. 15-1, §§280ff.) These DRG payment rates will be updated annually. The relative proportions of the hospital specific rate and the Federal rate during the transition period are:

PPS Transition Schedule

Summary of Hospital-Specific/Federal Percentages

Cost Reporting Periods Beginning on or After	Hospital-Specific Target Rate Percentage	Federal Rate Percentage
October 1, 1983	75	25
October 1, 1984	50	50
*October 1, 1985		
+ for the first 7 months	50	50
+ for the remaining 5 months	45	55
October 1, 1986	25	75
November 21, 1987	-	100

NOTE: The FY 1987 transition period blended rate (i.e., 75 percent Federal rate/25 percent hospital specific rate) remains in effect for the first 51 days of a hospital's cost reporting period beginning during FY 1988.

Summary of Regional and National Percentages of the Federal Portion

Federal Fiscal Year Beginning	(Regional/National Blend)	
October 1, 1983	(100)	(0)
October 1, 1984	(75)	(25)
*October 1, 1985	(75)	(25)
October 1, 1986-November 20, 1987	(50)	(50)
November 21, 1987	——	(100)

*An exception to this provision has been made for Oregon hospitals, which will continue under the transition schedule as defined prior to COBRA. For the first 7 months of cost accounting years beginning in FY 1986, Oregon hospitals were paid on 50 percent HSP and 50 percent Federal rates. Beginning with the 8th month, Oregon hospitals were paid a blend that is 25 percent HSP and 75 percent Federal. The composition of the Federal rate remained at 75 percent regional and 25 percent national for discharges occurring from October 1, 1985 through April 30, 1986. It changed to 50 percent regional and 50 percent national for discharges occurring between May 1, 1986 and September 30, 1986. For discharges on or after October 1, 1986, there is no regional component to the Federal rate for hospitals in Oregon. The Pricer program makes this distinction based upon the provider numbers.

B. Situations Requiring Special Handling.—

o Pay Sole Community Hospitals in accordance with the methods used to establish the prospective rates for the first year of the PPS transition. The 75 percent hospital-specific rate and the 25 percent Federal rate are applied by the Pricer program in accordance with the current values for the appropriate Federal year.

o Hospitals have the option to continue to be reimbursed on a reasonable cost basis subject to the target ceiling rate or to be reimbursed under PPS if the following are met:

— Recognized as of April 20, 1983, by the National Cancer Institute as Comprehensive Cancer Centers or Clinical Research Centers;

— Demonstrating that the entire facility is organized primarily for treatment of, and research on, cancer; and

— Having a patient population that is at least 50 percent of the hospital's total discharges with a principal diagnosis of neoplastic disease.

This decision is made at the beginning of the hospital's FY and continues until the hospital requests a change. If the provider selects reasonable cost subject to the target ceiling, it can later request PPS. No further option is allowed.

o Regional and national referral centers within short-term acute care hospital complexes. Rural hospitals which meet the criteria have their prospective rate determined on the basis of the urban, rather than the rural, adjusted standardized amounts, as adjusted by the applicable DRG weighting factor and the hospital's area wage index. (See §3610.15.)

o Hospitals in Alaska and Hawaii have the nonlabor related portion of the wage index adjusted by their appropriate cost-of-living factor. These calculations are made by the Pricer program and are included in the Federal specific portion of the rate.

o Kidney and heart acquisition costs are treated as an adjustment to provider payments. The payments are adjusted in each cost reporting period to compensate for the reasonable expenses of the acquisition and are not included in determining the prospective payment.

o Christian Science Sanatoria are paid on the basis of a predetermined fixed amount per discharge. Their reimbursement is based upon their historical operating costs per discharge and is not calculated by Pricer.

o Transferring hospitals with discharges assigned to DRG 385 (Neonates, Died or Transferred) or DRG 456 (burns, transferred to another acute care facility) have their payments calculated by the Pricer program on the same basis as those receiving the full prospective payment. They are eligible for both cost and day outliers.

o Nonparticipating hospitals furnishing emergency services are not affected by the legislation. They continue to be reimbursed upon their existing basis.

o VA hospitals are generally excluded from participation. Where payments are made for Medicare patients, the payments are determined in accordance with 38 U.S.C. 5053(d).

o Effective April 1, 1988, a Health Maintenance Organization (HMO) or a competitive medical plan (CMP) that receives Medicare payments on a risk basis, may no longer choose to have you make payment directly to the hospital. Hospitals and SNFs are required to accept as payment in full from HMO/CMPs the amount that would have been paid for the same services furnished to nonenrollees under Medicare reimbursement principles. (See §3555 for determining payment jurisdiction.) This does not, however, release you from the requirements of processing HMO paid bills for TEFRA risk HMOs.

o A hospital that loses its urban area status as a result of the Executive Office of Mangement and Budget redesignation occurring after April 20, 1983 may qualify for special consideration by having its rural Federal rate phased-in over a 2 year period. The hospital will receive, in addition to its rural Federal rate in the first cost reporting period, two-thirds of the difference between its rural Federal rate and the urban Federal rate that would have been paid had it retained its urban status. In the second reporting period, one-third of the difference is applied. The adjustment is applied for two successive cost reporting periods beginning with the cost reporting period in which HCFA recognizes the reclassification.

o The payment per discharge under the PPS for hospitals in Puerto Rico is the sum of:

— 75 percent of the Puerto Rico discharge weighted urban or rural standardized rate.

— 25 percent of the national discharge weighted standardized rate.

(The special treatment of referral centers and sole community hospitals does not apply to prospective payment hospitals in Puerto Rico.)

o There are special criteria that facilities must meet in order to obtain approval for payment for heart transplants and special processing procedures for these bills. (See §3613.) Facilities that wish to obtain coverage of heart transplants for their Medicare patients must submit an application and documentation showing their initial and ongoing compliance with the criteria. For facilities which are approved, Medicare covers under Part A all medically reasonable and necessary inpatient services.

C. DRG Classification.— The DRGs are a patient classification system which provides a means of relating type of patients a hospital treats (i.e., its case mix) to the costs incurred by the hospital. Payment for inpatient hospital services is made on the basis of a rate per discharge that varies according to the DRG to which a beneficiary's stay is assigned. All inpatient transfer/discharge bills from both PPS and non-PPS facilities, including those from waiver States, long-term care facilities, and excluded units are classified by the Grouper software program (see §3656.2) into one of 475 diagnosis related groups.

1. DRG No. 468.—Represents a discharge with possibly valid data but the surgical procedure is unrelated to the principal diagnosis. This DRG has a weight assigned and is paid. However, PROs will review all DRG 468 cases.

2. DRG No. 469.—Represents a discharge with a valid diagnosis in the principal diagnosis field, but one not acceptable as a principal diagnosis. Examples include diabetes mellitus or an infection of the genitourinary tract during pregnancy, both unspecified as to episode of care. The diagnoses may be valid, but they are not sufficient to determine the principal diagnosis for DRG assignment purposes. Return the claim to have the provider enter the correct principal diagnosis for proper DRG assignment.

3. DRG No. 470.—Represents discharges with invalid data. Return the claim for correction of data elements affecting proper DRG assignment.

When the bills are processed in conjunction with the MCE (see §3656.1) coding inconsistencies in the information and data are identified.

Where the MCE is run on-line or as a front-end process, inconsistencies are identified before the bills are processed through the Grouper. Corrections before Grouper eliminate inconsistencies that generate DRGs 469 and 470.

D. Physician Attestation.—The attestation requirement consists of two distinct parts: the certification statement which appears in each patient's medical record, and the annual penalty notice which must be achknowledged in writing by the hospital's physicians.

The certification statement in the medical record requires the attending physician shortly before, at, or shortly after, discharge (but before the claim is submitted), to attest in writing to the narrative descriptions of the principal diagnosis, secondary diagnoses, and the major procedures performed.

The signed acknowledgement that the physician has received the notice containing the penalty statement is kept on file at the hospital and verified by the PRO. The hospital is required to:

- o Obtain a signed acknowledgement for this penalty notice from the physicians. Acknowledgements must be dated within the year prior to the submission of the claim.
- o Renew this signed acknowledgement each year.

Where the PRO determines that claims are to be denied because the signed acknowledgements were either not on file, were not current, or the medical records had not been certified, initiate recovery against the hospital for all bills that you paid under the assumption that the certifications and acknowledgements were on file. Written notification will be supplied by your RO for the method and time frames associated with each recovery.

3610.1 Charges to Beneficiaries by PPS Hospitals.--A beneficiary's liability for payment is governed by the waiver of liability notification rules in §3440.1 where the admission is found not to be reasonable and necessary and no payment may be made for the stay under waiver of liability. A hospital receiving payment for a covered hospital stay (or one that includes at least one covered day, or one treated as covered under guarantee of payment or waiver of liability) may charge the beneficiary for items and services furnished during the stay only as described in subsections A through H.

A. Deductible and Coinsurance.—The hospital may charge for your applicable deductible and coinsurance amounts. The deductible is satisfied only by charges for covered services. Deduct the deductible and coinsurance amounts from your payment. Where the deductible exceeds the payment amount, apply the excess to a subsequent payment to the provider.

B. Blood Deductible.—The Part A blood deductible provision applies and reporting of the number of pints is applicable to both PPS and non-PPS hospitals.

C. Inpatient Hospital Care No Longer Required.—The hospital may charge for services which are not reasonable and necessary or which constitute custodial care, furnished on or after the third day following the date of the notification discussed after the second bullet when the following requirements are met:

o The hospital (acting directly or through its URC) determined that the beneficiary no longer required inpatient hospital care. (For this purpose, a beneficiary is considered to require inpatient hospital care if he needed a SNF level of care but an SNF-level bed was unavailble.)

o The attending physician agreed with the hospital's determination in writing, i.e., by issuing a written discharge order. If the hospital believed that the beneficiary did not require inpatient hospital care but is unable to obtain the physician's agreement, it requested an immediate review by the PRO. Concurrence by the PRO to the hospital's determination serves in lieu of the physician's agreement.

o Prior to charging for the noncovered period the hospital (acting directly or through the URC) notified the beneficiary (or person acting on his behalf) in writing that:

— In its opinion and with the concurrence of the attending physician (or of the PRO), the beneficiary no longer requires inpatient hospital care; or

— Customary charges will be made for continued hospital care beginning with the third day following the date of the notice.

o The beneficiary may request that the PRO make a formal determination on the validity of the hospital's finding if the beneficiary remains in the hospital after he/she becomes liable for charges. If the beneficiary wants an immediate review by the PRO, he/she must request it within 3 days of receiving the hospital's notice;

- The determination of the PRO may be appealed if it is unfavorable to the beneficiary in any way; and

- To the extent that a finding is made that the beneficiary required continued hospital care beyond the point indicated by the hospital, the charges for the continued care will be invalidated and any money paid by the beneficiary, or on his behalf, refunded.

The manner in which the hospital gives the notice to the beneficiary is in §3440.

If a hospital furnishing covered inpatient hospital services is able to determine in advance that the beneficiary will not require inpatient hospital care as of a certain date, it may give the notice in advance of that date, but ordinarily no earlier than 3 days before that date. If a hospital determines, however, that a beneficiary needs (or by the third day thereafter, will need) only a SNF-level of care but a SNF bed is not or will not be available, it may notify the beneficiary (or his representative) that he will be subject to charges beginning with the third day after the date of the notice that the SNF bed becomes available.

The beneficiary has the same right to appeal the PRO's determination that he no longer required inpatient hospital care as of a certain date as applies to PRO determinations regarding medical necessity. The hospital also has the right to appeal a PRO's determination which is unfavorable to the beneficiary.

When the hospital appeals in such cases the following entries are required on the bill:

- Occurrence code 31 (and date) to indicate the date the hospital notified the patient in accordance with the first bullet above;

- Occurrence span code 76 (and dates) to indicate the period of noncovered care for which it is charging the beneficiary;

- Occurrence span code 77 (and dates) to indicate the period of noncovered care for which the provider is liable, when it is aware of this prior to billing; and

- Value code 31 (and amount) to indicate the amount of charges it may bill the beneficiary for days for which inpatient care was no longer required. They are included as noncovered charges on the bill.

D. Change in the Beneficiary's Condition.--If the beneficiary remains in the hospital after receiving notice as described in subsection C, and the hospital, the physician who concurred in the hospital's determination, or the PRO, subsequently determines that the beneficiary again requires inpatient hospital care, the hospital may not charge the beneficiary or other person for services furnished after he again required inpatient hospital care until the conditions in subsection C. are again met. If a patient who needs only a SNF level of care remains in the hospital after the SNF bed becomes available, and the bed ceases to be available, the hospital may continue to charge the beneficiary. It need not provide the beneficiary with a subsequent notice when the patient chose not to be discharged to the SNF bed.

E. Admission Denied.—If the entire hospital admission is determined to be not reasonable or necessary:

- If the beneficiary was notified in writing prior to, or upon admission, the hospital may charge for the entire period of hospitalization.

- If the beneficiary was notified in writing on the day following the admission or subsequently, the hospital may charge the beneficiary for the hospitalization beginning with the day following the day the written notice was given. In this circumstance, the provider is liable for the period between admission and the day after the beneficiary was notified.

- The notice to the beneficiary must state:

  - The basis of the determination that inpatient hospital care is not necessary or reasonable (e.g., coverage exclusions);

  - That customary charges will be made for hospital care beginning with the day following the day on which the notice is given to either the beneficiary or to a representative on his behalf;

  - The beneficiary may request that the PRO make a formal determination on the validity of the hospital's finding if the beneficiary remains in the hospital. If the beneficiary wishes immediate PRO review, it must be requested within 3 days of receiving the hospital's notice;

  - The determination of the PRO may be appealed by the beneficiary if it is unfavorable to the beneficiary in any way. The hospital also has the right to appeal a PRO's decision; and

  - If a finding is made that the beneficiary required the hospitalization, the charges for the hospital stay will be invalidated, and money paid by the beneficiary or on his behalf will be refunded.

In such cases the following entries are required on the bill:

- Occurrence code 31 (and date) to indicate the date the hospital notified the beneficiary.

- Occurrence span code 76 (and dates) to indicate the period of noncovered care for which the hospital is charging the beneficiary.

- Occurrence span code 77 (and dates) to indicate any period of noncovered care for which the provider is liable (e.g., the period between issuing the notice and the time it may charge the beneficiary) when the provider is aware of this prior to billing.

- Value code 31 (and amount) to indicate the amount of charges the hospital may bill the beneficiary for hospitalization which was not necessary or reasonable. They are included as noncovered charges on the bill.

F. Procedures, Studies and Courses of Treatment That Are Not Reasonable or Necessary.--If diagnostic procedures, studies, therapeutic studies and courses of treatment are excluded from coverage as not reasonable and necessary (even though the beneficiary requires inpatient hospital care) the hospital may charge the beneficiary or other person for the services or care under the following circumstances:

o If the beneficiary was notified in writing prior to receipt of the care or services that the hospital may charge for the excluded care or services; and

o The notice to the beneficiary must state:

— The basis of the determination that inpatient hospital care is not necessary or reasonable (i.e., coverage exclusions);

— The determination is the hospital's opinion. (If the hospital obtained concurrance from you or the PRO this may be stated);

— Customary charges will be made if he receives the services;

— The beneficiary may request you, or the PRO when medical necessity is involved, make a formal determination on the validity of the hospital's finding if the beneficiary receives the items or services. If the beneficiary wants immediate PRO review, he/she must request it within 3 days of receiving the hospital's notice;

— Your determination, or the PRO's where a medical necessity determination is involved, may be appealed by the beneficiary if unfavorable to the beneficiary in any way. The hospital also has the right to appeal your or the PRO's decision; and

— The charges for the services will be invalidated and refunded if they are found to be covered.

The hospital may consult with you (on coverage exclusions) or the PRO (on medical necessity determinations) prior to issuing the notice to the beneficiary.

The following bill entries apply to these circumstances:

o Occurrence code 32 (and date) to indicate the date the hospital provided the notice to the beneficiary.

o Value code 31 (and amount) to indicate the amount of such charges to be billed to the beneficiary. They are included as noncovered charges on the bill.

G. Nonentitlement Days and Days after Benefits Exhausted.--If a hospital stay exceeds the day outlier threshold, the hospital may charge for some, or all, of the days on which the patient is not entitled to Medicare Part A, or after the Part A benefits are exhausted (i.e., the hospital may charge its customary charges for services furnished on those days). The hospital may charge the beneficiary the lesser of:

- o The number of days on which the patient was not entitled to benefits or after benefits were exhausted; or
- o The number of outlier days.

If the number of outlier days exceeds the number of days on which the patient was not entitled to benefits or after benefits were exhausted, the hospital may charge the beneficiary for all days on which the patient was not entitled to benefits or after benefits were exhausted. If the number of days on which the beneficiary was not entitled to benefits, or after benefits were exhausted, exceeds the number of outlier days, the hospital determines the days for which it may charge by starting with the last day of the stay (i.e., the day before the day of discharge) and identifying and counting off in reverse order, days on which the patient was not entitled to benefits or after the benefits were exhausted, until that number equals the number of outlier days. The days counted off are the days for which the hospital may charge.

H. Services Excluded from Coverage for Reasons Other than Absence of Medical Necessity, Provision of Custodial Care, Nonentitlement to Part A, or Exhaustion of Benefits.--In addition to receiving the basic prospective and day outlier payment, the hospital may charge the beneficiary for any services that are excluded from coverage for reasons other than, or in addition to, absence of medical necessity, provision of custodial care, nonentitlement to Part A, or exhaustion of benefits. For example, the hospital may charge for most cosmetic and dental surgery.

I. Private Room Care.--Payment for a medically necessary private room is included in the prospective payment. Where the beneficiary requests private room accommodations, the hospital must inform the beneficiary of the additional charge. (See §3101.1.)

J. Deluxe Item or Service.--Where a beneficiary requests a "deluxe" item or service, i.e., an item or service which is more expensive than is medically required for the beneficiary's condition after the hospital informs him of the additional charge, the hospital may collect the additonal charge. That charge is the difference between the customary charge for the item or service most commonly furnished by the hospital to private pay patients with the beneficiary's condition, and the charge for the more expensive item or service requested by the beneficiary. If the beneficiary believes that the more expensive item or service was medically necessary, he has a right to a determination and may file an appeal.

3610.2 Payment for Ancillary Services.--Part A payments include ancillary services for inpatient stays. However, this does not apply where the beneficiary is not entitled, benefits are exhausted prior to admission, or the admission is denied without waiver. The hospital may bill covered ancillary services under Part B.

3610.3 Outpatient Services Treated As Inpatient Services.--When an individual is furnished outpatient hospital services and is thereafter admitted as an inpatient of the same hospital before midnight of the next day, the outpatient hospital services furnished him are treated as inpatient services unless the patient does not have Part A coverage. The day on which the patient is formally admitted as an inpatient is counted as the first inpatient day.

Where this provision applies, services provided are included in the applicable DRG and not billed separately. See §3670 for requirements for duplicate checking in such cases.

3610.4 Admission Prior to and Discharge After PPS Implementation Date.--Two bills are needed on claims involving beneficiaries admitted before the implementation of DRG and discharged on, or after, the effective date of payment under DRG. During the period that a hospital becomes subject to PPS, some patients will have been admitted in the prior cost reporting period and discharged in the subsequent PPS period. Reduce prospective payments for these patients for the cost of the stay occurring in the prior period. Make the adjustment by subtracting from the prospective payment the hospital's interim reimbursement (before any deduction for deductible or coinsurance) for the inpatient operating costs applicable to the days in the prior period. Adjust the interim reimbursement applicable to the prior period to exclude estimated costs related to capital and direct medical education, kidney acquisition costs, and for bad debts for uncollectible deductible and coinsurance. Make an estimate if necessary.

For hospitals previously receiving interim reimbursement on the basis of an average cost per diem or under PIP, determine and remove a per diem amount for the excluded costs for that period from the interim payments before reducing the prospective payment amount applicable to the discharge in the subsequent period under PPS. Similarly, for hospitals which received a percentage of billed charges, remove the portion of the percentage applicable to the excluded cost items. Apply the net percentage to the charges billed in the prior period (cutoff bill). Subtract the resulting amount from the DRG payment applicable to the discharge in the subsequent period.

In paying transition claims, reimbursement must not exceed the higher of what would have been paid under the DRG including the outlier adjustment or any earlier cost payment. Do not reduce the final amount to less than zero. No further adjustments are appropriate.

The interim payments used to reduce the prospective payment amounts fairly repesent the inpatient operating costs incurred, and fair reimburement for the portion of the stay occcurring in the prior period. The adjustment is final and not subject to further modification. On bills covering two cost reporting periods:

- Each bill includes charges and covered days that apply to the period covered.

- The cutoff bill for the cost period is completed per §3604.

- The DRG bill contains principal diagnosis and surgical procedures for the entire stay.

- The DRG bill shows the admission date but the period covered begins with the first day of the new accounting year.

- Where discharge is on the first day of the new accounting year, a DRG bill is still due. Some payment may be due the provider, and the open admission must be closed on HCFA's records. There are no accommodation charges on the day of discharge; ancillary charges for the day of discharge are reported on the prior bill.

- Coinsurance days and related amounts are applied separately to each bill, i.e., the proper deduction for coinsurance days reported on the second bill is taken from that bill.

3610.5 Transfers Between Hospitals.--Where a patient is admitted to a hospital and is subsequently transferred to another for additional treatments once the patient's condition has stablized or a diagnosis established, the following procedures apply. See §3656.3 for proper Pricer coding to assure that these requirements are met.

A. Transfers Between PPS Hospitals.--Since the final discharging hospital generally provides the greater portion of the patient's treatment, pay it at the full prospective payment rate. Pay the transferring hospital based upon a per diem rate (i.e., the prospective payment rate divided by the average length of stay for the specific DRG into which the case falls) and the patient's length of stay at the transferring hospital. If less than 1 day, pay for 1 day. Count a day if the patient was admitted with the expectation of staying overnight. A per diem payment is appropriate. However, this day does not count against the patients' Medicare days (utilization days), since this Medicare day will be applied at the receiving hospital. Deductible or coinsurance, where applicable, is also charged against days at the receiving hospital. (See §3620, Item 6.) If the patient is treated in the emergency room without being admitted and then transferred, only Part B billing is appropriate.

The prospective payment rate paid to each hospital is the rate specific for that hospital. The rate is composed of the Federal portion and the hospital specific portion. Similarly, the wage indexes and any other adjustments are those which are appropriate for each. Where a transfer case results in treatment in the second hospital under a DRG different than the DRG in the transferring hospital, base payment to each hospital on the DRG under which the patient was treated. Outlier payments are payable based upon the admission and discharge dates. The transferring hospital may be paid a cost outlier payment but may not be paid a day outlier payment.

An exception to this policy applies to DRGs 385 and 456. The weighting factors for them assume that the patient will be transferred, since a transfer is part of the definition. Therefore, pay a hospital which transfers a patient classified into one of these DRGs the full amount of prospective payment associated with the DRG rather than the per diem rate, plus any outlier payment, if applicable.

B. Transfers to Hospital or Units Excluded from PPS.—When patients are transferred to hospitals or units excluded from prospective payment, make the full prospective payment to the transferring hospital. Pay the receiving hospital on the basis of reasonable costs.

Make a per diem payment to the transferring hospital when patients are transferred to hospitals that would ordinarily be paid under prospective payment, but are excluded because of special reimbursement rules (such as Maryland, New Jersey, and Rochester and Finger Lakes areas of New York). Also, make a per diem payment where a patient is transferred to a hospital or hospital unit that has not been officially determined as being excluded from PPS.

3610.6 Split Bills.—Under PPS, split billing is not needed for cost reporting purposes. For admissions prior to a provider's cost reporting year under PPS with a discharge after the beginning of the prospective payment year (see §3610.4). Split bills are not needed at the end of the government's FY or the calendar year as changes in DRG prices are determined by the date of discharge. However, it is necessary to show on the bill the coinsurance days in each calendar year for proper application of the coinsurance amount. Section 3604, value codes 09 and 11 describe how hospitals show this in locators 46-49.

PPS days on the cost report are allocated to the year of the discharge. Providers not on PPS continue to submit split bills at the end of their FYs and allocate the days to the provider year in which they occurred.

3610.7 Outliers.—In addition to the basic prospective payment rates, payments are made for discharges involving day and cost outliers. "Outliers" are cases which although classifiable into a specific DRG, have an unusually long length of stay or exceptionally high cost. Outlier payments may not be less than 5 percent nor more than 6 percent of total payments projected to be made based upon the prospective payment rates in any year.

Outliers are not applicable to non-PPS hospitals. The Pricer program (see §3656.3) makes all outlier determinations except for the medical review determination. Outliers are usually reviewed by the PRO on a post-payment sample basis. If the PRO determines the claim should be partially or completely denied, it will inform you. Prepare an adjustment bill. (See §3664.)

Where experience with a specific hospital indicates prepayment medical review on outlier bills would be appropriate, the PRO may require it to obtain medical review approval before payment of outliers. In such cases, pay for the outlier only where code "1" or "3" is reported in Item 87. You may suspend payment of the entire bill pending outlier review if appropriate for your system.

The PPS standardized amounts are reduced separately for hospitals located in urban and rural areas. The adjustments are based upon the estimated proportion of total DRG payments attributable to outlier payments. Consequently, instead of a uniform percent reduction factor applying to all standardized amounts, the reduction varies, depending upon whether the hospital is classified as rural or urban.

Cost outlier payment must be requested by the hospital. Treat the absence of code 66 in Items 35-39 of the bill as a request by the hospital for any cost outlier payment due. Hospitals are allowed to request cost outlier payments when they submit bills. Cost outlier cases are subject to post-payment review.

A. Day Outliers.--The cutoff point for the day outlier for the following Federal FYs are:

- For FY 1988 the lesser of 18 days or 2.0 standardized deviations.

- For FY 86 and FY 87 the mean length of stay for the specific DRG, plus 17 days or 1.94 times the standard deviation, whichever is lower. The effective date was May 1, 1986.

- For FY 84 and 85 20 days or 1.94 times the standard deviation and 22 days or 1.94 times the standard deviation respectively. The FY 85 cut-off point remained in effect through April 30, 1986.

The Pricer program determines the cutoff points and outlier amounts. A table showing the specific cutoff point for each DRG is in the Pricer implementation guide.

The PRO determines whether the claim is medically necessary on a post-payment sample basis.

The outlier per diem payment is the hospital's Federal rate for the DRG divided by the geometric mean length of stay for the applicable DRG times 60 percent of the Federal rate percentage, i.e., 25, 50, 75, or 100 percent.

Day outlier status is based upon the total length of the stay and day outlier payment upon the number of covered days.

B. Cost Outliers.--A hospital may request you to determine an appropriate additional payment for inpatient hospital services where its charges for covered services furnished to the beneficiary, adjusted for cost:

- In FY 88, exceeded the greater of $14,000 or 2 times the Federal DRG rate adjusted for area wage differences.

- In FY 86 and FY 87, exceeded the greater of $13,500 or 2 times the Federal DRG rate adjusted for area wage differences.

The Emergency Extension Act of 1985 extended the FY 85 payment amounts beyond September 30, 1985. They remained in effect through April 30, 1986. The FY 1986 payment amounts were effective May 1, 1986.

- In FY 85, exceeded the greater of $13,000 or 2 times the Federal DRG rate adjusted for area wage differences.
- In FY 84, exceeded $12,000 or 1 1/2 times the adjusted Federal DRG weight.

Cost is deemed to be 66 percent of total covered charges (excluding any kidney acquisition charges) and adjusted to exclude an estimate of indirect teaching costs. Except as provided below, do not pay a cost outlier if the stay qualifies as a day outlier.

The PRO reviews the claim on a pre or post-payment sample basis.

The additional payment amount is the applicable Federal rate percentage times 60 percent of the difference between the hospital's cost for the discharge and the threshold criteria established for the applicable DRG.

Where both split billing (during the hospital's transition to PPS) and a cost outlier are involved, the hospital includes the charges from the cost based bill in the Remarks sections of the HCFA-1450 of the prospective payment (DRG) bill.

The transferring hospital may be paid a cost outlier but not a day outlier payment. In these cases only, a cost outlier may be paid regardless of the day outlier criteria.

C. Special Outlier Payments for Burn Cases.--Special payments are provided for outlier cases classified in DRGs relating to burns. The percentage factor to apply in determining outlier payments is 90 percent. Thus, burn cases which stay beyond the appropriate day outlier threshold receive 90 percent of the applicable per diem for each outlier day. Cost outliers in burn DRGs receive 90 percent of the cost of care above the cost outlier threshold. This reimbursement level applies to discharges occurring during the period April 1, 1988 through September 30, 1990.

The six DRGs relating specifically to burn cases are:

DRG	Name
456.................	Burns, transferred to another acute care facility
457.................	Extensive burns w/o O.R. procedure
458.................	Nonextensive burns with skin graft
459.................	Nonextensive burns with wound debridement or other O.R. procedure
460.................	Nonextensive burns w/o O.R. procedure
472.................	Extensive burns with O.R. procedure

D. Adjustments Where the PRO Denies Days or Cost.--Where a PRO's decision changes previously processed bills, prepare and process an adjustment bill in accordance with §3664.

E. Pricer Coding for Outlier Cases.--Follow these guidelines for using the Pricer program to determine outlier status and payment amount.

- If the Pricer return code is 59 (day outlier met), send the case back to Pricer with review code 01. This will pay the day outlier.

- If the return code is 63 (cost outlier met), determine if condition code 66 is present. In its absence, the hospital is requesting cost outlier payment. Send the case back to Pricer with review code 02. This will pay the cost outlier. If condition code 66 is present, send the case back to Pricer with review code 04. This will pay the nonoutlier portion of the bill.

Send transfer cases as code 03.

- If the return code is 63 (cost outlier met), determine if condition code 66 is present.

- If it is, send the case back to Pricer with review code 06. This will pay the per diem payment.

- If condition code 66 is absent, send the case back to Pricer with review code 05. This will pay the cost outlier.

3610.8 Adjustment Bills.—Under prospective payment (DRG), bill adjustments are required from hospitals where errors occur in diagnoses and procedure coding that change the DRG, or where the deductible or utilization are affected. Hospitals are allowed 60 days from the date of your payment notice to submit adjustment bills where diagnostic or procedure coding was in error. Adjustments reported by the PRO have no corresponding time limit. Adjust them automatically without requiring the hospital to submit an adjustment bill. However, if diagnostic and procedure coding errors have no effect upon the DRG, do not submit adjustment bills. (See S3816.1, A and B.)

Where reimbursement is handled through cost reporting and settlement processes, the provider accumulates a log for those items not requiring an adjustment bill. Maryland inpatient hospital providers also keep a log of late charges when the amount is under $500. They submit the log with their cost reports. After cost reports are filed, make a lump sum payment to cover these charges as shown on the summary log. The provider uses the summary log for late charges only under cost settlement (outpatient hospital), except in Maryland. (See S3816A.)

Maryland and cost providers are required to meet the 27-month timeframe for timely filing of claims, including late charges.

3610.9 Waiver of Liability.—Charges paid to the provider under waiver are considered covered charges by the PS&R system. Therefore, process such charges as covered charges on the bill. Similarly, process days related to charges paid under waiver as Medicare patient and utilization days. See SS3430 and 3630 for application of waiver of liability provisions.

3610.10 Effects of Guarantee of Payment.—Process days and charges paid under this provision as Medicare patient days and covered charges. However, do not charge utilization beyond the days remaining in the benefit period. See §3106C for guarantee of payment.

Also count guarantee of payment days as outlier days for determining day outlier status or payment amount.

3610.11 Remittance Advice to the Hospital.—Determine what additional data to include in the remittance advice to the hospital. As a minimum, include the DRG number and an indication of whether the bill was paid as an outlier. Where the hospital cannot determine the DRG before submitting the bill, you may use the remittance advice to identify potential outlier cases.

3610.12 Noncovered Admission Followed by Covered Level of Care.—Where a beneficiary receives noncovered care at admission, and is notified as such, but subsequently is furnished covered level of care during the same hospital stay, pay as if the admission occurred at the point that covered services were medically needed and rendered. This is applicable to PPS and non-PPS billings.

The following bill entries identify this situation:

o The admission date (not the deemed date) is in Items 15 and 22.

o Occurrence code "31" and the date the hospital provided notice to the beneficiary are in Items 28-32.

o Occurrence span code 76 indicates the noncovered span from admission date through the day before covered care started.

o Value code 31 is shown to indicate the amount which was charged the beneficiary for services if less than the covered level of care in Items 46-49.

o Charges related to noncovered services are shown as noncovered.

o The principal diagnosis shown is the diagnosis for the covered period of care.

o Only procedures performed during the covered level of care are shown.

If you have processed a no payment bill for the noncovered level of care, process a new, initial bill coded in UNIBILL as above.

3610.13 Billing for Alcohol and Drug Related Services.--

A. Alcohol and Drug Detoxification Characteristics.--Detoxification is the medically supervised process of facilitating the elimination of alcohol and other psychoactive drugs from patients in a manner which minimizes the risk of development of medical, surgical, or psychiatric complications of such drug use and withdrawal. Detoxification involves:

- Placement of the patient in a safe physical environment with appropriate staff to allow monitoring of physical and mental health status;

- The provision of supportive and symptomatic, medical, surgical, or psychiatric treatments; and

- Specific pharmacologic protocols necessary to minimize the risk of adverse medical or psychological complications of alcohol and other drug withdrawal in accordance with accepted standards of care.

B. Alcohol and Drug Rehabilitation Treatment Characteristics.--Rehabilitation treatment is a discrete, intensive, coordinated program to help patients:

- Recover from the recent effects of alcohol and other drugs;

- Understand the medical, social, and psychological aspects of alcohol and drug dependence, generally, and their dependence, specifically;

- Develop motivation to comply with individually determined treatment recommendations; and

- Develop necessary knowledge, attitudes, and skills to avoid or minimize risk of return to medically unnecessary use of alcohol or other psychoactive drugs.

Rehabilitation treatment includes identification and treatment of related and/or coexisting medical, surgical, and psychiatric problems when necessary and reasonable.

Rehabilitation treatment procedures include the following, which are provided in accordance with individualized assessment of a patient's medical, surgical, and psychological needs:

- Intense educational activities such as lectures, films, reading assignments, and discussion.

- Staff-supervised group therapy.

best copy available

- Individual medical and psychological procedures necessary for diagnosis or treatment of alcohol or drug dependence and its complications or coexisting disorders.

- Involvement of family and others in educational and other appropriate program activities where feasible. (This is intended to encourage involvement of the family in the educational and limited group therapy programs. It does not imply Medicare coverage of such participation.)

- Intensive discharge planning, including efforts to involve patients and family members in appropriate outpatient follow-up therapies with physicians, counselors, and other health care personnel specifically trained in alcohol, drug dependence, and its complications. In addition, efforts are made to involve appropriate patients and families in support groups such as Alcoholics Anonymous, ALANON, Narcotics Anonymous, etc., in their communities where appropriate. Where such efforts are deemed inappropriate, there is documentation of the rationale as to why.

C. Completion of Billing Form for Alcohol and Drug Related Services.--If an alcohol and drug related ICD-9-CM code listed in subsection D is listed as a principal diagnosis, the provider uses the following procedures to indicate whether rehabilitation or detoxification services were furnished.

- Rehabilitation services provided as treatment contain the ICD-9-CM diagnosis code, V57.89, as an additional diagnosis.

- Detoxification services provided as treatment contain the ICD-9-CM procedure code 94.25, as one of the procedures.

- If both rehabilitation and detoxification services were provided, both the V57.89 code as an additional diagnosis and the 94.25 code as one of the procedures are present.

- If neither detoxification nor rehabilitation services were provided to the patient, no additional coding is included.

If the additional code(s) is not present, the Grouper groups claims as if no rehabilitation or detoxification services were furnished.

D. PRINCIPAL DIAGNOSES THAT MUST BE ACCOMPANIED BY A SECONDARY DIAGNOSIS OR PROCEDURE CODE TO INDICATE REHAB. AND/OR DETOX.

3610.14 Repeat Admissions and Leave of Absence.--A patient who requries followup care or surgery may be discharged and readmitted or may be placed on a leave of absence.

Providers may place patients on a leave of absence when readmission is expected and the patient does not require a hospital level of care during the interim period. Examples include, but are not limited to, situations where surgery could not be scheduled immediately, a specific surgical team was not available, bilateral surgery was planned, or when further treatment is indicated following diagnostic tests but cannot begin immediately.

PROs review acute hospital admissions occurring within 7 days of discharge from an acute care hospital if both hospitals are in the PRO's area and if it appears that the two confinements could be related. Two separate payments would be made for these cases unless the PRO denies a readmission to the same hospital.

NOTE: PROs review and may deny the second admission to the same hospital no matter how many days have elapsed since the discharge from the same hospital.

Placing a patient on a leave of absence will not result in the two payments. Only one bill is prepared and one DRG payment is made. PROs do not consider leave of absence bills two admissions but may select such bills for review.

PPS providers submit one bill for covered days and days of leave when the patient is discharged. Non-PPS providers may submit an interim bill when a patient is placed on a leave of absence, with code 30, still patient in Item 21, Patient Status.

Providers bill for covered days with days of leave included in Item 24, Noncovered Days. Noncovered charges for leave of absence days (holding a bed) may be omitted from the bill or may be shown under revenue code 18x. Instruct providers which billing method to use. Even though the program may not be billed for days of leave, a provider may not charge a beneficiary for them.

An adjustment bill should be submitted (see S3816) where a patient:

o Is on leave of absence from a non-PPS provider;

o Was shown as "still patient" on an interim bill; and

o Has not returned within 60 days (14 days for a SNF) including the day leave began; or

o Has been admitted to another institution.

The day the patient left the facility is the date of discharge.

NOTE: Home health or outpatient services provided during a leave of absence do not affect the leave and no discharge bill is required unless the above events occurred.

3610.15 Additional Payment Amounts for Hospitals With Disproportionate Share of Low Income Patients.--Adjustments are made in the Federal portion of the DRG payment to achieve increased payments to hospitals serving a disproportionate share of low income patients. The additional payment equals the Federal portion of the DRG payment and outlier payments (but excluding any additional payments for the costs of indirect medical education) multiplied by an adjustment percentage.

If a hospital meets the disproportionate share hospital (DSH) definition as prescribed in the law, an additional payment is made for discharges occurring on or after May 1, 1986 and before October 1, 1989. The DSH adjustment is applied only to the Federal portion of the DRG payment (including the outlier payments). It is basically a year-end lump sum adjustment. Identify those hospitals that are eligible to receive the DSH adjustment and make interim payments subject to a year-end settlement based upon the hospital's actual DSH percentage for the cost reporting period. The DRG payment includes the interim DSH payment (but excludes the indirect teaching adjustment).

The DSH percentage is the sum of:

o The percentage of a hospital's total Medicare Part A patient days attributable to Medicare patients who are also SSI recipients (this percentage is supplied to you by HCFA). Since the SSI/Medicare percentages are determined by HCFA on a FY basis, hospitals will be afforded the option (for settlement purposes) of determining their SSI/Medicare percentage based upon data from their own cost reporting periods. A hospital that avails itself of this option must furnish to you, in a manner and format prescribed by HCFA, data on its Medicare patients for its cost reporting period. These data will be matched by SSA to determine those patients dually entitled to Medicare Part A and SSI for the hospital's cost reporting period.

o The percentage of the hospital's total patient days attributable to Medicaid patients. (Medicaid days and total days are available on the hospital's cost report.)

A hospital qualifies for a DSH adjustment if it has a DSH percentage:

-- At least 15 percent for an urban hospital with 100 or more beds;

-- At least 40 percent for an urban hospital with fewer than 100 beds;

-- At least 45 percent for a rural hospital; or

-- At least 15 percent, if the hospital is located in a rural area and has 500 or more beds. (Applicable for discharges occurring on or after October 1, 1986 and before October 1, 1989.)

For purposes of the DSH determination, the number of beds in a hospital is determined by counting the number of available bed days during the cost reporting period, excluding beds assigned to newborns, custodial care, and PPS excluded distinct part hospital units, and dividing that number by the number of days in the cost reporting period.

Hospitals which meet the DSH percentage criteria are entitled to adjustments to the Federal portion of their DRG payments (including the Federal portion of outlier payments) as follows:

o Urban hospitals with 100 or more beds and rural hospitals with 500 or more beds -- the lesser of 15 percent or the percentage determined using the following formula:

(DSH % - 15)(.5) + 2.5

EXAMPLE: a. Hospital A is an urban hospital with 200 beds and has a DSH percentage of 21 percent. Its DSH payment factor is computed:

(21 - 15)(.5) + 2.5 = 5.5%
DSH adjustment factor = 5.5% (.0550)

b. Hospital B is an urban hospital with 250 beds and has a DSH percentage of 45 percent. Its DSH payment adjustment factor is computed:

(45 - 15)(.5) + 2.5 = 17.5%
DSH adjustment factor = 15% (.1500) (the maximum adjustment under the law).

2. Urban hospitals with fewer than 100 beds -- 5 percent.

3. Rural hospitals -- 4 percent.

Compute the amount of the DSH adjustment by multiplying the Federal portion of the hospital's DRG revenues by the appropriate DSH adjustment factor.

EXAMPLE: Hospital A's DSH payment adjustment factor is 5.5 percent (or .0550). The Federal portion of its DRG revenues (including appropriate outlier payments, but excluding any payments for indirect medical education costs) equals $100,000.

Federal DRG revenues x DSH adjustment factor = DSH adjustment amount
$100,000 x .055 = $5,500

Accumulate a record in your PS&R of the DSH amount paid, the Federal portion of the DRG and any outlier amount for all hospitals for discharges to use at cost settlement.

DSH Exception

The law also contains a provision whereby a hospital can qualify for a DSH adjustment of 15 percent if it meets the following criteria:

o It is located in an urban area and has 100 or more beds.

o It demonstrates that during its cost reporting period, more than 30 percent of its total inpatient care revenues is derived from State and local government payments for indigent care furnished to patients not covered by Medicare or Medicaid.

The following are some types of care that are not to be included by the hospital as indigent care:

o Free care furnished to satisfy the hospital's Hill-Burton obligation.

o Free care or care furnished at reduced rates to its employees or by a government hospital to any category of public employees.

o Funds furnished to the hospital to cover general operating deficits.

NOTE: The adjustment is a year-end adjustment for which hospitals have to apply annually. The adjustment is not automatic from year to year once an initial approval is granted.

Documentation should include the complete audited financial statements along with the accompanying notes. The hospital should also provide detailed schedules related to State and local revenue appropriations as well as outlining their purpose. Unless the appropriations are specifically earmarked for indigent patient care, assume that a portion of these funds was intended to cover the costs of other uncompensated care such as bad debts for nonindigent patients, free care to employees, etc., as well as to cover general operating deficits. In order to determine the portions, calculate the percentage of charity care included in all uncompensated care. Apply this percentage to the appropriated funds. The resulting figure is the amount appropriated for charity care.

Require adequate documentation supporting amounts claimed as indigent patient care. This includes a copy of hospital procedures for determining indigency, steps to verify a patient's financial information, and methods used to distinguish bad debts from indigency.

Intermediary Review

It is your responsibility to review the documentation submitted in support of the provider's request for a disproportionate share adjustment under §412.106(b)(2) of the regulations. This review can be accomplished in conjunction with the audit/settlement of the cost report for the period subject to the adjustment. At a minimum, perform the following steps:

- o Verify total inpatient revenues;
- o Verify that State and local government appropriations on the financial statements are consistent with amounts contained in governmental appropriations bills;
- o Review, on the basis of a sample of cases, the provider's implementation of procedures for identifying indigent patients. Ensure that amounts for "indigent" patients do not include charges associated with:
  - Titles XIX and XVII patient care;
  - Hill-Burton care;
  - Free care to employees; and
  - Bad debts for patients who are not indigent.

3610.16 Rural Referral Centers (RRCs).--The law provides for exceptions and adjustments to the standardized prospective payment amounts to take into account the special needs of RRCs. The adjustment allowed for approved RRCs is that they are paid based upon the urban, rather than rural, prospective payment rates as adjusted by the applicable DRG weighting factor and the rural area index.

The rates in Pricer include a reduction in the adjusted standardized amounts for all hospitals to ensure that total PPS payment neither increase nor decrease as a result of the increase in payments to RRCs.

A hospital can qualify as a RRC by meeting two mandatory criteria (i.e., case-mix index and number of discharges) and at least one of three optional criteria (speciality composition of medical staff, source of inpatient, or volume of referrals), in addition to beding located in a rural area.

The two mandatory criteria for designation as a RRC are:

- o The case-mix index for each region is equal to the median case-mix index for urban hospitals in each census region (excluding hospitals with approved teaching programs).
- o The national number of discharges criterion is at least 5,000 discharges per year, or if fewer, the median number of discharges for urban hospitals in the census region is which the hospital is located.

The revised regional case-mix criteria and the median number of discharges for a hospital based upon its discharges subject to prospective payment occurring during Federal FY 1988 are:

Region	Case Mix (Federal FY 1986)	Median Discharges (Hospital Fiscal Year Beginning During Federal FY 1986)
1..............	1.1261	7,385
2..............	1.1021	8,192
3..............	1.1355	6,611
4..............	1.1224	8,171
5..............	1.0912	5,456
6..............	1.1450	5,879
7..............	1.1442	4,706
8..............	1.1733	6,948
9..............	1.1737	4,742

To qualify for the RRC adjustment for FY 1988, a hospital's case-mix index for Federal FY 1986 must have been at least equal to the above appropriate regional value or the national value of 1.1572. In addition, the hospital must have met the appropriate national or regional discharge criterion for its cost reporting period beginning during Federal FY 1986.

Hospitals classified as RRCs as of October 21, 1986 retain that status through the end of their cost reporting periods beginning before October 1, 1989.

3612. KIDNEY TRANSPLANT - GENERAL

A major treatment for patients with ESRD is kidney transplantation. This involves removing a kidney, usually from a living relative of the patient or from an unrelated person who has died, and surgically placing the kidney into the patient. After the beneficiary receives a kidney transplant, Medicare reimburses the transplant (implanting) hospital for the transplant and appropriate standard acquisition charges. Special provisions apply to payment.

A transplant hospital may acquire cadaver kidneys by:

- Excising kidneys from cadavers in its own hospital;
- Having its kidney procurement team excise kidneys from cadavers in other hospitals;
- Arrangements with participating community hospitals, whether they excise kidneys on a regular or irregular basis;
- Arrangements with a kidney procurement organization which services the transplant hospital as a member of a network; and
- Arrangements with a free-standing kidney procurement organization which provides cadaver kidneys to any transplant hospital.

When the transplant hospital also excises the cadaver kidney, the cost of the procedure is included in its kidney acquisition costs and is considered in arriving at its standard cadaver kidney acquisition charge. When the transplant hospital excises a kidney to provide another hospital, it may use its standard cadaver kidney acquisition charge or its standard detailed departmental charges to bill that hospital.

When the excising hospital is not a transplant hospital, it bills its customary charges for services used in excising the cadaver kidney to the transplant hospital or organ procurement agency.

When the provider excising the kidney is a community hospital that does not participate in the Medicare program, its charges for the kidney are subject to screens of $1,200 (provider cost) and $400 (physicians' services). Organs may be accepted from a nonparticepating hospital only if they cannot be obtained from any other source.

If the transplanting hospital's organ procurement team excises the cadaver kidney at another hospital, the cost of operating such a team is included in the transplanting hospital's kidney acquisition costs, along with the reasonable charges billed by the other hospital of its services.

3612.1 The Standard Kidney Acquisition Charge.--There are two basic standard charges which must be developed by transplant hospitals from costs expected to be incurred in the acquisition of kidneys:

- The standard charge for acquiring a live donor kidney; and
- The standard charge for acquiring a cadaver kidney.

The standard charge is not a charge representing the acquisition cost of a specific kidney; rather, it is a charge which reflects the average cost associated with each type of kidney acquisition.

3612.2 Billing for Kidney Transplant and Acquisition Services.--The HCFA-1450 is completed in accordance with §3604 for the beneficiary who receives a kidney transplant. Applicable standard kidney acquisition charges are identified separately in item 51 by revenue code 811 (Living Donor Kidney Acquisition) or 812 (Cadaver Donor Kidney Acquisition). Where interim bills are submitted, the standard acquisition charge appears on the billing form for the period during which the transplant took place. This charge is in addition to the hospital's charges for services rendered directly to the Medicare recipient.

Deduct kidney acquisition charges for PPS hospitals for processing through Pricer. These costs incurred by approved kidney transplant hospitals, are not included in the prospective payment DRG 302 (kidney transplant). They are reimbursed on a reasonable cost basis. Interim payment is paid as a "pass through" item. (See Provider Reimbursement Manual, Part 1 §2802, B.8.) Include kidney acquisition charges under the appropriate revenue code in UNIBILL.

3612.3 Charges for Kidney Acquisition Services.--Applicable services (see §§3179-3179.19) are billed from the excising hospital to the transplant (implant) hospital). A billing form is not submitted from the excising hospital to you. The transplant hospital keeps an itemized statement that identifies the services rendered, the charges, the person receiving the service (donor/recipient), and whether this is a potential transplant donor or recipient. These charges are reflected in the transplant hospital's kidney acquisition cost center and are used in determining the hospital's standard charge for acquiring a live donor's kidney or a cadaver's kidney. The standard charge is not a charge representing the acquisition cost of a specific kidney; rather, it is a charge which reflects the average cost associated with each type of kidney acquisition. Also, it is an all inclusive charge for all services required in acquisition of a kidney, i.e., tissue typing, post-operative evaluation, etc.

3612.4 Notifying Carriers.--To inform carriers when immunosuppressive drugs are reimbursable, make an extra copy of the Medicare Benefit Notice that gives the date of discharge for kidney transplants. Send the copy to the carrier specializing in immunosuppressive drug reimbursement.

- If the beneficiary lives west of the Mississippi or in Minnesota send the copy to:

- TransAmerica Occidental
  Life Insurance Company
  Medicare Immuno Drug Claims
  P.O. Box 60848 Terminal Annex
  Los Angeles, Ca 90060

o If the beneficiary lives east of the Mississippi, excluding Minnesota, send the copy to:	o Blue Cross and Blue Shield of South Carolina Medicare Immunosuppressive Drug Unit Pen Claims P.O. Box 102401 Columbia, SC 29224

See §3718.1 for the message about immunosuppressive drug reimbursement to include in the notice.

3613. HEART TRANSPLANTS

A. Background.--On April 6, 1987, HCFA Ruling 87-1, "Criteria for Medicare Coverage of Heart Transplants" was published in the *Federal Register*. For Medicare coverage purposes, heart transplants are medically reasonable and necessary when performed in facilities that meet certain criteria. Facilities that wish to obtain coverage for their Medicare patients submit an application and documentation showing their initial and ongoing compliance with each criterion.

The facility mails the application to the address below in a manner which provides it with documentation that it was received, e.g., return receipt requested.

Administrator
Health Care Financing Administration
c/o Office of Executive Operations
Room 777 East High Rise
6325 Security Blvd.
Baltimore, MD 21207

If you have any questions concerning the effective or approval dates of your hospitals, contact your RO.

B. Artificial Hearts and Related Devices.--An artificial heart can be used either as a permanent replacement for a human heart or as a temporary life-support system (bridge to transplant) until a human heart becomes available. Ventricular assist devices also are used as temporary support systems. Charges for artificial heart ventricular assist devices and related services are reported as noncovered. (See §65-15 of the Coverage Issues Manual.)

C. Drugs.--Effective January 1, 1987, Medicare covers immunosuppressive drugs up to 1 year following a covered transplant. (See §3660.8.)

D. Noncovered Transplants.--Medicare does not cover transplants or retransplants in facilities which have not been approved as meeting the facility criteria. If a beneficiary is admitted for and receives a heart transplant from a facility that is not approved, neither physicians services nor inpatient services associated with the transplantation procedure are covered.

When a beneficiary has received a heart transplant from a hospital (which has not been approved as meeting the facility criteria) and later requires medical and hospital services as a result of the noncovered transplant, the services are covered when they are reasonable and necessary in all other respects.

E. Bill Review Procedures.—Take the following actions to process heart transplant bills. You may accomplish them manually or you may modify your MCE and Grouper interface programs to handle the processing.

F. Change MCE Interface.—The MCE creates an exception for procedure code 375 (heart transplant). Where this procedure code is identified by MCE, check the provider number to determine if the provider is an approved transplant center. Check the effective approval date. If payment is appropriate (i.e., the center is approved and the service is on or after the approval date) override the noncovered OR procedure edit.

G. Grouper.—If the discharge is October 1, 1987 or later, process the bill through Grouper and Pricer. If the discharge is before October 1, 1987, Pricer does not have the proper DRG weight. Assign a weight of 14.9944 and process to payment. Use a 51 day outlier threshold for discharges before October 1, 1987.

H. Handling Heart Transplant Billings From Nonapproved Hospitals.—Where a heart transplant and covered services are provided by a nonapproved hospital, the bill data processed through Grouper and Pricer must exclude transplant procedure codes and related charges. (See §3656.1.)

I. Effective Dates.—Coverage is effective for discharges no earlier than October 17, 1986 for facilities which applied by July 6, 1987.

HCFA informs the hospital of the effective date in the approval letter. You will receive a copy.

J. Approved Heart Transplant Facilities.—The facilities listed below have been approved as Medicare heart transplant facilities. The effective date for each is shown. If you have any questions, contact your RO.

List of Approved Medicare Heart Transplant Centers

Name & Address	Effective Date
Medical College of Virginia 11th and Marshall Sts. Richmond, VA 23298	October 17, 1986
Stanford University, University Hospital Stanford University Medical Center Stanford, CA 94305	October 17, 1986

University of Minnesota Hospital and Clinic 420 Delaware Street, S.E. Minneapolis, MN 55455	October 17, 1986
University Medical Center at the Arizona Health Sciences Center 1501 N. Campbell Av. Tuscon, AZ 85724	October 17, 1986
The Johns Hopkins Hospital 600 N. Wolfe St. Baltimore, MD 21205	October 17, 1986
Foster G. McGaw Hospital Loyola University Medical Center 2160 South First Av. Maywood, IL 60163	October 17, 1986 (revised date)
Methodist Hospital/Baylor College of Medicine The Methodist Hospital System 6535 Fannin, M.S. 101 Houston, TX 77030	October 17, 1986
Methodist Hospital of Indiana 1701 North Street Blvd. Indianapolis, IN 46202	October 17, 1986
Presbyterian University Hospital Desoto at O'Hara Sts. Pittsburgh, PA 15213	October 17, 1986
Washington University (Barnes Hospital) 4949 Barnes Hospital Plaza St. Louis, MO 63110	September 16, 1987
St. Louis University Hospital 3556 Caroline St. St. Louis, MO 63104	October 17, 1986
University Hospital University of Utah 50 North Medical Dr. Salt Lake City, UT 84132	October 17, 1986

Temple University Hospital Broad and Ontario Sts. Philadelphia, PA 19140	January 1, 1987
Pacific Presbyterian Medical Center 2333 Buchanan St. San Francisco, CA 94115	July 15, 1987
Brigham & Women's Hospital 75 Francis St. Boston, MA 02115	June 20, 1987
University Hospital University of Alabama Birmingham University Station Birmingham, Al 35294	October 17, 1986
St. Luke's Episcopal Hospital (Texas Heart Institute) P.O. Box 20269 Houston, TX 77225-0269	October 17, 1986
Jewish Hospital 217 East Chestnut St. Louisville, KY 40202-1886	April 7, 1988
The Cleveland Clinic Foundation 9500 Euclid Av. Cleveland, OH 44106	June 13, 1988
The Oregon Health Sciences University 3181 S.W. Sam Jackson Park Rd. Portland, OR 97201	June 15, 1988
Henry Ford Hospital 2799 West Grand Blvd. Detroit, MI 48202-2689	August 2, 1988
Latter Day Saints Hospital Eighth Ave and C St. Salt Lake City, UT 84143	April 14, 1988
Tampa General Hospital Davis Island P.O. Box 1289 Tampa, FL 33601	August 19, 1988

3613.1 Notifying Carriers.—To inform carriers when immunosuppressive drugs are reimbursable, make an extra copy of the Medicare Benefit Notice that gives the date of discharge for heart transplants. Send the copy to the appropriate carrier shown in §3612.4.

3618. PAYMENTS OF NONPHYSICIAN SERVICES HOSPITALS OBTAIN FOR HOSPITAL INPATIENTS

A. Services Included in PPS Payment.--The following medical items, supplies, and services furnished to hospital inpatients are covered as hospital services under Part A. Consequently, they are covered by the prospective payment rate or reimbursed as reasonable costs under Part A for hospitals excluded from prospective payment.

- Laboratory services (excluding anatomic pathology services);
- Pacemakers and other prosthetic devices including lenses, and artificial limbs, knees, and hips;
- Radiology services, including computed tomography (CT) scans furnished to inpatients by a physician's office, other hospital or radiology clinic; and
- Total parenteral nutrition (TPN) services.
- Transportation including transportation by ambulance to and from another hospital or freestanding facility to receive specialized diagnostic or therapeutic services not available at the facility where the patient is an inpatient. Hospitals include the cost of these services in the appropriate ancillary service cost center, i.e., in the cost of the diagnostic or therapeutic service. They are not shown separately under revenue code 540.

Exceptions

- Pneumococcal Vaccine

  Pneumococcal vaccine is payable under Part B only and is billed by the hospital on the HCFA-1450.

- Ambulance Service Other Than That Described in §3660.1

  For purposes of this section "hospital inpatient" means a beneficiary who has been formally admitted. It does not include a beneficiary who is in the process of being transferred from one hospital to another. Where the patient is transferred from one hospital to another, and is admitted as an inpatient to the second, the ambulance service is payable only under Part B. If transportation is by a hospital owned and operated ambulance, the hospital bills separately on form HCFA-1450. Similarly, if the hospital arranges for transportation with an ambulance operator, including paying the ambulance operator, it bills separately. However, if the hospital does not assume any financial responsibility, the billing is to the carrier by the ambulance operator or beneficiary, as appropriate.

- Anesthetist Services "Incident to" Physician Services

  If a physician's practice was to employ anesthetists and to bill on a reasonable charge basis for these services and that practice was in effect as of the last day of a hospital's most recent 12 month cost reporting period ending before September 30, 1983, the physician may continue that practice through cost reporting periods beginning October 1, 1984. However, if the physician chooses to continue this practice, the hospital may not add the costs of the anesthetists' service to its base period costs for purposes of determining the hospital specific portion of its transition payment rates.

- Part B Inpatient Services

  Where Part A benefits are not payable, payment may be made to the hospital under Part B for certain medical and other health services.

Carriers are responsible for ensuring that they do not pay for nonphysician services provided to hospital inpatients. This requires coordination and data exchange between you and carriers. Send the carrier a duplicate of the PROBILL record that you furnish the PRO. (See §3770.1.) Furnish the carrier a record file with the same frequency with which you furnish the PROBILL file to the PRO. The carrier will process this in accordance with §3672.

B. Exception/Waiver.—The provisions of "A" above may be waived until cost reporting periods beginning on or after October 1, 1986, if the criteria contained in §2804 of the Provider Reimbursement Manual (HCFA Pub. 15-1) are met. Hospitals that believe they qualify for a waiver apply to the RO through you. Under prospective payment, approved waivers require you to deduct the Part B reasonable charges for services furnished by the outside suppliers from payments made to a PPS hospital.

C. Waiver is Approved for PPS Hospitals.—Carriers will notify you of claim payments so that an appropriate adjustment can be made to the Part A reimbursement. They provide the following information:

- Beneficiary's HICN
- Name
- Sex
- Hospital Provider Number
- Supplier ID Number
- Type and dates of service
- Amount allowed before application of deductible and coinsurance

Work out the specific format with the carriers. Use the information they provide to deduct the appropriate payment amount from a future payment to the hospital. It is not necessary to adjust the individual DRG payment, whether already made or not. However, make such deductions within 30 days of receipt of the carrier's notification. If the hospital contests the deduction, determine whether the deduction is appropriate, and if not, inform the carrier to recover its overpayment and to educate the supplier.

3620. DETERMINING COVERED/NONCOVERED DAYS AND CHARGES

Whether a day or charge is recorded as covered or noncovered is important because:

- o Beneficiary utilization is recorded based upon days during which the patient received hospital or SNF accommodations from the program, including days paid by Medicare and days for which a provider was held liable.

- o The provider may claim credit on its cost report only for covered accommodations days and charges for which actual payment is made (i.e., provider liable days and charges are not included). Data from the bill payment process is used in preparing the cost report.

- o The number of days and charges provided to the Pricer program affects the day and cost outlier determination.

It is possible on a single bill to use a different number of days for each of the above purposes.

The provider enters on the bill the number of days it thinks are claimable as Medicare patient days on the cost report. Verify the accuracy and adjust the days if you determine fewer days are claimable (e.g., as a result of review by you or the PRO).

You must also determine the proper number of days to charge utilization to the beneficiary and the proper number of days for the length of stay used by Pricer.

The following factors affect the calculation of days for cost report, utilization record, and Pricer.

1. Admission Date Prior to Entitlement.—Do not count the days before entitlement for any of the cost report, utilization or Pricer.

2. Benefits Exhausted Pricer to Outlier Threshhold.—Count the days up to benefits exhausted for all three purposes. Do not count any days after benefits exhausted.

3. Provider Liable Days.—Charge utilization but do not count as cost report Medicare patient days or for Pricer.

4. Guarantee of Payment Days.—Do not charge utilization (there is no coverage left), but count for Medicare patient days and Pricer.

5. Day of Admission.—Count the day of admission for all three purposes.

6. Days of Discharge, Death, or Beginning a Leave of Absence.—Do not count this day for utilization, the cost report, or Pricer unless the admission and discharge are on the same day. In that case count it for all three purposes, unless the patient's

discharge status is 02 (transfer to another short-term hospital) or 03 (transfer to an SNF). If the discharge status is 02 or 03, no utilization day is taken. The receiving facility will take both the utilization day and any applicable deductible or coinsurance. If the patient is admitted with the expectation that he will remain overnight but is discharged, dies, or is transferred to a nonparticipating provider or nonparticipating distinct part of the same provider (discharge status 05) before midnight, the day counts as a utilization day, cost report day, and Pricer day.

7. Primary Payer Makes Partial Payment.--Where the primary payer paid part but not all of the bill count the days for the cost report and Pricer but see §§3679-3689 for instructions on calculating utilization. Where the primary payers paid the entire bill do not count the days for any of utilization, cost report, or Pricer.

3622. SPELL OF ILLNESS

Make spell of illness determinations in accordance with §3035, and these special instructions.

A. Beginning a Spell of Illness in a Nonparticipating Provider.—The noncovered services furnished by a nonparticipating provider can begin a spell of illness only if the provider is a qualified provider. A qualified provider is a hospital (including a psychiatric hospital) or a SNF which meets all requirement in the definition of such an instruction even though it may not be participating. (See §§3010, 3015, 3016, 3020, and 3035. For beginning a spell of illness for purposes of qualifying for posthospital home health benefits, see §3121.1A.)

It is most unlikely that a nonparticepating hospital which is not accredited by JCAH, or a nonparticipating SNF would satisfy the conditions of participation, particularly with regard to utilization review. Therefore, for spell of illness purposes, assume that nonparticipating providers are not "qualified providers" in the absence of evidence to the contrary. Situations which might constitute such contrary evidence include cases where the provider recently dropped out of the program, or after a survey by the State agency, decided not to participate even though the conditions of participation were met. Hospitals accredited by JCAH are deemed to meet all requirements except utilization review. For such a hospital, determine through the RO whether it has a utilization review plan in effect.

B. Continuing a Spell of Illness.—For purposes of continuing a spell of illness the hospital or SNF in which the stay occurs need not meet all requirements that are necessary for starting a spell of illness. (See §3035C.) An inpatient stay in a facility or part of a facility that is certified solely as an ICF, or licensed by the State solely at, or below, an ICF level of care, does not continue a spell of illness. If there has been a stay in an institution which might continue the spell of illness, and you cannot ascertain its status, contact the RO which maintains a list of all medical facilities and their status.

When adjudicating claims from hospitals and SNFs located in Maine, Massachusetts, New Hampshire, Rhode Island, Connecticut, Vermont, New York, New Jersey, Puerto Rico, the Virgin Islands, Delaware, Pennsylvania, Kentucky, Michigan, Ohio, and Tennessee for which a determination, either initial or a reconsideration, is made on or after January 1, 1985, the special definition of "inpatient" described in §3035.B.2 must be met to extend a spell of illness. This special rule also applies to determinations received by the beneficiary, or the beneficiary's representative, on or after August 7, 1982, for claims from hospitals and SNFs in Maine, New Hampshire, Vermont, Massachusetts, Connecticut, and Rhode Island. If the applicable skilled level of care standards were not met during a prior SNF stay after application of the presumptions outlined in §3035, the prior SNF stay does not continue a spell of illness.

NOTE: When reviewing cases where a prior SNF stay could affect spell of illness status, a proper sequence of consideration is:

- o Determine if the inpatient stay was in a facility or part of a facility certified solely as an ICF or licensed solely at, or below, an ICF level of care.

- o If the facility is determined to be a SNF, the spell of illness is continued with current utilization available to the beneficiary.

- o If the facility is determined to be an ICF, the spell of illness is not continued. A new spell of illness will restore full utilization and impose a cash deductible.

Only intermediaries adjudicating SNF or hospital claims from 16 jurisdictions, i.e., Maine, Massachusetts, New Hampshire, Rhode Island, Connecticut, Vermont, New York, New Jersey, Puerto Rico, the Virgin Islands, Delaware, Pennsylvania, Kentucky, Michigan, Ohio, and Tennessee, apply the special prior stay SNF inpatient rules to determine if the applicable skilled level of care standards for determining the definition of "inpatient," is met.

Application of the special rule and presumptions regarding SNF "inpatient" status is based strictly on the location of the SNF or hospital whose Medicare inpatient claims is being adjudicated (i.e., it applies to claims from SNFs and hospitals in the 16 jurisdictions). Application of the rule is not determined by the location of the SNF where any prior stay occurred.

Use the seven presumptions, and the instructions for their application, outlined in S3035 to determine whether the skilled level of care standards were met during a prior SNF stay. Apply the presumptions in sequence, i.e., if presumption 1 is applicable do not consider the others. If presumption 1 is not applicable, consider presumption 2, etc.

Some of the presumptions require a knowledge of Medicaid's claims processing involvement with the prior SNF claim. Use current bill data, accompanying documentation, bill history files, and telephone contacts with the prior stay facility and/or the Medicaid agency to develop the Medicaid aspects. Do not continue Medicaid development beyond a telephone contact. Conclude your consideration of the presumption at this point based upon the Medicaid information available.

- o If the applicable skilled level of care standards were met during a prior SNF stay, the spell of illness is continued with current utilization available to the beneficiary.

- o If the applicable skilled level of care standards were not met during a prior SNF stay, the spell of illness is not continued. A new spell of illness restores full utilization and imposes a cash deductible.

- o Presumptions 1 through 4 cannot be rebutted by the beneficiary while presumptions 5 through 7 can. Where the presumptions are rebuttable (i.e., (5) through (7)), rebuttal showings are permitted at your level and at the reconsideration level. Evaluate rebuttal documentation even if the presumption being rebutted was triggered by a Medicare denial. (See S3035.)

- o Presumptions 5 through 7 require you to send a special spell of illness notice to the beneficiary. Forms HCFA-1954 and HCFA-1955 are designated for some of the required notices. See SS3722.1 and 3722.12. The EOMB form or a special form may be used for other notices displayed in S3719.1C.

If necessary, use the new benefit period initializer code (used for Kron cases) to begin a new benefit period. See §3880.2, position 62. Do not submit dates of a noncovered stay if the stay does not begin or continue a spell of illness.

3624. PROCESSING NO-PAYMENT BILLS

A. General.—The benefit days available to a beneficiary depend upon the status of his utilization of services during the "spell of illness" and the lifetime reserve days described in §3106. Submission of bills by providers for all stays, including those for which no-payment can be made, is required to enable you and HCFA to maintain utilization records and determine remaining eligibility on subsequent claims.

Hospitals and SNFs prepare bills covering inpatient services in situations in subsection B in which no-payment can be made. Where payment may be made for part of the services, one bill is prepared covering payable and nonpayable days and services.

Do not permit providers to submit interim no-payment bills, unless they are submitted via EMC. (This avoids unnecessary data entry and processing expense.) Only one bill is needed for no-payment cases, regardless of the length-of-stay. It is submitted upon discharge or death.

See §3894.4 for counting no-payment bills on your workload report.

B. Nonpayment Codes.—Nonpayment codes are required in inpatient UNIBILL records for the hospital and SNF situations shown below where no-payment is made. (Outpatient bills and inpatient bills where partial payment is made do not require nonpayment codes.) These codes alert HCFA to bypass edits in UNIBILL processing that are not appropriate in nonpayment cases. Enter the appropriate code in location 1853 of the UNIBILL record if the no-payment situation applies to all services covered by the bill. Do not enter the nonpayment code if partial payment is made. Also, do not enter the nonpayment code when payment is made in full by an insurer primary to Medicare. When you identify such situations in your development or processing of the bill, adjust the bill data the provider submitted and prepare an appropriate UNIBILL record.

1. Benefits Exhausted Before "From" Date on Bill - Nonpayment Code B.—Benefits exhausted and either lifetime reserve days were also exhausted or the beneficiary elected not to use them.

2. Provider Liable Bills - Nonpayment Code R (All charges are shown as noncovered but utilization is charged.).—

- PRO denies admission and no-payment under waiver provisions is available (includes denials for no physician certification).
- You deny all SNF inpatient services.
- Time limitation for filing expired before billing and provider is at fault.
- Provider failed to submit needed information.
- Patient refused to request benefits.

3. Denials Without Provider Liability - Nonpayment Code N (neither utilization nor cost report days reported).

- o Services not covered under Part A (e.g., dental care, cosmetic surgery).
- o Time limitation for filing expired before billing and provider not at fault.
- o Waiver of liabilty decision finds beneficiary at fault.
- o Inpatient psychiatric reduction (150 days) used before admission. (See §3104.)
- o All services after active care ended in psychiatric (or tuberculoses) hospital.
- o All services after the date covered level of care ended (general hospital or SNF).
- o MSP cost avoidance denials. (See §3899.8.)

4. No Payment Situations Not Requiring Nonpayment Code.—

- o Payment cannot be made because deductible/coinsurance exceed the payment amount.
- o EGHP, LGHP, auto medical or no-fault insurance, WC (including BL), NIH, PHS, VA, other governmental entity or liability insurance paid for all covered services.
- o Services provided to HMO enrollee for which the HMO has jurisdiction for payment. Option code B or C in R trailer.

C. Intermediary Processing.—Providers complete all items on a no-payment bill in accordance with instructions for completing payment bills except that all charges may be summarized and reported as one revenue code (001). You must provide a complete UNIBILL record, indicating the appropriate number of utilization and cost report days to record. Charges on UNIBILL may be summarized under revenue code 001 (total and noncovered). Charge utilization for all days for which the beneficiary received program benefits, including days for which the provider is liable and days for which the HMO paid directly to the provider. Record cost report days for days which the provider may count as Medicare days in the cost report. Do not charge either utilization or cost report days where the beneficiary is liable. Enter the appropriate nonpayment code as described in subsection B.

If charges are covered by Medicare, they are carried on the cost report, but if the charges are not covered, they are not shown.

NOTE: Charges for services paid by risk HMOs are not included in the PS&R system. Therefore, charges are shown as covered to avoid edit exception.

3626. HOSPITAL BILLING FOR INPATIENT PART B AND OUTPATIENT SERVICES

3626.1 Inpatient Part B Services.—Participating hospitals use form HCFA-1450 to bill for the following services furnished directly or under arrangements to inpatients whose benefit days are exhausted or who are otherwise not entitled to have payment made under Part A. (See S3110.)

- o Diagnostic X-ray tests, diagnostic laboratory, and other diagnostic tests.
- o X-ray, radium, and radioactive isotope therapy, including materials and services of technicians. (See S3146.)
- o Surgical dressings, splints, casts, and other devices used for the reduction of fractures and dislocations. (See S3110.3.)
- o Prosthetic devices (other than dental) which replace all or part of an internal body organ (including contiguous tissue) or replace all or part of the functions of a permanently inoperative or malfunctioning internal body organ, including replacement or repair of such devices. (See S3110.5.)
- o Leg, arm, back, and neck braces, trusses, and artificial legs, arms, and eyes, including adjustments, repairs, and replacements required because of breakage, wear, loss, or change in the patient's physical condition. (See S3110.5.)
- o Outpatient physical therapy services furnished inpatients. (See SS3147ff.)
- o Outpatient speech pathology services furnished inpatients. (See SS3147ff.)
- o Outpatient occupational therapy services furnished inpatients. (See SS3147ff.)

Part B coverage for services furnished by a participating hospital to its inpatients is limited to the above items and services.

3626.2 Outpatient Services.—Section 3604 contains general instructions for review of form HCFA-1450. Hospitals use this form to bill for covered outpatient services (type of bill 13). (See S3112.1 for definition of outpatient.)

If the patient is admitted as an inpatient on the day he received outpatient services or before midnight of the following day, the services are considered part of the inpatient services.

Hospitals do not put charges for Part B services for separate cost accounting years on the same bill. Separate bills are prepared with each including charges for each year.

No bill is submitted if:

- o The patient is not enrolled under Part B;

- Only noncovered services were provided; or

- Payment in full was made by a primary payer. (See §§3679-3685 for a description of such payers and the exception that requires billing to credit the deductible in EGHPs.)

Deny any bills received in the above situations.

3626.3 Calculating the Part B Payment.--Under Part B, the patient is responsible for a cash deductible for covered services and a blood deductible for blood furnished in a calendar year. After the deductibles are met, the patient pays 20 percent (coinsurance) of the reasonable charges (e.g., billed charges) for covered services.

You must query your deductible met file and/or HCFA's central records to determine deductible status. (See §3500 for related procedures.)

To determine the coinsurance amount, exclude any charges for clinical diagnostic lab services and deduct the unmet deductible from the covered charges. Multiply the remainder by 20 percent. The result is the coinsurance applicable to the claim.

3626.4 Reporting Outpatient Surgery and Other Services.—

A. General.—Section 9343(g) of the Omnibus Budget Reconciliation Act of 1986 (OBRA), P.L. 99-509 requires that beginning July 1, 1987 (i.e., the "from date" on the bill), hospitals must report outpatient services provided to Medicare beneficiaries using HCPCS. HCFA developed HCPCS by using the American Medical Association's Current Procedural Terminology, 4th Edition (CPT-4) for physician services and adding HCFA developed codes for certain nonphysician services. All of the CPT-4 is contained within HCPCS.

Hospitals will use the CPT-4 portion of HCPCS to report significant outpatient surgical procedures (clinical diagnostic lab services had been and continue to be coded using HCPCS) and use revenue codes, with some expansion to three digit codes, for all other services.

One bill is required for all services provided on the day the procedure(s) is performed. (An exception is allowed for hospital bills that include preoperative services. That is, preoperative services provided prior to the day of surgery may be included on the same bill.)

B. Reporting Surgery.—

1. Definition of Surgery.—Hospitals are required to report HCPCS codes for all significant surgical procedures. Significant surgery is defined as incision, excision, amputation, introduction, repair, destruction, endoscopy, suture or manipulation. This is the current definition in the Intermediary and Hospital Manuals and is consistent with the Uniform Hospital Discharge Data Set. The codes for surgery are in the CPT-4 portion of HCPCS beginning with 10000 and ending at 69979. Hospitals will report procedures performed in this section except for specific out-of-scope procedures (e.g., venipuncture, catheter insertion, and physician global fee codes) listed in Addendum F.

Except for these out-of-scope procedures, hospitals use HCPCS codes for all surgical procedures performed on outpatients, including both ASC approved surgical procedures and other significant non-ASC surgical procedures. If out-of-scope procedures are reported, the OCE program and the ASC Pricer program will identify them and establish the correct bill type. Therefore, do not return bills with incorrect bill codes 83x or 13x because of these surgical procedures.

2. Type of Bill.—Hospitals use Form HCFA-1450 to bill for outpatient surgical and other procedures. Section 3604 contains general instructions for bill review. Report bill type 83x to the PS&R system for claims subject to the ASC payment limit. This bill type permits separate identification of revenue code charges for the PS&R when these surgical procedures are involved. The OCE program will tell you whether bill type 83x or 13x is applicable for the PS&R system. Therefore, it is not necessary for your claims processing, for the hospital to enter the correct bill type.

If the hospital reports 83x but not a designated procedure, develop to determine whether the type of bill is incorrect or a procedure code is missing.

3. Selecting and Reporting Procedure Codes.—Using medical records as basic sources, hospitals report HCPCS surgical procedure codes for outpatient surgery in Item 50 (to the right of the dotted line) adjacent to the revenue code for the operating room or other room used for the surgery. The bill includes the hospital's charges for the surgery as well as all other services provided on the day the procedure was performed.

Usually only one surgical procedure is entered on a bill. However, upon occasion, more than one outpatient surgical procedure might be rendered at the same session. In such cases, all significant surgical procedures are reported in Item 50. However, hospitals will not allocate charges among procedures. Only one charge for each room used to perform a procedure appears on the bill. When more than one procedure is reported, the accommodation revenue code is repeated as often as necessary. The revenue code for each procedure is repeated with "O" charges in Item 53 and with a HCPCS code in Item 50.

Install an edit in your system to require at least one HCPCS code when revenue code 36x (operating room) is billed unless diagnosis code V64.1, V64.2, or V64.3 is present indicating that the procedure was not carried out. Do not use the additional revenue codes listed in subsection C for this edit unless there are special SUBC instructions which require HCPCS codes with other revenue codes.

a. ASC Procedures.—Effective for hospital cost reporting periods beginning on or after October 1, 1987, reimbursement for the covered ambulatory surgical center procedures performed on an outpatient basis and identified in Addendum F is based in part on what the program would pay for the same surgical procedure if it were performed in an approved ASC. The aggregate payment for these surgical procedures is the lesser of:

o The amount that would be paid under the traditional Medicare reasonable cost/customary charge methodology for outpatient services; or

o An amount based on a blend of the hospital payment under reasonable cost/customary charge reimbursement methodology and the ASC payment. For cost reporting years beginning during FY 1988, the blend is 75 percent cost/customary charge payment and 25 percent ASC rate. For cost reporting years beginning FY 1989 (and subsequent years), the blend is 50 percent cost/customary charge payment and 50 percent ASC rate.

If any ASC covered procedure listed in Addendum F is performed, it must be reported to permit application of the new payment system.

When more than one significant procedure is performed in one operative session, the hospital reports all surgical procedures on the bill. The order in which procedures are reported is not material. The ASC Pricer program determines which procedures are covered by the ASC limits and arrays them in the proper order for calculating payment.

For cost reporting periods beginning on or after October 1, 1987, the payment amounts for ASC surgical procedures performed on an outpatient basis is based in part on the ASC rates (see subsection C). Maintain a rate file; determine the procedure price on a bill-by-bill basis; and when necessary, apply 100 percent of the rate to the most expensive ASC listed procedure and 50 percent of the rate for other ASC listed procedures.

The final payment for ASC surgical procedures is handled through the cost settlement process. Therefore, as bills are processed, the PS&R accumulates facility charges attributable to ASC procedures (by identifying the charges billed under certain revenue codes) and the ASC payment rate for each procedure, based upon the HCPCS code. Periodically review the payment data accumulated in the PS&R (see subsection E) and make any necessary adjustments to the outpatient interim rate to determine if the hospital's charges or costs are substantially higher than the ASC rate. This avoids program overpayment.

b. Special Payment Rate Extension for Eye and Eye and Ear Specialty Hospitals.—A hospital is allowed an extension of the blended payment of 75 percent of the Medicare reasonable cost/charge reimbursement amount and 25 percent ASC amount if it meets specific requirements. This extension is applicable for cost reporting periods beginning in Federal FYs 1989 and 1990 (i.e., hospital cost reporting periods beginning on or after October 1, 1988 and before October 1, 1990). The requirements are:

o The hospital specializes in eye, or eye and ear services to the extent that more than 50 percent of its total Medicare inpatient DRGs during the cost reporting period are DRGs 36 through 74;

o It receives more than 30 percent of its total revenues from outpatient services; and

o It met the criteria for an eye, or eye and ear specialty hospital on October 1, 1987.

The hospital must demonstrate to you that it meets these criteria based on its cost reporting period beginning on or after October 1, 1986 and ending before October 1, 1987. Advise the RO of any hospitals meeting the criteria.

For cost reporting periods beginning on or after October 1, 1990, the blended payment amount reverts to a 50 percent reasonable cost/charge reimbursement amount and a 50 percent ASC amount.

Apply the blended payment calculation during cost settlement. No changes are required in your claims processing operation, the ASC Pricer or the PS&R.

A hospital in a State receiving payment under a State reimbursement control system under §1814(b)(3) or 1886(c) of the Act uses inpatient data comparable to the DRG data cited above to demonstrate that it meets the requirements.

A hospital which believes it qualifies as an eye, or eye and ear, specialty hospital, but which is not subject to PPS, may meet the first criterion by demonstrating to you that more than 50 percent of its inpatient revenues are attributable to admissions pertaining to eye, or eye and ear, diagnoses.

In addition to meeting these requirements, the hospital must submit a written request to you as soon as possible before the beginning of its first cost reporting period beginning on or after October 1, 1988. After reviewing the request, notify the hospital of your decision.

c. Non-ASC Surgical Procedures.--HCPCS surgical codes are required for billing outpatient hospital surgical procedures that are not included in the ASC listing. Continue to use bill type 13x.

d. Unlisted Service or Procedure.--There may be services or procedures performed that are not found in HCPCS. These are typically services that are rarely provided, unusual, variable, or new. A number of specific code numbers have been designated for reporting unlisted procedures. When an unlisted procedure code is used, an operative report desciribing the service is submitted with the claim. Pertinent information includes a definition or description of the nature, extent, and need for the procedure and the time, effort, and equipment necessary to provide the service.

When you receive a claim with an unlisted procedure code, review it to verify that there is no existing code that adequately describes the procedure. If you determine that an adequately descriptive code is contained in codes 10000-69979 of the CPT-4 portion of HCPCS, advise the hospital of your determination and process the claim. If your review determines that no existing code is sufficiently descriptive, pay the claim and forward a copy and the operative report to CO for a code determination. When you receive a determination from CO, inform the hospital of the correct code for future reporting.

Health Care Financing Adminstration
Office of Program Operations Procedures, BPO
1-H-3 Meadows East Bldg.
6325 Security Blv.
Baltimore, MD 21207

NOTE: If the claim was submitted via EMC or identified after the bill has been processed, an operative report, the provider number, revenue codes, and charges are sufficient.

The "Unlisted Procedures" and accompaning codes for surgery are:

15999 Unlisted procedure, excision pressure ulcer
17999 Unlisted procedure, skin, mucous membrane and Subcutaneous tissue
19499 Unlisted procedure, breast
20999 Unlisted procedure, musculoskeletal system, general
21499 Unlisted orthopedic procedure, head
21899 Unlisted procedure, neck or thorax
22899 Unlisted procedure, spine
22999 Unlisted procedure, abdomen, musculoskeletal system
23929 Unlisted procedure, shoulder
24999 Unlisted procedure, humerus or elbow
25999 Unlisted procedure, forearm or wrist
26989 Unlisted procedure, hands or fingers
27299 Unlisted procedure, pelvis or hip joint
27599 Unlisted procedure, femur or knee
27899 Unlisted procedure, leg or ankle
28899 Unlisted procedure, foot or toes
29799 Unlisted procedure, casting or strapping
29909 Unlisted procedure, arthroscopy
30999 Unlisted procedure, nose
31299 Unlisted procedure, accessory sinuses
31599 Unlisted procedure, larynx
31899 Unlisted procedure, trachea, bronchi
32999 Unlisted procedure, lungs, and pleura
33999 Unlisted procedure, cardiac surgery
36299 Unlisted procedure, vascular injection
37799 Unlisted procedure, vascular surgery
38999 Unlisted procedure, hemic or lymphatic system
39499 Unlisted procedure, mediastinum
39599 Unlisted procedure, diaphragm
40799 Unlisted procedure, lips
40899 Unlisted procedure, vestibule of mouth
41599 Unlisted procedure, tongue, floor of mouth
41899 Unlisted procedure, dentoalveolar structures
42299 Unlisted procedure, palate, uvula
42699 Unlisted procedure, salivary glands or ducts
42999 Unlisted procedure, pharynx, adenoids, or tonsils
43499 Unlisted procedure, esophagus
43999 Unlisted procedure, stomach
44799 Unlisted procedure, intestine

44899 Unlisted procedure, Meckel's diverticulum and the mesentery
45999 Unlisted procedure, rectum
46999 Unlisted procedure, anus
47399 Unlisted procedure, liver
47999 Unlisted procedure, biliary tract
48999 Unlisted procedure, pancreas
49999 Unlisted procedure, abdomen, peritoneum, and omentum
53899 Unlisted procedure, urinary system
55899 Unlisted procedure, male genital system
58999 Unlisted procedure, female genital system nonobstetrical
59899 Unlisted procedure, maternity care and delivery
60699 Unlisted procedure, endocrine system
64999 Unlisted procedure, nervous system
66999 Unlisted procedure, anterior segment of eye
67299 Unlisted procedure, posterior segment
67399 Unlisted procedure, ocular muscle
67599 Unlisted procedure, orbit
67999 Unlisted procedure, eyelids
68399 Unlisted procedure, conjunctiva
68899 Unlisted procedure, lacrimal system
69399 Unlisted procedure, external ear
69799 Unlisted procedure, middle ear
69949 Unlisted procedure, inner ear
69979 Unlisted procedure, temporal bone, middle fossa approach

C. Determining ASC Payment Rate.—

1. Payment Categories.—Covered ASC surgical procedures (see Addendum F) are grouped into four categories for Medicare reimbursement purposes. Surgical procedures not included in Addendum F are not covered under these payment limitation provisions. Payment for facility services furnished on an outpatient basis by a hospital is based, in part, on the rates that would be paid for the facility services if the procedure had been performed by an approved ASC. This is accomplished through the cost settlement process. Procedures performed in an ASC are paid at one of four group rates, adjusted for the regional wage index. The current rates, published in the June 1, 1987 *Federal Register* are:

- Group 1..............$274
- Group 2..............$326
- Group 3..............$351
- Group 4..............$399

2. Services Included in Facility Cost.—The rate for ASC surgical procedures listed in Addendum F includes all facility services directly related to the procedure(s) that are provided on the day of surgery. In general, "facility services" include, but are not limited to nursing and technician services, use of the facility, drugs, biologicals, surgical dressings, splints, casts and equipment directly related to provision of the surgical procedure,

materials for anesthesia, administrative, recordkeeping and housekeeping items and services. Facility services do not include items and services such as physicians' services, laboratory, X-rays, or diagnostic procedures (other than those directly related to the performance of the surgical procedure), prosthetic devices, ambulance services, leg, arm, back, and leg braces, artificial limbs, and DME for use in the patient's home.

Separate payment is not made for the following services directly related to the surgery. Services reported under the following revenue codes (where surgery identified by Addendum F is reported) are subject to the ASC payment limitation.

a. The Use by the Patient of Hospital Facilities.--This includes operating and recovery rooms, patient preparation areas, waiting rooms, and other areas used by the patient or offered for use to the patient's relatives in connection with surgical procedures. It includes all services in connection with covered procedures furnished by nurses, technical personnel and others involved in patient care.

Whenever a surgical procedure is performed, one or more of the following revenue centers is used to reflect the charges for items and services provided in connection with the procedure:

- 25x Pharmacy
- 270 Medical/surgical supplies-devices (general)
- 272 Sterile supply
- 36x Operating Room Services;
- 37x Anesthesia
- 38x Blood
- 39x Blood storage and processing
- 45x Emergency Room;
- 49x Ambulatory Surgical Care;
- 51x Clinic;
- 52x Free-Standing Clinic;
- 70x Cast Room;
- 71x Recovery Room;
- 75x Gastro-Intestinal Services;
- 76x Treatment or Observation Room;
- 920 Other Diagnostic Services General;
- 929 Other Diagnostic Services, other (codes 921-925 are excluded and may be used to report nonfacility services);
- 940 Other Therapeutic Services, General; and
- 949 Other Therapeutic Services, other (codes 941-945 are excluded and may be used to report nonfacility services).

These revenue codes include diagnostic or therapeutic items and services furnished by the hospital staff in connection with a covered ASC surgical procedure. With respect to diagnostic tests, some providers perform simple tests just before surgery, primarily urinalysis and blood hemoglobin or hematocrit. To the extent that they are provided by the hospital on the day of surgery and the charges have been included in the operating room or comparable revenue center, they are included in the definition of outpatient hospital facility services.

b. Drugs, Biologicals, Surgical Dressings, Supplies, Splints, Casts, Appliances, and Equipment.--This includes all supplies and equipment commonly furnished by the ASC in connection with surgical procedures (see subsection D for certain exceptions). Drugs and biologicals are limited to those which cannot be self-administered. (See §3112.4.)

Medicare coverage for surgical dressings is limited to primary dressings, i.e., therapeutic and protective coverings applied directly to lesions on the skin or on openings to the skin required as the result of surgical procedures. Primary dressings are usually applied first by a physician. In the hospital outpatient setting, these dressings are included as facility services. Items such as Ace bandages, elastic stockings and support hose, Spence boots and other foot coverings, leotards, knee supports, surgical leggings, gauntlets and pressure garments for the arms and hands are generally used as secondary coverings and, are not subject to the ASC payment limitation. These items should be billed under a revenue code other than those listed in (a).

Other covered supplies, splints, and casts include only those furnished by the hospital at the time of the surgery. Additional covered supplies and materials furnished later are generally furnished as "incident to" a physician's service, not as a hospital service. The term supplies includes those required for both the patient and hospital personnel, i.e., gowns, masks, drapes, hoses, scalpels, etc., whether disposable or reusable.

The hospital revenue code for drugs is:

- o 25x Pharmacy

For hospitals that use the classification other than 0 - General classification, the following codes are included:

- o 251 Generic Drugs;
- o 252 Nongeneric Drugs;
- o 257 Nonprescription;
- o 258 IV Solutions;
- o 259 Other Pharmacy.

Because drugs and biologicals coverage is limited to those which cannot be self-administered, revenue code 253 is not included. Revenue code 256 is also excluded as experimental drugs are not covered.

In order to identify the supplies and equipment commonly furnished in connection with surgical procedures in a manner comparable to their identification for inclusion in the ASC facility services, it is necessary to code at the third digit level. If hospitals report items described in revenue codes 273-279 under 270, they may lower the hospital's total reimbursement by making these charges or applicable cost subject to the blended payment amount limitation. Therefore, hospitals are encouraged to report all services at the detail level.

The codes for supplies included in the ASC payment limitation are:

- o 270 Medical Surgical Supplies;
- o 272 Sterile Supply.

c. Blood, Blood Plasma, Platelets, Etc..—Revenue codes include:

- o 38x Blood;
- o 39x Blood Storage and Processing.

d. Materials for Anesthesia.—These include the anesthetic itself and any necessary materials, whether disposable or reusable. Covered ASC facility services do not include the services of a certified registered nurse anesthetist (CRNA). Separate identification of these services is not necessary as they can be determined at cost settlement.

The revenue code for anesthesia services is:

- o 37x Anesthesia

Hospitals that use the classification other than "0-General Classification," revenue code 379 is included in the definition of outpatient hospital facility services while revenue code "374-Acupunture" is not, since it is not covered by Medicare.

D. Services Not Included In the Definition of Outpatient Hospital Facility Services.-Revenue codes not described in subsection C are excluded from the ASC payment limitation because the services they describe are not facility services for purposes of establishing the ASC payment rates. A discussion of the most commonly used codes follows. Where these, or other services not described in subsection C are reported on a bill for services covered by the ASC payment limitation, the ASC Pricer program provides you data to accumulate separate transactions for the PS&R system. See §3656.4 for the ASC Pricer program.

The sale, lease or rental of DME to ASC patients for use in their homes is excluded from the covered ASC facility services payment. When the hospital supplies DME in connection with a covered procedure, the charges are excluded from the definition of outpatient hospital facility services. The code for DME is:

- o 29x Durable Medical Equipment

Some ASCs perform simple diagnostic tests just before surgery, primarily urinalysis and blood hemoglobin or hematocrit, which are generally included in their facility charges. These simple tests, included in the ASC's facility charges, are considered facility services.

However, in most cases, diagnostic tests performed directly by an ASC are not considered ASC facility charges. If hospitals are presently performing these simple tests just before surgery and not submitting separate charges under the laboratory revenue codes, that practice should continue. However, except for the limited number and type of diagnostic tests noted above, charges for laboratory services are excluded from the definition of outpatient hospital facility services. Clinical diagnostic laboratory services are paid under the lab fee schedule. The revenue codes for these services are:

- 30x Laboratory
- 31x Laboratory Pathological

If an ASC furnishes ambulance services, they are not included in the ASC facility payment. Therefore, they are not included in the definition of outpatient hospital facility services. The revenue code for ambulance services is:

- 54x Ambulance

Prosthetic devices, whether implanted, inserted, or otherwise applied by covered surgical procedures are covered, but are not included in the ASC facility payment amount. Therefore, they are not included in the definition of hospital outpatient facility services that are subject to the ASC payment limitation. If hospitals report items described in revenue codes 273-279 under 270, the effect maybe to lower the hospital's total reimbursement by making these charges subject to the ASC limitation. Therefore, hospitals are encouraged to report such services at the detail level. The revenue code for prosthetic devices is:

- 274 Prosthetic Devices

Leg, arm, back, and neck braces as well as artificial legs, arms, and eyes are not considered part of an ASC facility service and are not included in the ASC facility payment rate. Charges for these items or equipment are, therefore, not included in the definition of hospital outpatient facility services for calculating the ASC payment limitation. Note that all revenue codes in the series 27x are excluded except "272 -Sterile Supply" which is included. Code 270, if used, is assumed to be sterile supply and subject to the ASC payment limitation.

Other categories in 27x not included in the ASC payment limitation are:

- 273 Take Home Supplies;
- 274 Prosthetic Devices;
- 275 Pacemaker;
- 277 Oxygen - Take Home;
- 278 Other Implants; and
- 279 Other Devices.

NOTE: There is no 271.

Physician services furnished in connection with a covered procedure are not subject to the ASC payment limitation. Hospitals continue to bill for these services as they do now.

E. Payment Rates.—You will be provided an ASC Pricer program to calculate payment rates for ASC surgical procedures. (See §3656.4.) Install this program before the beginning of the cost reporting year for the first hospital(s) in your service area beginning on or after October 1, 1987. In calculating the appropriate rate, the adjustment program performs the following.

1. Adjustment of Payment Rates.—A wage index has been developed by HCFA and the BLS is used to adjust ASC payment rates. The same wage index is used to calculate the payment limitation for hospitals. (See §3656.4.)

The ASC Pricer program uses the following procedure for adjusting the National ASC payment rates:

o Locates the appropriate wage index number for each MSA in a State, and for rural areas in a State.

o Divides the rate into labor (one-third) and nonlabor (two thirds) components for each payment rate.

o Multiplies the labor component of the rate by the appropriate wage index number.

o Adds the adjusted labor component to the unadjusted nonlabor component.

The sum is the adjusted payment rate.

EXAMPLE: Adjustment of group 4 rate ($399) for an ASC located in Baltimore, MD. The appropriate index number is 1.1698.

Adjusted Rate = [($399 x 1/3) x 1.1698] + ($399 x 2/3)
= ($133 x 1.1698) + $266
= $155.58 + $266
= $421.58

2. Calculating ASC Limitation for Multiple Procedures.—Where a beneficiary has more than one ASC surgical procedure performed in the same operative session, special payment rules apply. The ASC Pricer program calculates the full rate for the procedure classified in the highest payment group when two or more ASC procedures are performed. Any other ASC procedures furnished in the same session are paid at 50 percent of their applicable rate. If the procedures are in the same group, the adjustment program calculates the payment at the full rate for one, and 50 percent of the rate for the other procedures.

EXAMPLE: A beneficiary receives a group 4 and a group 1 procedure in the same session. Total payment is calculated as follows:

Adjusted Rate for Group 4 = [($399 x 1/3) x 1.1698] + ($399 x 2/3)
= ($133 x 1.1698) + $266
= $155.58 + $266
= $421.58

Adjusted Rate for Group 1 = 1/2 x $274
= [($137 x 1/3) x 1.1698] + ($137 x 2/3)
= ($45.66 x 1.1698) + $91.32
= $53.41 + $91.32
= $144.73

Total Adjusted Payment For
Both Procedures = $421.58 + $144.73
= $566.31

With one exception, all covered ASC procedures listed in Addendum F are considered single procedures. Therefore, payment is made at the same rate, as an example, inguinal herniorrhaphy, without respect to whether the procedure is furnished unilaterally or bilaterally. Bilateral procedures requiring a separate incision that are performed at the same operative session are identified separately, using the appropriate five digit code. The use of modifier codes to identify bilateral procedures is not acceptable. The only exceptions to this rule are CPT-4 code 66983 (intracapsular cataract extraction with insertion of intruocular lens posthesis) and 66984 (extracapsular cataract removal with insertion of intracocular lens prosthesis). These codes are considered as two procedures. As such, payment is made at 150 percent of the applicable group 4 rate ($598.50 plus or minus local wage adjustment).

3. Handling Non-ASC Services.—

a. Procedures.—When all procedures on the bill are non-ASC procedures, the bill is exempt from the ASC payment limitation. Also, when there is a mix of ASC and non-ASC procedures, the bill is not subject to the ASC payment method.

NOTE: Procedures listed in Addendum F, i.e., out-of-scope procedures, do not remove a bill from the ASC limitation.

b. Revenue Codes.—Where revenue codes are included on the bill for services not included in the ASC facility services, the ASC Pricer program prepares separate transaction records for the PS&R. It accumulates ASC revenue code charges applicable to facility services and revenue code changes applicable to nonfacility services (i.e., medical and other health services) under different bill types. ASC facility services are accumulated under bill type 83x and nonfacility services under bill type 13x. See §3656.4 for a description of the ASC Pricer program.

Preparation of separate transactions occurs after your preparation of UNIBILL and does not affect the UNIBILL record.

F. Coinsurance and Deductibles.—Coinsurance and deductibles are applicable to ambulatory surgery services.

G. Reporting of Other Outpatient Services.—The UB-82 (HCFA-1450) revenue codes are used for the billing of significant procedures (other than surgery) and for other outpatient hospital services. No additional coding entries beyond the revenue codes is required.

H. Relationship of Lab Fee Schedules.—The fee schedule for clinical diagnostic lab services applies to bill type 13x, 14x, and 83x. (See §3628.) Lab services furnished in connection with surgery on the ASC list are not included in the ASC facility services. Hospitals continue to bill for lab services as now.

I. Editing Procedures Codes on Outpatient Bills.—Process all outpatient bills through the OCE. (See §3656.5.) Installation of the program is required by July 15 to process bills for services provided on or after July 1. Do not return bills prepayment for coding correction until October 1, 1987. In October, you may return bills based on any of your receipt date, your OCE run processing date, or the from date on the bill.

During July, August, and September 1987 prepare and distribute to each hospital a report describing its coding performance as reported by the OCE. Prepare the report no less frequently than monthly. Weekly is preferable. The first report is due August 10 for bills processed by OCE through July 31. Use the error condition codes in §3656.5, and furnish a copy of the edits description contained therein.

J. EMC Formats.—

1. Standard Tape Format.—Record type 61 is used to report outpatient services. Record type, sequence number, patient control number (if used), revenue code, HCPCS procedure code, units, charges, and noncovered charges are required. Modifiers and dates of service are not. The date of service will be determined from the "from" and "through" dates shown in record 20. Include other record types as appropriate.

2. Direct Data Entry.—You are responsible for determining where to locate the HCPCS procedure code on your data entry screen.

K. UNIBILL.—Report the surgical procedure codes in the financial data section (field 32-40). Include revenue code, HCPCS, revenue units, and covered charges in the record. Where more than one HCPCS procedure is applicable to a single revenue code, the hospital shows all ASC procedure charges and revenue code units on the first line and repeats the revenue code with zero charges and units as often as necessary to include each HCPCS code on a separate line. If the procedure is done more than once, it is listed once for each occurrence in the UNIBILL report as above. Use override code 4 in field 40 to by-pass HCFA edits requiring charges with revenue codes.

The ASC rate is not required in UNIBILL. The rate is determined after UNIBILL preparation.

L. Medical Review of Ambulatory Surgery.—Effective with PRO contracts entered into or renewed on or after January 1, 1987, PROs will be required to review some or all of the ambulatory surgical procedures provided in hospital outpatient departments (and ASCs). Plan now to furnish the PRO a UNIBILL record for outpatient surgery when review becomes operational. Include initial bills, adjustments, and RTI corrections. See §3770.1A for data required by the PRO and intermediary editing required. Attending physician and operating physician identification numbers are required data elements. Admission type, admission source, admitting diagnosis, and readmission indicators are not required for outpatient bills. All other data and edit requirements apply. Your outpatient medical review processes continue. However, instead of receiving ICD-9-CM codes and dates in Items 84-86, you will receive HCPCS codes without dates in column 50.

M. Relationship to Inpatient Services.—The rule for treating outpatient services furnished to an individual who is subsequently admitted to the same hospital as an inpatient before midnight of the next day as Part A inpatient services is unaffected. (See §3610.3.) These provisions are not applicable to payment under Part B for medical and other health services provided to hospital inpatients when Medicare Part A benefits are not payable. (See §3110.)

N. Excluded Hospitals.—The following hospitals and distinct part hospital units are not subject to the ASC payment limitation. However, they must comply with the coding and billing requirements described in subsection B.

- Hospitals participating in a HCFA approved demonstration project or State reimbursement control system applicable to outpatient services. Areas receiving this waiver are Maryland and Rochester, New York.

- Indian Health Service hospitals that qualify under §1880(a) of the Act.

3627. HCFA COMMON PROCEDURE CODING SYSTEM (HCPCS)

HCPCS is based upon the American Medical Association's (AMA) Physicians' Current Procedural Terminology, Fourth Edition (CPT-4). It includes three levels of codes and modifiers. There is an upward progression of codes from the lowest (local assignment) to the highest level (national assignment). HCFA monitors the system to ensure uniformity. Level I contains only the AMA's CPT-4 codes with the exception of anesthesiology services. This level consists of all numeric codes. The second level contains the codes for physician and nonphysician services which are not included in CPT-4, e.g., ambulance, DME, orthotics and prosthetics. These are alphanumeric codes maintained jointly by HCFA, the Blue Cross and Blue Shield Association and the Health Insurance Association of America.

The AMA updates and republishes CPT-4 annually and provides HCFA with a magnetic tape containing the updated data. HCFA updates the alphanumeric (Level II) portion of HCPCS and incorporates the updated AMA material to create the HCPCS file. The file is duplicated and distributed to Medicare contractors and State agencies in hardcopy and on magnetic tape using the format shown in Exhibit 2. The local codes are also alphanumeric, but are restricted to the series beginning with W, X, Y, and Z. To the extent that you have required providers to use Level II coding (e.g., HHAs for DME claims), furnish them copies of the codes and definitions, or refer them to the GPO for their purchase at:

U.S. Government Printing Office
Superintendent of Documents
Washington, D.C. 20402

For credit card order, call (202) 783-3232

Level III (local assignment) contains the codes for services needed by individual contractors or State agencies to process Medicare and Medicaid claims. They are used for items and services not having the frequency of use, geographic distribution or general applicability needed to justify a code assignment at a higher level.

Issuance of Level III codes is coordinated by the RO, which in turn notifies CO of the codes assigned. Part B carriers are the only Medicare contractors authorized to make Level III coding assignments. Medicaid State Agencies are authorized to assign Level III codes for items and services unique to their programs, i.e., no other third party payer makes reimbursement for these items.

Local codes needed by you and Medicaid State Agencies for items and services reimbursable by multiple third party payers are to be requested through the local Part B carrier. Carriers may establish reasonable criteria for code assignments, such as a minimum frequency of occurence of a service. It is not appropriate to request assignment of codes for items rarely furnished. The occasional service is correctly reported in a miscellaneous code (ending in "99") generally referred to as "not otherwise classified" (NOC). Use discretion in requesting assignment of local codes, remembering that there are finite numbers of codes available for local assignment, that once issued a number cannot be reused for a minimum of three years, and that all parties involved with the coding system have to maintain and update their systems to reflect current coding assignments. (See §3627.2.)

If the Part B carrier is not responsive to a request for Level III assignment, refer the matter to the HCPCS coordinator in the RO. Do not delay claims processing (except for laboratory claims) pending a local code assignment. Use the appropriate NOC code. See §3628H for special considerations involved in assignment of local codes for laboratory services. See §3626.4C. for action required in processing outpatient claims with unlisted procedure codes.

3627.1 Use and Maintenance of CPT-4 in HCPCS.--The text contains over six thousand service codes, and descriptors plus titles and modifiers and is copyrighted by the AMA. The AMA entered into an agreement with HCFA which states:

o The AMA permits HCFA, its agents, and other entities participating in programs administered by HCFA, to use CPT-4 codes and terminology in HCPCS;

o HCFA shall adopt and use CPT-4 in connection with HCPCS for reporting services under Medicare and Medicaid;

o HCFA agrees to include a statement in HCPCS that participants are authorized to use the copies of CPT-4 material in HCPCS only for purposes directly related to participating in HCFA programs and that permission for any other use must be obtained from the AMA;

o HCPCS shall be prepared in format(s) approved in writing by the AMA which include(s) appropriate notice(s) to indicate that CPT-4 is copyrighted material of the AMA;

o Both AMA and HCFA will encourage health insurance organizations to adopt CPT-4 for the reporting of services to achieve the widest possible acceptance of the system and the uniformity of services reporting consistent therewith; and

o The AMA recognizes that HCFA and other users of CPT-4 may not provide reimbursement under their programs for certain procedures identified in CPT-4. Accordingly, HCFA and other health insurance organizations may independently establish policies and procedures governing the manner in which the codes are used within their operations.

o The AMA Editorial panel has the sole responsibility to revise, update, or modify CPT-4 codes.

You may edit and abridge CPT-4 data within your claims processing area. You are not allowed to publish, edit, or abridge versions of CPT-4 for distribution outside of your claims processing structure. This would violate copyright laws. You may print the codes and approved narrative descriptions in newsletters that instruct providers in how and when to use certain codes when reporting services on claims forms, e.g., services subject to ASC limitation, out-of-scope services, need for documentation of services, handling of unusual circumstances, reporting new and changed codes. However, your newsletter must show "CPT-4 Copyright AMA" in close proximity to listed CPT codes and descriptors. You may also print the code and approved narrative description in development requests relating to individual cases.

3627.2 Addition, Deletion and Change of Local Codes.--When you determine that there is a service or procedure which appears to require a HCPCS Code, but does not have one, see §3628H, if it is a laboratory procedure and §3626.4 if it is a surgical procedure performed in the outpatient department of a hospital.

A suggested format for local code proposals is in Exhibit 1. If a local code is necessary:

o Identify the component making the request and its address, i.e., contractor name and number.

o Provide the descriptor or terminology to be used.

o Describe the reason the code assignment is requested e.g., received on claim, request from hospital. This provides background that helps HCFA in deciding whether or not a national code may be required.

o Describe any coverage, utilization, or reimbursement limits placed upon the service.

o Forward the material to the local carrier for review to determine whether the code duplicates an existing HCPCS code. If appropriate, the carrier proposes a local code assignment and forwards the material to the RO for review. Follow up in 15 days after your request, and send a copy to the RO.

If the proposed code is approved by the RO, it will forward the data to CO. If the RO disagrees with the local code assignment, it will resolve the issue with you and the local carrier. If the issue cannot be resolved, the code and appropriate supporting documentation are forwarded to CO for resolution. Necessary supporting documentation depends upon the situation and a matter of professional judgement. ROs may or may not specify standards.

3627.3 Use and Acceptance of HCPCS Codes.--Use the CPT-4 portion of HCPCS for ambulatory surgical procedures, and clinical diagnostic lab services. Also, use HCPCS alphanumeric codes for coding DME.

HCPCS is updated annually to reflect changes in the practice of medicine and provision of health care. HCFA provides a tape and/or transaction listing of the updated HCPCS codes, a computer system specifications chart, and a listing of changed and deleted codes 90 days in advance of the implementation of the annual update. Update your HCPCS file and map all new or deleted codes to appropriate reimbursement information no later than 3 months after receipt of the update.

3627.4 HCPCS Manuals.--Providers use the CPT-4 manual published by the AMA as a coding source. It is your responsibility to supply providers with HCFA's alpha-numeric codes and with your local codes.

Inform providers when the annually updated HCPCS becomes available and effective in your claims processing system.

3627.5 Fee Schedule and Diagnostic Lab and DME.--Fee schedules are established by carriers on a carrier-wide basis. The carrier furnishes you copies of fee schedules, national limitation amounts and HCPCS updates. The fee schedule amounts are adjusted periodically to reflect changes in the Consumer Price Index (CPI) for all urban consumers (U.S. city average).

There may be procedures for which hospitals bill outpatient lab services that are not included. Where gaps occur, the carrier is responsible for developing codes and prices. Work out procedures with the carrier to receive the missing information. If you are unable to do this, request assistance from the RO. Codes which are assigned to fill gaps are valid until replaced by permanent codes in an annual update.

Providers may bill for DME on the HCFA-1450. If coding is used to describe DME, only HCPCS alpnanumeric coding is acceptable.

3627.6 Public Relations.--Establish a knowledgeable person as a focal point for provider inquiries. This person must be able to address coding and reimbursement questions.

When codes change, are added or deleted, or when general problems arise, send appropriate bulletins to providers.

Providers obtain new volumes of CPT-4 annually at:

AMA, Order Department
Box 10946
Chicago, IL 60610-0946

Since local changes can occur throughout the year, continue your professional relations work to provide as much information as possible to providers.

3627.7 HCPCS Training.--A large number of changes to HCPCS may necessitate the training of provider personnel. If this is necessary, schedule the sessions in conjunction with the State medical records association or the State hospital association. In issuing the invitations, ensure that the people who complete the bills attend. In the training, emphasize the use of the new manuals and the proper completion of the claim forms.

Be alert to a provider having difficulty with HCPCS. Provide follow up training geared to the individual situation. Review and discuss specific billing problems over the phone or by mail. If a volume of problems develop with a specific provider, schedule a visit to provide the specific training needed. Training is your responsibility.

				630 Exfoliative Cytology 700 Physiological Testing 710 EKG Services 800 Radiobioassas 900 Procedures which may be performed by any certified independent laboratory.
FD-10 IC	X(1)	112	112	Individual Consideration TAG - A one position alpha field containing the following elements: R = Medicaid - suspend for medical review S = Medicare - suspend for medical review U = Medicare and Medicaid - suspend for medical review
FD-11 SP	X(1)	113	113	Speciality Procedures - A one position alpha code identifying procedures that can be performed by a physician or a provider limited to a certain speciality. The following elements are used: A = Procedure performed by a podiatrist or a chiropractor; B = Procedure that can be performed by a podiatrist or a dentist; C = Procedure that can be performed by a chiropractor; D = Procedure that can be performed by a dentist; E = Procedure that can be performed by a chiropractor, dentist or podiatrist; F = Procedure that can be performed by a chiropractor or a dentist;

FIELD NUMBER	FIELD TYPE	STARTING POSITION FIELD	ENDING POSITION FIELD	DESCRIPTION
				P = Procedure that can be performed by a podiatrist; or X = Procedure that can be performed by x-ray suppliers.
FD-12 RI	X(1)	114	114	Reimbursement Information - A code denoting the following elements: I = Drugs that can be given intravenously; P = Primary code for reimbursement purposes. Payment may be made under this code. The related secondary code is in Field 6. If there is more than one secondary code, the most frequently used one is in Field 6. Use the appropriate modifier when a secondary code is changed to a primary code. For reimbursement, Code P, Field 14 must contain a valid HCPCS code; R = Listed procedure reimbursed 100 percent by Medicare B; e.g., clinical laboratory services paid on a fee schedule basis, and certain surgical procedures performed in an independent ambulatory surgical center (ASC), or in a hospital affiliated ASC; S = Secondary code for reimbursement purposes. Payment for this procedure is made under the primary code shown

Exhibit 2(Cont.)

FIELD NUMBER	FIELD TYPE	STARTING POSITION FIELD	ENDING POSITION FIELD	DESCRIPTION
				in Field X-Ref 6. Use the appropriate modifier when a procedure is changed for reimbursement purposes. For reimbursement code S, Field X-Ref must contain a valid HCPCS code.
FD-13	X(5) 999V99	115	119	Relative Value Units - Decimal point is assumed between third and fourth positions. Values are considered guidelines and are not mandatory: - a five position code containing any of the following: BR - (BY REPORT) These procedures are too variable to permit the assignment of unit values. Documentation is required in order to justify reimbursement. RNE - (RELATIVITY NOT ESTABLISHED) These services are either too recently developed or infrequently performed for a determination of appropriate allowance. Documentation is required to justify reimbursement. BLANK - No relative values available.
FD-14 X-REF	X(25)	120	144	Cross Reference - Contains 5 groups of 5 positions, each identifies a crosswalk to an alpha-numeric or CPT-4 code to relate services previously or currently coded in HCPCS. For CPT, refer to Appendix B of the CPT-4 text.

FIELD NUMBER	FIELD TYPE	STARTING POSITION FIELD	ENDING POSITION FIELD	DESCRIPTION
FD-15 MCM	X(6)	145	150	Medicare Carriers Manual Reference - A six position numeric field; two position for chapter and four positions for section code.
FD-16 ANE VAL	X(3) (99V9)	151	153	Anesthesia Value - A three position numeric field containing anesthesia base values. A decimal point is assumed between the second and third position. Values are considered guidelines and are not mandatory.
FD-17 SLHA	X(1)	154	154	Sex/Life Procedure/History Procedure/Age - A one position field containing one of the following: 1 = Male only 2 = Female only 3 = Once in a lifetime procedure 4 = Once in a history procedure 5 = Aged (over 65 years of age) 6 = Male-once in lifetime or history procedure 7 = Female-once in lifetime or history procedures
FD-18SA	X(1)	155	155	Surgical Assist - A one position field. "Y" indicates procedures for which a surgical assistant may be reimbursed. Can be annotated by you.

Exhibit 2(Cont.)

FIELD NUMBER	FIELD TYPE	STARTING POSITION FIELD	ENDING POSITION FIELD	DESCRIPTION
FD-19 F/D	X(3)	156	158	Follow-up Days - a three position numeric field for global surgical procedures indicating the number of days for normal uncomplicated follow-up care that will be covered by the surgical procedure reimbursement. To be entered by the carrier.
FD-20 CNTS	X(4)	159	162	Control Statement - 4-digit number to footnote comments at the end of the alpha-numeric section.
FD-21 M/D	X(4)	163	166	Maintenance Date - Month and year an action is taken on the coding system, this is computer generated date.
FD-22 AC	X(1)	167	167	Action Code - the type of action taken on the coding system. Show the type of action - either A, C, D, E or I with any update of the code: A = Add C = Substantial Change D = Delete E = Editorial Change I = Under investigation. Code being reviewed for duplication and acceptance in national coding system. NOTE: A blank in this field indicates an original code. No maintenance activity.
FD-23	X(1)	168	168	BLANK

3628. CLINICAL DIAGNOSTIC LABORATORY SERVICES OTHER THAN TO INPATIENTS

Clinical diagnostic laboratory tests are paid on the basis of fee schedules.

Hospital laboratories billing for either outpatient or nonpatient claims bill you directly. Neither deductible nor coinsurance applies to either outpatient or nonpatient lab tests paid under the fee schedule. Verify eligibility for Part B using a Part B status query or a deductible met file.

A hospital outpatient is a person who has not been admitted as an inpatient but is registered on the hospital's records as an outpatient and receives services (rather than supplies alone). Where a tissue sample, blood sample, or specimen is taken by personnel who are not employed by the hospital and is sent to the hospital for tests, the tests are nonpatient hospital services since the patient does not directly receive services from the hospital. Where the hospital uses the category "day patient," i.e., an individual who receives services during the day and is not expected to be lodged in the hospital at midnight, the individual is classified as an outpatient.

Individual laboratory tests are identified using the HCFA HCPCS codes and terminology.

A. Fee Schedules.—The fee schedules were established by the Medicare carriers on a carrier wide basis (not to exceed a statewide basis) and furnished to you.

COBRA requires national limitation amounts to be applied to payments for clinical diagnostic laboratory services. Effective for services on or after April 1, 1988, a national limitation amount of 100 percent of the median of all the fee schedules for each clinical lab procedure (HCPCS code) is established. Separate limitation amounts are set for the 60 and 62 percent fee schedules.

- Prior to April 1, 1988 for outpatient tests performed by a hospital for its own outpatients, the fee was set at 60 percent of the prevailing charge, unless the tests were performed by a qualified hospital laboratory. In this case, the fee was set at 62 percent. A qualified hospital laboratory is one which provides some clinical diagnostic laboratory tests 24 hours a day, 7 days a week, in order to serve a hospital's emergency room which is available to provide services 24 hours a day, 7 days a week. To meet this requirement, a hospital must have physicians physically present or available within 30 minutes through a medical staff call roster to handle emergencies 24 hours a day, 7 days a week. Hospital laboratory technologists must be on duty or on call at all times to provide testing for the emergency room.

- Effective for hospital outpatient tests furnished on or after April 1, 1988, to receive the 62 percent fee, the hospital must also be a sole community hospital which meets the qualifications listed in the paragraph above. In all other cases the fee is set at 60 percent of the prevailing charge.

Use the same determination you used for PPS purposes to determine whether a hospital qualifies as a sole community hospital. Sole community hospitals are indicated as codes 01 and 11 in your PPS Pricer File. (See S3656.3D, "Provider Type Field.")

- For tests to hospital nonpatients, the fee is set at 60 percent.

B. Application of Fee Schedule.—You are responsible for applying the correct fee schedule for payment of clinical diagnostic laboratory tests by determining which hospitals meet the criteria for payment at the 62 percent fee schedule. Only sole community hospitals with qualified hospital laboratories as defined in subsection A are eligible for payment under the 62 percent screen.

Pay the lower of the applicable current fee schedule, the actual charge, or the national limitation amount. This applies to all clinical diagnostic laboratory tests except:

- Laboratory tests furnished to a hospital inpatient whose stay is covered under Part A. These are included in the DRG for PPS hospitas or are paid on a cost basis for non-PPS hospitals. Laboratory tests for hospital inpatients covered under Part B (due to lack of Part A coverage) are reimbursed on a reasonable cost basis.

- Laboratory tests furnished by hospital-based or independent dialysis facilities that are included under the ESRD composite rate payment. Laboratory tests reimbursed in addition to the composite rate payment are subject to the fee schedule limits. These are at the 60 percent rate unless furnished by a qualified hospital laboratory in a sole community hospital. In this case the 62 percent rate applies.

- Laboratory tests furnished by hospitals in Maryland as long as a waiver of Medicare reimbursement principles applies for outpatient services. However, instructions in subsection D apply for bill preparation for these hospitals.

- Laboratory tests furnished to inpatients of a hospital with a waiver under S602(k) of the 1983 Amendments to the Act. Under the waiver, an outside supplier may bill Part B for laboratory and other nonphysician services furnished to inpatients that would otherwise be reimbursed only through the hospital. Part B payment to the outside supplier for laboratory tests furnished to inpatients under the 602(k) waiver is at 80 percent of the reasonable charge if unassigned, or at 100 percent if assigned. However, the fee schedule applies to any tests furnished by the outside supplier to hospital outpatients and to nonhospital patients.

- Laboratory tests performed by a SNF for its own inpatients and reimbursed under Part A or Part B, and any laboratory tests furnished under arrangements to a SNF inpatient with Part A coverage. Such tests are reimbursed on a reasonable cost basis. All other tests furnished by a laboratory other than the SNF's own are reimbursable only to the laboratory under the fee schedule. Therefore, laboratory tests for SNF inpatients without Part A coverage are not reimbursed to the SNF under arrangements unless the test was referred by a SNF with its own laboratory. Patients occupying beds in non-Medicare certified areas of a SNF are not considered inpatients for the purposes of this exception. Tests furnished to such patients are treated as tests furnished to nonpatients.

- o Laboratory tests furnished to patients of RHCs under an all-inclusive rate. Tests performed by the RHC lab, not included in the all-inclusive rate, are billed to the carrier or to you. Related tests by hospital labs are billed to you.

- o Laboratory tests provided by a participating HMO or HCPP to an enrolled member of the plan.

- o Laboratory tests furnished by a hospice.

C. Clinical Diagnostic Laboratory Services Subject to Fee Schedule.—For purposes of the fee schedule, clinical diagnostic laboratory services include laboratory tests listed in codes 80002-89399 of the Current Procedural Terminology Fourth Edition, 1987 printing, (CPT-4). Certain tests, however, are required to be performed by a physician and are therefore exempt from the fee schedule. These include:

80500-80502	Clinical pathology consultation
85095-85109	Codes dealing with bone marrow smears and biopsies
86077-86079	Blood bank service
88000-88125	Certain cytopathology services
88160-88199	Certain cytopathology services
88300-88399	Surgical pathology services

Some CPT-4 codes in the 80000 series are not clinical diagnostic laboratory tests. They include codes for blood products such as whole blood, various red blood cell products, platelets, plasma, and cryoprecipitates. Other codes for tests primarily associated with the provision of blood products are also not considered to be clinical diagnostic tests. These include the various blood crossmatching techniques.

Exclusion codes are paid under reasonable costs to the extent they are covered.

The following codes are never subject to fee schedule limitations:

85060
86012
86013
86016-86019
86024
86026
86028
86034
86068
86069
86072-86076
86100
86120
86128
86265-86267
86455-86585
86595
89100-89105
89130-89141
89350
89360

The following codes are not subject to fee schedule limitations when submitted for payment on the same bill with charges for blood products:

86011
86014
86031-86033
86035
86080
86082
86090
86095
86096
86105

If no blood product is provided, and billed for, on the same claim, the codes are subject to the fee schedule.

The following codes that delineate organ or disease oriented panels are not subject to the national limitation amounts because laboratories do not always utilize the same array of tests in a particular panel:

80050-80099
86421-86422

The following codes for unlisted or not otherwise classified clinical diagnostic laboratory tests are not subject to the national limitation amounts:

81099
84999
85999
86999
87999
88299
88399

There may be additional valid level 3 (carrier assigned) codes to consider in any edits.

Furnish fee schedule information to your hospitals. Nomenclature may be furnished. If you furnish nomenclature, use the format shown in exhibit 1. Display the copyright at the bottom of each page.

In January, HCFA updates and distributes HCPCS codes to carriers. The carrier is responsible for supplying you with the annual HCPCS update. See subsection H. for price updating of fee schedules.

D. Billing for Diagnostic Lab Tests.—Follow requirements for review of the HCFA-1450 in §3604.

When the hospital obtains laboratory tests for outpatients or nonpatients under arrangements with independent laboratories or other hospital laboratories, either the originating hospital (or hospital lab) may bill for all tests, or the originating hospitals and the reference labs may bill for the tests they perform. The hospital may not bill for tests under arrangements if it does not operate a lab. Hospital labs bill you. Independent labs bill the carrier.

If all tests are for a nonpatient, the hospital may submit one bill and be reimbursed at 60 percent.

If the tests are for an outpatient, those referred to a reference laboratory are reimbursable at 60 percent. If a sole community hospital agrees to bill for both, it must prepare two bills: one for the laboratory tests reimbursable at 62 percent, the other for the reference laboratory tests reimbursable at 60 percent. The bill for tests performed by the reference lab include nonpatient type of bill coding.

Billing for fee schedule lab tests is included with billing for other outpatient services to the same beneficiary on a single bill except where a qualified hospital laboratory is billing for a reference lab as described above. Do not permit hospitals to submit separate bills for laboratory tests performed in different departments on the same day.

Where a SNF operates a lab that provides lab services to other than its own patients, it is functioning as an independent lab. Bills for these lab services depend upon the status of the patient (e.g., hospital inpatients, ICF patients) and the arrangements made for payment with the referring entity.

E. Specimen Collection Fee.—Separate charges made by laboratories for drawing or collecting specimens are allowable whether or not the specimens are referred to hospitals or laboratories. Do not pay the fee to anyone who has not extracted the specimen. Only one collection fee is allowed for each type of specimen (e.g., blood, urine) for each patient encounter, regardless of the number of specimens drawn. When a series of specimens is required to complete a single test (e.g., glucose tolerance test), treat the series as a single encounter. Allow a specimen collection fee in circumstances such as drawing a blood sample through venipuncture (i.e., inserting into a vein a needle with syringe or vacutainer to draw the specimen) or collecting a urine sample by catheterization.

Special rules apply when such services are furnished to dialysis patients. The specimen collection fee is not separately payable for any patients dialyzed in the facility or for any patients dialyzed at home under reimbursement Method I. Payment for this service is included under the ESRD composite rate (§2711.1B4 of the Provider Reimbursement Manual, Part 1) for separately billable laboratory tests, as well as those included in the composite rate. Fees for taking specimens from home dialysis patients who have elected reimbursement Method II (§§2740ff. of the Provider Reimbursement Manual, Part 1) may be paid separately, provided all other criteria for payment are met. Also, fees for taking specimens in the hospital setting, but outside of the dialysis unit, for use in performing laboratory tests not included in the ESRD composite rate may be paid separately.

A specimen collection fee is not allowed for blood samples where the cost of collecting the specimen is minimal (such as a throat culture or a routine capillary puncture for clotting or bleeding time). Do not make payment for routine handling charges where a specimen is referred by one laboratory to another.

Allow a specimen collection when it is medically necessary for a laboratory technician to draw a specimen from either a nursing home or homebound patient. The technician must personally draw the specimen, e.g., venipuncture or urine sample by catheterization. A specimen collection fee is not allowed the visiting technician where a patient in a facility is not confined to the facility or the facility has on duty personnel qualified to perform the specimen collection. If you have no information regarding the qualifications of the facility's personnel, assume the technician's service was necessary.

Establish the following HCPCS codes and terminology:

36415 Routine venipuncture for collection of specimen(s).
P9615 Catheterization for collection of specimen(s).

For all codes, pay the lesser of the charge or $3 per patient. Because payment is permitted for time and travel costs, the $5 fee allowed for P9605 and P9610 is discontinued effective for services January 1, 1987 and later. Specimens drawn from more than one patient during the same nursing home visit are billed under 36415 and P9615. The amount you allow should not exceed $3 per patient.

F. Travel Allowance.—In addition to a specimen collection fee allowed under subsection E, a travel allowance is payable to cover the costs of collecting a specimen from a nursing home or homebound patient. Pay the additional allowance only where a specimen collection fee is also payable: i.e., no travel allowance is made where the technician merely performs a messenger service to pick up a specimen drawn by a physician or nursing home personnel. Since a travel allowance can be paid routinely, the differential specimen collection amount provided for in subsection E when a specimen is collected from a single patient rather than multiple patients (i.e., $5 rather than $3) is discontinued.

The allowance covers the estimated travel costs of collecting a specimen and reflects the technician's salary and travel costs. The following HCPCS codes are used for travel allowances:

P9603—Travel allowance - one way, in connection with medically necessary laboratory specimen collection drawn from homebound or nursing homebound patient; prorated miles actually traveled (intermediary allowance on per mile basis); or

P9604—Travel allowance - one way, in connection with medically necessary laboratory specimen collection drawn from homebound or nursing homebound patient; prorated trip charge (intermediary allowance on flat fee basis).

If you determine it is appropriate, you may apply an additional fee for travel, on the same basis as the carrier in your area, to all circumstances where travel is required. Otherwise, establish an appropriate allowance and inform the hospitals in your area. If you decide to establish a new allowance, one method is to consider:

- The current Federal mileage allowance for operating personal automobiles of $0.205 per mile, plus

- A personnel allowance per mile to cover personnel costs based upon an estimate of average hourly wages and average driving speed.

Prorate travel allowance amounts claimed by suppliers by the number of patients (including Medicare and non-Medicare patients) from whom specimens were drawn on a given trip.

EXAMPLE 1: You determine that the average technician is paid $9 per hour and estimate 45 miles per hour as the average speed driven or $.20 per mile. Including the Federal allowance of $0.205 per mile results in a total allowance of $0.405 per mile. A laboratory technician makes a trip to two nursing homes involving a total of 20 miles and collects five specimens from Medicare and non-Medicare patients. A travel allowance per Medicare claim of $1.62 can be made - 20 miles roundtrip x $0.405 per mile divided by 5 specimens.

EXAMPLE 2: You determine through a review of the laboratory records that on average, four specimens are drawn or picked up each trip and the average trip involves a 30 mile round trip. Assuming the same facts as Example 1 (i.e., $9 per hour and 45 miles per hour), you establish a flat travel allowance of $3.03. Hospitals bill code P9604 and are paid $3.03 regardless of actual distance or number of patients served.

G. Amount of Part B Payment for Clinical Laboratory Tests.—The following rules apply in determining the amount of Part B payment for clinical laboratory tests:

o If payment is made to a hospital for tests furnished for a nonpatient of that hospital (or tests furnished for an outpatient when the hospital is not a sole community hospital, the payment is the least of the actual charge, the 60 percent fee schedule amount, or the 60 percent national limitation amount. Part B deductible and coinsurance do not apply.

o If payment is made to a sole community hospital for tests furnished for an outpatient of that hospital, the payment is the least of the actual charge, the 62 percent fee schedule amount, or the 62 percent national limitation amount. (See subsection B.) Part B deductible and coinsurance do not apply.

o If payment is made to a participating hospital for tests performed for an inpatient of that hospital without Part A coverage, payment is made on a reasonable cost basis subject to Part B deductible and coinsurance.

o If payment is made to a participating SNF for tests performed by that SNF for its inpatient, payment is made on a reasonable cost basis subject to Part B deductible and coinsurance.

o If payment is made to a hospital-based or independent dialysis facility for laboratory tests included under the composite rate payment and performed for a patient of that facility, the facility's composite rate payment includes payment for these tests subject to the Part B deductible and coinsurance.

o If payment is made to a RHC for laboratory tests performed for a patient of that clinic, payment is made as part of the all-inclusive rate subject to Part B deductible and coinsurance.

o If payment is made to a hospital pursuant to a waiver of Medicare reimbursement principles for outpatient services, Part B deductible and coinsurance apply unless otherwise waived as part of the approved waiver.

o If payment is made to a participating HMO or HCPP for laboratory tests performed for a patient who is not a member, payment is the least of the actual charge, the fee schedule amount, or the national limitation amount. The Part B deductible and coinsurance do not apply.

H. Adjusted Fee Schedule.—Beginning April 1, 1988, the 1987 fee schedules for automated tests, and for tests (with the exception of cytopathology) that were subject to the LCL provision prior to July 1, 1984, are reduced by 8.3 percent. To determine the adjusted fee schedules, multiply the 1987 fee schedule by .9170 (100 percent of the 1987) fee schedule minus 8.3 percent).

The automated tests subject to the adjusted fee schedules tests are listed in codes 80002 - 80019 of the 1987 printing of the CPT-4.

The adjusted fee schedules also apply to the following tests that were subject to the LCL provision prior to the establishment of the fee schedule methodology.

Test	1987 CPT-4 Code
Cholesterol, Serum	82465
Complete Blood Count	85022 85031
Hemoglobin	85018
Hematocrit	85014
Prothrombin Time	85610
Sedimentation Rate (ESR)	85650 85651
Glucose	82947 82948
Urinalysis	81000*
Blood Uric Acid	84550
Blood Urea	84520
White Blood Cell Count	85048

*If 81002 and 81015 are both billed, pay as though the combined service (81000) had been billed.

Where these adjusted fee schedule tests are part of disease or organ panels, assure that the fee for the panel does not exceed the sum of the fees for the individual components after accounting for the reductions due to the adjustment. Get further information from your carrier.

I. Coordination With Carriers.—The carrier in your area furnishes you copies of fee schedules, national limitation amounts and HCPCS updates. The fee schedule amounts are adjusted periodically to reflect changes in the Consumer Price Index (CPI) for all Urban Consumers (U.S. city average). For laboratory tests performed on or after July 1, 1985 through December 31, 1986, the fee schedules were increased 4.1 percent. Beginning January 1, 1987, CPI adjustments are made January 1 of each year instead of July 1. The CPI increase effective for laboratory tests performed on or after January 1, 1987 is 5.4 percent. This factor was applied to the national limitation amounts on the 60 and 62 percent fee schedules furnished to you. No update is scheduled for calendar year 1988.

COBRA requires national limitation amounts to be applied to the payments for outpatient clinical diagnostic laboratory services. For services rendered on or after July 1, 1986 and prior to April 1, 1988, the national limitation amount is 115 percent of the median of all the fee schedules established for a test for each laboratory code (separately calculated for 60 and 62 percent fee schedules). For laboratory tests performed on or after January 1, 1987 through March 31, 1988, the initial national limitation amounts were increased by 5.4 percent and the results is the 1987 national limitation amount.

For laboratory tests performed on or after April 1, 1988, the national limitation amount is 100 percent of the median of all the fee schedules established for a test for each laboratory code (separately calculated for 60 and 62 percent fee schedules). The 100 percent national limitation amount for automated tests and for tests formerly subject to the LCL limit, is determined by reducing the current national limitation amount by 8.3 percent (i.e., by multiplying the national limitation by .9170) and multiplying this result by .8696 (100 percent divided by 115 percent). In a single step computation the 1987 national limitation amount is multiplied by .7974 (.9170 x .8696). For all other tests the 100 percent national limitation amount is determined by multiplying the 1987 national limitation amount by .8696 (100 percent divided by 115 percent).

There may be procedures for which hospitals bill for outpatients that are not included in the fee schedule. Where gaps occur in the fee schedule, the carrier has the responsibility for developing codes and prices. Work out procedures with the carrier to receive the missing information within a reasonable amount of time. If you are unable to do this satisfactorily, request assistance from the RO. Codes which are assigned to fill gaps are valid until replaced by permanent codes in an annual update.

J. Laboratory Tests Utilizing Automated Equipment.—Clinical laboratory tests are covered under Medicare if they are reasonable and necessary for the diagnosis or treatment of an illness or injury. In the case of multi-channel automated and/or batch automated (e.g., SMAC, CHEMICAL PROFILES, ASTRA) laboratory determinations, however, the physician may not be free to specify the tests the patient needs and there is normally only one charge for the battery of tests. The delivery of the service in this manner is much more economical than if the tests are performed individually.

National guidelines on what tests are available in automated batteries are being developed. Until completed, install edit procedures to identify situations where the provider bills individual tests where billing for the automated battery would be appropriate based upon carrier practices in your area.

K. Modification of EOMB Process.—If services other than lab services necessitate sending an EOMB to the beneficiary, add a message to explain that clinical diagnostic lab services are reimbursed at 100 percent of the fee schedule and deductible and coinsurance do not apply. Either include a stuffer with your EOMB or modify the language on the front. If a stuffer is used, use the following language:

"You are not responsible for deductible or coinsurance for outpatient clinical diagnostic laboratory tests furnished. The Medicare payment for such tests is considered payment in full to the hospital.

This payment does not affect your annual deductible amount, and the hospital may not charge you any deductible or coinsurance for such lab tests. There may be deductible or coinsurance for other tests you received."

3629. BILLING FOR DURABLE MEDICAL EQUIPMENT (DME) AND ORTHOTIC/PROSTHETIC DEVICES

Section 4062 of P.L. 100-203, the Ominbus Budget Reconciliation Act of 1987 (OBRA) requires that payment for DME furnished under the Part A home health benefit and Part B DME, orthotic and prosthetic devices be on the basis of a fee schedule for items provided January 1, 1989 and later. For inpatients with no entitlement to Part A, the fee schedule applies for items covered under Part B. HCPCS coding is required. Deductible and coinsurance apply. (See subsection C for application.) The equipment is categorized into one of six classes:

- Prosthetic and orthotic devices;
- Inexpensive or other routinely purchased DME;
- Items requiring frequent and substantial servicing;
- Customized items;
- Capped rental items; or
- Oxygen and oxygen equipment.

See subsection E for billing information for each class and Addendum H for appropriate HCPCS codes and definitions.

A. Billing for DME, Orthotic and Prosthetic Devices.--Providers other than HHAs which previously billed DME on the HCFA-1450 will bill the local carrier on the HCFA-1500. The provider must obtain a billing number from the carrier first.

HHAs bill their RHHI for DME on the HCFA-1450, except for subunits that now bill carriers as suppliers.

Return any claims you receive from your non-HHA providers for DME only. Advise them to bill the carrier for DME on the HCFA-1500. Where a claim from a non-HHA provider contains DME and other line items, you have the option of returning the claim or denying the DME portion.

All provider outpatient departments bill you for orthotic and prosthetic devices on the HCFA-1450. Apply the fee schedule. (See Addendum H for a list of HCPCS codes for these devices).

B. Fee Schedule.--The carrier establishes the fee schedule for DME, orthotics and prosthetics and furnishes it to you. Depending on the class location of a piece of equipment, base payment procedures on the particular class' fee schedule effective January 1, 1989. In subsequent years, the fee schedule will be adjusted to reflect changes in the consumer price index for all urban consumers (CPIU) (U.S. city average). For local codes, the carrier provides information on the appropriate category and pricing.

Carriers determine the fee schedule on the basis of a single locality for their service area. Where the service area includes more than one State, the schedule is based on no more than one State. Some States have more than one carrier with service areas within them. These carriers have defined service areas within the States. Apply the fee schedules based on the location of the provider.

NOTE: All codes contained in Addendum H must be paid on the basis of the fee schedule including HHA benefits furnished under a Plan of Treatment.

C. Application of Fee Schedule and Determining Payments and Patient Liability.—Apply the correct fee schedule for payment of orthotic and prosthetic devices. If you are an RHHI, you are also responsible for applying the correct fee schedule for payment of DME.

Use the following rules on determining payments and patient liability for DME, orthotics and prosthetics:

- Payment to a Provider Other Than Nominal Charge HHA.—To determine the Part B payment to a provider other than a nominal charge HHA, subtract any unmet Part B deductible from the lower of the actual charge or the fee schedule amount for the item or service and multiply the remainder by 80 percent. This is the final payment. (If the item or service is furnished by a HHA and is covered under the Plan of Treatment, the payment is determined in the same way, except that no deductible is applicable.)

- Payment to a Nominal Charge HHA.—To determine the Part B payment to a nominal charge HHA, subtract any unmet deductible from the fee schedule amount and multiply the remainder by 80 percent. This is the final payment. (If the item or service is furnished by a nominal charge HHA and is covered under the Plan of Treatment, the payment is determined in the same way, except that no deductible is applicable.) For these items and services, no providers are considered nominal charge providers other than HHAs.

- Payment to a Nominal Charge Provider Other Than a Nominal Charge HHA.—To determine the Part B payment to a nominal charge provider other than a nominal charge HHA, subtract any unmet Part B deductible from the lower of the actual charge or the fee schedule amount for the item or service and multiply the remainder by 80 percent. This is the final payment.

- Patient Liability to a HHA.—To determine the patient liability to a HHA under Part B (nominal charge or regular HHA), subtract any unmet deductible from the lower of the actual charge or fee schedule amount and mutliply the remainder by 20 percent. The result obtained plus the unmet deductible is the patient's liability. If the item or service is covered under a Plan of Treatment, the deductible does not apply.

- Patient Liability to a Provider Other Than a HHA.—To determine the patient liability to a provider other than a HHA (including nominal charge providers other than a HHA), subtract any unmet deductible from the actual charge and multiply the remainder by 20 percent. The result obtained plus the unmet deductible is the patient's liability.

D. Bill Review.—In general, but subject to specific billing and processing requirements listed in subsections G-I, follow requirements for review of the HCFA-1450 in §3604. HHA medical review requirements in §§3900ff. apply. Develop medical review criteria for outpatient services.

E. Classes of Equipment.—The following defines the six classes of equipment and indicates (by provider type) whether you or the carrier is billed. (See Addendum H for HCPCS codes for each class.)

Intermediaries other than RHHIs will only receive claims for the classes "Prosthetic and Orthotic Devices (Other Than DME)" and "Certain Customized Items."

o Prosthetic and Orthotic Devices (Other Than DME).—These items consist of all prosthetic and orthotic devices excluding: items in the classes "Certain Customized Items" and "Items Requiring Frequent and Substantial Servicing," transcutaneous electrical nerve stimulators (TENS), parenternal/enteral nutritional supplies and equipment, and intraocular lenses. Other than these exceptions, pay for prosthetic and orthotic devices on a lump-sum purchase basis using the lesser of the fee schedule amount or the actual purchase charge.

All providers bill their regular intermediary.

Orthotic and prosthetic devices are billed under revenue code 274.

For TENS, a payment of 10 percent of the purchase price less coinsurance is allowed for the first 2 months of usage for a 2 month trial period prior to purchase. This trial period permits a physician to determine whether the purchase of a TENS is medically appropriate. If so, the full purchase price is paid without an adjustment for the two monthly rental payments. Providers other than HHAs bill the carrier. HHAs bill the RHHI. The HCPCS codes for TENS are E0720 and E0730.

o Inexpensive or Other Routinely Purchased DME.—This is equipment with a purchase price not exceeding $150 or equipment which the Secretary determines is acquired by purchase at least 75 percent of the time. Payment is either through rental or purchase but the total rental amount for a particular item may not exceed the actual charge or fee for purchase. Payment is possible for maintaining and servicing purchased equipment. The rental fee includes service and maintenance.

Providers other than HHAs bill the carrier. HHAs bill the RHHI.

o Items Requiring Frequent and Substantial Servicing.—These are items such as ventilators, aspirators, IPPB machines, and nebulizers. Payment is generally made on a rental basis. For rentals, payment is made based on monthly fee schedule amounts until the medical necessity ends. However, where the beneficiary has purchased an item in this category, pay monthly installments equivalent to rental fee schedule amounts until the medical necessity ends, the fee schedule purchase price or actual charge has been reached, whichever comes first.

Providers other than HHAs bill the carrier. HHAs bill the RHHI.

o Certain Customized Items.—Due to their unique nature (custom fabrication, etc.) which makes them unsuitable for grouping together for profiling purposes, these are items for which the carrier has not established customary and prevailing charges. Other than HCPCS code E1220, the DME and orthotic/prosthetic items included in this category are not coded in HCPCS. (This includes those circumstances where an item which has a HCPCS code is modified to the extent that neither the original terminology nor the terminology of another HCPCS code accurately describes the modified item.) Pay for these items in a lump-sum based upon your considerations for each item. Also, pay for maintenance and servicing when a manufacturers' warranty no longer provides coverage. There is no listing of codes in Addendum H for this class. HHAs use HCPCS code E1399 when billing the RHHI for DME and HCPCS code L8499 when billing the RHHI for orthotics and prosthetics. Provider outpatient departments contact the carrier for appropriate codes for billing DME and use HCPCS code L8499 when billing their intermediary for orthotics and prothetics.

Providers other than HHAs bill the carrier for DME. HHAs bill the RHHI.

Provider outpatient departments bill the intermediary for orthotics and prosthetics.

o Capped Rental Items (Other Items of DME).--These are DME items not covered by the categories described above. For these items of DME, RHHIs pay on a rental or purchase basis as indicated by the revenue code. For rental items, generally pay on a monthly rental basis not to exceed 15 continuous months except where the beneficiary has purchased an item without prior rental. In such cases, pay on monthly installments equivalent to the rental fee schedule amounts until the actual charge for purchase is reached, the fee schedule amount for purchase is reached, or the medical necessity ends, whichever occurs first. Payment may be made for purchase even if the purchase was preceded by a period of rental. However, total payments for rental plus purchase may not exceed the amount that would have been paid had the equipment been continuously rented for 15 months. Therefore, if a purchase occurs during a period of continous use after 15 months of rentals have been paid, no payment may be made other than the reasonable and necessary charges for maintenance and servicing. (See subsection F for instructions on payment for maintenance and servicing and for continuous use.)

Providers other than HHAs bill the carrier. HHAs bill the RHHI.

o Oxygen and Oxygen Equipment.--Generally, payment is made on a monthly basis. However, where a beneficiary has purchased an item of oxygen equipment, pay monthly installments equivalent to the fee schedule amounts until either the medical necessity ends or the fee schedule amount for purchase of the equipment has been reached. (See subsections G and H for special processing requirements for RHHIs.)

Providers other than HHAs bill the carrier. HHAs bill the RHHI.

NOTE: For all the above classes of equipment except Capped Rental Items, payment for maintenance and servicing is made anytime the beneficiary purchases equipment. Payment is not made for maintenance and servicing if the beneficiary rents the equipment since maintenance and servicing are included in the rental payments. (See subsection H for Capped Rental Items.)

For all classes involving DME and/or oxygen except Capped Rental Items, the HHA bills for maintenance and servicing under HCPCS code E1350 and furnishes a description of what was done. All other providers use E1350 for prosthetics and orthoics and contact the carrier for appropriate HCPCS billing codes for DME. The billed amount is paid if reasonable.

F. Special Processing Rules for RHHIs.—Apply the following rules when processing DME claims:

- Replacement.—Do not pay for replacement of equipment that is not purchased. Do not pay for replacement of capped rental items where the 15-month rental period has expired. (See subsection E.)

- Plan of Treatment Requirements.—All DME must be included on the Plan of Treatment. (See §3902.1.) If items listed in the category "Need Prescription Before Delivery" which is contained in Addendum H are being billed, they must be included in the Plan of Treatment in order for payment to be made.

- Installment Payments.—Where a beneficiary is purchasing an item through installments, the HHA indicates the total price of the item on the first bill. Set up a diary to generate monthly payments equivalent to the rental fee schedule amount until the fee schedule purchase price or actual charge has been reached, whichever comes first.

- Payments During a Period of Continuous Use.--For capped rental items, payments may not exceed a period of continuous use longer than 15 months. Develop with the HHA or beneficiary to determine when this period begins. Neither a change in address nor a change in suppliers (HHAs) will extend the 15 month period. For the month of death or discontinuance of use, pay the full month. After 15 months of rental have been paid, the HHA must continue to provide the item without any charge, other than for the maintenance and servicing fees until medical necessity ends or Medicare coverage ceases. For this purpose, unless there is a break in need for at least 60 days, medical necessity is presumed to continue.

A period of continuous use allows for temporary interruptions in the use of equipment. Interruptions may last up to 60 consecutive days plus the days remaining in the rental month (this does not mean calendar month, but the 30-day rental period) in which use ceases, regardless of the reason the interruption occurs. Thus, if the interruption is less than 60 consecutive days plus the days remaining in the rental month in which use ceases, do not begin a new 15-month rental period. Also, when an interruption continues beyond the end of the rental month in which the use ceases, do not make payment for additional rental until use of the items resumes. Establish a new date of service when use resumes. Do not count unreimbursed months of interruption toward the 15-month limit.

If, however, the interruption is greater than 60 consecutive days (plus the days remaining in the rental month in which need ceases) and the HHA submits a new prescription, new medical necessity documentation, and a statement describing the reason for the interruption which shows that medical necessity in the prior episode ended, a new 15-month period begins. If the HHA does not submit this documentation, a new 15-month period does not begin.

If a 15-month rental period has already ended and a greater than 60 consecutive day interruption occurs, subject any claims purporting to be a new period of medical necessity after the interruption to a thorough MR to ensure that medical necessity did in fact end after the prior episode.

If the beneficiary changes to different, but similar, equipment, review to determine whether the beneficiary's medical needs have substantially changed and the new equipment is necessary. If so, begin a new 15-month period. Otherwise continue to count against the current 15-month limit and base payment on the less expensive medically appropriate configuration of equipment. If the 15-month period had already expired, make no additional rental payments.

If the new configuration is a modification of existing equipment through the addition of medically necessary features (for example, a special purpose back is added to a wheelchair), continue the 15-month rental period for the original equipment and begin a new 15-month rental period for the added equipment.

For purposes of computing the 15-month period for capped rental items, begin counting the first month that the beneficiary continously rented the equipment. For example, if the beneficiary began renting the equipment in July 1988, the rental month which begins in January 1989 is counted as the beneficary's 7th month of rental. Therefore, if the equipment has been continously rented prior to October 2, 1987, no further rental payments are made since the 15-month period is terminated before January 1, 1989. Payment for maintenance and servicing begins July 1, 1989.

If the beneficiary has reached (on a date of service prior to January 1989) the purchase price limitation on a rental claim, do not make any further purchase or rental payments. However, for capped rental items previously rented that have reached the purchase cap under the rent/purchase rules, pay claims for maintenance and servicing fees effective July 1, 1989.

- Maintenance and Servicing.—HHAs bill for the maintenance and servicing of DME under revenue code 299 using HCPCS code E1399 representing capped rental equipment. A description of the service is included in Item 94 "Remarks" of the HCFA-1450 or attached. Pay the reasonable and necessary charges for maintenance and servicing of purchased equipment. Do not pay for parts and labor that are covered under a manufacturer's or supplier's warranty. Pay on a lump-sum, as needed basis based on your considerations for that item. Payment may not be made for maintenance and servicing of rented equipment other than the maintenance and servicing fee established for capped rental items.

For capped rental items which have reached the 15-month rental cap, pay claims for maintenance and servicing fees after 6 months have passed from the end of the final paid rental month or from the end of the period the item is no longer covered under the supplier's or manufacturer's warranty, whichever is later. For example:

Date service begins:	1/5/88
15-month rental period ends: (1/5/88 + 15 months)	4/4/89
6-month period when no payment is made (4/5/89 + 6 months):	4/5/89 - 10/4/89
Date maintenance and servicing payment may begin:	10/5/89
Payment covers all maintenance and servicing through (10/5/89 + 6 months):	4/4/90

For capped rental DME, the maintenance and servicing fee may be paid only once every 6 months.

G. Special Requirements for Processing of Oxygen Claims by RHHIs.--Fee schedule payments for stationary oxygen system rentals are all inclusive and represent a monthly rental payment allowance per beneficiary. Accordingly, providers bill on a monthly basis for the stationary oxygen equipment rentals and contents furnished, if applicable (i.e., if HHA services are provided in addition to oxygen, the HHA will include the oxygen on the HHA bill.) An additional fee for portable add-on equipment is payable under the situations indicated in subsection H.

The monthly payment amount for stationary oxygen is subject to adjustment depending on the amount of oxygen prescribed liters per minute (LPM) and whether or not portable oxygen is also used. In order to receive the applicable payment adjustment, bills must indicate the appropriate revenue code described as follows, if applicable:

o If the prescribed amount of oxygen is less than 1 LPM, the revenue code is 294. Reduce the monthly payment amount for stationary oxygen by 50 percent.

o If the prescribed amount of oxygen is greater than 4 LPM, the revenue code is 295. Increase the monthly payment amount for stationary oxygen by 50 percent.

o If the prescribed amount of oxygen exceeds 4 LPM and portable oxygen is prescribed, the revenue code is 296. Increase the monthly payment for stationary oxygen by the higher of 50 percent of the monthly stationary oxygen payment amount or the fee schedule amount for the portable oxygen add-on.

All other oxygen is billed under revenue code 277.

Monthly bills may be submitted to you as of the first rental service date in the case of initial rentals of an oxygen system or, no sooner than 30 days after the prior rental month's service date in the case of an established oxygen patient.

Apply coverage guidelines in 60-4 of the Coverage Issues Manual.

H. Oxygen Equipment and Contents Billing Chart.—The following chart indicates what oxygen fee schedule component is billable/payable under various transaction scenarios.

A. Situation: Bene Uses a Stationary System Only

1. Rental Cases

Type of System	Stationary Monthly Payment	Oxygen Content Fee	Portable Add-On	Portable Contents Fee	Purchase Payment Limit
Concentrator	Yes	No	No	No	N/A
Gaseous	Yes	No	No	No	N/A
Liquid	Yes	No	No	No	N/A

2. Purchase Cases

Type of System	Stationary Monthly Payment	Oxygen Content Fee	Portable Add-On	Portable Contents Fee	Purchase Payment Limit
Concentrator	Yes(installment)	No	No	No	Yes
Gaseous	Yes(installment)	Yes	No	No	Yes
Liquid	Yes(installment)	Yes	No	No	Yes

B. Situation: Bene Uses Both a Stationary and Portable System

1. Rents stationary/Rents portable

Type of System	Stationary Monthly Payment	Oxygen Content Fee	Portable Add-On	Portable Contents Fee	Purchase Payment Limit
Concentrator	Yes	No	Yes	No	N/A
Gaseous	Yes	No	Yes	No	N/A
Liquid	Yes	No	Yes	No	N/A

2. Rents stationary/Owns portable

Type of System	Stationary Monthly Payment	Oxygen Content Fee	Portable Add-On	Portable Contents Fee	Purchase Payment Limit
Concentrator	Yes	No	Yes(installment)	No	No/Yes
Gaseous	Yes	No	Yes(installment)	No	No/Yes
Liquid	Yes	No	Yes(installment)	No	No/Yes

3. Owns stationary/Owns portable

Type of System	Stationary Monthly Payment	Oxygen Content Fee	Portable Add-On	Portable Contents Fee	Purchase Payment Limit
Concentrator	Yes(installment)	No	Yes(installment)	Yes	Yes/Yes
Gaseous	Yes(installment)	Yes	Yes(installment)	No	Yes/Yes
Liquid	Yes(installment)	Yes	Yes(installment)	No	Yes/Yes

4. Owns stationary/Rents portable

Concentrator	Yes(installment)	No	Yes	Yes	Yes/No
Gaseous	Yes(installment)	Yes	Yes	No	Yes/No
Liquid	Yes(installment)	Yes	Yes	No	Yes/No

C. Situation: Bene Uses a Portable System Only

1. Rents portable system

Type of System	Stationary Monthly Payment	Oxygen Content Fee	Portable Add-On	Portable Contents Fee	Purchase Payment Limit
Gaseous	No	No	Yes	Yes	N/A
Liquid	No	No	Yes	Yes	N/A

2. Owns portable system

Gaseous	No	No	Yes(installment)	Yes	Yes
Liquid	No	No	Yes(installment)	Yes	Yes

RHHIs consider the following when processing oxygen claims:

o Whenever the volume adjustment and the portable add-on both apply, only pay the higher of the two;

o Do not make additional payments for either stationary or portable contents whenever a stationary system is rented. The monthly oxygen payment amount already includes reimbursement for all required contents;

o Make payments for purchased oxygen equipment on an installment basis (equal to the fee for rental) until either medical necessity ends or, the fee schedule amount for purchase or, the actual purchase price is reached, whichever comes first; and

o The portable content fee is never payable in addition to the "regular" content fee. The regular content fee already includes portable content reimbursement.

I. Reporting Units of Service.—Provider outpatient departments report under item 52 "Units of Service" the number of items being billed for orthotic and prosthetic devices.

RHHIs report under item 52 the number of purchased items being billed under DME (excluding oxygen) or the number of months for rental. For oxygen, RHHIs report under item 52 the number of months being billed.

J. Coordination Between Intermediaries and Carriers.--The carrier(s) will furnish you copies of fee schedules and updates. They will provide schedule updates at least 30 days prior to selected implementation. Use the fee schedules as indicated in subsection A to pay for covered items supplied by providers. Consult with carriers on filling gaps in fee schedules. Carriers will make the final decision on gap-filling amounts.

K. EMC Formats.--Utilize one of the following:

o Standard Tape Format - Record type 61 is used to report outpatient and home health services. Record type, sequence number, patient control number (if used), revenue code, HCPCS procedure code, units, charges, and noncovered charges are required. Modifiers and dates of service are not. The date of service will be determined from the "from" and "through" dates shown in record 20. Include other record types as appropriate.

o Direct Data Entry - You are responsible for determining where to locate the HCPCS procedure code on your data entry screen.

L. UNIBILL Requirements - Report the procedure codes in the financial data section (field 32-40). Include revenue code, HCPCS, units, and covered charges in the record. Where more than one HCPCS procedure is applicable to a single revenue code, the provider reports each HCPCS and related charge on a separate line. The revenue code is reported. Report the payment amount before adjustment for beneficiary liability in field 37 "Rate" and the actual charge in field 38 "Covered Charges."

3630. SKILLED NURSING FACILITIES

The requirements for processing hospital bills (inpatient Part A, inpatient Part B, and outpatient) (see SS3600-3628) apply to bills from SNFs. In addition, the following requirements are applicable.

Occurrence code 70 is used to indicate qualifying stay dates involving Part A claims for SNF level of care only. This code indicates that the dates shown are for a hospital stay of at least 3 days which qualifies the patient for payment of the SNF level of care services billed.

Verify that you have received a hospital bill that permits SNF coverage. If you have not received a bill, process the claim on the assumption that the SNF bill is correct. Diary for development if a hospital bill is not received within 90 days.

The requirement for a hospital stay of at least 3 days is applicable only to SNF admissions prior to January 1, 1989. For admissions on or after that date, there is no hospital prior stay requirement and occurrence code 70 is not required.

3630.1 Processing Beneficiary Demand Bills for Noncovered Admissions.—If a beneficiary requests the SNF to bill Medicare for services that the SNF thinks are noncovered, the SNF must do so.

If the bill relates to a noncovered admission, the SNF must submit the bill in the next billing cycle. It shows the charges as noncovered and reports condition code 20 to indicate the beneficiary thinks the services are covered. Process the bill, including medical review, as described in S3900.1B. Provide the appropriate notice to the beneficiary and SNF (allowance or denial with appeal rights as appropriate) on every demand bill received.

If the SNF reports condition code 21, the bill is not a demand bill. The bill is submitted to obtain a denial notice for Medicaid or another insurer. Process these bills in accordance with S3900.1D. Provide the appropriate letter to the beneficiary and SNF.

3630.2 Processing Beneficiary Demand Bills for Continued Stay Denials.—Where the SNF believes that a covered level of care has ended but the beneficiary disagrees, the SNF reports occurrence code 21 (UR Notice Received) or 22 (active care ended) as applicable. Condition code 20 indicates the beneficiary believes the services are covered beyond that date. The SNF reports the days and charges after the Item 21 or 22 date as noncovered.

Process the bill, including medical review, as described in S3900.1B. Provide the appropriate notice to the beneficiary and SNF (allowance or denial with appeal rights) on every demand bill received.

See S3723 if you decide coverage is appropriate for the period the beneficiary disputes.

3630.3 Processing Beneficiary Complaints and Inquiries Regarding Demand Bills.—Search your files to determine if a bill has been submitted when you receive an inquiry or complaint regarding a demand bill. Advise the beneficiary of the status or disposition of the bill if located. If the bill has not been received:

- o Advise the beneficiary (or person acting on his/her behalf) that the SNF will be requested to submit a bill and that they will receive either a copy of the bill or notice that it has been submitted from the SNF. Notify the beneficiary of the Medicare decision after the bill has been reviewed. The beneficiary is not required to pay for services which could be covered by Medicare until a Medicare decision is made. The SNF must refund monies collected if the beneficiary has paid the bill and if Medicare determines the care is covered. (See §3723 for reversal letter.)

- o Request the SNF to submit the bill, medical evidence, and a copy of the beneficiary denial notice within 5 working days of your request. (See §3723.1 for request letter.)

- o Followup by telephone if necessary until the bill and information are received.

- o Refer SNFs to the State Survey Agency through the RO if there are repeated complaints from beneficiaries about noncompliance with requests to submit bills to Medicare.

- o Refer to §3900.1 (Exhibit 1) for reporting requirements.

3630.4 Review of SNF Denial Notices for Demand Bill Requests.—To ensure that all SNFs institute the denial letter and demand bill procedures properly, SNFs must submit for two consecutive quarters, copies of all notices to beneficiaries where the URC or SNF believes that the care required by the beneficiary will not be covered by Medicare and the beneficiary has requested that a claim be submitted for a Medicare decision. Consent forms for admissions or tranfers to noncertified beds must be attached. Review these notices as follows:

- o Ensure that notices are received from each SNF. Followup if notices are not received.

- o Count the number of demand bill notices and compare with the number of demand bills you received from the SNF. Followup any discrepancies.

- o Discontinue review of a SNF after two consecutive quarters unless there are major discrepancies or noncompliance by the SNF. (Notify the SNF accordingly.)

- o Record for each SNF; the number of notices received; the number of demand bills not submitted (i.e., followup required) and the number of notices in error for noncompliance with procedures (other than demand bills not submitted).

- o Attach this report to the MR activity report in §3900.1 and forward it at the end of each quarter.

3634. SWING-BED SERVICES

Swing-bed services require the provider to bill inpatient hospital services and SNF services separately. The 3 day hospital stay requirement and the timely transfer requirement outlined in §§3131ff. must be met. Swing-bed hospitals use their regular provider numbers when billing for hospital services and an alpha letter "U" in the third position of the provider number to identify swing-bed SNF bills.

A. Inpatient Hospital Services in a Swing-Bed.--Where there is no change to a SNF level of care, services are billed in accordance with hospital billing instructions. (See §3604.) Where the beneficiary's level of care changes from hospital to SNF level, the provider shows patient status code 03 on the hospital bill in item 20 to indicate transfer to a SNF level of care. (This constitutes a discharge for purposes of Medicare payment for inpatient hospital services under the PPS.) Indicate on Item 22 the last day of care at the hospital level.

B. SNF Services in a Swing-Bed.--Services are billed in accordance with §3604, with the following exceptions:

o The swing-bed SNF bill has a hospital provider number in lieu of a provider number in the usual SNF provider number series. This is a unique SNF bill identified by an alpha letter "U" in the third position.

o The date of admission on the swing-bed SNF bill is the date the patient began to receive a SNF level of care service.

o State level agreements may call for varying type of bill coding in Item 4. HCFA does not perform edits on type of bill coding on bills with 8 in the 2nd digit (bill classification), in field 6 (location 54) of the UNIBILL inpatient record if the record is identified in field 1 as hospital or SNF. Therefore, accept with subsequent conversion, any bill type agreed to at the State level to identify swing-bed billing, e.g., 18X, 28X, 11X, 21. Be sure the record identification of UNIBILL field 1 is consistent with the provider number shown.

o If the hospital has 50-99 beds, additional processing rules apply:

— The hospital may not be paid for more than the number of capped days for swing bed stays. See subsection C for determining the limitation.

— Payment may not be made for services furnished after the end of the 5 day period (excluding weekends and holidays) beginning when the hospital is notified that a bed is available in a SNF, unless the patient's physician certifies within that 5-day period that transfer to a SNF is not medically appropriate.

The PRO is responsible for review to assure that the provider has considered availability of a SNF bed and obtained appropriate certification. Assume that payment is appropriate on initial bills, subject to the cap limitation. The PRO may later deny the bill and notify you.

See §3130.1 for additional coverage policy information.

C. Determination of Capped Amount (50-99) Bed Provider.--Maintain a record for each swing bed provider of 50-99 beds. This record must contain:

- The capped amount for the period;
- The SNF days paid for the period (or the days remaining if you prefer); and
- The date the cap is met (not the date you record it).

Notify the hospital if a beneficiary's extended care stay cannot be covered because the cap has been reached. In such a case, the law prohibits payment under Part A. However, payment may be made under Part B for certain medical and other health services. (See §3110.)

On each bill from a provider with 50-99 beds, determine whether the provider had already been paid for its limit of capped days before the date of admission to the SNF level of care. If an admission occurs prior to the date the capped days are exhausted, the entire stay is reimbursed (if otherwise covered) even though the cap is met during the stay.

Determine the number of capped days by multiplying .15 times the product of the number of days in the cost reporting period and the average number of licensed beds at the hospital for the period. From your State licensing agency, determine the number of licensed beds at the beginning of the current cost reporting period or from the date of the swing bed approval, if later.

In States that do not license beds, hospitals use the average number of hospital beds reported on their most recent Certificate of Need (CON) (excluding bassinets). If during the cost reporting period, there is an increase or decrease in the number of licensed beds, multiply the number of licensed beds for each part of the period by the number of days for which that number of licensed beds was available. After totalling the results, compute 15 percent of the total available licensed bed days to determine the payment limitation.

3638. BILLING BY HOME HEALTH AGENCIES

HHAs use the HCFA-1450 when billing for services rendered under a plan of treatment and for medical and other health services. Beneficiaries are entitled to unlimited home health visits when they meet the requirement of intermittent care and are homebound.

Start of care Notices are not required when billing for services, therefore, maintain a Medicare elgibility history file to determine when a beneficiary is entitled to Medicare Part A or Part B. When entitlement is questionable, submit a status query. (See §3507.3.)

3638.1 When Bills are Submitted.—The HCFA-1450 is submitted on a periodic basis, e.g., monthly.

- For services furnished under a home health plan of treatment when a bill includes at least one visit.
- For medical and other health services under Part B. (See §3127.)
- The patient (or his representative) refuses to request payment on his behalf.
- When the beneficiary is a HMO enrollee and you have jurisidiction for processing.
- The provider is responsible for not filing a timely claim for payment. (See § 3309.1.)

The agency must submit a separate bill for each beneficiary for services provided in different accounting years.

3638.2 Billing for Nonvisit Charges.—For benefits furnished under a Part A home health plan the HHA will normally prepare and submit a HCFA-1450 only when the bill includes charges for at least one visit. If only nonvisit charges (e.g., nonroutine medical supplies, DME) were incurred during the billing period and it is expected that another visit will be made under the existing plan of treatment, the HHA will not immediately submit a bill but include such nonvisit charges on the next billing which does reflect a visit.

When a nonvisit charge is incurred after the last home health visit, but before the plan is terminated, the HHA does not bill for the nonvisit charge until termination of the plan. It then submits a HCFA-1450 showing only the nonvisit charge as a separate line item, with an annotation "Final Covered Charge" in Item 94, Remarks.

Do not forward a bill record showing only the final covered nonvisit charge to HCFA. Instead, pay the covered charge and notify the beneficiary of payment made on his behalf.

Nonvisit charges incurred after termination of the plan are reimbursable under Part B medical and other health services.

3638.3 Payment System for HHA Claims.—Maintain the payment of claims for home health services in three categories to ensure proper accumulation of data for the PS&R and the cost report.

- o Services under a plan of treatment, beneficiary is entitled to Part A.
- o Services under a plan of treatment, beneficiary is entitled to Part B only (Part B Trust Funds).
- o Medical and other health services.

3638.4 DME Furnished as a Home Health Benefit.—Effective July 18, 1984, medical applicances furnished as a covered home health service are redefined as DME in accordance with the definition in §3113.1 and are subject to 20 percent coinsurance. Items which prior to July 18, 1984, could qualify as medical appliances under the home health benefit, but which do not meet the definition of DME, may be covered if the requirements in §3113.1B3, which pertain to such items, are met. Medicare reimbursement cannot exceed 80 percent of the reasonable cost of the DME. DME furnished free, or at a nominal charge by a public HHA, or by another HHA which requsts and receives approval to have payments made to it as a public HHA because a significant portion of its patients are low income, receive interim reimbursement equal to the number of covered visits times the estimated reasonable cost per visit. Coinsurance is applicable for DME furnished at a nominal charge. All DME billed under these instructions must be identifiable for cost report and final cost settlement purposes.

Where a beneficiary meets the criteria for coverage of home health services and the HHA is providing the care under Part A, any DME provided is under Part A (Bill Type 33). Where the patient meets the criteria for coverage of home health services and the HHA is providing the care under Part B because the patient is not eligible for Part A, the DME provided by the HHA may, at the beneficiary's option, be billed under Bill Type 33 or as a medical and other health service (Bill Type 34).

For DME billed under the home health benefit, generate a notice to the beneficiary to be used for payment of coinsurance by Medicaid and other supplementary insurance carriers. An EOMB or other notice may be used, but include the following language:

"Effective July 18, 1984, an individual receiving home health services is required to pay 20 percent coinsruance for the use of DME, e.g., hospital bed, wheelchair, respirator, walker. For your portion of the charge for use of durable medical equipment furnished to you from ________________ to ________________ the provider of services shown above may bill you for $ __________ coinsurance. If you have other health insurance that pays for some or all services not paid by Medicare, you may use this notice to claim the other insurance benefits. Since the insurance company may keep this notice, make a copy before sending it."

3638.5 More Than One Agency Furnished Home Health Services.—When a physician deems it necessary to use two participating HHAs, the physician designates the agency which renders the major services and assumes the major responsibility for the patient's care. The primary agency bills for all services rendered by both agencies and keeps all records pertaining to the care. The secondary agency is reimbursed through the primary agency under mutually agreed upon arrangements.

Where agencies do not agree on a prearranged agreement for billing and reimbursement, each agency:

- o Establishes a home health plan of treatment and required certification.
- o Advises the other agency of services provided to avoid duplication of services.
- o Secures independently the necessary physician signature.

3638.6 Home Health Services Are Suspended or Terminated Then Reinstated.—A physician may suspend visits for a time to determine whether the patient is recovered sufficently to do without further home health services. When the suspension is temporary (not more than 60 days) and the physician later determines that the services must be resumed, the resumed services are paid under the same program (Part A or Part B) and plan of treatment as before. The date care started and the date plan established remain the same as on the initial bill. A no-payment bill should not be submitted for the period in which there were no visits.

For Medicare reimbursement, a suspension of home health visits for more than 60 days terminates the plan of treatment unless the physician has reviewed the plan and made an appropriate recertification (see §3326) within 60 days, indicating that the lapse of visits is a part of the planned regimen for the patient. If there has been no recertification, no discharge bill is prepared by the agency.

There may be instances in which a physician determines that home health services furnished under Part A are no longer necessary and discharges the patient. The physician may later determine that the home health services are again necessary and may establish a plan for services related to the same condition. However, since the previous plan of treatment was terminated, the subsequent services must be established under a new plan of treatment.

3638.7 Preparation of a Home Health Billing Form in No-Payment Situations.—

A. No Utilization Chargeable.—HCFA does not maintain open items on start of care. Therefore, do not forward a bill record on bills where no payment is made.

B. Utilization is Chargeable.—Even though no payment is made, a fully completed home health form must *always* be submitted when:

- o The patient or his representative refuses to request payment on his behalf. The agency should enter "Refused Payment" in the open area under

Item 94. Send the beneficiary a denial notice as indicated in §3722.4, MISC-1, which explains the reason for Medicare nonpayment.

- **You deny the bill because the provider fails to submit the requested information.**
- **The provider is responsible for not filing a timely claim for payment. (See §3309.1.)**
- **A waiver of liability decision results in the beneficiary being found without fault and the provider being at fault. Process the bill as a nonpayment case, even though the beneficiary may be reimbursed through the indemnification procedure.**

If the bill reviewer determines that additional information is needed for any item on the bill in order to make a final decision, and the provider fails to submit the requested information, deny the entire bill. Denying the entire bill:

- Permits easier bill processing procedures;
- Protects the beneficiary because he cannot be billed by the provider for any services furnished for the billing period;
- Motivates the provider to submit the needed information; and
- Provides for simpler procedures if the bill is later reopened.

3638.8 Intermediary Denies HHA Bill But Plan of Treatment Still in Effect.—After previous bills have been paid for a beneficiary under a plan of treatment which is still in effect, a bill submitted to you may be noncovered, e.g., for services that are precluded from payment or for items or services not related to the plan of treatment. Process the denial and notify the beneficiary. Do not batch the nonpayment bill. Retain the bill and records until 60 days have elapsed after the last covered services were provided, since at that time the plan of treatment may be considered terminated.

When you determine that noncovered services were furnished from the start of care date to discharge, notify the provider and beneficiary but do not submit a bill to HCFA.

3638.9 Billing for Part B Medical and Other Health Services.—Form HCFA-1450 is submitted for certain Part B medical and other health services for which a HHA may receive reimbursement. (See §3127.)

A. Patient Not Under a Home Health Plan of Treatment or Visits Exhausted.—The HHA uses a HCFA-1450 (Bill Type 34x) to bill for certain Part B "medical and other health services" when there is no home health plan of treatment. Specifically the HHA may bill for the following services. (There must be a physician's certification on file.):

o Surgical dressings, splints, casts, and other devices used for reduction of fractures and dislocations.

o Rental or purchase of DME.

o Ambulance service operated by the HHA.

o Prosthetic devices. (See §3660.6 for billing enteral and parenteral supplies and equipment.)

o Leg, arm, back, and neck braces, trusses, and artificial legs, arms, and eyes.

o Outpatient physical therapy services. (See §§3147ff.)

o Outpatient speech pathology services. (See §§3147ff.)

o Outpatient occupational therapy services. (See §§3147ff.)

B. The Patient is Under a Home Health Plan of Treatment.—If a patient is receiving home health services under a plan of treatment the agency may bill for the following services on form HCFA-1450 (Bill Type 34x). All other services are home health services and should be billed for on form HCFA-1450 with Plan of Treatment Bill Types (33x for Part A or 32x for Part B.)

o Ambulance service operated by the HHA.

o Prosthetic devices not covered as medical supplies. (See §3660.6 for billing for enteral and parenteral supplies and equipment.)

o Rental or purchase of DME.

o Outpatient rental or purchase of DME.

NOTE: Do not bill rental or purchase of DME or outpatient physical therapy, speech pathology and occupational therapy services as a medical and other health service unless the patient is entitled to Part B only and elects to have these services billed under this benefit.

C. Billing Spanning Two Calendar Years.—The agency should not submit a Part B medical and other health services bill for an inclusive period beginning in one calendar year and extending into the next. If the agency does not bill on a calendar month basis, it prepares two bills. The first covers the period ending December 31 of the old year; the second, the period beginning January 1 of the new year. This permits you to apply the appropriate deductible for both years.

3642. RURAL HEALTH CLINICS

A. Full-Time Physician Employees.—Physicians who are full-time employees of a RHC may furnish services to clinic patients at the clinic facility or in other locations, such as in a patient's home or in a hospital. These services are RHC services and are reimbursable only to the clinic. Thus, a physician who is a full-time employee of a RHC may not bill the Medicare program through the carrier for services furnished to Medicare beneficiaries who are clinic patients regardless of place of service. It is possible, however, that such physicians may provide services to beneficiaries who are not clinic patients and payment may be made on a reasonable charge basis for these services. In these situations, such physicians would bill the Medicare program through the carrier for services furnished to Medicare beneficiaries for these nonclinic services.

NOTE: The status of whether a physician is full time or part time is determined by his agreement with the RHC.

B. Part Time Physician Employees-RHC Services.--A physician who is a part time employee of the clinic may provide medical services to clinic patients under an agreement with the clinic. In that event, any services furnished by the physician to patients at the clinic facility are RHC services, and, as such, are reimbursable only to the clinic. The physician must seek compensation for the services from the clinic; the services may not be billed to the Medicare program on a reasonable charge basis. The amount paid by the clinic for the services is an allowable clinic cost to the extent it is reasonable.

C. Part Time Physician Employees-Non-RHC Services.--The services furnished to clinic patients in locations other than at the clinic facility by physicians who are not full-time employees of a clinic may or may not be RHC services, depending upon the agreement between the clinic and the physician. If the agreement provides that the clinic will compensate the part-time physician for these services, the clinic includes this compensation in its allowable costs and is reimbursed as part of its per visit rate. The physician may not bill the Medicare program on a reasonable charge basis.

If the clinic's agreement with the part-time physician does not provide for the clinic to compensate the physician for services furnished to clinic patients in locations other than at the clinic facility, Medicare payment for covered services furnished to beneficiaries at other sites is on a reasonable charge basis through the area carrier.

D. Other Services.--Certain items and services furnished by clinics may be covered under the Medicare program but are not included in the definition of RHC services. Among these are ambulance sevices and DME. Clinics may bill the carrier on a reasonable charge basis for these services.

3642.1 Coordination Between RHC Intermediaries and Carriers.--Because of the reimbursement practices when physicians associated with an RHC are eligible to receive payment from either you or the area carrier, close coordination among the RHC, you, and the carrier is required to prevent duplicate payment.

A. Release of Information From the RHC to You.--Within 30 days of receipt of certification of the RHC, secure the following information:

- o The names of all physicians associated with the clinic and their relationship with the clinic (e.g., owner, full or part-time supervisor or other) and the address of any place other than the clinic where the physician renders services.
- o A copy of any written compensation agreement between the physician and the clinic.

You should receive a list of any accretions or deletions to the above list of personnel within 30 days of the occurrence.

B. Transfer of Information Between You and the Area Carrier.-- Within 60 days of certification of the RHC, send to the carrier servicing the area in which the RHC is located the following:

- o The names of all physicians associated with the clinic, their relationships with the clinic, and the address of any place other than the clinic where they render services;
- o A copy of any written compensation agreement between the physician and the clinic; and
- o The names of all RHC physicians who must also provide coverage at the emergency room of hospitals at which they have staff privileges.

NOTE: Travelers acts as the Part B carrier for Railroad Retirement beneficiaries. These beneficiaries can be distinguished from other beneficiaries by their unique claim numbers. These numbers contain an alpha prefix instead of an alpha suffix. The RHC intermediary must also send the above information to Travelers within the time frames specified and carry out the following duplicate check procedures.

Provide the area carrier and Travelers with anv accretions or deletions to the above information within 15 days of receipt.

C. Comparison of Your and Carrier Records for Providers Associated with RHCs.--During the first week of each calendar quarter (January, April, July, October) provide the appropriate carrier with a magnetic tape in HICN sequence containing only the claims of the RHCs involved with a given carrier that were processed and paid within the previous 3 months. A tape will be created for each carrier servicing any medical personnel who are affiliated with a RHC.

The format of the tape is:

Tape Header

Standard IBM

LINE ITEM

HIC/Beneficiary Name/Date of Service/Provider Identification/Control Number

Tape Characteristics

9 Track
1600 BPI
Standard 1200' or 2400' reel

External Label

Intermediary Name, Address, Record Identification Rural Health Clinic Dup Control (date), Record Length, Block Size

Record Description

Field	Size	Type	Location
1. HICN (See §3502ff. for an explanation of the HICN). The number is shown left-justified with unused columns blank.	12	A/N	1-12
2. Beneficiary Surname - First Initial-Middle Initial - Should be left justified. Remaining spaces blank. Do not use punctuation. Show two-word surnames as one word.	8	A	13-20
3. Date of Service - MMDDYY	6	N	21-26
4. Provider Identification - Provider ID Number assigned to the RHC.	6	N	27-32
5. Control Number - May be the DCN, Batch Number, or any data you desire. Data entered here will be returned by the carrier for all matching records.	15	A/N	33-47

In those cases where medical personnel associated with an RHC may be served by more than one carrier, provide the 3-month history to all carriers. This condition may be determined by reviewing the information received from the RHC as explained in §3642C and flagging the records of personnel served by other carriers.

Each quarter:

- Within 15 days of receipt of the intermediary's tape, the carrier will match this tape against its history file. A match is based on:
  - Beneficiary HICN.
  - Date of service on your record being the same or within dates of service on the carrier's file.
- For all records determined to be a potential duplicate, the carrier sends a copy of its history file and supporting documentation to interpret the history, including the control number of the matching record for investigation. (Documentation will only be provided with the initial submittal.) The carrier provides a history printout unless tape is specifically requested.
- Investigate matches by comparing the RHC's bill to the record received from the carrier and determining which, if any, is a duplicate charge. Depending on initial findings, determine whether all matches require development or whether a sample review is sufficient.
- If you determine that the RHC was in error, make necessary adjustments and institute recovery procedures against the RHC. (See SS3707ff.)
- If you determine that the carrier-filed HCFA-1490 was in error, send all pertinent information to the affected carrier for necessary action.

3644. DIALYSIS FOR ESRD - GENERAL

A. Methods of Payment for Home Dialysis Patients.--Medicare beneficiaries dialyzing at home can choose between two methods for Medicare program payment for care (exclusive of physician services). The choice is indicated on Form HCFA-382, Beneficiary Selection Form. A change in method may be made annually effective January 1 of the following year. The ESRD facility is responsible for obtaining the selection form and forwarding it to you.

In addition, HCFA includes the method the beneficiary has selected in the query reply "S" trailer which is appended to query replies or to the Code 39 automatic notice. See §3535.1).

Method I

If the dialysis facility with which the Medicare home patient is associated assumes responsibility for providing all home dialysis equipment and supplies, the beneficiary may decide to have the facility provide these items. For this service, the facility receives the same Medicare dialysis payment rate as it would receive for an infacility patient under the composite rate system. The beneficiary is responsible for paying any unmet Part B deductible and the 20-percent coinsurance on the Medicare rate to the facility.

Under Method I items and services included in the composite rate must be furnished by the facility, either directly or under arrangement. If it fails to provide (either directly or under arrangements) any part of the items and services covered under the rate, the facility cannot be paid any amount for the items and services that it does furnish. These items and services include:

- Medically necessary dialysis equipment and dialysis support equipment;
- Home dialysis support services including the delivery, installation, maintenance, repair, and testing of home dialysis equipment, and home support equipment;
- Purchase and delivery of all necessary dialysis supplies;
- Routine ESRD related laboratory tests; and
- All dialysis services furnished by the facility's staff.

Some examples (but not on all-inclusive list) of items and services that are included in the composite rate and may not be billed separately when furnished by a dialysis facility are:

- Staff time used to administer blood;
- Declotting of shunts and any supplies used to declot shunts;
- Oxygen and the administration of oxygen; and
- Staff time used to administer nonroutine parenteral items.

See Chapter 27 of the Provider Reimbursement Manual, Part I, for more information on establishing the composite rate.

Method II

The beneficiary retains the right to deal directly with the Medicare program and make arrangements for securing the necessary supplies and equipment to dialyze at home. Under this arrangement, the beneficiary is responsible for dealing with the facility or the various suppliers and the Medicare program to arrange for payment. The beneficiary is also responsible to the facility or suppliers for any unmet Part B deductible and the 20-percent Medicare coinsurance requirements. The dialysis facility may not bill for or receive the composite rate for treatments furnished.

The facility furnishes and bills for all home dialysis support services. The facility may be paid for home dialysis support services; the beneficiary may not. However, the beneficiary may obtain the remaining supplies and equipment from the facility that are not obtained from a supplier. If the beneficiary chooses the facility to act as a supplier, the facility may bill you for any supplies and/or equipment it provides. Hospital-based facilities are reimbursed the reasonable cost of support services and any items not furnished by an outside supplier, subject to the lesser of cost or charges provisions of section 1833(a)(2)(A) of the Social Security Act. Independent facilities are reimbursed on a reasonable charge basis for any home dialysis support services they furnish; and on a reasonable cost basis for any supplies or equipment they furnish.

B. Processing Home Dialysis Claims.--

o Use the method of election information provided in the 'S' query reply trailer to verify the beneficiary's election. See §3535.1.

o Check the claim to determine if there is EGHP insurance. See §§3490ff. where the beneficiary is covered under the EGHP insurance.

o If the beneficiary has elected Method I, process the claim per §3644.1.

o If the beneficiary has elected Method II, do not pay the composite rate. Follow §3644.3.

o The effective date of the election chosen by the home dialysis beneficiary on the HCFA-382 is the date the patient signed the form. Prior to that date all home dialysis items and services are billed and reimbursed in accordance with Method II. Therefore, the facility may not be paid the composite rate for any home dialysis treatments furnished prior to the date that the patient signed the HCFA-382. The effective date for changes is the January 1 that follows the date of election.

o All home dialysis patients must have chosen either Method I or Method II. If you receive a claim on behalf of a beneficiary for whom you have not received a copy of the HCFA-382, hold the claim. Contact the facility immediately for a copy of the HCFA-382. Process the claim accordingly.

C. Reduction in Medicare Program Reimbursement Due to P.L. 99-509.—

1. General.—On October 21, 1986, the Omnibus Budget Reconciliation Act of 1986 (OBRA) (P.L. 99-509) was enacted. Section 9335(j) of OBRA requires the Secretary to reduce the amount of each composite rate payment for each treatment by 50 cents and to allocate these amounts to ESRD network activities. This section of OBRA applies to all dialysis treatment furnished on or after January 1, 1987. All Medicare hospital-based and independent ESRD facilities reimbursed the composite rate are affected.

2. Changes Required in Bill Payment Procedures.—Revise your program for calculating payment. Deduct 50 cents per treatment on each claim from the amount paid to ESRD facilities for all treatments furnished on or after January 1, 1987. For example, if a facility's composite rate payment is $120, Medicare will pay the renal facility $95.50 per treatment, ($120 x 80% - $.50). The 50 cents reduction is also applicable to modes of dialysis other than hemodialysis (including training treatments). Reduce the facility's weekly composite rate payment by $1.50 for CAPD or continuous CCPD. Where there is less than a week of CCPD or CAPD treatment, prorate the $1.50. For peritoneal dialysis furnished in sessions of greater than 20 or 30 hours per treatment, multiply the 50 cents reduction times 1.5 or 3 depending upon the length of the treatment.

Report the reduction amount in your PS&R and UNIBILL using value code 71 in field 30 of UNIBILL to identify monies withheld to fund ESRD networks. Enter the dollar amount in field 31 of UNIBILL.

Indicate for the individual claims on your remittance record to the facility the Medicare payment reduction allocated toward funding the ESRD networks.

3. Application of ESRD Network Funding to MSP Claims.—Apply the ESRD offset for network funding on MSP claims as follows:

o Where another payer, primary to Medicare, pays the claim in full, no ESRD offset is applicable;

o Where another payer, primary to Medicare, makes a partial payment, deduct the ESRD offset for each treatment as described in subsection C2 from the Medicare secondary payment amount;

o Where the ESRD offset amount is greater than the secondary payment amount, apply the entire Medicare secondary payment amount towards the ESRD network funding. No Medicare secondary payment would be made to the facility in this situation and no further ESRD offset is applicable. Do not make an additional ESRD offset for treatments on this claim against other payments to the facility on the same remittance or on future payments for the same beneficiary.

See §§3490.8 and 3490.9 for determining what constitutes a full or partial payment by a primary payer.

3644.1 Special Consideration When Processing ESRD Bills Under Method I.—Laboratory reimbursement for certain laboratory tests, whether performed by the facility or through an independent laboratory, is included in the composite rate and may not be billed separately. These tests are listed in SS3172ff.

Hospitals may not show charges anywhere on the bill for these laboratory tests if they are performed in the hospital's laboratory. Hospitals must maintain a log of these charges in their records for cost apportionment purposes. Charges for any laboratory tests performed in the dialysis unit must be included in the hospital's dialysis charge.

Pharmacy

Parenteral items routinely used in the dialysis procedure are covered under the facility's composite rate. Following is a list of the routine items that may not be billed separately:

heparin
protamine
mannitol
saline
glucose
dextrose
antiarrythmics

Also, included in routine pharmacy would be topical anesthetics (e.g., xylocaine).

There are other parenteral items that are not routinely furnished as a part of the dialysis procedure but may be medically necessary for some patients receiving dialysis. When furnished to infacility dialysis patients these may be billed separately provided they are justified for medical necessity. They include:

antibiotic
hematinics
anabolics
analgesics
sedatives
tranquilizers
muscle relaxants

These other parenteral items (i.e., those not included as routine) may only be billed by a ESRD facility if they are administered in the facility by its staff.

CCPD and CAPD Sessions - CCPD and CAPD is billed and reimbursed on the basis of an equivalence rate. Because CCPD and CAPD are continuous therapies, and not furnished in discrete treatments, they are reimbursed at three times the facility's per treatment composite rate per week. The facility must show the number of patient weeks (including any fraction of a patient week) in place of the number of treatments. If the patient is hospitalized, is dialyzed in a facility, or the facility bills on a monthly basis and there are 31 days in the month, the odd days are accounted for by prorating the weekly rate by 1/7 for each day.

Example

Facility A has a CAPD patient who dialyzes on CAPD for the full month of January. Facility A bils on a monthly basis and its per treatment composite rate is $130.

For the 3 additional days:
CAPD daily rate = 1/7 x $390 = $55.71
2 x $55.71 = $167.13

The proper total amount billed for January is:

$1,560 + $167.13 = $1727.13

Part B
Assume the patient's deductible amount is met. Your payment is 80% x $1,727.13 = $1,381.70.

Require facilities to bill only full weeks (e.g., every 4 weeks) to avoid the above computation.

Training Sessions'

Hemodialysis, Peritoneal Dialysis, and CCPD

Training sessions for these types of dialysis are billed at their approved frequencies and reimbursed the composite rate plus $20.

CAPD Training Sessions

CAPD training sessions are reimbursed the composite rate plus $12. A maximum of 15 CAPD training sessions are covered routinely for each patient. The training session(s) billed must be enumerated on the bill (either in the unlabeled column to the right of item 50 or in Remarks), e.g., "CAPD training sessions nos. 6-10." Claims for additional training sessions beyond 15 may be paid if they are documented for medical necessity. Extra training sessions raise questions about either the adequacy of CAPD for the patient or the patient's capacity to learn to perform the CAPD technique. The patient's physician should address these questions in his explanation of the need for extra training sessions. Report any facilities that consistently bill for excessive CAPD training sessions to the ARA, HSQ RO to determine whether there are any problems with the facility's training program that require improvement.

If it is necessary to supplement the patient's CAPD during training with either hemodialysis or peritoneal dialysis sessions, these sessions are billed and reimbursed as any other session furnished by the facility.

The facility must indicate on the bill the number of the session and that this session is supplemental to CAPD training; e.g., "CAPD training supplemental dialysis session no. 2." Normally, not more than three supplemental dialysis sessions during the training course are necessary.

Infacility Back-Up Dialysis

A back-up dialysis is an infacility dialysis furnished to a home dialysis patient.

Condition code 76 must appear as one entry in items 35 through 39.

Equipment and Equipment Related Services Provided to Home Dialysis Patients

Home dialysis equipment may not be billed separately. It is included in the composite rate.

Delivery, installation, repair, maintenance, and removal services may only be billed separately under a 100-percent reimbursement agreement for home dialysis equipment. The composite rate adjusted (composite rate reduced by $12) is used to reimbursement the remaining items and services covered under the composite rate.

best copy available

3644.2 Review of ESRD Bills Under Method I.—All items on the HCFA-1450 are completed in accordance with §3604 except for the following.

Item 4. Type of Bill

Required. This three-digit numeric code gives three specific pieces of information. The first digit identifies the type of facility. The second classifies the type of care. The third indicates the sequence of this bill in this particular episode of care. It is referred to as a "frequency" code.

Code Structure (only codes used to bill Medicare are shown).

First Digit - Type of Facility

Hospital-based renal dialysis facilities enter code "1" Hospital.

Independent renal dialysis facilities enter code "7" Clinic.

Second Digit - Classification

Hospital-based renal dialysis facilities enter code "3" Outpatient.

Independent renal dialysis facilities enter code "2" Free-Standing Renal Dialysis Center.

Third Digit - Frequency

Hospital-based and independent renal facilities enter the appropriate code as defined below.

1 - Admit Through Discharge Claim	This code is used for a bill encompassing an entire course of outpatient treatment for which the provider expects reimbursement from the payer.
2 - Interim - First Claim	This code is used for the first of an expected series of payment bills for the same course of treatment.
3 - Interim - Continuing Claim	This code is used when a payment bill for the same course of treatment has been submitted and further bills are expected to be submitted later.
4 - Interim - Last Claim	This code is used for a payment bill which is the last of a series for this

	course of treatment. The "Through" date of this bill (Item 22) is the discharge date for this course of treatment.
5 - Late Charge Only	This code is used only for outpatient claims. Late charge bills are not accepted for Medicare inpatient claims.
7 - Replacement of Prior Claim	This code is used when the provider wants to correct (other than late charges) a previously submitted bill. This is the code applied to the corrected or "new" bill.
8 - Void/Cancel of a Prior Claim	This code indicates this bill is an exact duplicate of an incorrect bill previously submitted. A code "7" (Replacement of Prior Claim) is also submitted to show the corrected information.

Item 15. Admission Date
Not required.

Item 17. Type of Admission
Not required.

Item 18. Source of Admission
Not required.

Item 21. Patient Status
Not required.

Item 22. Statement Covers Period (From-Through)
Required. Hospital-based and independent renal dialysis facilities:

Show the dates during which the patient's care was under the supervision of the facility. Exclude dates when the patient's care was under the supervision of another entity (e.g., hospital, another ESRD facility, SNF.)

Item 23. Covered Days
Not required.

Item 24. Noncovered Days
Not required.

Item 25. Coinsurance days
Not required.

Item 26. Lifetime Reserve Days
Not required.

Item 33. Occurrence Span Code and Dates
Not required.

Item 34. Untitled
Not required.

Item 35, 36, 37, 38, and 39. Condition Codes
Required. Hospital-based and independent renal facilites complete this item. Note that one of the codes 71-76 will be applicable for every bill.

Code Structure (only codes effecting Medicare payment/processing are shown).

CODE	TITLE	DEFINITION
02	Condition is Employment Related	Providers enter this code if the patient alleges that the medical condition causing this episode of care is due to environment/events resulting from employment.
04	Patient is HMO Enrollee	Providers enter this code to indicate the patient is a member of an HMO.
71	Full Care in Unit	Providers enter this code to indicate the billing is for a patient who received staff-assisted dialysis services in a hospital or renal dialysis facility.
72	Self-Care in Unit	Providers enter this code to indicate the billing is for a patient who managed his own dialysis services without staff assistance in a hospital or renal dialysis facility.
73	Self-Care in Training	Providers enter this code to indicate the billing is for special dialysis services where a patient and his helper (if necessary) were learning to perform dialysis.
74	Home	Providers enter this code to indicate the billing is for a patient who received dialysis services at home but code 75 below did not apply.

CODE	TITLE	DEFINITION
75	Home 100 Percent Reimbursement	Providers enter this code to indicate the billing is for a patient who received dialysis services at home using a dialysis machine that was purchased under the 100 percent program.
76	Back-up Infacility Dialysis	Providers enter this code to indicate the billing is for a home dialysis patient who received back-up dialysis in a facility.

Item 40. Pints of Blood Furnished
Required. Hospital-based and independent renal facilities must complete this item. Providers enter the total number of pints of blood or units of packed red cells furnished, whether or not replaced. Blood is reported only in terms of complete pints rounded upwards, e.g., 1 1/4 pints is shown as 2 pints. This entry serves a basis for counting pints towards the blood deductible.

Item 41. Pints of Blood Furnished
Required. Hospital-based and independent renal facilities must complete this item. Providers enter the total number of pints of blood donated on the patient's behalf. Where one pint is donated, one pint is replaced. If arrangements have been made for replacement, pints are shown as replaced. Where the provider charges only for the blood processing and administration, i.e., it does not charge a "replacement deposit fee" for unreplaced pints, the blood is considered replaced for purposes of this item. In such cases, all blood charges are shown under the 39x revenue code series (blood administration).

Item 42. Pints of Blood Not Replaced
Required. Hospital-based and independent renal facilities must complete this item. Providers enter the difference between the number of pints of blood furnished and the number of pints replaced.

Item 43. Blood Deductible Pints
Required. Hospital-based and independent renal facilities must complete this item. Providers enter the number of unreplaced deductible pints of blood supplied. If all deductible pints furnished have been replaced, no entry is made.

Item 44. Special Program Indicator
Not required.

Items 46, 47, 48, and 49. Value Codes and Amounts

Required. Providers enter a code(s) and related amount(s) to identify data of a monetary nature necessary for the claim's processing. The codes are two numeric digits, and each value allows up to eight numeric digits (000000.00). Negative amounts are never shown. If more than one value code is shown for a billing period, codes are shown in ascending numeric sequence. There are two lines of data, line "a" and line "b." Items 46a through 49a are used before Items 46b through 49b (i.e., the first line is used up before using the second).

Code Structure (Only codes used to bill Medicare are shown.)

Code	Title	Definition
06	Medicare Blood Deductible	Part B Code indicates the amount that the patient paid for unreplaced deductible blood.
07	Medicare Cash Deductible	Part B Providers enter this code to indicate that the amount shown is the Part B cash deductible the patient paid in cases where the Part B blood deductible was also paid. In all other cases, the entry in item 60 reflects the Part B deductible paid by this patient and no entry is needed in this item.
12	Working Aged Beneficiary/Spouse With EGHP	Providers enter this code to indicate the amount shown is for a higher priority employer group health insurance payment made on behalf of an aged beneficiary that the provider is applying to covered Medicare charges on this bill. If the provider enters six zeros (0000.00) in the amount field, it is claiming a conditional payment because the EGHP has denied coverage.
13	ESRD Beneficiary in the 12-Month Coordination Period With An EGHP	Providers enter this code to indicate that the amount shown is that portion of a higher priority EGHP payment on behalf of an ESRD beneficiary that

Code	Title	Definition
		applies to covered Medicare charges on this bill. If the provider enters six zeros (0000.00) in the amount field, it is claiming a conditional payment because the EGHP has denied coverage or there has been a substantial delay in its payment.
14	Automobile, No-Fault, or Any Liability Insurance	Providers enter this code to indicate the amount shown is that portion of a higher priority automobile, no-fault, or liability insurance payment made on behalf of a Medicare beneficiary that they are applying to covered Medicare charges on this bill. If they enter six zeros (0000.00) in the amount field, they are claiming a conditional payment because the other insurer has denied coverage or there has been a substantial delay in its payment.
15	WC/BL	Providers enter this code to indicate the amount shown is that portion of a higher priority WC insurance payment made on behalf of a Medicare beneficiary that the provider is applying to covered Medicare charges on this bill. If the provider enters six zeros (0000.00) in the amount field it is claiming a conditional payment because there has been a substantial delay in the other payer's payment.
16	VA, PHS, Other Federal Agency	Providers enter this code to indicate the amount shown is that portion of a higher priority VA, PHS, or other Federal Agency's payment made on behalf of a Medicare beneficiary that they are applying to covered Medicare charges on this bill.
71	Funding of ESRD Networks	PROVIDERS DO NOT ENTER THIS CODE. FOR PAYER INTERNAL USE ONLY. Indicates the amount of Medicare payment reduction to help fund the ESRD networks.

Item 50. Revenue Description
Required. Refer to §3170 for detailed information on when providers may bill for these revenue centers. A complete list of revenue codes and descriptions is in Addendum C.

Unlabeled Column Required with Peritoneal Dialysis

When a revenue code in the 83x series (peritoneal dialysis) is placed in Item 51, an entry must also appear in the untitled column to the left of Item 51. This entry identifies the duration (number of hours) of the peritoneal treatments.

Peritoneal dialysis is usually done in sessions of 10-12 hours durations 3 times per week, and each session is billed and reimbursed as one treatment. Providers enter the number of hours for each session in this column. They also enter the number of sessions (treatments) in Item 52.

Some peritoneal dialysis is done only once or twice a week for a longer duration per treatment. Therefore, peritoneal dialysis sessions of between 20-29 hours duration will be reimbursed as 1 1/2 treatments. However, for purposes of billing, since fractions or decimals are not acceptable, the number of treatments is rounded upwards e.g., 1 1/2 treatments are equal to 2. The total number of treatments is placed in Item 52. In the unlabeled column, the number of hours for each treatment is entered so that proper reimbursement can be made.

Extended peritoneal dialysis sessions of 30 hours or more, given once a week, in place of 2 or 3 sessions of shorter duration are billed and reimbursed as three treatments. Providers enter the number of hours for each session in this column. They also enter the number of treatments in Item 52.

Item 52. Units of Service
Required. Hospital-based and independent renal facilities must complete this Item. The entries quantify services by revenue category, e.g., number of dialysis treatments. Units are defined as follows:

82X (Hemodialysis) - Sessions
83X (Peritoneal) - Sessions
84X (CAPD) - Days covered by the bill
85X (CCPD) - Days covered by the bill

Item 53. Total Charges
Required. Hospital-based and independent renal facilities must complete this item. Providers must show their customary charge in this item to correspond to the appropriate revenue code in Item 51. They must not enter their composite rate as their charge. The last revenue code entered in column 51 is "001" representing the total of all charges billed.

3644.3 Special Consideration When Processing ESRD Bills Under Method II.—These instructions apply only to home dialysis items and services billed and reimbursed under Method II. Under Method II, all home dialysis items and services must be billed and reimbursed on an itemized basis.

Under Method II, the home dialysis patient may choose to obtain home dialysis equipment and/or supplies directly from a supplier that is not a facility. In this case the patient (or supplier) bills the carrier. However, if the home dialysis patient chooses to obtain home dialysis equipment and/or supplies from the facility, the facility bills its intermediary on an itemized basis using basis using a HCFA-1450.

A. Laboratory.—Independent facilities may not bill for laboratory tests.

Hospital-based laboratories providing laboratory service to hospital dialysis patients of the hospital's dialysis facility will be paid in accordance with the outpatient lab provisions. However, where the hospital lab does tests for an independent dialysis facility or for another hospital's facility, the nonpatient billing provisions apply.

Specimen collection fee up to $3 will be allowed only in the following circumstances:

- Drawing a blood sample through venipuncture (i.e., inserting into a vein a needle with a syringe or vacutainer to draw the specimen).
- Collecting a urine sample by catheterization. Both independent and hospital-based facilities bill this fee.

B. Pharmacy.—All routine ESRD parenteral items are billed in this item. Routine parenteral items may be covered without documentation for medical necessity and may be billed by an ESRD facility regardless of where they are furnished. All other parenteral items may only be billed by a hospital-based ESRD facility if they are administered in the hospital facility by its staff. They must be documented for medical necessity, either through information on the claims form, or as requested by you. Hospital-based facilities are reimbursed on a reasonable cost basis. Independent facilities are reimbursed on a reasonable charge basis. Obtain the reasonable charge from the carrier.

C. Home Dialysis Equipment.—Equipment that is owned by a facility may not be furnished by the facility on a rental basis. It must be sold. It is billed and reimbursed on either a lump sum or periodic purchase payment basis.

A facility may only furnish home dialysis equipment on a rental basis, if the facility itself rents the equipment from a supplier or manufacturer. In this case, no markup is allowed to the facility above its rental charge.

Determine the allowable cost of equipment furnished by or through a facility at the time you process the claim. You may also be able to compare this cost against the equipment costs reported by the facility on its Renal Dialysis Cost Report. Check with your audit department to determine whether the facility reported home dialysis equipments costs for patients not under the composite rate in a way that can be used for this purpose. Equipment distributed directly to a home patient by a manufacturer, but billed to the facility, is considered as furnished through the facility on the date the equipment is delivered.

Those services furnished with respect to dialysis equipment purchase before August 1, 1983, under the 100-percent reimbursement agreement, continue to be reimbursed at 100 percent of their costs.

D. Support Services.—All home dialysis support services must be furnished by a renal dialysis facility. A facility must bill for these services, and only a facility may be reimbursed. Hospital-based facilities are reimbursed on a reasonable cost basis. Independent facilities are reimbursed on a reasonable charge basis. An appropriate chrge for a service furnished by an independent facility must be reasonably related to the cost of furnishing the service. For example, the facility should indicate the length of time, type of personnel, and travel used in furnishing the service so that you may estimate the cost of furnishing that service. Do not allow a charge that is unreasonably related to the cost (e.g., a charge of twice the cost).

E. Support Services Furnished to Home CAPD Patients.—The support services specifically applicable to home CAPD patients must be furnished and billed by the sponsoring CAPD certified facility. These include, but are not limited to:

- Changing the connecting tube (also referred to as an "adminsitration set").
- Watching the patient perform CAPD and assuring that it is done correctly, and reviewing for the patient any aspects of the technique he may have forogtten, or informing the patient of modifications in apparatus or technique.
- Documenting whether the patient has or had had peritonities that requires physician intervention or hospitalization, (unless there is evidence of peritionities, a culture for peritonities is not necesary).
- Inspection of the catheter site.

These services are furnished in accordance with the written plan required for home dialysis patients. Each of the CAPD support services may be covered and reimbursed routinely at a frequency of once per month. Any support services furnished in excess of this frequency must be documented for medical necessity. For example, the patient may contract peritonities and require an unscheduled visit. (See §3170.3.)

Support services are reimbursed on a reasonable charge basis to independent facilities and a reasonable cost basis to hospital-based facilities. A reasonable cost determination must be made for each individual support service furnished to home CAPD patients. Use $75 as a guideline for the total of the reasonable costs for all support serivces furnished to each home CAPD patient in a month except changing the connecting tub (also referred to as the "administration set"). Lab services and supplies are not included. The connecting tub change may be reimbursed at an additional amount which generally should not exceed $15. (This amount includes both the supplies and the personnel service required. Although the guidelines provided appear to be high for the services, they are also intended to reflect the fact that staff time is often spent helping the patient in ways that cannot be directly billed, e.g., consulting with the patient over the phone.

F. Revenue Codes.—Only the following revenue codes may be billed.

25X **Pharmacy**

Charges for medication produced, manufactured, packaged, controlled, assayed, dispensed and distributed under the direction of a licensed pharmacist. This includes blood plasma, other components of blood, and IV solutions.

This category should be used only for nonroutine drugs and biologicals since routine drugs and biologicals are included in the composite rate under METHOD I and are part of home dialysis supplies under METHOD II. They must be documented for medical necessity. The administration of drugs and biologicals (both staff time and supplies are covered and billed as revenue code 259).

Subcategory	Standard Abbreviation
0 - General Classification	PHARMACY
1 - Generic Drugs	DRUGS/GENERIC
2 - Non-generic Durgs	DRUGS/NONGENERIC
4 - Blood Plasma	BLOOD/PLASMA
5 - Blood-Other Components	BLOOD/OTHER
8 - IV Solutions	IV SOLUTIONS
9 - Other Pharmacy	DRUGS/OTHER

27X **Medical/Surgical Supplies**

Charges for supply items required for patient care.

Rationale: Additional breakdowns are provided for items that hospitals may wish to identify because of internal or third party payer requirements.

30X **Laboratory**

Charges for the performance of diagnostic laboratory tests.

Rationale: A breakdown of the major areas in the laboratory is provided in order to meet hospital needs or third party billing requirements.

Subcategory	Standard Abbreviation
0 - General Classification	LABORATORY or (LAB)
1 - Chemistry	LAB/CHEMISTRY
2 - Immunology	LAB/IMMUNOLOGY
3 - Renal Patient (Home)	LAB/RENAL HOME
4 - Non-Routine Dialysis	LAB/NR DIALYSIS
5 - Hematology	LAB/HEMATOLOGY
6 - Bacteriology & Microbiology	LAB/BACT-MICRO
7 - Urology	LAB/UROLOGY
9 - Other Laboratory	LAB/OTHER

OTE: Under METHOD I, all hospital-based laboratories providing services to patients associated with hospital-based dialysis facilities are reimbursed according to the 62 percent fee screen. These bills are sent to you for payment. However, if the hospital is acting as an independent laboratory, it must bill you but will be reimbursed at the 60 percent level.

31X Laboratory Pathological

Charges for diagnostic laboratory tests on tissues and culture.

Rationale: A breakdown of the major areas that providers may wish to identify is provided.

Subcategory	Standard Abbreviation
0 - General Classification	PATHOLOGY LAB or (PATH LAB)
1 - Cytology	PATHOL/CYTOLOGY
2 - Histology	PATHOL/HYSTOL
4 - Biopsy	PATHOL/BIOPSY
9 - Other	PATHOL/OTHER

32X Radiology - Diagnostic

Charges for diagnostic radiology services provided for the examination and care of patients. Includes: taking, processing, examining and interpreting radiographs and fluorographs.

Rationale: A breakdown is provided of the major areas and procedures that individual providers or third party payers may wish to identify.

Subcategory	Standard Abbreviation
0 - General Classification	DX X-RAY
4 - Chest X-Ray	DX X-RAY/CHEST
9 - Other	DX X-RAY/OTHER

38X Blood

Rationale: Charges for blood must be separately identified for private payer purposes.

Subcategory	Standard Abbreviation
0 - General Classification	BLOOD
1 - Packed Red Cells	BLOOD/PKD RED

Subcategory	Standard Abbreviation
2 - Whole Blood	BLOOD/WHOLE
3 - Blood Plasma	BLOOD/PLASMA
4 - Blood Platelets	BLOOD/PLATELETS
5 - Blood Leucocytes	BLOOD/LEUCOCYTES
6 - Blood - Other Components	BLOOD/OTHER COMP
7 - Blood - Other Derivatives (Cryoprecipitates)	BLOOD/ OTHER DER
9 - Other Blood (Describe)	BLOOD /OTHER

39X Blood Storage and Processing

Charges for the storage and processing of whole blood.

Subcategory	Standard Abbreviation
0 - General Classification	BLOOD/STOR-PROC
1 - Blood Administration	BLOOD/ADMIN.
9 - Other Blood Storage & Processing	BLOOD/OTHER STOR

73X EKG/ECG (Electrocardiogram)

Charges for operation of specialized equipment to record electromotive variations in action of the heart muscle on an electrocardiograph for diagnosis of heart ailments.

Subcategory	Standard Abbreviation
0 - General Classifications	EKG/ECG
1 - Holter Monitor	Holter Mont
9 - Other EKG/ECG	Other EKG-ECG

82X Hemodialysis - Outpatient or Home Dialysis

A waste removal process performed in an outpatient or home setting, necessary when the body's own kidneys have failed. Waste is removed directly from the blood.

Rationale: Detailed revenue coding is required; therefore, do not sum services at the zero level.

Subcategory	Standard Abbreviation
0-General Classification	HEMO/OP OR HOME
1-Hemodialysis/Composite	HEMO/OP/COMPOSITE

2-Home Supplies	HEMO/HOME/SUPPL
3-Home Equipment	HEMO/HOME/EQUIP
4-Maintenance/100%	HEMO/HOME/100%
5-Support Services	HEMO/HOME/SUPSERV
9-Other Hemodialysis Outpatient	HEMO/HOME/OTHER

NOTE: This revenue code should not be used to indicate sessions under METHOD II. However, backup dialysis furnished to home patients in the facility may be billed. (See condition code 76.)

83X Peritoneal Dialysis - Outpatient or Home

A waste removal process performed in an outpatient or home setting, necessary when the body's own kidneys have failed. Waste is removed indirectly by flushing a special solution between the abdominal covering and the tissue.

Subcategory	Standard Abbreviation
0-General Classification	PERITONEAL/OP OR HOME
1-Peritoneal/Composite	PERTNL/OP/COMPOSITE
2-Home Supplies	PERTNL/HOME/SUPPL
3-Home Equipment	PERTNL/HOME/EQUIP
4-Maintenance/100%	PERTNL/HOME/100%
5-Support Services	PERTNL/HOME/SUPSERV
9-Other Peritoneal Dialysis	PERTNL/HOME/OTHER

NOTE: This revenue code should not be used to indicate sessions under METHOD II. However, backup dialysis furnished to home patients in the facility may be billed. (See condition code 76.)

84X Continuous Ambulatory Peritoneal Dialysis (CAPD) - Outpatient

A continuous dialysis process performed in an outpatient or home setting, using the patient's peritoneal membrane as a dialyzer.

Subcategory	Standard Abbreviation
0-General Classification	CAPD/OP OR HOME
1-CAPD/Composite	CAPD/OP/COMPOSITE
2-Home Supplies	CAPD/HOME/SUPPL
5-Support Services	CAPD/HOME/SUPSERV
9-Other CAPD Dialysis	CAPD/HOME/OTHER

NOTE: This revenue code should not be used to indicate sessions under METHOD II. However, backup dialysis furnished to home patients in the facility may be billed. (See condition code 76.)

85X Continuous Cycling Peritoneal Dialysis (CCPD) - Outpatient or Home

A continuous dialysis process performed in an outpatient or home setting which uses a machine to make automatic exchanges at night.

Subcategory	Standard Abbreviation
0-General Classification	CCPD/OP OR HOME
1-CCPD/Composite or Other Rate	CCPD/COMPOSITE
2-Home Supplies	CCPD/HOME/SUPPL
3-Home Equipment	CCPD/HOME/EQUIP
4-Maintenance 100%	CCPD/HOME/100%
5-Support Services	CCPD/HOME/SUPSERV
9-Other Outpatient CCPD	CCPD/HOME/OTHER

86X Reserved

87X Reserved

88X Miscellaneous Dialysis

0 - General
1 - Ultrafiltration

3648. REVIEW OF HOSPICE BILLS

Form HCFA-1450 was developed by representatives of the hospital and health insurance industries to be suitable for billing most third party payers (both Government and private). Because it serves the needs of many payers, some data elements may not be needed by a particular payer. Detailed information is given only for items required for Medicare hospice claims. Items not listed need not be reviewed although providers may complete them when billing multiple payers.

Item 1. (Untitled) - Provider Name, Address, and Telephone Number
Required. The minimum entry is the provider's name, city, State, and ZIP code. The post office box number or street name and number may also be included. The State may be abbreviated using standard post office abbreviations. Five or nine digit zip codes are acceptable. Use the information to reconcile provider number discrepancies.

Item 4. Type of Bill
Required. This three-digit numeric code gives three specific pieces of information. The first digit identifies the type of facility. The second classifies the type of care. The third indicates the sequence of this bill in this particular episode of care. It is referred to as a "frequency" code.

Code Structure (only codes used to bill for hospice care are shown).

1st Digit - Type of Facility

8 - Special (Hospice)

2nd Digit - Classification (Special Facility)

1 - Hospice (Nonhospital Based)
2 - Hospice (Hospital Based)

3rd Digit - Frequency	Definition
A - Admission Notice	The hospice notifes you of the beneficiary's election of hospice benefits by fowarding form HCFA-1450. For admission purposes items 1, 4, 7, 10, 11, 12, 13, 15, 65, 68, 77, 92, and 93 are completed. (Also item 34 when the admission is for a patient who has changed an election from one hospice to another.)
1 - Admit Through Discharge Claim	This code is used for a bill encompassing an entire course of hospice treatment for which the provider expects reimbursement from the payer, i.e., no further bills will be submitted for this patient.
2 - Interim - First Claim	This code is used for the first of an expected series of payment bills for a hospice course of treatment.
3 - Interim - Continuing Claim	This code is used when a payment bill for a hospice course of treatment has already been submitted and further bills are expected to be submitted.
4 - Interim - Last Claim	This code is used for a payment bill which is the last of a series for a hospice course of treatment. The "Through" date of this bill (Item 22) is the discharge date or date of death.
7 - Replacement of Prior Claim	This code is used by the provider when it wants to correct (other than late charges) a previously submitted bill.

	This is the code applied to the corrected or "new" bill.
8 - Void/Cancel of a Prior Claim	This code indicates this bill is an exact duplicate of an incorrect bill previously submitted. A code "7" (Replacement of Prior Claim) is also being submitted by the provider showing the corrected information.

Item 7. Medicare Provider Number
Required. This is the six-digit number assigned by HCFA.

Item 10. Patient's Name
Required. The patient's name is shown with the surname first, first name, and middle initial, if any.

Item 11. Patient's Address
Required. This item shows the patient's full mailing address including street number and name, post office box number or RFD, city, State, and ZIP code.

Item 12. Patient's Birthdate
Required. (If available.) The month, day, and year of birth is shown numerically as MM-DD-YY. If the date of birth was not obtained after reasonable efforts by the hospice, the field will be blank.

Item 13. Patient's Sex
Required. An "M" for male or an "F" for female must be present.

Item 15. Admission Date
Required. The admission date to the hospice is used to report the effective date of the hospice election. If a patient changes the election to another hospice, the admission date to the second hospice is shown. It represents the effective date of the hospice election change. The date of admission may not precede the physician's certification by more than 2 calendar days. The month, day, and year are shown numerically as MM-DD-YY.

EXAMPLE: The hospice election (admission) is January 1, 1986. The physician's certification is dated January 10, 1986. The hospice admission date for coverage and billing is January 8, 1986. The first hospice benefit period ends 90 days from January 8, 1986.

Item 21. Patient Status
Required. This code indicates the patient's status as of the "Through" date of the billing period (Item 22).

Code Structure
01 - Discharged (left care of this hospice)
30 - Still patient (remains a patient of this hospice)

40 - Died at home
41 - Died in a medical facility, such as a hospital, SNF, ICF or Free Standing Hospice
42 - Place of death unknown

Item 22. Statement Covers Period (From-Through)
Required. The beginning and ending dates of the period covered by this bill are shown in numeric fields (MM-DD-YY). Days before the patient's entitlement are not shown. The "From" date is used to determine timely filing. (See §§3307ff.) Since the 12 month hospice "CAP period" (see Hospice Manual §§405 and 407) ends each year on October 31, hospice services for October and November cannot be submitted on the same bill.

Items 28, 29, 30, 31, and 32. Occurrence Codes and Dates
Required. Code(s) and associated date(s) defining specific event(s) relating to this billing period are shown. Event codes are two numeric digits and dates are shown as six numeric digits (MM-DD-YY). If there are more occurrences than there are spaces on the form, Item 33 (occurrence span) or Item 94 (remarks) is used to record additional occurrences and dates.

NOTE: There are occurrences on which other payers require reporting that are not shown below. See §3419, §3490, and §3491 to determine when Medicare is the secondary payer.

Code	Title	Definition
42	Termination of Hospice Care	The date the patients hospice care ends. Hospice care may be terminated by a change in the hospice election to another hospice, a revocation of the hospice election, or death. Termination code 42 should be shown in item 28.

NOTE: See §3604 for additional occurrence codes and payment information where other payers are involved.

Item 34. Transferring Hospice I.D.
When a receiving (second) hospice submits an admission notice involving a patient who changed the hospice election and moved from one hospice to another, this item reflects the transferring hospice's complete name, address, and provider number. This information is an alert that the hospice admission continues a hospice benefit period rather than beginning a new one.

Items 46, 47, 48, and 49. Value Codes and Amounts
The only value codes that apply to hospice benefits are those that indicate Medicare payment is secondary to another payer. Deduct the amount of payment shown in the value field from the payment to the hospice. If the primary payment is greater than the payment due the hospice, adjust against past or future payments due the hospice for the beneficiary involved. See §3604 for a complete description of codes used for reporting primary payers.

Item 50. Revenue Description
Required. A narrative description or standard abbreviation for each revenue code shown in column 51 is shown on the adjacent line in column 50. The information assists clerical bill review. Descriptions or abbreviations correspond to the revenue codes shown in Addendum C. "Other" code categories descriptions are locally defined and individually described on each bill.

Item 51. Revenue Code
Required. For each reimbursement rate, a revenue code is assigned. The appropriate three-digit numeric revenue code is entered on the adjacent line in column 51 to explain each charge in column 53.

NOTE: Revenue code 657 identifies provider charges for physician services furnished to hospice patients by physicians employed by the hospice or receiving compensation from the hospice for services rendered. In conjunction with revenue code 657, the provider enters a physician procedure code. Request the carrier to provide area prevailing charge data for physician services provided to hospice patients. Make reasonable charge determinations for revenue code 657 by reimbursing the hospice for the lower of the area prevailing or billed charge. You are responsible for forwarding the physician procedure codes to the provider to facilitate hospice billing.

These are the revenue codes used by hospices to bill Medicare.

Code	Description	Standard Abbreviation
651	Routine Home Care	RTN Home
652	Continuous Home Care	CTNS Home (a minimum of 8 hours, not necessarily consecutive, in a 24 hour period is required. Less than 8 hours is routine home care for reimbursement purposes. A portion of an hour is 1 hour).
655	Inpatient Respite Care	IP Respite
656	General Inpatient Care	GNL IP
657	Physician Services	PHY SER (must be accompanied by a physician procedure code)

Item 52. Units of Service
The hospice enters the number of units for each type of service on the line adjacent to the revenue code and description. Units are measured in days for codes 651, 655, and 656, in hours for code 652, and in procedures for code 657.

Item 53. Total Charges
The hospice enters the total charges for the billing period by revenue code (column 51) on the adjacent line in column 53. The last revenue code entered in column 51 is "001" which represents the grand total of all charges billed. The total will be in column 53 on the adjacent line. Each line allows up to eight numeric digits (000000.00).

Items 57A, B, C. Payer Identification
If Medicare is the primary payer, "Medicare" is on line A.

If Medicare is not the primary payer, the primary payer is identified on line A and Medicare on line B or C, if appropriate. See §§3419, 3490, and 3491 to determine when Medicare benefits are secondary.

Where the primary payer has made payment to the hospice at the time of billing to Medicare, the hospice indicates the type and the amount of payment in Item 46 (value code).

If the primary payer has denied payment, the denial is indicated with zeros in the value amount. The date of the denial and occurrence code 24 is entered in the appropriate occurrence field. Items 65-75 are completed to the extent applicable, and the information is available, for your development with the primary payer. See §3604 for a detailed description of the value codes and Items 65-75.

Items 65A, B, C. Insured's Name
The hospice enters the beneficiary's name on line A if Medicare is the primary payer. The name is shown as on the beneficiary's HI card. If Medicare is the secondary payer the beneficiary's name is entered on line B or C as applicable, and the insured's name on the applicable primary policy is entered on line A.

Items 68A, B, C. Certificate/Social Security Number Health Insurance Claim/Identification Number
On the same lettered line (A, B, or C) that corresponds to the line on which Medicare payer information was shown in Items 57-63, the hospice enters the patient's Medicare HICN; i.e., if Medicare is the primary payer, this information is entered in Item 68A. The number is shown as it appears on the patient's Health Insurance Card, Social Security Award Certificate, Utilization Notice, EOMB, Temporary Eligibility Notice, etc., or as reported by the SSO.

Item 77. Principal Diagnosis Code
The full ICD-9-CM diagnosis code is shown. The principal diagnosis is defined as the condition established after study to be chiefly responsible for occasioning the admission of the patient to the hospice for care.

Item 92. Attending Physician I.D. Required
The name, number and address of the licensed physician normally expected to certify and recertify the medical necessity of the services rendered and/or, who has primary responsibility for the patient's medical care and treatment is here. The hospice uses Item 94 "Remarks" for additional space for recording this information.

Item 93. Other Physician I.D. Required
The word "employee" or "nonemployee" is entered here to describe the relationship the patient's attending physician has with the hospice.

Item 94. Remarks
The hospice enters any information not shown elsewhere on the bill but is necessary for proper payment.

Provider Representative Signature and Date
A hospice representative makes sure that the required physician's certification and a signed hospice election statement is in the records before signing the HCFA-1450. A stamped signature is acceptable.

3648.1 Billing for Covered Medicare Services Unrelated to Hospice Care.—Any covered Medicare services not related to the treatment of the terminal condition for which hospice care was elected, which are provided during a hospice election period, are billed to you for nonhospice Medicare reimbursement. These services are billed by the provider in accordance with existing procedures as a new admission with appropriate query and billing actions.

3648.2 Billing for Covered Medicare Services After Hospice Benefits Are Exhausted.—Covered Medicare services rendered to hospice patients after the maximum 210 day hospice benefit expires, are billed to you for nonhospice Medicare reimbursement. Where hospice benefits are exhausted, billing procedures are the same as those prior to the hospice election. Covered services are billed by the provider in accordance with existing admission, query, and billing instructions.

3650. COMPREHENSIVE OUTPATIENT REHABILITATION FACILITIES (CORFs)

A. General.—Certain services provided by the CORF are considered administrative services. Do not included these charges on the HCFA-1450. Their costs are included in the cost report and are considered in the calculation of the interim rate you pay for billable services.

Examples of administrative services are CORF physicians' services, team conferences, case reviews, plan of treatment review, and routine nursing services. (See §3183.1.)

Use the guidelines in §3903 for the MR of CORF services.

NOTE: Physicians' diagnostic and therapeutic services furnished to a CORF patient are not CORF physician's services. The physician must bill the Part B carrier for these services.

B. Patient Evaluation and Reevaluation.—

- When an initial evaluation is performed and there is no need for additional services, the evaluation is billed as a visit.

- When an initial evaluation and treatment are rendered on the same day, two visits cannot be billed. The usual charge for one visit can be increased to reflect the extra services.

- A reevaluation performed during a regular treatment visit must not be billed separately. The charge for one visit can be increased to reflect the additional services.

NOTE: Generally, CORFs will bill using the zero level revenue code. You may require the specific code for evaluation/reevaluation if you use them for bill review.

C. Services Billed on the HCFA-1450.—Services that can be billed by a CORF are:

- Physical therapy, occupational therapy, speech pathology services and respiratory therapy. Includes patient evaluation, testing, treatment, and other services defined as covered therapy services. (See §§3183.2-3183.5.)

NOTE: Certain services such as patient education and monthly reevaluation of a patient undergoing speech therapy are included in the course of treatment and are not billed separately.

- Social and psychological services. (See §§3183.7 and 3183.8.)

- Nursing services that are identifiable rehabilitation services which a nurse is qualified to perform and do not duplicate services performed by the therapist or other skilled nursing services specified in the plan of treatment. (See §3183.9.)

o Prosthetic and orthotic devices, including testing, fitting, or training in their use. (See S3183.6.)

o Drugs and biologicals which cannot be self administered. (See S3183.10.)

o Supplies, appliances, and equipment including the purchase or rental of DME from the CORF. (See S3183.11.)

NOTE: Equipment and appliances used at the CORF are reimbursed as overhead costs.

o Home environment evaluation, a single home visit to evaluate the potential impact of the home environment on the rehabilitation goals. Billed under line item or revenue code of professional who made the visit. (See S3183.12.)

o Certain diagnostic tests to be evaluated by a physician, such as pulmonary function, spirometry, and blood gas analysis are included under specific revenue codes. (See S3101.5.)

D. Offsite CORF Services.—Effective with services furnished on and after December 22, 1987, CORFs may provide physical, speech and occupational therapy off the CORF's premises in addition to the home evaluation. (See S3182.) Services provided offsite are billed separately and identified as "offsite" on the UB-82, in Item 94, Remarks. The charges for offsite visits includes any additional charge for providing the services at a place other than the CORF premises. There is no change in the interim reimbursement method for offsite services. Perform appropriate edits to prevent duplicate payments.

E. Psychiatric Services Limitation.—The amount of a beneficiary's incurred psychiatric expenses that can be recognized in any calendar year is the lesser of 62 1/2 percent of expenses or the amount shown in the following table:

Year of Service	Limit Recognized	Payment Limit
Through 12/31/87	$ 312.50	$ 250.00
1/1/88 - 12/31/88	562.50	450.00
1/1/89 and after	1,375.00	1,100.00

Apply these limits to revenue code 910 on CORF claims.

F. Revenue Codes.—Revenue codes to bill Medicare for CORF services are as follows:

Description	Code
Drugs and Biologicals	250
Supplies	270
Prosthetic Devices	274
Orthotic Devices	279
Rental of DME	291

9

Purchase of New DME	292
Purchase of Used DME	293
Respiratory Therapy Services	410
Home Evaluation Visit	419
Physical Therapy Services	420
Home Evaluation Visit	429
Occupational Therapy Services	430
Home Evaluation Visit	439
Speech Pathology Services	440
Home Evaluation Visit	449
Pulmonary Function	460
Audiology	470
Stress Test	482
Nursing Services	550
Home Evaluation Visit	559
Social Services	560
Home Evaluation Visit	569
EKG, ECG	730
Psychological Services	910
Diagnostic Testing	918
Home Evaluation Visit	919
EMG	922
Other Diagnostic Services (Specify)	929

Use these revenue codes when billing for the following outpatient therapies:

Physical Therapy	420
Occupational Therapy	430
Speech Pathology	440

3654. COORDINATION WITH HEALTH MAINTENANCE ORGANIZATIONS

3654.1 Provider Billing for Services Provided to HMO Beneficiaries.—When a HMO qualifies for participation under the Medicare program, HCFA annotates its records to indicate which Medicare beneficiaries are HMO enrollees.

Depending on the contractual arrangements between the HMO and HCFA, Medicare bills for HMO enrollees may be paid either by an intermediary or HMO. (See §§3555ff. for description of how to determine who processes the bill.) Where these guidelines indicate the HMO has processing jurisdiction, inform the provider to bill the HMO. Process the bill showing HMO payment.

When services are provided to a HMO enrollee for which the HMO has payment jurisdiction it either sends a HCFA-1450 to you via EMC, if possible, for processing as a "paid" HMO bill or arranges for the provider to send a HCFA-1450 directly to you.

Send the UNIBILL to HCFA, showing HMO paid code in field 67 position 1840. In field 53 positions 1707-1715 show zeros as Medicare Reimbursement Amount, and charges as covered.

Do not make a duplicate payment for the same services the HMO has paid. When you pay a HMO enrollee's bill follow regular bill processing procedures, including proper coding in location 1840 of UNIBILL to indicate whether you, or the HMO, paid the bill.

3654.2 Patient is a Member of HMO for Only Part of Billing Period.—Where a patient either enrolls or disenrolls in a HMO during a period of services, two factors determine whether the HMO is liable for the payment.

- o Whether the facility is included in PPS, and
- o The date of enrollment.

If the patient changes HMO status during an inpatient hospitalization in a PPS hospital, his status at admission determines liability. If he was enrolled in the HMO before admission, the HMO is responsible regardless of whether the patient disenrolled before discharge. If the patient was not a HMO enrollee upon admission, later enrolls before discharge, the HMO is not responsible for payment.

Where the facility is a non-PPS hospital or unit, SNFs, HHAs, etc., the HMO is responsible for payment for services on and after the day of enrollment up through the day disenrollment is effective.

3656. COMPUTER PROGRAMS SUPPLIED BY HCFA

3656.1 Medicare Code Editor (MCE).–

A. Implementation Requirements.–The MCE edits claims to detect incorrect billing data. In determining the appropriate DRG for a Medicare patient, the age, sex, discharge status, principal diagnosis, secondary diagnosis, and procedures performed must be reported accurately to the Grouper program. The logic of the Grouper software assumes that this information is accurate. The Grouper does not edit the data for accuracy. Only where extreme inconsistencies occur in the patient information will a patient not be assigned to a DRG. Therefore, use the MCE to improve the quality of information given to Grouper.

Process all inpatient Part A discharge/transfer bills for both PPS and non-PPS facilities (including waiver States, long-term care hospitals, and excluded units) through the MCE. Process claims that have been reviewed by the PRO prior to billing through the MCE only for edit types #1, 2, 3, 4, 7, and 12. Bills not to process through the MCE include:

o Where no Medicare payment is due (amounts reported by value codes 12, 13, 14, 15, or 16 equal or exceed charges).

o Where no Medicare payment is being made. Where partial payment is made, editing is required.

o Reviewed by the PRO before billing (code 1 or 3 in Item 87). You may process these exceptions through the program and ignore development codes or bypass the program.

The MCE software contains multiple versions. The version of the MCE accessed by the program depends upon the patient dischage date entered on the claim. The following chart lists the patient discharge periods and the MCE version associated with each.

For Patients Discharged From	MCE Version Used
03/01/84 - 09/30/86	MCE 2.0
10/01/86 - 09/30/87	MCE 3.0
10/01/87 - 09/30/88	MCE 4.0

B. Bill System/MCE Interface.–Install MCE online if possible, so that prepayment edit requirements identified in subsection C can be directed to hospitals without clerical handling.

The MCE needs the following data elements to analyze the bill:

o Age
o Sex

- Discharge status
- Diagnosis (5)
- Procedures (3)
- Discharge date

MCE provides you an analysis of "errors" on the bill as described in subsection C. Develop your own interface program to provide data to MCE and receive data from it.

The MCE Installation Manual describes the installation and operation of the program, including data base formats and locations.

C. Processing Requirements.--Follow these procedures for each error code. Where bills are returned to the hospital, consider the bill improperly completed for control and processing time purposes. (See §3600.1C.)

1. Invalid Diagnosis or Procedure Code.—The MCE checks each diagnosis code, including the admitting diagnosis, and each procedure code against a table of valid ICD-9-CM codes. If the recorded code is not in this table, the code is invalid.

For a list of all valid ICD-9-CM codes see Internation Classification of Diseases, 9th Revision, Clinical Modification (ICD-9-CM), January 1979, Volume I (Diseases) and Volume 3 (Procedures). Return the claim and request a corrected bill with a valid diagnosis or procedure.

2. Invalid Fourth or Fifth Digit.—The MCE identifies any diagnosis code, including the admitting diagnosis or any procedure that requires a fourth or fifth digit, which is either missing or not valid for the code in question.

For a list of all valid fourth and fifth digit ICD-9-CM codes see International Classification of Diseases, 9th Revision, Clinical Modification (ICD-9-CM), January 1979, Volume 1 (Diseases) and Volume 3 (Procedures). Return the claim and request a corrected bill with a valid diagnosis or procedure.

3. E-Code as Principal Diagnosis.—E-codes describe the circumstances that caused an injury, not the nature of the injury, and therefore are not principal diagnoses. E-codes are all ICD-9-CM diagnosis codes that begin with the letter E. For a list of all E-codes, see International Classification of Diseases, 9th Revision, Clinical Modification (ICD-9-CM), January 1979, Volume 1 (Diseases). Return the claim and request a proper principal diagnosis on a corrected bill.

4. Duplicate of PDX.—Any secondary diagnosis that is the same code as the principal diagnosis is identified as a duplicate of the principal diagnoses, because the secondary diagnosis may cause assignment to a complication/comorbidity DRG in error. Delete the secondary diagnosis from your bill record. Continue processing without it.

5. Age Conflict.—The MCE detects inconsistencies between a patient's age and the diagnosis. Examples of conflicts are:

- A 5 year old patient with benign prostatic hypertrophy.
- A 78 year old delivery.

In the above cases, the diagnosis is clinically impossible for a patient of the stated age. Therefore, either the diagnosis or age is presumed to be incorrect. Four age code categories follow.

- A subset of diganoses are intended only for newborns and neonates. These are identified as "Newborn" diagnoses. For "Newborn" diagnoses the patient's age must be 0 years.
- Certain diagnoses are only considered reasonable for children between the ages of 0 and 17. These are "Pediatric" diagnoses.
- Diagnoses identified as "Maternity" are only coded for patients between the ages of 12 and 55 years.
- A subset of diagnoses is considered valid only for patients over the age of 14. These are identified as "Adult" diagnoses. For "Adult" diagnoses the age range is 15 through 124.

Addendum E, pages E-2-17, contains listings for each category. The listings include both the ICD-9-CM diagnosis codes and the corresponding English descriptions.

If you edit online, return the bill and request a proper diagnosis or correction of age as applicable. If you edit in batch operations after receipt of the admission query response, use the age based on HCFA records and return bills that fail this edit. Request a proper diagnosis.

6. Sex Conflict.—The MCE detects inconsistencies between a patient's sex and the diagnosis or procedure on the patient's record. Examples of a conflict are:

- Male patient with cervical cancer (diagnosis).
- Male patient with a hysterectomy (procedure).

In both instances, the indicated diagnosis or the procedure conflicts with the stated sex of the patient. Therefore, either the patient's diagnosis, procedure or sex is incorrect.

Addendum E, pages E-18-38 contain listings of male and female related ICD-9-CM diagnosis and procedure codes and the corresponding English descriptions. Return the bill. Request a corrected bill with the proper sex, diagnosis, and procedure.

7. Manifestation Code As Principal Diagnosis.—These describe the manifestation of an underlying disease, not the disease itself, and therefore, cannot be a principal diagnosis. Addendum E, pages E-39-41, contains listings of ICD-9-CM diagnoses identified as manifestation codes. Return the bill. Request a corrected bill with the diagnosis for the underlying condition.

8. Nonspecific Principal Diagnosis.—A set of diagnosis codes, particularly those described as "not otherwise specified," are identified by the MCE as nonspecific diagnoses. While these codes are valid according to the ICD-9-CM coding scheme, more precise codes can be used for the principal diagnosis.

A diagnosis is considered a nonspecific principal diagnosis only if the patient was discharged alive. Deceased patients often do not receive a complete diagnostic workup, thus, the specification of precise principal diagnosis may not be possible.

Addendum E, pages E-42-50, contains listings of ICD-9-CM diagnosis codes identified as "nonspecific" when used as principal diagnosis.

Do not develop before payment. Count bills monthly by provider and analyze them to determine whether educational contacts are needed. If the number of bills containing nonspecific coding exceeds 10 percent, contact the provider to discuss proper coding.

9. Questionable Admission.—There are some diagnoses which are not usually sufficient justification for admission to an acute care hospital. For example, if a patient is given a principal diagnosis of:

4011 Benign Hypertension

then this patient has a questionable admission, since benign hypertension is not normally sufficient justification for admission.

Addendum E, page E-51, contains a listing of ICD-9-CM diagnosis codes identified as "Questionable Admission" when used as principal diagnosis.

PROs review on a post-payment basis all questionable admission cases. Where the PRO determines the denial rate is sufficiently high to warrent, it uses the PRS to accomplish prepayment review.

Do not interrupt processing based upon MCE identification of questionable admission.

10. Unacceptable Principal Diagnosis.—There are selected codes that describe a circumstance which influences an individual's health status but is not a current illness or injury; therefore, these codes are unacceptable as a principal diagnosis. For example, V173 (Family History of Ischemic Heart Disease) is an unacceptable principal diagnosis.

In a few cases, there are codes that are not unacceptable if a secondary diagnosis is coded. If no secondary diagnosis is present for them, the message "requires secondary dx" appears. Codes that follow this rule are indicated with an asterisk (*) in Addendum E, pages E-52-57.

The PRO reviews claims with diagnosis V571, V572, V573, V5789 and V579 and a secondary diagnosis.

If these codes are identified without a secondary diagnosis, return the bill. Request a secondary diagnosis that describes the origin of the impairment. Return bills containing other "unacceptable principal diagnosis" codes. Request a principal diagnosis that describes the illness or injury.

11. Nonspecific O.R. Procedures.—A set of O.R. procedure codes, particularly those described as "not otherwise specified" are identified by the MCE as nonspecific. While these codes are valid according to the ICD-9-CM coding scheme, more precise codes must be used. For example, 8020 (Arthroscopy NOS) is identified as a nonspecific O.R. procedure because the site is not specified by the code. Codes 8021-8029 specify the precise site.

MCE reports the nonspecific O.R. procedure condition only if all the O.R. procedures performed have been coded as nonspecific.

Addendum E, page E-58, contains a listing of ICD-9-CM procedure codes identified as "Nonspecific O.R. Procedure."

Do not develop before payment. Count bills monthly by provider for this exception. Analyze to determine whether educational contacts are needed. If the number of bills containing nonspecific coding exceeds 10 percent, contact the provider to discuss proper coding.

12. Noncovered O.R. Procedures.—There are some O.R. procedures for which Medicare does not reimburse.

Addendum E, page E-59, contains a listing of ICD-9-CM procedure codes identified as "Noncovered O.R. Procedure."

Return the bill. Request the following appropriate action:

- A no pay bill,
- A correction in the procedure code, or
- A bill indicating the covered and noncovered procedures. (See §3101.14.)

If the hospital indicates that there are covered and noncovered procedures, refer the bill to the PRO for prepayment review. Upon receipt of the PROs response, either delete the noncovered procedures and charges or require the hospital to delete them. Do not process the noncovered procedures through Grouper (see §3656.2) or the noncovered charges through Pricer. (See §3656.3.)

Do not return procedure code 375 without first checking to determine if the bill is from an approved heart transplant center. (See §3613 where the bill is from an approved heart transplant center.)

13. Open Biopsy Check.—Biopsies can be peformed as open (i.e., a body cavity is entered surgically), or closed (percutaneously or endoscopically). The DRG definitions assign different DRGs depending upon whether or not the biopsy was open. In general, for most organ systems, open biopsies are performed infrequently.

Effective October 1, 1987 there are revised biopsy codes that distinguish between open and closed biopsies. It is no longer necessary to request O.R. reports for all open biopsy procedures identified in the MCE. However, to make sure that hospitals are using the new ICD-9-CM codes correctly, request O.R. reports on a sample of 10 percent of claims with open biopsy procedures (see Addendum E) for review on a postpayment basis.

If the O.R. report reveals that the biopsy was closed (performed percutaneounsly, endoscopically, etc.) change the procedure code on the bill to the closed biopsy code and process an adjustment bill. Some biopsy codes (3328 and 5634) have two related closed biopsy codes, one for closed endoscopic and for closed percutaneous biopsies. Assign the appropriate closed biopsy code after reviewing the medical information. If the hospital's biopsy coding error rate exceeds 10 percent, place the hospital on prepayment review for these claims until its error rate is below 10 percent.

14. Medicare as Secondary Payer - MSP Alert.—Addendum E, pages E-61-68, identifies situations that may involve automobile medical, no-fault or liability insurance. See §§3419.5 and 3489.4B for processing instructions and tolerances.

15. Bilateral Procedure.—There are certain codes that do not accurately reflect performed procedures in one admission on two or more different bilateral joints of the lower extremeties. A combination of these codes show a bilateral procedure when, in fact, they could be single joint procedures (i.e., duplicate procedures).

If two more more of these procedures are coded, and the principal diagnosis is in MDC 8, they are flagged for post-pay development. Process the bill as coded but request an O.R. report. If the report substantiates bilateral surgery, no further action is necessary. If the report does not substantiate bilateral surgery, prepare and process an adjustment bill. Code it appropriately.

If the error rate for any provider is sufficiently high, you may develop claims prior to payment on a provider-specific basis.

16. Invalid Age.—A patient's age is usually necessary for an appropriate DRG determination. If the age reported is not between 0 years and 124 years, the MCE assumes the age is in error.

Reenter the bill with the proper age. If the beneficiary's age is established at over 124, reenter it with 123.

17. Invalid Sex.—A patient's sex is sometimes necessary for appropriate DRG determination. The sex code reported must be either 1 (male) or 2 (female).

18. Invalid Discharge Status.—A patient's discharge status is sometimes necessary for appropriate DRG determination. Discharge status must be coded according to the UB-82 conventions.

The following UB-82 discharge status codes are considered valid by the MCE.

01	Home, self-care (routine)
02	Short term hospital
03	SNF
04	ICF
05	Other facility
06	Home health service
07	Left against medical advice
20	Died (or did not recover if CSCs are involved)
30	Still a patient

19. Invalid Discharge Date.—An invalid discharge date is a discharge date that does not fall into the acceptable range of numbers to represent either the month, day or year (e.g., 13/03/87, 12/32/87). If no discharge date is entered, it is also invalid. When an invalid discharge date is entered, version 4.0 of the MCE is automatically edits the claim.

3656.2 DRG Grouper Program.—Pay for inpatient hospital services on the basis of a rate per discharge that varies according to the DRG to which a beneficiary's stay is assigned. Each DRG represents the average resources required to care for a case in that particular DRG relative to the national average of resources consumed per case. The DRG weights used to calculate payment are in the Pricer DRGX file.

Use the Grouper program to assign the DRG number. Grouper is the software that determines the DRG from data elements reported by the hospital. This applies to all inpatient discharge/transfer bills received from both PPS and non-PPS facilities, including those from waiver States, long-term care hospitals, and excluded units.

The Pricer (PPSMAIN) driver program calls the correct Grouper based upon the discharge date. If you write your own driver program, you need to access the following Grouper programs:

- 5.0 for discharges from October 1, 1987
- 4.0 for discharges from October 1, 1986 through September 30, 1987
- 3.0 for discharges from May 1, 1986 through September 30, 1986
- 2.0 for discharges from before May 1, 1986

Grouper does not determine the DRG price. Grouper input/output are specified below. Determine the best place in your total system to place the Grouper program.

Input	Output
1. Principal and up to four other diagnoses.	1. Major diagnostic category
	2. DRG number
2. Principal and up to two additional procedures.	3. Grouper return code (one position code indicating the action taken by the program)
3. Age (at last birthday on admission date, verified by the 0 trailer).	4. Procedure code used in determining the DRG
4. Sex (1=male, 2=female)	5. Diagnosis code use in determining the DRG
5. Discharge destination	6. Secondary diagnosis used, if applicable, in determining DRG.

EMC/UB-82 (HCFA-1450) sex coding is M for male, F for female, and U for unknown, while Grouper is 1 for male and 2 for female. Discharge destination codes are similar except codes 20-29 are summarized as 20. Calculate age at admission as Grouper needs age rather than date of birth.

3656.3 PPS Pricer Program.—

A. General Description.—HCFA provides a PRICER program to determine the price upon which to base reimbursement under prospective payment. A separate PRICER installation guide has been provided. Use the appropriate Pricer for discharges occurring during the periods below:

- o 7.2 for discharges after April 1, 1988;
- o 7.1 for discharges from November 21, 1987 through March 31, 1988; and
- o 7.0 for discharges from October 1, 1987 through November 20, 1987.

The Pricer program relies upon your system to call the appropriate Grouper depending upon the discharge date. After the DRG is determined by Grouper, your system calls the Pricer program. Pricer determines the price to pay and prepares a report.

Four data files are included. HCFA maintains three:

o DRGX file — contains DRG weights, average length of stay and outlier cutoff points.

o MSAX file — contains urban and rural wage indexes used in calculating payment.

- RATE file — contains census division values and updating amounts used in calculating payment.

You maintain the last, the Provider Specific File, (PROV file). This contains information about the facts specific to the provider that affects computations, e.g., effective dates for PPS, type of provider (for application of special computation rules), census division, MSA, adjusted cost per discharge, disproportionate share adjustment percentage.

Pricer also calculates the disproportionate share adjustment and adds it to the DRG payment. Correct calculation depends upon the accuracy of related information you include in the Pricer PROV file.

The Pricer program applies the DRG relative weights, hospital urban or rural and census division location, provider specific data, and beneficiary hospital data from the bill to determine the amount payable for each PPS discharge bill.

Pricer uses the Intern-to-Bed ratio in calculating the indirect teaching adjustment for you to accumulate and use in related payments. Insure that this ratio is available for Pricer to compute the reimbursement for teaching hospitals. Include the ratio in your PROV file to insure that cost outliers are not overpaid to your teaching hospitals.

Pricer does not calculate utilization days required for UNIBILL or the cost report. It does not determine the amount to pay after deduction for deductible, coinsurance, or the primary payment where Medicare is secondary. Calculate the price and make adjustments to the price furnished before making payment.

B. Data Requirements for Bill Processing.—The Pricer subroutine (PPSSUB) that determines the DRG price refers to the four files described in subsection A and to the following data from the bill.

- Provider number,
- Review code (see §3656.3D.2),
- DRG,
- Approved length of stay (see §3656.3D.1), or
- Covered days (see §3656.3D.1).

- Lifetime reserve days,
- Discharge date, and
- Charges (excluding kidney acquisition costs).

C. Bill Processing Report from Pricer.—Pricer may be operated to provide the following levels of information in response to bill processing.

Option 1

- Return Codes - After processing, the program provides the following "return codes" to report disposition. Codes 00-49 describe how the bill was priced. Codes 50-99 describe why the bill was not priced.

  00=Priced standard DRG payment
  01=Priced as a day outlier
  02=Priced as a cost outlier
  03=Priced on per diem basis (received review code 03)
  04=Priced standard DRG payment only. Day or cost outlier status was ignored.
  05=Priced as per diem days plus cost outlier
  06=Priced as per diem days only

  51=No provider specific information found
  52=Invalid MSA # in provider file
  53=Waiver State - not calculated by PPS
  54=DRG not 001-468 or 471
  55=Discharge date is earlier than provider's PPS start date
  56=Invalid length of stay (e.g., nonnumeric or zero with review code not = 03)
  57=Review code not 00-06
  58=Total charges not numeric
  60=Review code was 02 and length of stay indicates day outlier. Bill is thus not eligible as cost outlier.
  61=Lifetime reserve days not numeric
  62=Invalid number of covered days (e.g., covered days greater than length of stay, or nonnumeric, or lifetime reserve days greater than covered days.

- Wage index
- Outlier days
- Average length of stay
- Outlier cutoff days

- Indirect teaching adjustment -, price calculated on per-bill basis
- Total payment (indirect teaching excluded)
- Hospital specific portion
- Federal specific portion (DSH excluded)
- Outlier portion
- Regular covered days used in pricing
- Lifetime reserve days used in pricing
- Disproportionate share amount
- PRICER version number

Option 2

Information in option 1 plus the following will be provided.

- Hospital specific portion of the payment
- Federal portion of the payment
- National percentage of Federal Blend
- Regional percentage of Federal Blend
- Case mix index adjusted for computation (cost per discharge)
- PPS update factor/special update factor
- DRG relative weight
- National labor share
- National nonlabor share
- Regional labor share
- Regional nonlabor share
- Cost of living adjustment

- Intern-to-bed ratio
- Cost outlier portion of the payment
- Bill cost data
- PPS dollar threshhold
- PPS provider record
- FY table

Within option 1 and option 2 there are variables with respect to format and operating procedures. These are described in the Pricer Implementation Guide. You must determine which data elements are useful in processing or in your history records and construct the interface system to obtain them.

D. Developing PRICER Input Parameters

1. Approved length of stay.—Approved length of stay is necessary for PRICER to determine whether day outlier status is applicable in nontransfer cases, and in transfer cases to determine the number of days for which to pay the per diem rate. Normally, Pricer covered days and approved length of stay will be the same. However, when benefits are exhausted, or when entitlement begins during the stay, PRICER length of stay days may exceed Pricer covered days in the nonoutlier portion of the stay.

As a result, the days that PRICER returns reflect only the days used to calculate the rate and may not accurately reflect the utilization days required for UNIBILL or your cost report. The program uses the relationship between the covered days and the day outlier trim point of the assigned DRG to calculate the rate. Where the covered days are more than the approved length of stay, PRICER may not return the correct utilization days. The host system determines and/or validates the correct utilization days to charge the beneficiary in accordance with §3637.1.

Example

Covered Days sent to PRICER	26
Outlier Days	0
Lifetime Reserve Days	0
Approved Length of Stay	20
Day Outlier Cutoff	22
PRICER Length of Stay Days	22

If the hospital has not notified the beneficiary, charge utilization to the beneficiary for actual days. Pricer will calculate your payment from the approved length of stay. The hospital may not charge the beneficiary for the difference.

If the hospital has notified the beneficiary, charge utilization to the beneficiary for medically approved days, and base your payment on them. The hospital may charge the beneficiary for the difference.

To develop approved length of stay used by PRICER:

- For discharge destination (value) codes 01, 03, 04, 05, 06, 07, or 20 in HCFA-1450 locator 21. Enter the number of days from the later of entitlement or admission to the earlier of discharge or death.

  Subtract any days before the ending date that the medical review entity disapproved, except for days approved for payment under waiver. PRICER uses approved length of stay and covered days shown on the bill (including LTR where applicable) to determine how many outlier days can be paid.

- For discharge destination code 02 - Enter as above except do not use benefits exhausted (HCFA-1450 locator 28, code 23) in your calculation. If benefits are exhausted after admission, but before transfer, payment is made for any days prior to transfer regardless of whether benefits are exhausted.

- Discharge destination 02 does not identify a cost outlier on transfers made on, or after, October 1, 1984. To pay these cost outliers adjust the approved length of stay to be less than the trim point of the DRG.

2. PRICER Review Code.—The review code instructs the program as to the disposition of the bill. Select the proper review code as described below.

00 = Pay standard DRG and any days or cost outlier. Use for nontransfer cases which do not contain condition code 66 (Locator 35-39 on the HCFA-1450).

01 = Pay standard DRG and days outlier. Use when condition code 66 is present. Pricer will calculate the standard DRG payment. It will also calculate the day outlier portion of the payment if the covered days exceed the outlier cutoff for the DRG.

02 = Pay standard DRG and cost outlier. Pricer will calculate the standard DRG payment. It will also calculate the cost outlier portion of the payment if the adjusted charges exceed the cost theshold. If the approved length of stay exceeds day outlier cutoff, no price will be computed and it will return code 60.

03 = Pay per diem and any cost outlier. Use for transfer cases which do not contain condition code 66. Pricer will calculate a per diem payment based upon the standard DRG payment if the covered days are fewer than the average length of stay for the DRG. If the covered days are equal to, or exceed, the average length of stay, the standard DRG payment is calculated. If transfer is after 9/30/84 and the charges claimed exceed the threshold, the cost outlier is also calculated and a code 05 is returned.

04 = Pay only standard DRG. Pricer will not edit for day or cost outliers.

05 = Pay per diem and cost outlier. Use for transfer cases where prior approval is required in your system. Pricer will calculate a per diem payment based upon the standard DRG payment if the approved length of stay is less than the average length of stay for the DRG. If the approved length of stay is equal to, or exceeds, the average length of stay, the standard DRG payment is calculated. It also calculates the cost outlier portion of the payment if the adjusted charges of the bill exceed the cost threshold.

06 = Pay per diem days only. Use for transfer cases which contain code 66. Pricer will not edit for cost outlier.

D. Provider Specific File.—The PROV file contains needed information about each provider to calculate the payment amount. Maintain the accuracy of the data in accordance with the following criteria.

Whenever the status of any element changes, prepare an additional record showing the effective date. For example: when a hospital's FY end changes as a result of a change in ownership or other "good cause," make an additional record showing the effective date of the change. As Pricer was designed to accommodate FY ends, it automatically applies the appropriate update factor and hospital-specific portion/Federal portion blend. The only exception is when the effective date of the change in ownership begins in a transition period different from that under the old ownership. In these cases, force the hospital into a specific (PPS) year using file position "17." Pricer will compare the discharge date on the bill record with the effective date in file to determine the proper data to use in calculating the payment.

The format and data shown below are required by the Pricer program and by the quarterly Provider Specific File you submit to HCFA. (See §3850.)

File Position	Format	Title	Description
1-6	X(6)	Provider Number	Alpha-numeric 6 character provider number.
7-12	9(6)	Effective Date	Numeric YYMMDD. This date is the effective date of the provider's first PPS period or the first record for each provider. This date should be 1 day later than the end of the provider's original FY. For subsequent records, for the same provider, this date is the effective date of the change.
13	X	Waiver Indicator	"N" means not waived (under PPS) and "Y" means waived (not under PPS).

File Position	Format	Title	Description
14-15	XX	Provider Type	This identifies providers that require special handling. Enter the appropriate code: Must be blank or 00-12 00 or blanks = Short Term Facility 01 Sole community provider 02 Long Term 03 Psychiatric 04 Rehabilitation Facility 05 Pediatric 06 Hospital distinct parts 07 Rural referral center 08 Indian Health Service 09 Redesignated Rural - year 1 10 Redesignated Rural - year 2 11 Sole community/referral center provider 12 Alcohol Facility
16	9	Current Census Division	Enter the appropriate code for the current census division: 1 New England 2 Middle Atlantic 3 South Atlantic 4 East North Central 5 East South Central 6 West North Central 7 West South Central 8 Mountain 9 Pacific
17	9	Provider PPS Period	Present when forcing provider into a specific PPS period, blank or 0-6. NOTE: Once a provider is forced into a specific PPS period, use an additional record each successive period through PPS period 5. If not, the provider stays in the PPS period of the last record indefinitely.
18-21	9(4)	Metropolitan Statistical Area	Enter the appropriate code for the metropolitan statistical area 0040-9340 or 9999 for rural.

File Position	Format	Title	Description
22-27	9(6)	Fiscal Year End	Enter the appropriate numeric MMDDYY. On the first record for each provider this is the FY end of its last year before PPS. (PPS bills will be accepted for dates after this date.) For subsequent provider records, this only changes if the provider changes its FY end, e.g., a change of ownership.
28-34	9(5)V99	Case Mix Adjusted Cost per Discharge	Enter the PPS base year cost per discharge divided by the case mix index. Enter zero for new providers.
35-38	9V999	Cost of Living Adjustment	Enter the appropriate cost of living adjustment as listed below:

Area	FY 84	FY 85 (10/1/84-4/30/86)	FY 86 (5/1/86-9/30/86)	FY 87-89 (10/1/86-9/30/89)
Alaska	1.250	1.250	1.250	1.250
Oahu	1.200	1.225	1.225	1.225
Kauai	1.175	1.150	1.150	1.175
Maui	1.200	1.200	1.200	1.200
Molakai	1.200	1.200	1.200	1.200
Lanai	1.200	1.200	1.200	1.200
Hawaii	1.100	1.125	1.125	1.150
All other	1.000	1.000	1.000	1.000

39-43	9V9(4)	Intern/Beds Ratio	Enter the provider's intern/resident to bed ratio. Calculate this by dividing the provider's full-time equivalent interns and residents by the number of available beds (as calculated in positions 50-54). Do not include interns and residents in anesthesiology who are employed to replace anesthetists or those assigned to excluded units. Base the count upon the number of interns and residents assigned to the hospital on September 1. Correct cases where there is reason to believe that the count is substantially in error for a particular facility. You are responsible for reviewing hospital records and making any necessary changes in the count at the end of the cost reporting period. Enter zero for nonteaching hospitals.

File Position	Format	Title	Description
44-49	9V9(5)	Special Provider Update Factor (PRUP)	Use this field only for hospitals that have special update factors because their base period ended prior to September 30, 1982. Enter that factor here. Each time a new regular update factor is published in the Federal Register, compute a new special update factor. Place it and its effective date in the provider file. For example, provider 010010 has a special update factor of 1.17268 effective 840203. If its current cost reporting period under PPS ends 12/31/84, the regular update factor would be 1.06003 and the new special update factor effective 850101 would be: 1.17268 * 1.06003 = 1.24308 Zero fill for non-PRUP hospitals.
50-54	9(5)	Hospital Beds	Number of hospital beds. Indicate the number of adult and pediatric beds available for lodging inpatients. (See §2405.3G Provider Reimbursement Manual.) If there is a change during the year, make an adjustment if it would make a significant difference in the amount of payments.

NOTE: The effective date for PRUP changes computed this way is based upon cost reporting periods beginning on or after 10/1/84; i.e., a cost reporting period ending 9/30/84 has a PRUP effective 10/1/84; a cost reporting period ending 10/31/84 has its PRUP effective 11/01/84, etc.

File Position	Format	Title	Description
55-58	V9(4)	DSH	Disproportionate share adjustment percentage. For discharges occurring on or after May 1, 1986 and before October 1, 1990, make an additional payment for each PPS hospital that meets the criteria for serving a disproportionate share of low income patients. Place this factor in this field if the hospital qualifies for this additional payment. Edit to assure that the DSH adjustment factor does not exceed .9999. Pricer multiplies this percentage (expressed as a decimal) by the Federal portion and outlier payment to determine the DSH adjustment. Enter "zero" for hospitals that do not qualify.
59-62	9V999	Cost to Charge Ratio	Derived from the latest settled cost report and corresponding charge data from the billing file. Compute this amount by dividing the Medicare operating costs by the Medicare covered charges. Obtain Medicare operating costs from the Medicare cost report Form HCFA-2552-85 Supplemental Worksheet D-1, Part II, Line 54. Obtain Medicare covered charges from your billing file, i.e., PS&R record. Hospitals for which you are unable to compute a reasonable cost-to-charge ratio, use the appropriate urban or rural statewide average cost-to-charge ratio calculated annually by HCFA. Use these average ratios to calculate cost outlier payments for those hospitals where you compute cost-to-charge ratios lower than 0.36 or greater than 1.24. (The list of state wide cost-to-change averages follows this section).

File Position	Format	Title	Description
63-67	9V9(4)	Case Mix Index	The case mix index used to complete positions 28-34. In most cases this is the case mix index that has been calculated and published by HCFA for each hospital (based on 1981 cost and billing data) reflecting the relative costliness of that hospital's mix of cases compared to the national average mix.
68	X	Filler	Blank
69-74	9(6)	Report Date	Date file created. Must be MMDDYY.
75	X	Filler	Blank
76-80	X(5)	Intermediary Number	Intermediary #
81-86	9(6)	Fiscal Year Beginning Date	Must be numeric (MMDDYY) Month: 01-12 Day: 01-31 Year: Greater than 81 but not greater than current year.
87-92	9(4)V99	Pass Thru Amount Capital	Per diem amount based on the interim payments to the hospital. (See §2405.2, Provider Reimbursement Manual.)
93-98	9(4)V99	Pass Thru Amount for direct medical education	Per diem amount based on the interim payments to the hospital. (See §2405.2, Provider Reimbursement Manual.)
99-104	9(4)V99	Pass thru amount for Organ Acquisition	Per diem amount based on the interim payments to the hospital. (See §2405.2, Provider Reimbursement Manual.)
105-110	9(4)V99	Total pass thru amount, including miscellaneous	Per diem amount based on the interim payments to the hospital. (See §2405.2, Provider Reimbursement Manual.)
111-114	V9(4)	Supplemental Security Income Ratio	SSI ratio used to determine if the hospital qualifies for the disproportionate share adjustment in positions 55 - 58.
115-118	V9(4)	Medicaid Ratio	Medicaid ratio used to determine if the hospital qualifies for the disproportionate share adjustment in positions 55 - 58.
119-160	9(42)	Filler	Blank

Statewide Average Cost-to-Charge Ratios for Urban and Rural Hospitals (Case Weighted)

NOTE: This data should be rounded up to the nearest three digit decimal for claims processing and payment purposes.

State	Urban	Rural
Alabama	0.5194	0.5815
Alaska	0.6731	0.8809

3656.4 Ambulatory Surgical Center (ASC) Pricer Program.—

A. General Description.—The ASC Pricing Program, when interfaced with your calling program, performs calculations necessary to permit your accumulation of ASC limits for use at the hospital's cost settlement. It produces records formatted for the PS&R system for making adjustments to interim payment rates and at cost settlement. Process all bill records that the OCE system indicates as bill type 83x in this program.

Four data files are included:

o HCPCS codes subject to ASC limitation - this file contains a listing of five character HCPCS codes that includes all ASC covered procedures. A sixth character designates the associated payment category (1-4). (See Addendum F for listings of codes.) It also contains a listing of HCPCS procedure codes that are considered out-of-scope. (See §3626.4.) Most non-ASC procedures on the same bill with an ASC procedure will result in the bill not being subject to the cost limitation (i.e., not priced by the ASC Pricing program). Procedures in the out-of-scope table will not result in excluding the bill from the ASC limitation.

o Revenue codes subject to ASC limitation - this file contains a listing of revenue center codes subject to the ASC payment limitation. (See §3626.4C(1)(a).)

o Payment categories - this file contains dollar amounts for the four ASC payment groups for as many as 3 payment years. (See §3626.4.)

o Wage index - this file has the capacity to retain wage indices for multiple time periods. Use the November 26, 1984 BLS index.

The files are maintained by HCFA. Maintain a related provider file to use with the wage index table containing the provider number and MSA code. The program uses the MSA code to obtain the wage index. In addition, design and maintain an interface system between the ASC Pricer program and your system. Specific requirements are in subsection B.

Run the program before the PS&R system. If possible, place it immediately before the PS&R to avoid having to expand processing systems to include additional data elements such as ASC price and split transactions before that point. The PS&R system reports provide any reporting to the provider on ASC limits that apply to the claims.

B. Interface System Requirements.—Your interface system (driver program) must pass the following record to the pricing program:

Location	Data Description
1-4	MSA Number - to access the wage index. See Addendum G for MSA designations. This data is not identical to your inpatient PROV file. The ASC payment limit is based upon a different wage index than the PPS wage index.

Location	Data Description
5-10	Date of Service - the "from" date in Item 22 of Form HCFA-1450 (YYMMDD).
11-12	Number of HCPCS Codes - the number of HCPCS codes included in the record (01-28). Do not count HCPCS codes associated with revenue codes 29x (DME) or 300-319 (lab).
13-152	HCPCS Codes - these are in Item 50 of HCFA-1450. Up to 28 codes are accepted. Do not submit HCPCS codes associated with revenue code 29x (DME) or 300-319 (lab). Include these HCPCS codes with the related revenue codes returned from the ASC PRICER Program on bill type 13X.
153-154	Number of Revenue Codes - the number of revenue codes included in the record (01-28). Do not include or count revenue code 001 (total charges) in the record.
155-238	Revenue Center Codes - these are in Item 51 of HCFA-1450. Up to 28 codes are accepted. Do not pass revenue code 001 (total charges). Submit all 29x (DME) and 300-319 (Lab) revenue codes to the ASC Pricer Program in order to have the ASC Pricer Program return data for a 13x record.

NOTE: Revenue charges are not used by the pricing program but must be maintained in the calling program for association when records are returned.

Your interface program receives the following data from the ASC Pricer.

Location	Data Description
1-4	Return Code - a four digit code describing action taken or required. See subsection C for processing requirements.

Location	Data Description
5-9	Wage index used.
10-13	MSA code used.
14-21	Total of all HCPCS prices on the bill.
22-23	Number of HCPCS codes priced.
24-947	For each code (28 times).
(5)	HCPCS code;
(1)	Percent 150 = 3 100 = 2 50 = 1 0 = 0
(1)	Group number;
(3)	Group rate;
(8)	Adjusted labor portion;
(8)	Nonlabor portion; and
(7)	Payment rate for code.
948-949	Number of revenue codes subject to limitation.
950-1033	Each included revenue code up to 28.
1034-1035	Number of excluded HCPCS codes.
1036-1175	Each excluded HCPCS code up to 28.
1176-1177	Number of revenue codes not subject to limitation.
1178-1261	Each excluded revenue code up to 28.
1262-1269	Version number.

C. Return Codes and Related Intermediary Processing.--Return codes 1000-1499 indicate that pricing has been performed for the return data.

Code	Action
1000	All HCPCS and revenue codes are subject to the payment limitation. Out-of-scope procedures are considered

Code	Action
	subject to the limitation, but are priced at zero. Prepare one transaction for the PS&R. Use bill type 83x. Include the following from the ASC Pricer return record in the PS&R. Place the return code in location 3372-3375 of the PS&R. Place the total price in location 3376-3382 of the PS&R (PIC 9(5) V99). Place the revenue codes, individual HCPCS codes, and individual payment rates starting in position 527 of the PS&R in accordance with PS&R instructions. The additional data in the output record is for your use in internal control or in resolving inquiries.
1010	The bill contains included and excluded revenue codes. Prepare two transactions for the PS&R. The first is all procedures and revenue codes subject to the limitation (included), prepared as described in code 1000 above. Include any out-of-scope procedures. The second is excluded revenue codes. Use bill type 13x. Include the return code in location 3372-3375 of both records to indicate a companion record is applicable. ASC prices are not applicable to the 13x record. Include all lab and DME HCPCS codes that were not submitted to ASC Pricer as described in subsection B.

	Record any applicable deductible on the 83x record. Allocate coinsurance, reimbursement amount, interest amount, and MSP value code amounts based on the ratio of total charges (revenue codes) remaining on each record after substracting charges for clinical diagnostic lab services paid under the fee schedule and deductible that you allocate to the 83x record. Repeat all other coding (occurrence codes, condition codes, beneficiary and provider identification, from/through dates, etc.), on each transaction.
1020	Valid HCPCS codes but all revenue codes excluded. This situation indicates that revenue codes were omitted, coded incorrectly, or that HCPCS codes were coded incorrectly. Pricing data is returned, but development is required to obtain the missing codes or determine the correct codes.

Return codes 1500-1999 indicate that pricing has not been performed for the return data.

1500	Some or all of the HCPCS codes are surgery codes not subject to the payment limitation. The claim is not subject to the ASC payment limit. Prepare a 13x record for the PS&R.
1510	MSA code not on the MSA wage index file. Check for correct MSA code.
1520	Date of service is prior to October 1, 1987. No pricing is performed for any services prior to October 1. Prepare a 13x record for the PS&R.
1530	Invalid HCPCS count. The count did not fall within the range of 01-28. Resubmit with the proper number.
1540	Invalid HCPCS codes. Resubmit with valid code.
1550	Invalid revenue count. The count did not fall within the range of 01-28. Resubmit with the proper number.

1560	Invalid revenue code (e.g., nonnumeric). Resubmit with the proper revenue code.
1570	All HCPC codes are out-of-scope. Prepare a 13x record for the PS&R.
1580	Input coding indicates operations on more than two eyes. Resubmit with proper codes.

D. ASC Pricer Program Function.—The program uses the data you provide and internal files to determine the ASC limitation for each procedure on the bill record and provides you with data for your processes described in subsection B.

Internally, the program:

o Checks the HCPCS code from the bill against a table of ASC and out-of-scope codes and selects the group number.

o Uses the from date parameter to locate the correct group table.

o Uses the group number obtained from the procedure code check to obtain the correct payment amount from the payment category table.

o Uses the from date to locate the correct wage index table.

o Uses the MSA number to obtain the correct wage index from the wage index table.

o Performs one wage index calculation for each procedure. (Payment amount x 1/3) x wage index + (payment amount x 2/3.)

o For procedures flagged to pay at 100 percent, passes the calculated amount to the calling program; otherwise divides the amount by two and passes the result.

o If procedure code 66983 or 66984 is involved, pays at 150 percent of the group 4 rate, and considers it the first procedure.

3656.5 OCE Editor.—

A. Implementation Requirements.—The OCE edits outpatient hospital claims to detect incorrect billing data and determines if the ASC limit applies to each bill. It reviews each HCPCS and ICD-9-CM code for validity and coverage.

Process all outpatient Part B bills (bill types 13x and 83x) through the OCE.

B. Bill System/OCE Interface.—Install OCE online if possible, so that prepayment edit requirements in subsection C can be directed to hospitals without clerical handling.

The OCE needs the following data elements to analyze the bill:

- ICD-9-CM diagnosis codes (up to 15);
- HCPCS procedure codes (up to 15);
- Age;
- Sex; and
- From date (Item 22 on Form HCFA-1450).

OCE provides you an analysis of "errors" on the bill as described in subsection C. Develop your own interface program to provide data to OCE and receive data from it.

OCE reports to your claims processing system the status of each procedure code and indicates whether the bill is subject to the ASC limit and which edit conditions apply.

The OCE Installation Manual describes the installation and operation of the program, including data base formats and locations.

C. Processing Requirements.—Follow the procedure described below for each error code. Where bills are returned to the hospital, consider them improperly completed for control and processing time purposes. (See §3600.1.)

1. Invalid Diagnosis or Procedure Code.—The OCE checks each diagnosis code against a table of valid ICD-9-CM diagnosis codes and each procedure code against a table of valid 1987 HCPCS codes. If the reported code is not in these tables, the code is considered invalid. Return the bill to the hospital and request a corrected bill with a valid diagnosis or procedure. If you use DME or local HCPCS codes for clinical diagnostic lab services, review the excepted HCPCS procedure code against a file of valid local codes before deciding whether to reject the bill. You may use a supplement table that you develop or you may add local codes to the HCPCS tables.

For a list of all valid ICD-9CM codes see International Classification of Diseases, 9th Revision, Clinical Modification (ICD-9-CM), January 1979, Volume I (Diseases) and the September 1986 "Addendum/Errata" issued by Program Memorandum A-86-18. For a list of valid 1987 HCPCS codes see Physicians' Current Procedural Terminology, 4th Edition, CPT 1987 and HCFA Common Procedure Coding System (HCPCS) 1987, Non-CPT-4 Portion.

2. Invalid Fourth or Fifth Digit for Diagnosis Codes.—The OCE identifies any diagnosis code that requires a fourth or fifth digit, which is either missing or not valid for the code in question.

For a list of all valid fourth and fifth digit ICD-9-CM codes see International Classification of Diseases, 9th Revision, Clinical Modification (ICD-9-CM), January 1979, Volume I (Diseases) and the September 1986 "Addendum/Errata" issued by Program Memorandum A-86-18. Return the claim to the hospital and request a corrected bill with a valid diagnosis.

3. E-Code as Principal Diagnosis.—E-codes describe the circumstances that caused an injury, not the nature of the injury, and therefore, are not used as a principal diagnosis. E-codes are all ICD-9-CM diagnosis codes that begin with the letter E. For a list of all E-codes, see International Classification of Disease, 9th Revision, Clinical Modification (ICD-9-CM), January 1979, Volume I (Diseases). Return the claim to the hospital and request a proper principal diagnosis on a corrected bill.

4. Age Conflict.—The OCE detects inconsistencies between a patient's age and any diagnosis on the patient's record. Examples of such conflicts are:

- A 5 year old patient with benign prostatic hypertrophy.
- A 78 year old delivery.

In the above cases, the diagnosis is clinically impossible in a patient of the stated age. Therefore, either the diagnosis or age is presumed to be incorrect. Four age code categories are described below.

- A subset of diagnoses are intended only for newborns and neonates. These are identified as "Newborn" diagnoses. For "Newborn" diagnoses the patient's age must be 0 years.
- Certain diagnoses are only considered reasonable for children between the ages of 0 and 17. These are "Pediatric" diagnoses.
- Diagnoses identified as "Maternity" are only coded for patients between the ages of 12 and 55.
- A subset of diagnoses is considered valid only for patients over the age of 14. These are identified as "Adult" diagnoses. For "Adult" diagnoses the age range is 15 through 124.

Addendum E, page E-2-17 contain listings for each of the age categories described above. The listing includes both the ICD-9-CM diagnosis codes and the corresponding English descriptions.

If you edit online, return the bill to the provider and request a proper diagnosis or correction of age as applicable. If you edit in batch operations after receipt of the admission query response, use the age based on HCFA records and return bills that fail this edit, requesting a proper diagnosis.

5. Sex Conflict.—The OCE detects inconsistencies between a patient's sex and any diagnosis or procedure on the patient's bill. Examples of a sex conflict are:

- o Male patient with cervical cancer (diagnosis).
- o Male patient with hysterectomy (procedure).

In both instances, the indicated diagnosis or the procedure conflicts with the stated sex of the patient. Therefore, either the patient's diagnosis, procedure or sex is incorrect. Return the bill to the hospital and request a corrected bill with the proper sex, diagnosis, and procedure.

Addendum E, pages E-18-31 and E-35-36 contain listings of female and male related ICD-9-CM diagnosis codes and the corresponding English descriptions. For listings of female and male related HCPCS procedure codes see Addendum F.

6. Questionable Covered Procedures.—These are procedures that may be covered under the Medicare program, depending upon the medical circumstances. For example, HCPCS code 19360 "Breast reconstruction with muscle or myocutaneous flap" is a condition that is not covered by the program when performed for cosmetic purposes. However, if this procedure is performed as a follow up to a radical mastectomy, it would be covered.

Addendum F contain listings of questionable covered procedure codes. Perform medical review prior to a payment.

7. Noncovered Procedures.—These are procedures that are not reimbursable under the Medicare program. Deny the bill.

Addendum F contain listings of noncovered procedure codes.

8. Medicare as Secondary Payer - MSP Alert.—Addendum E, pages E-61-68 identify situations that may involve automobile medical, no-fault or liability insurance. See §§3341 9.5 and 3489.4B for processing instructions and tolerances.

9. Invalid Age.—If the age reported is not between 0 years and 124 years, the OCE assumes the age is in error.

Reenter the bill with the proper age. If the beneficiary's age is established at over 124, reenter with 123.

10. Invalid Sex.—The sex code reported must be either 1 (male) or 2 (female).

11. Date Range.—The OCE checks the from date in Item 22 on Form HCFA-1450. Billing dates not in the acceptable range of 7/1/87 through 9/30/88 are not edited. Continue processing the bill in your system.

12. Valid Date.—The OCE checks the month, day, and year from Item 22 (from date). If the date is impossible, return the bill to the hospital and request a corrected bill with a valid date.

13. Unlisted Procedures.—These are codes for surgical procedures (i.e., codes generally ending in 99). For listings of these codes and development instructions, see §3626.4.

NOTE: The OCE will produce a summary of "errors," including counts of the number of occurrances of each. Use this information to identify provider coding problems.

3660. SPECIAL BILLING SITUATIONS

3660.1 Ambulance Services.—Process claims for ambulance service furnished by, or under arrangements, made by a provider. Whether or not the patient is admitted as an inpatient, the provider bills ambulance services as an outpatient service. For an exception to this ruling see §3618A. In addition to the information ordinarily supplied, the provider furnishes the following data: (You may develop a form for use by your providers in furnishing the required information.)

- A detailed statement of the condition necessitating the ambulance service;
- A statement indicating whether or not the patient was admitted as an inpatient. If applicable, it shows the name and address of facility;
- Name and address of certifying physician;
- Name and address of physician ordering service if other than certifying physician;
- Point of pickup (identify place and complete address);
- Destination (identify place and complete address);
- Number of miles
- Cost per mile;
- Mileage charge;
- Minimum or base charge; and
- Charge for special items or services, explain. (§3114A.3.)

NOTE: This information is not required for transportation services identified in §3618A, since such transportation is not an ambulance service. Hospitals include such charges on an inpatient bill.

A. Coverage Guidelines for Ambulance Service Claims.--Reimbursement may be made for provider costs incurred in furnishing ambulance service provided conditions in the left-hand column below have been met. The right-hand column indicates the documentation needed to establish that the condition has been met.

Conditions	Review Action
1. The provider has obtained the required physician certification. (§3322)	1. Condition met if the HCFA-1450 is properly signed.

2. Patient was transported by an approved amublance service. (See §3114A.)	2. The provider is listed in your list of those having approved ambulance service. Where the service has been furnished by a supplier under arrangements with the provider, check your list based upon verification with carriers, that the ambulance company is approved.

NOTE: If the ambulance service is not on either list, undertake full development in accordance with §3114A to determine the status of the ambulance company.

3. The patient was suffering from an illness or injury which contraindicated transportation by other means. (See §3114B.)	3. Presume the requirement is met if the file shows the patient: o Was transported in an emergency situation, e.g., as a result of accident, injury, or acute illness; o Needed to be restrained; o Was unconscious or in shock; o Required oxygen or other emergency treatment on the way to his destination; o Had to remain immobile because of a fracture that had not been set or the possibility of a fracture; o Sustained an acute stroke or myocardial infarction; o Was experiencing severe hemorrhage; o Was bed confined before and after the ambulance trip; or

	o Could be moved only by stretcher. In the absence of any of the above conditions obtain additional documentation to establish medical need where the evidence indicates existence of any of the following circumstances: o Patient's condition would not ordinarily require movement by stretcher; o The individual was not admitted as a hospital inpatient, (except in accident cases); o The ambulance was used solely because other means of transportation were unavailable; or o The individual merely needed assistance in getting from his room or home to a vehicle. Where the information indicates a situation not listed above, refer the case to your supervisor.
4. The patient was transported from, and to, points listed below: (See §3114C.)	4. Claims show points of pickup and destination. The patient was transported from, and to, points listed below:
(a) From patient's residence (or other place where need arose) to hospital or SNF.	(a) Condition met if trip began within the institution's service area as shown in your locality guide. Condition met where the trip began outside the institution's service area if the institution was the nearest one with appropriate facilities. Refer to supervisor for determination.

NOTE: A patient's residence is the place where he makes his home and dwells permanently or for an extended period of time. A SNF is an institution which meets section 1861(j)(1) of the law.

(b) SNF to a hospital or hospital to a SNF.	(b) Condition met if pickup point was in the service area of the destination as shown in your locality guide. Condition met where the pickup point is outside the service area of the destination if the destination institution was the nearest one with appropriate facilities. Refer to supervisor for determination.
(c) Hospital to hospital or SNF to SNF.	(c) Condition met if the discharging institution was not an appropriate facility and the admitting facility was one with appropriate facilities.
(d) From a hospital or SNF to patient's residence.	(d) Condition met if patient's residence is within the institution's service area as shown in your locality guide. Condition met where the patient's residence is outside the institution's service area if the institution was the nearest one with appropriate facilities. Refer to supervisor for determination.

NOTE: Ambulance service to a physician's office or a physician-directed clinic is not covered. (See §3114C.5 where a stop is made at a physician's office enroute to a hospital.)

B. Partial Payment.--Partial reimbursement may be made for otherwise covered ambulance service which exceed the criteria in 4 above. Base payment upon the amount that would have been payable had the patient been transported from the pickup point to the nearest appropriate facility. However, when the beneficiary was transported from a distant hospital or a SNF to his residence, base payment upon the amount that would have been payable had the beneficiary been transported to his residence from the nearest institution with appropriate facilities.

3660.2 Hepatitis B Vaccine.—Effective September 1, 1984, Part B of Medicare covers the reasonable cost of provider services for hepatitis B vaccine and its administration to a patient if it is ordered by a doctor of medicine or osteopathy. Deductible and coinsurance amounts apply.

Where the vaccine is administered in connection with other outpatient services, it may be included on the same outpatient bill (bill type 13). Where the vaccine is given to an inpatient, a separate Part B bill will be prepared because of a differing deductible and coinsurance requirement from inpatient services.

Applicable revenue code (e.g., 250) will be used. No special annotations are needed.

See §3157 for discussion of who is eligible for such vaccine.

6

3660.3 Rental or Puchase of DME.—

A. General Requirements.—The provider bills on HCFA-1450 for DME rented or sold to a beneficiary for use in his home or in an institution used as his home. A beneficiary may elect to rent an item of equipment rather than purchase it even though it may appear that purchase would be more economical for the program. Except for used equipment (see below), payment is made to the provider (subject to final settlement) at 80 percent of reasonable cost, less any unmet Part B deductible. Make full payment for the purchase of used DME which meets the criteria for waiver of the beneficiary's 20 percent coinsurance, less any unmet Part B deductible. (See §§3113ff. for coverage of equipment, §3113.7 for processing and payments, including lump-sum payments for inexpensive equipment, and §3525.7 for query procedures and diarying for continuing payments.)

Where the purchase price for equipment is $50 or less and a lump-sum payment made, the usual outpatient billing procedures apply. Where a lump-sum cannot be paid for purchased equipment, make payment in installments equal to those that would have been made had the beneficiary rented the equipment.

1. Processing Periodic Payments.--Where the provider rents the equipment to the patient, it submits a HCFA-1450 for each month's rental charge.

Where the provider sells the equipment to the patient, it submits one HCFA-1450 showing the purchase price. The provider may bill the patient once for his deductible and coinsurance liability or submit a bill each month.

To determine the number of periodic payments, divide the total charge (plus allowable State and local taxes and allowable interest or carrying charges) by the reasonable monthly rental charge. Where these do not divide evenly, make an additional periodic payment based upon the remainder if it is one-half or more of the reasonable monthly rental charge. Where the remainder is less, add the remaining reimbursement to the last full periodic payment.

2. Safeguards to Stop Payments When Medical Necessity Ends.--Establish appropriate safeguards to insure that payments are not made beyond the last month of medical necessity or beyond the month in which reimbursement will be completed, whichever comes first. For example, if medical necessity for a given item of equipment is estimated by the physician to be 8 months and periodic payments would extend over a period of 10 months, take appropriate steps to insure that the periodic payments are stopped at the end of the 8-month period.

Send notices to beneficiaries well in advance of the date that payments to providers are scheduled to stop so that payment would not be unnecessarily terminated where there is a continuing medical necessity for the equipment. Advise him of the reason that payments will be stopped, and that payments can continue if the continues to be medically necessary.

B. Special Bill Entries.—The following special entries are applicable.

Item 50. Description

Contains a description of the equipment. Compare this with the diagnosis (Item 77) and Remarks to determine necessity.

Item 51. Revenue Code

The following codes indicate the type.

291 - rental
292 - purchase new
293 - purchase used

Revenue code 293 represents used equipment for which the 20 percent coinsurance is waived. If you reduce the purchase price shown to a lower figure, report the lower figure in UNIBILL.

Item 94. Remarks

The rental rate, cost and anticipated months of use is shown. Compare these to determine whether the billed price is consistent with the length of time needed.

C. Coverage Revew.—Reimbursement may be made for expenses incurred by a patient for the rental or purchase of DME for use in his home provided that the conditions in Column A are met. Column B indicates the action to take to establish that the conditions have been met.

The patient may elect to rent even though purchase is more economical. However, make reimbursement on the basis of which is less expensive to the program.

Column A	Column B
Conditions	Review Action
1. Make payment for the following:	1.
Items of DME (§3113.1B) that are medically necessary. (See §3113.2).	Appendix shows coverage status of items of equipment. If item is not listed in appendix, refer to supervisor, who will determine whether item is covered in accordance with §§3113ff.
Separate charges for repairs, maintenance, and delivery. (See §3113.3.)	Repairs--only if DME is being purchased or is already owned by patient and repair is necessary to make the equipment serviceable. If expense for repairs exceeds the estimated expense to purchase or rent another item for the remaining period of medical need, deny the excess.

	Maintenance--only if the equipment is being purchased or is already owned by the patient and if the maintenance is extensive amounting to repairs, i.e., requiring the services of skilled technicians. (Deny claims for routine maintenance and periodic servicing, e.g., testing, cleaning, checking oiling.)
	Delivery--of rented or purchased equipment only if the supplier customarily makes a separate charge for delivery, and this is a common practice of the local suppliers.
Separate charges for disposable supplies, e.g., oxygen, if essential to the effective use of medically necessary DME. Separate charges for replacement of essential accessories such as hoses, tubes, mouthpieces, etc., only if the beneficiary owns or is purchasing durable medical equipment (§3113.4). (Medications used in connection with durable medical equipment are covered under certain conditions, see §3313.4.)	Claim must indicate that the patient has the DME for which the item is intended; the DME continues to be medically necessary; and the items are readily identifiable as the type customarily used with such equipment.

NOTE: If the quantity of accessories and/or supplies included in a claim seems excessive or if claims for such items are received from the same claimant with undue frequency, refer to a supervisor for handling in accordance with §3113.5.

2. DME must be for use in patient's residence other than a health care institution (§§3113.6 and 3120.5).	2. Payment cannot be made for equipment for use in an institution whose provider number in the current edition of the Directory of Medical Facilities classifies it as:

(a) a participating hospital;
(b) an emergency hospital;
(c) meets 1861(e)(1);
(d) a participating SNF; or
(e) meets 1861(j)(1)

If one of the above institutions has a distinct part which does not meet either 1861(e)(1) or (j)(1), the patient may be considered in his residence if he was physically located in such distinct part during the use period.

3. Physician's prescription

3. (a) Prescription and other required information must be reviewed to determine medical necessity and establish the duration of medical need. If DME is currently necessary, accept the physician's estimate of duration when it does not exceed 6 months. When the physician's estimate exceeds 6 months, is indefinite, or is lacking, refer to your supervisor. (See § 3113.7C.)

(b) The prescription should include the patient's diagnosis and prognosis, the reason the equipment is required and an estimate (in months) of the duration of need; if the prescription lacks this information, refer to your supervisor. (See §3113.7C.)

(c) Prescriptions for home dialysis delivery systems do not require an estimate of the duration of need, or estimate may be shown as indefinite.

(d) Prescriptions or other documentation for home oxygen systems must also include specification of the oxygen flow rate and an estimate of the frequency and duration of use of the oxygen system in addition to the information specified in (b) above. Prescriptions also may include specification of the type of oxygen delivery system to be used. If the type of system is specified, the medical reasons for selecting that system over alternative systems must also be specified. (See HCFA Pub. 6, §60-4.)

NOTE: When medical necessity has been established, approval of the claim should not be delayed because of a question involving the period of need. (See § 3113.7C.)

3660.4 All-Inclusive Rate Providers.—

A. Providers Using All-Inclusive Rates for Inpatient Part A Charges.—Providers have the option with your approval to bill on a flat fee charge incurred on either a daily basis or total stay basis for services rendered. This is an "All Inclusive Rate." These charges may cover room and board including ancillary services or room and board only. The following explain the essential data entries that must be made on the HCFA-1450 by providers that use all-inclusive rates as charges. All-inclusive rate providers are identified by one of the following charge structures:

- One total all-inclusive charge rate for both accommodations and ancillary services, including the cost of blood in the rate,
- One total all-inclusive charge rate for both accommodations and ancillary services, not including the cost of blood in the rate,
- One all-inclusive charge rate for accommodations and another for ancillary services including the cost of blood in the all-inclusive rate, or
- One all-inclusive charge rate for accommodations and another for ancillary services, not including the cost of blood in the all-inclusive rate.

Providers follow these special instructions for completing Items 50-56 of the billing form.

1. Accommodations

Revenue Codes - Codes which identify the accommodations furnished, ancillary services provided or billing calculation are entered in field 51. The code indicates whether the rate includes charges for ancillary services or only room and board.

If the patient was furnished more than one type of accommodation, the lines for each type of accommodation are completed. This is necessary whether or not the provider charges an all-inclusive rate according to accommodations.

Where the all-inclusive rate varies with the type of accommodation, Item 94 (Remarks) is annotated for a five-or-more bed accommodation showing the reason for the accommodation.

Unit of Service - A quantative measure for services rendered by revenue category to or for the patient which includes items such as the number of accommodation days, pints of blood, renal dialysis treatments, etc., is entered in column 52.

Total Charges - The total charges pertaining to the related revenue code for the current billing period is enter in column 53.

Unlabeled Charge Columns - These columns (54-56) are used to identify and allocate charge information pertaining to the related revenue code. They indicate whether the charges are for covered or noncovered services.

2. Ancillary Services

One All-Inclusive Charge Rate - Hospitals with one all-inclusive charge rate, including ancillary services, are reflected in the revenue code in item 51. The total charge in item 53 should reflect the charge for both accommodations and ancillary services.

Separate Ancillary All-Inclusve Rate - Some providers segregate charges for ancillary services for billing purposes. Where a separate flat rate charge for ancillary services is incurred either on a daily or total stay basis, the provider enters separate codes in items 5-52 for the services. These codes indicate whether the total charge includes only ancillary cost or includes other costs (i.e., blood).

If applicable, the following additional billing instructions are applied:

- Blood

  Whenever whole blood is furnished the patient, items 40-43 are completed. If the all-inclusive rate does not include the charge for whole blood or packed cells, items 50-52 are completed in the same way a provider not using all-inclusive rates would complete them. When the provider discounts its customary charges for unreplaced blood to which the deductible is applicable, it shows the charges before the discount.

  If the all-inclusive rate covers the cost of providing blood whenever a patient needs it, the number of pints furnished, replaced, not replaced, and the estimated cost per pint is entered in items 40-43. No amount can be shown in the Total Charges Column since the rate includes the cost of blood. The cost of any of the first three pints which are not replaced is shown in item 42. It is not necessary to show the cost for any replaced blood.

- All-Inclusive Charges Acccording to Disease, Injury, or Type of Treatment

  Providers that have a charge system based on the patient's illness or injury or type of treatment complete the line(s) for type of accommodation furnished showing number of days, rate, and total charges. The rate amount and total amounts should be the same. Blood entries are indicated as above.

- Physician's Component

  As with providers having a schedule of charges for individual services, the amount of any physician's component included in the all-inclusive charge is removed from the total covered charges before applying the inpatient deductible or coinsurance.

- Combined Billing

  Do not encourage the all-inclusive rate provider to combine bill. However, if it does, it must develop the capability and indicate in Item 94, Remarks, the number and type of each service it is combined billing. To identify such cases, the remark "Combined Billing" must be written in item 94, Remarks.

B. Providers Using All-Inclusive Rates for Part B Charges.—The following explains entries on the HCFA-1450 by providers that use all-inclusive rates as charges for Medicare Part B services. (See §3604 for instructions to complete the rest of the bill.)

1. Part B Services Rendered to Outpatients by Providers Which Charge One Outpatient Rate.--All-inclusive rate providers that charge one outpatient rate no matter what services are rendered to the outpatient indicate their charge in Item 50, as one total charge amount. These charges are identified as "All-inclusive Rate in Item 51. The total charge on Item 53 is the same as the covered charge in Item 51. The rest of the bill is completed according to §3604.

- Combined Billing

  This type of all-inclusive rate provider should not be encouraged to combine bill. However, if such a provider does combine bill, it must develop the capacity and indicate in Item 94 "Remarks" the number and type of each service it is combined billing. To identify such cases, the remark, "Combined Billing" is written in "Remarks".

2. Part B Services Rendered to Inpatients.--For billing purposes, the determination of charges for Part B ancillary services furnished to hospital or SNF inpatients when Part A benefits are not payable is dependent upon the cost reimbursement method used by the provider to apportion allowable costs between Medicare beneficiaries and other patients. (See Provider Reimbursement Manual, Part 1, §2208.3, regarding the various cost reimbursement methods used by all-inclusive rate providers in determining Part B inpatient ancillary costs.) These inpatient ancillary services may be payable under Part B when the level of care becomes noncovered under Part A or when Part A benefits become exhausted or are otherwise not payable.

Part B inpatient ancillary services include radiology, pathology, electrocardiology, electroencephalography, physical therapy, speech pathology, renal dialysis, and prosthetic devices, braces, and splints covered under the heading of medical supplies.

Participating hospitals use form HCFA-1450 to bill a limited number of services furnished inpatients whose benefit days are exhausted or who are otherwise not entitled to have payent made under Part A.

3. Part B Services Rendered to Inpatients by Providers That Have A Separate All-Inclusive Rate for Ancillary Services.--All-inclusive rate providers that have a separate all-inclusive charge rate for ancillary services bill for the limited number of covered services on the HCFA-1450. In all cases, item 4, "Type of Bill" indicates that the bill is for "Inpatient (Medicare Part B Only)." The all-inclusive ancillary rate or charge is in Item 50, as one charge amount. This ancillary charge rate is coded as "All-inclusive Rate" in Item 51, and the total charge (obtained by multiplying this rate per day x number of days after Part A benefits were exhausted) is entered in Item 53, Total Charges. The rest of the bill is completed according to §3604.

o Combined Billing

Providers that have a separate all-inclusive charge rate for ancillary services and use combined billing complete Item 18, Professional Component (hospital inpatients), when radiology or pathology services are provided.

4. Part B Services Rendered to Inpatients by Providers That Have One Total All-Inclusive Rate for Both Accommodations and Ancillary Services.-- All-inclusive rate providers that have one all-inclusive rate for both accommodations and ancillary services should follow the appropriate cost reimbursement method of billing instructions listed below. Regardless of the cost reimbursement method used by the hospital or SNF to obtain the rate, all charges allocated to the inpatient ancillary services are entered in Items 50-53 as one charge amount and identified as "Inclusive Rate." The rate is multiplied by the number of days the patient was in the facility (receiving covered services) after Part A benefits were exhausted to obtain the total charge for Part B inpatient services, entered on Item 53, TOTAL.

5. Cost Reimbursement Methods of Billing

a. Hospitals and SNFs Using Method A (Use of Statistical Data).--For billing purposes, using the costs report for the immediately preceding cost reporting period, the ratio of total allowable costs of the Part B inpatient ancillary services to total allowable costs of all inpatient services (including routine) applied to the provider's current all-inclusive billing rate represent the inclusive billing rate applicable to the ancillary services covered for Part B inpatients when Part A benefits are not available. They enter the charge amount obtained by this computation in Item 51.

b. Hospitals using Method B (Sliding Scale to Account for Difference between Average Length of Stay for Medicare Patients and that for All Patients).--Not applicable to SNFs. For billing purposes, an inclusive charge for the Part B inpatient ancillary services is determined by applying the same fixed percentage employed in the cost apportionment formula to the hospital's average inpatient ancillary charge. The average ancillary charge is determined from the hospital's prior year costs report by applying a percentage to its all-inclusive rate based on its total inpatient ancillary costs divided by total costs for all inpatient services (including routine).

Based on the best available data, the following percentages represent the average ratio of inpatient ancillary service costs which would be reimbursable under Part B, when Part A benefits are not available, to total inpatient ancillary service costs:

All hospitals Except Psychiatric	45%
Psychiatric	48%

The amount derived by mutiplying the appropriate percentage figure by the hospital's average inpatient ancillary service charge is entered in Item 51.

c. Hospitals using Method C (Hospitals with Established Descending Rates of Charges).--(Not applicable to SNFs.)

An inclusive charge for the Part B ancillary services is determined by applying the same fixed percentage (see below) employed in the cost apportionment formula to the hospital's all-inclusive rate, after application of the descending rates.

The following percentages, based on the best available data, represent the average ratio of inpatient ancillary service costs reimbursable under Part B, when Part A benefits are not available, to total costs of all inpatient services (ancillary and routine).

All Hospitals Except Psychiatric	16%
Psychiatric	6%

The amount derived by multiplying the hospital's total charge for inpatient services (ancillary and routine) by the appropriate percentage figure is entered in Item 51.

d. Hospitals and SNFs Using Method D (Use of Comparable Hospital or SNF Data).--For billing purposes, an inclusive billing rate applicable to the ancillary services covered for Part B inpatients, when Part A benefits are not available, is determined in the same manner and employing the same fixed percentages as those used by Method b hospitals (using 65 percent for SNFs).

The amount derived by multiplying the provider's average inpatient ancillary service charge by the appropriate percentage figure is entered in Item 51.

e. Hospitals and SNFs Using Method E (Percentage of Per Diem).--For billing purposes, the inclusive charge for Part B inpatient ancillary services is computed by applying the same fixed percentages as those used by Method C hospitals or by using 2.5 percent for SNFs. The amount derived by multplying the provider's total charge for inpatient services (ancillary and routine) by the appropriate percentage figure is in Item 51.

Any payments made by Medicare beneficiaries to providers for Part B inpatient ancillary services which are billable to, and reimbursable by, Medicare under these guidelines must be refunded to the beneficiaries.

3660.5 Hospitals That Do Not Chare.—Participating hospitals that do not charge individuals and also meet the exceptions to the law that normally exclude payment for expenses paid for directly or indirectly by a governmental entity, may be reimbursed the reasonable cost of furnishing covered services to Medicare beneficiaries. The following special procedures apply to their bills.

- Part A Services

Computing Medicare Billing Rate.--The Medicare billing rate per day is determined by the following equation:

$$\frac{\text{Total allowable inpatient cost}}{\text{Total inpatient days}} = \text{cost per day per patient}$$

Thus, the billing rate that appears is the average inpatient cost per day per inpatient as calculated from entries on the latest cost settlement report approved by Medicare. Where this is the provider's first year in the program, determine this rate based on the provider's books and record the appropriate billing rate for services rendered to Medicare beneficiaries.

Computing Medicare Billing Rate (Inpatient).--The Medicare billing rate is determined in the following manner:

$$\frac{\text{Total available inpatient cost}}{\text{Total inpatient days}} = \text{Cost per day per patient}$$

Multiply the cost per day per patient by 93 percent for short-term hospitals and by 98 percent for long-term hospitals. (See §2208.1E of the Provider Reimbursement Manual, Part I, for definitions of "short-term" and "long-term" hospitals.) Then apply the following fixed percentages. The result is the Medicare billing rate.

Computing Medicare Billing Rate (Outpatient).--The Medicare billing rate is determined by the following equation:

$$\frac{\text{Total allowable outpatient costs}}{\text{Total vists (occasions of service)}} = \text{average cost per visit}$$

Thus, the billing rate is the average cost per outpatient visit as calculated from entries on the latest cost settlement report approved by Medicare. Where this is the provider's first year in the program, determine this rate based on the provider's books and record the appropriate billing rate for services rendered to Medicare beneficiaries.

A. Explanation of Medicare Benefits (EOMB).--Where the hospital does not charge for outpatient services, do not send the individual to EOMB. This avoids confusion and the appearance that the beneficiary is liable for services received.

3660.6 Billing for Enteral and Parenteral Nutritional Therapy.--Providers can bill for necessary medical supplies, equipment, and nutrients for enteral and parenteral nutritional therapy (EPT) when the therapy meets the coverage guidelines (Coverage Issues Manual 65-10 - 65-10.3) as a prosthetic device. HHAs, SNFs, and hospitals which supply medical supplies, equipment and nutrients for enteral and parenteral nutritional therapy as a prosthetic device under Part B Medical and other health benefits, will bill the two Part B specialty carriers. When the EPT therapy meets the coverage guidelines, they are billed on the HCFA-1500.

Return claims containing EPT charges for services where the bill type is 12, 13, 22, 23, 33 or 34.

Manual instructions to the providers direct them to submit the EPT charges on Form HCFA-1500 to the carrier according to the locale of the provider (or home office if billing is centralized):

West of the Mississippi and the State of Minnesota

Transamerica Occidental Life Insurance Co.
Medicare Pen Mail
P.O. Box 60848 Terminal Annex
Los Angeles, CA 90054

East of the Mississippi

Blue Cross and Blue Shield of South Carolina
Parenteral/Enteral Claims Processing
Drawer F
Columbia, SC 29260-9987

They are also instructed to resubmit a new bill for services where the bill contained a combination of services.

3660.7 Pneumococcal Vaccinations.--Part B pays 100 percent of the reasonable charges for pneumoccal vaccinations and its administration to a patient if it is ordered by a physician who is a doctor or medicine or osteopathy. (See §3157A.) Neither deductible nor coinsurance apply.

The provider bills for these services on a HCFA-1450 with bill type 12X (hospital inpatient Part B) or 13 X (hospital outpatient), as appropriate with the following entries:

- o Revenue code 250 in Item 51;
- o Narrative description in Item 50; and
- o Code 06 in Item 44.

The provider completes the remaining items in accordance with regular billing instructions.

3660.8 Immunosuppressive Drugs Furnished to Transplant Patients.--Part B of Medicare covers the reasonable cost of FDA-approved immunosuppressive drugs. Payment is made for those immunosuppressive drugs that have been specifically labeled as such and approved for marketing by the FDA, as well as those prescription drugs, such as prednisone, that are used in conjunction with immunosuppressive drugs as part of a therapeutic regimen reflected in FDA-approved labeling for immunosuppressive drugs. Therefore, antibiotics, hypertensives, and other drugs that are not directly related to rejection are not covered. Deductible and coinsurance apply. This benefit is limited to a 1-year period after the date of the transplant procedure if the patient received a Medicare covered organ (e.g., kidney or heart) transplant. Coverage of immunosuppressive drugs received as a result of a transplant is contingent upon the transplant being covered by Medicare. (See §3613.) Medicare pays for immunosuppressive drugs which are provided outside the 1-year period if they are covered under some other provision of the law (e.g., when the drugs are covered as inpatient hospital services or are furnished incident to a physician's service).

The "1-year period after the date of the transplant procedure" is defined as 365 days from the day on which an inpatient is discharged from the hospital stay during which the transplant was performed. During a covered stay, include payment for these drugs in your payment to the hospital. If the same patient receives a subsequent transplant operation within 365 days, the 1-year period begins anew.

The FDA has identified and approved for marketing only the following specifically labeled immunosuppressive drugs:

- Sandimmune (cyclosporine), Sandoz Pharmaceutical (oral or parenteral form);
- Imuran (azathioprine), Burroughs-Wellcome (oral);
- Atgam (antithymocyte/globuline), Upjohn (parenteral); and
- Orthoclone (OKT3 (muromonab-CD3), Ortho Pharmaceutical (parenteral).

In addition to the above listed drugs, prescription drugs used in conjunction with immunosuppressive drugs as part of a therapeutic regimen reflected in FDA-approved labeling for immunosuppressive drugs are also covered.

You are expected to keep informed of FDA additions to the list of the immunosuppressive drugs. Prescriptions generally should be nonrefillable and limited to a 30 day supply. The 30 day guideline is necessary because dosage frequently diminishes over a period of time, and further, it is not uncommon for the physician to change the prescription. Also, these drugs are expensive and the coinsurance liability on unused drugs could be a financial burden to the beneficiary. Unless there are special circumstances, do not consider a supply of drugs in excess of 30 days to be reasonable and necessary. Deny payment accordingly.

A. Billing Requirements.--The hospital bills on HCFA-1450 with bill type 12x (hospital inpatient Part B) or 13x (hospital outpatient) as appropriate with the following entries:

- Occurrence code 36 and date in Items 28-32;
- Revenue code 250 in Item 51; and

- Narrative description in Item 50.

The hospital completes the remaining items in accordance with regular billing instrutions.

B. EOMB Messages.--If the claim for an immunosuppressive drug is denied because it was not approved by the FDA, state on the EOMB:

- "Medicare does not pay for immunosuppressive drugs that are not specifically labeled and approved for marketing by the FDA."

If the claim for an immunosuppressive drug is denied because the 1 year time limit has expired, use the following message;

- "Medicare cannot pay for this drug since coverage is limited to 1 year following your discharge from the hospital after your transplant."

If the claim for an immunosuppressive drug is partially denied because of the 30 day limitation, use the following message;

- "Medicare will only pay for a 30 day nonrefillable supply of immunosuppressive drugs at one time."

If the claim for an immunosuppressive drug is denied because a transplant was not covered, use the following message;

- "Medicare does not pay for immunosuppressive drugs furnished in conjunction with a transplant unless the transplant itself was covered by Medicare."

3664. ADJUSTMENT BILLS

A. General.—Adjustment bills are the most common mechanism for changing a previously accepted bill. They are required to reflect the results of PRO medical review. (See §3674.5.) You may process a PRO adjustment and count it processed before receiving the batch acceptance record. (See §3674.5.) Adjustments may also be requested by HCFA if HCFA discovers that bills have been accepted and posted in error to a particular record. (See §3816.2.) Providers report adjustments as described in §3664.1.

Where reimbursement is handled through cost reporting and settlement processes, the provider accumulates a log for those items not requiring an adjustment bill. For cost settlement, pay on the basis of the log. This log must include:

- Patient name;
- HICN;
- Dates of admission and discharge, or from and thru dates;
- Adjustment in charges (broken out by ancillary or routine service); and
- Any unique numbering or filing code necessary for the hospital to associate the adjustment charge with the original billing.

Providers in Maryland, which are not paid under PPS or cost reports, submit an adjustment bill for inpatient care of $500 or more, and keep a log as described above for lesser amounts. Because there are no adjustment bills, enter the payment amounts from the summary log into the PPS waiver simulation and annually pay the items on the log after the cost report is filed.

An original bill does not have to be accepted by HCFA prior to making related adjustments to the provider. However, for all adjustments other than PRO adjustments (e.g., provider submitted, and/or those you initiate) submit an adjustment bill to HCFA following HCFA's acceptance of the initial bill. To verify HCFA's acceptance, take one or both of the following actions:

1. Submit a Status Query.—The reply to a status query provides the thru or discharge date of the last bill posted as well as all open items. When the admission for the bill in question is absent from the query reply and the thru or discharge date of the last bill posted is on, or after, the discharge date of the bill in question, presume that the original bill has been posted.

2. Review Your Batch Record.—The first interim batch record shows the status of each bill. The final batch record shows which were accepted and which were deleted. If a final batch record has not been prepared, review all interim batch records for the batch in which the original bill (the bill to be adjusted) was submitted. If the bill was deleted, it should appear on an interim batch record. If the bill is shown as pending on the first interim batch record but does not appear as a deleted item or on an interim batch record and no final batch record has been received, the bill may have been accepted by HCFA. A status query will verify acceptance.

The status query is the fastest way to determine whether an original bill has been accepted. However, if the status query reply shows that the bill has not been posted, review the batch notices to determine if it is still pending within HCFA's system or has been rejected. If rejected, see subsection B. If pending, do not send an adjustment until the bill is accepted. For PRO initiated adjustments, these requirements are waived.

You may submit PRO adjustments to HCFA absent HCFA's acceptance of the initial bill, if you choose to do so. You should, however, be aware that should the initial bill RTI, the adjustment will also RTI.

B. General Rules for Submitting Adjustment Bills.--Adjustment bills which are "credits" must match the original on the following fields:

- o Surname;
- o HICN;
- o Admission date;
- o From/thru dates;
- o When present, discharge date;
- o Utilization days (i.e., full, coinsurance);
- o Deductible and blood (pints furnished, pints replaced, and deductible); and
- o Intermediary control number.

Cancel only adjustments are not acceptable, except in cases of incorrect provider identification or HICNs.

If billing data was submitted in a format which HCFA no longer accepts, use the new format.

If you furnished the Part B carrier a copy of the original bill which is being adjusted, furnish them a copy of the adjusted bill.

If adjustment bills returned by HCFA for additional corrections need to be resubmitted, send them in the applicable batch category (e.g., you must include inpatient adjustment bills in an inpatient bill batch). Even if the adjustment action is requested by letter from HCFA, submit the adjustment bill in your UNIBILL record. If a rejected adjustment bill is determined to be unnecessary, stop the adjustment action upon receipt of correction.

Where an adjustment changes subsequent utilization, note this and process adjustments to subsequent bills if you service the provider. In New Jersey there may be additional changes in utilization because it is a waiver State. If you do not service the provider, HCFA will contact the intermediaries which submitted bills with subsequent billing dates that are affected by the adjustments via an SSA-L389 or SSA-L1001 (see §3816.2) upon receipt of the adjusted bills via magnetic tape. (An indicator is set by HCFA on its records upon advising an intermediary of the appropriate adjustment actions.)

C. Action When Original Bill is or Can be Expected to be Rejected by HCFA.—If you determine that the original bill has been rejected, you may process the adjustment and the RTI correction in the same action, if your system permits. If you do this, include the "P" in the third position of bill type on all PRO requested adjustments.

Enter on the resubmittal items which you or the provider wish to adjust. This eliminates the need for an adjustment bill. If review of the batch records shows that the original bill is still pending within HCFA, but the error on the bill will cause HCFA to delete it, for a provider's or your own adjustments, wait until it is rejected and returned before submitting the adjustment. However, do not wait until you have received the deleted bill from HCFA before instructing the provider to refund any overcollection in accordance with §3401.

When you doubt whether the original bill will be deleted by HCFA, do not send any adjustment (except a PRO initiated one, as described in §3674.5.B.) until you receive the batch record indicating final disposition (accepted or deleted).

NOTE: Resubmit any original bill which is deleted for correction even if you or the provider have already submitted an adjustment. The submission of an adjustment bill does not replace the need for the corrected original bill, and HCFA will delete any adjustment for which the original bill has not been processsed. In addition, the open item remains open and under RTI control until the corrected original is received.

D. Adjustment Bills Involving Time Limitation for Filing Claims.--If a provider fails to include a particular item or service on its initial bill, an adjustment bill(s) to include such an item(s) or service(s) is not permitted after the expiration of the time limitation for filing a claim. However, to the extent that an adjustment bill otherwise corrects or supplements information previously submitted on a timely claim about specified services or items furnished to a specified individual, it is subject to the rules governing administrative finality rather than the time limitation for filing. (See §3799.2.)

Providers in Maryland which are not paid under PPS or cost reports, submit an adjustment bill for inpatient care of $500 or more, and submit a log for the lesser amounts.

3664.1 Tolerance Guides for Submitting Adjustment Bills.—

A. Inpatient Adjustment Bills.—When a bill has been submitted and you discover an error, the provider submits an adjustment bill if the error is:

o A change in the number of inpatient days (including a change in the length of stay or a different allocation of covered/noncovered days);

- A change in blood deductible;
- A change in the inpatient cash deductible of more than $1;
- A change in the servicing provider;
- A change in discharge status in a PPS hospital;
- A change in the DRG code; or
- A change in outlier payment amount.

When you receive any of the above, submit UNIBILL to HCFA. An adjustment from the PRO for any of the above also requires submission to HCFA.

Providers in Maryland submit a log for inpatient items under $500 along with their cost reports.

After cost reports are filed, make a lump sum payment to cover charges shown on the summary log. Additionally, if PPS is involved and the DRG has been changed as a result of medical review after an original bill has been forwarded to HCFA, adjustment debit/credit bills are required. The corrected bill must be an exact duplicate of the original, except for any changed fields including diagnostic and procedure codes.

Do not perform a separate audit for the summary log. Audit the log during the regular provider audit.

B. Outpatient Adjustment Bills.—When an initial bill for outpatient services has been submitted and the provider or you discover an error, the provider submits debit/credit adjustment bills to you. You submit debit/credit adjustment bills to HCFA if there is a change:

- In the Part B deductible of more than $1;
- In covered charges of more than $1 on bills for surgery or other outpatient procedures;
- In the servicing provider;
- In the blood deductible;
- In the coinsurance amount greater than $1.99; or
- In procedure codes.

Providers submit a log for use in the cost settlement for outpatient services not requiring an adjustment bill.

Physician Services

3668. PHYSICIAN SERVICES

3668.1 Billing for Physicians Services.—The services of provider-based physicians which are directly related to the medical care of the individual patient are not includable as covered provider costs. (See §§3145 and 3902.) However, the services of interns and residents, even though they are licensed physicians, are covered as a provider cost, except for "moonlighting" interns and residents who are reimbursed on a reasonable charge basis. (See §3115B.) The cost for interns and residents under an approved teaching program is included as routine services (accommodations charge, see §3101.6), or as part of the hospital component charge for outpatient department services. (See §3617 on billing for interns or residents who are in a program which has not been approved.)

Part B benefits for the professional components of physician and other nonprovider services are reimbursable on a reasonable charge basis. There are two methods of claiming them: The patient (or his representative) may request payment on the basis of an itemized bill (receipted or unpaid), or he may assign his claim to his source of medical treatment or services. By accepting assignment, the physician (or hospital authorized to bill and receive payment for physician services (see §§3688-3688.5)) can claim the payment. The physician or hospital accepting the assignment agrees to consider the reasonable charge as determined by the carrier to be the full charge for the service.

Ways in which physician services may be billed:

- HCFA-1500 Health Insurance Claim Form.—It is the prescribed form for claims prepared by physicians or suppliers whether or not the claims are assigned. Hospitals may use the HCFA-1500 to bill the carrier for the professional component of physicians' services where applicable.

- The combined billing method (form HCFA-1450 may be used only by all inclusive rate hospitals. (See §3604.1-3604.5.)

- HCFA-1490S Patient's Request for Medicare Payment.—This form is used only by beneficiaries (or their representatives) who complete and file their own claims.

3668.2 Combined Billing by All-Inclusive Rate and Teaching Hospitals.—

A. Hospital Requirements.—The combined billing method is available only to all inclusive rate and teaching hospitals. It combines the billing of the provider and professional components and eliminates the need for separate billings for physician's services. For interim reimbursement purposes, pay the hospital on the basis of a single billing. Obtain a realistic allocation of the physician compensation in accordance with §§3912ff. and make an adjustment between the Part A and Part B Trust Funds at the end of the provider's fiscal year.

The hospital must be entitled to receive SMI payment for a physician's services as an employer under §3488 or as a facility under §3488.1. Where a physician charges a fee for service, the combined billing method cannot be used. Combined billing is used only where the physician is compensated by salary or receives a percentage of charge.

When combined billing is used for either radiology or pathology, it must be used for both inpatient and outpatient services. All radiologists or all pathologists must agree. The combined billing method does not apply to any inpatient services except those furnished by radiologists or pathologists. Inpatient services (professional component) of hospital-based physicians other than radiologists or pathologists is billed to the carrier.

Combined billing may be used by other hospital-based physicians (except those treating mental disease) for outpatient services. However, before outpatient services furnished for an individual medical specialty can be billed, all physicians in that medical specialty department must agree. The use of the combined billing method by the individual medical specialty department is not dependent upon the approval of physicians in other medical specialty departments.

EXAMPLE All radiologists in a hospital agree to combined billing. The pathologists do not. Combined billing can be used for both inpatient and outpatient radiology services. It cannot be used for pathology services for either inpatient or outpatient services. Combined billing could not be used for pathology services even if the physicians reached a limited agreement to allow it for inpatient services, since the agreement to use combined billing must cover both inpatient and outpatient services.

Prior to the Omnibus Reconciliation Act of 1980, the Medicare Part B program paid 100 percent of the reasonable charges (no deductible or coinsurance) for physician's radiological and pathological services covered under Part B furnished to an inpatient of a qualified hospital by a physician in the field of radiology or pathology. Under the Omnibus Reconciliation Act, the Medicare Part B program pays 100 percent of the reasonable charges for such services only if the physician has in effect an agreement to accept assignment for all such services he furnishes to hospital inpatients. If he does not have such an agreement in effect, the program pays 80 percent of the reasonable charges after the application of any unmet deductible, whether the particular claim is submitted on an assigned or unassigned basis.

Ultrasonic diagnostic procedures are not considered radiological services, i.e., the physician's charge for his professional service is subject to the applicable Part B deductible and coinsurance. Accordingly, where a provider uses combined billing in the radiology department, it may not include the cost of ultrasonic procedures in that department. The cost of these procedures is included in another cost center appropriate for such services. If combined charges are used for ultrasonic procedures, their cost must be included in a cost center which uses combined charges. Conversely, if the provider does not use combined charges for these procedures, the cost of the procedures must be included in a cost center that does not use combined charges.

B. Physician's Authorization for Combined Billing.--Where the hospital uses the combined billing method. A one time authorization is necessary. The authorization is retained in the hospital's files. The signature of the hospital's representative on the billing form serves as a request for payment on behalf of the physician and as a certification that proper authorizations are on file. The following is a sample of an authorization which satisfies this requirement:

> "I hereby authorize the (name of hospital or any of its duly authorized administrators) to accept on my behalf any assignment made by any individual who receives medical treatment from me at the (name of institution) of the amount payable to such individual under Part B of Title XVIII of the Social Security Act, and to receive on my behalf any payments which may be made pursuant to such assignment. It is understood and agreed that the reasonable charge which will serve as the basis for payment in accordance with the terms of such assignment shall be the full charge for the services."

An additional statement includes the individual arrangements agreed upon by the provider and the physician(s) governing the conditions of withdrawing the authorization.

C. Intermediary Controls.—You may not authorize the use of, or discontinuation of, the use of the combined billing method until the carrier has been advised of:

- The name of the hospital where the combined billing method will be used or discontinued;
- The specific departments involved, and whether the combined billing agreement covers both outpatient and inpatient services;
- The names of the physicians in each department; and
- The effective date or the change to (or from) the combined billing procedure.

The hospital is expected to be consistent in its billing practices and to notify the carrier and you of any changes in the manner of billing or in any item shown above.

When changes occur, promptly confirm from your copy of the notice or from the provider that the Part B carrier has been notified, and insure that the notification shows whether the change covers outpatient services as well as inpatient radiology and/or pathology. If any departments are excluded from the combined billing arrangements, identify them.

D. Bill Preparation.—

1. General.—To use combined billing, the hospital in consultation with you must calculate an apportionment for physician patient care services on a per diem basis. This apportionment is divided between inpatient and outpatient services on the basis of the time spent on each. The inpatient per diem figure is obtained by dividing the total annual inpatient charge for these services by the estimated annual number of inpatient days for all patients. Base outpatient professional component on per visit (i.e., visits divided into total outpatient charges). Exclude the cost on Reasonable Compensation Equivalent (RCE) for hospital-based physician individual patient care services from the hospital's all-inclusive rate. Include it separately on the hospital bill.

2. Part A Inpatient Combined Billing All-Inclusive Rate Hospital.—Providers indicate the psychiatric professional revenue code as 961 and all other professional components either with code 960, or an appropriate detail level 96X, 97X, or 98X, depending on circumstances.

Create and process a Part B bill as if a separate HCFA-1450 was received.

For patients enrolled under Part B, reimburse the provider for 80 percent of the physician per diem charges in excess of the Part B deductible, prepare an EOMB for the beneficiary, and report the bill to HCFA using an UNIBILL outpatient record. (See §§3825.1, 3871, and 3880.2.) Where psychiatric services are involved, the $500 annual limitation applies to outpatient professional components only. (See §§3525ff.)

Patients not enrolled under Part B are liable for the entire physician charge. The provider maintains a record of the inpatient days of these individuals so that this cost may be excluded from the amount of program obligation at the time of retroactive cost adjustment.

3. Part B Inpatient and Part B Outpatient Combined Billing, All Inclusive Rate Hospital.—The instructions in §3622 and subsection 2 above apply except:

- Only one bill need be processed.
- The $500 annual psychiatric limitation applies to outpatient services only.

4. Acceptable Alternative Methods.—An alternative to consider where the bill volume is low, is to request the all-inclusive rate or teaching hospital to prepare a separate Part B bill instead of combining the Part B charge with the Part A bill. It is not appropriate to incur significant data entry costs for separate bills nor to place undue burden on providers for preparing separate bills unless absolutely necessary.

Consider establishing the individual providers professional component per diem rates in the provider file and automatically determining the professional component amount from the length of stay or number of outpatient visits.

RO approval is necessary if you implement either above method. After approval, supply the provider with the necessary instructions to implement the decision.

3669. RESIDENTS AND INTERNS NOT UNDER APPROVED TEACHING PROGRAMS

A. General.—A provider's cost for the services furnished by residents and interns not under approved teaching programs (including physicians employed by the provider who are authorized to practice only in a provider setting) are covered under Part B. (Part A covers only the costs of services performed for inpatients by residents and interns who are under approved teaching programs.) See §3115 for further information on the coverage of these services.

The provider determines that part of the inpatient charges which represents the cost of the services of residents and interns who are not under approved teaching programs and bills these separately under Part B, using type of bill code 121 and revenue code 96X, 97X, or 98X as applicable.

B. Provider Procedures.—The cost of Part B residents' and interns' services to inpatients is calculated on a per diem basis by the hospital in consultation with you. Apportion the total cost of such services (including fringe benefits, etc.) between inpatient and outpatient services on the basis of the time spent on each. Obtain the inpatient per diem figure by dividing the total annual inpatient cost for these services by the estimated annual number of inpatient days for all patients.

For patients who are enrolled under Part B, regardless of whether Part A benefits are payable, the provider is reimbursed for 80 percent of the cost of providing these services. The provider collects or bills the complementary insurer for 20 percent of the per diem rate for the services of residents and interns covered under Part B times the number of inpatient days provided. The administrative cost of determining Part B deductible status involving the cost of query, response, recording, and accounting on an individual basis in the aggregate, exceeds the potential patient deductible obligation. Therefore, as long as the patient is entitled to Part A benefits no determination of the patient's deductible liability need be made for inpatient Part B interns' and residents' services.

Patients not enrolled under Part B are liable for the entire cost of interns' and residents' services. The provider maintains a record of the inpatient days of these individuals so that this cost may be excluded from the amount of program obligation at the time of final cost settlement.

C. Intermediary Procedures.—Assist the provider in arriving at the inpatient per diem rate for the cost of services covered under Part B provided by residents and interns. (See Provider Reimbursement Manual, Part I, §2120 for apportioning costs between inpatient and outpatient per diem and §2406 for establishing interim rates.) The normal interim reimbursement rate applied to other provider services applies to Part B residents' and interns' services.

3670. DETECTION OF DUPLICATE CLAIMS

Whenever any of the following claim situations occur develop to prevent duplicate payment of claims. This includes:

- Outpatient payment is claimed where the date of service is totally within inpatient dates of service at the same or another provider. Do not consider outpatient services provided on the day of discharge within the inpatient dates of service.

- Outpatient bill is submitted for services on the day of an inpatient admission or the day before the day of admission to the same hospital.

- Outpatient bill overlaps an inpatient admission period.

- Outpatient bill for services matches another outpatient bill with a service date for the same revenue code at the same provider or under a different provider number.

Outpatient services means services for which you prepare an outpatient UNIBILL record from all providers.

A. History File - Paid Claims.—Maintain a history file containing information about each HCFA-1450 processed. The file may consist of the HCFA-1450 or information from it. It must contain the following minimum information:

- Beneficiary HICN;
- Beneficiary name information;
- Provider identification (name or number); and
- Billing period from the claim.

Claims or claims information in the history file may be transferred to inactive files or retired to a Federal record center per SS2980ff. of Part 2. However, you must have the facility to recall such claims or information if a claim for the beneficiary involving the same time period is received.

B. History File - Pending Claims.—Each processing system must have controls to prevent a duplicate claim being paid while two claims are in the process within the system at the same time. This may be accomplished through a special check of in-process claims or in the design of the history file for paid claims. The file should contain the same minimum information indicated in subsection A. It is desirable (but not essential) for the check to be performed prior to query to prevent occasional improper deductible postings and the corrective action which would have to follow.

C. Criteria for Detecting Potential Duplicates.—A "potential duplicate" claim is a HCFA-1450 being processed which, when compared to the history or pending file, has the following characteristics:

- Match on the beneficiary information;
- Match on provider identification; and
- One day or more overlap in billing period indicated.

Examine and compare to the prior bill any bill which is identified as a potential duplicate. For the HCFA-1450, if the services (revenue or HCPCS codes) for one claim duplicate the services for the other, check the diagnosis. If the diagnosis codes are duplicates, obtain an explanation from the provider before making payment. Required action:

o Review your records to determine if you have made payment;

o Initiate appropriate recovery action;

o Instruct the provider to refund to the beneficiary any Part B deductible and/or coinsurance collected, or use your indemnification process, as appropriate; and

o Determine what data you need to support cost settlement and arrange to prepare it.

D. Analysis of Patterns of Duplicate Claims.--Establish a system for continuing analysis of duplicate claims. This includes the systematic evaluation of returned "Explanation of Benefits" from beneficiaries and communications from providers indicating a duplicate payment has been made, as well as returned checks from any payee.

The system should provide for analyzing duplicate receipts to determine whether certain providers are responsible for duplicates and if so identify them. Contact them to reduce the number of duplicates submitted. Should duplicate claims activity continue initiate program integrity action.

3672. COORDINATION WITH CARRIERS

A. Nonphysician Services.—For the services to be covered, hospitals must furnish either directly or under "arrangements," as defined in section 1861(w)(1) of the Act, all items and nonphysician services needed by Medicare inpatients. To insure that nonphysician services were billed only to a hospital, HCFA initiated the A/B Data Exchange. Its objective is to prevent double billing for services provided to hospital inpatients through the exchange of payment information by carriers and intermediaries.

Should you and the carrier develop a more efficient and cost-effective method of identification, discuss your alternative with the RO. The RO may approve an alternative which meets the objective and is cost-effective.

Carriers are responsible for ensuring that they do not pay for nonphysician services provided to hospital inpatients. This requires coordination and data exchange between you and them. Send the carrier a duplicate of the PROBILL record that you furnish the PRO. (See §3770.1.) Furnish the carrier a record file with the same frequency with which you furnish the PROBILL file to the PRO unless your RO has approved a different frequency. The carrier will process it in accordance with §3672.1.

B. Other Medical Items, Supplies, and Services—The following medical items, supplies, and services furnished to hospital inpatients are covered as hospital services under Part A. Consequently, they are covered by the prospective payment rate or reimbursed as reasonable costs under Part A to hospitals excluded from prospective payment.

- Laboratory services (excluding anatomic pathology services);
- Pacemakers and other prosthetic devices including lenses, and artificial limbs, knees, and hips;
- Radiology services, including computed tomography (CT) scans furnished to inpatients by a physician's office, other hospital or radiology clinic;
- Total parenteral nutrition (TPN) services; and
- Transportation including transportation by ambulance to and from another hospital or freestanding facility to receive specialized diagnostic or therapeutic services not available at the facility where the patient is an inpatient. Hospitals include the cost of these services in the appropriate ancillary service cost center, i.e., in the cost of the diagnostic or therapeutic service. They are not shown separately under revenue code 540.

Exceptions:

- Pneumococcal Vaccine

Pneumococcal vaccine is payable under Part B only and is billed by the hospital on the HCFA-1450.

- Ambulance Service Other Than That Described in Subsection B1

  For purposes of this section "hospital inpatient" means a beneficiary who has been formally admitted. It does not include a beneficiary who is in the process of being transferred from one hospital to another. Where the patient is transferred from one hospital to another, and is admitted as an inpatient to the second, the ambulance service is payable only under Part B. If transportation is by a hospital owned and operated ambulance, the hospital bills separately on form HCFA-1450. Similarly, if the hospital arranges for transportation with an ambulance operator, including paying the ambulance operator, it bills separately. However, if the hospital does not assume any financial responsibility, the billing is to the carrier by the ambulance operator or beneficiary, as appropriate.

- Anesthetist Services "Incident to" Physician Services

  If a physician's practice was to employ anesthetists and to bill on a reasonable charge basis for these services and that practice was in effect as of the last day of a hospital's most recent 12 month cost reporting period ending before September 30, 1983, the physician may continue that practice through cost reporting periods beginning October 1, 1984. However, if a physician chooses to continue this practice, the hospital may not add the costs of the anesthetist's service to its base period costs for purposes of its transition payment rates. If it is the existing or new practice of the physician to employ certified registered nurse anesthetists (CRNAs) and other qualified anesthetists and include charges for their services in his or her bills for anesthesiology services for hospital cost report periods beginning on or after October 1, 1984 and before October 1, 1987, the physician may continue to do so.

- Part B Inpatient Services

  Where Part A benefits are not payable, payment has been made to the hospital under Part B for certain medical and other health services. (See §3640.2.)

C. Exception/Waiver.--The provisions of subsections A and B have been waived for several hospitals. They are:

- Mayo Clinic
  Rochester, MN

- Rochester Methodist Hospital
  Rochester, MN

- Scott and White Memorial Hospital
  Temple, TX

- St. Marys Hospital
  Rochester, MN

- Carle Clinic and Foundation Hospital
  Urbana, IL

Instructions for these hospitals are issued by the appropriate RO.

If you service any of these hospitals, the carrier will notify you of claim payments so that an appropriate adjustment can be made to the Part A reimbursement. The carrier provides the following information:

- Beneficiary's HICN,
- Name,
- Sex,
- Hospital Provider Number,
- Supplier ID Number,
- Type and dates of service, and
- Amount allowed before application of deductible and coinsurance.

Work out the specific format with the carrier. Use the information provided to deduct the appropriate payment amount from a future payment to the hospital. It is not necessary to adjust the individual DRG payment, whether already made or not. However, make such deductions within 30 days of receipt of the carrier's notification. If the hospital contests the deduction, determine whether the deduction is appropriate. If not, inform the carrier to recover its overpayment and to educate the supplier.

3672.1 Part A Denials.—Where medical review by the PRO results in denial of services, the UNIBILL record you furnish the carrier (see §3770.2) on inpatient adjustments alerts the carrier of the need to review the bill for inappropriate payment. A "P" in the third position of type of bill on the UNIBILL identifies the record as involving a PRO medical denial. Inform the carrier of denials of SNF services by sending the carrier a copy of the denial letter unless your RO has approved other arrangements.

Send UNIBILL records to the carrier within 5 working days of preparation of the UNIBILL unless your RO has approved a different frequency. Work out specific arrangements regarding the mode. Send the SNF denial notification within 5 working days of preparation of the denial letter.

3672.2 Nonphysician Services Furnished to Hospital Inpatients Are Billed to Carrier.—A participating hospital agrees that any covered items and services, except physician services, which are furnished to an inpatient beneficiary will be furnished by it or by others under arrangements. If a supplier bills the beneficiary or the carrier for covered items and services while the beneficiary was an inpatient of a participating hospital, one of two situations exists:

- The hospital has breached the requirements of its participation agreement by permitting such billing; or

- The supplier has double billed, if both the hospital and Medicare have been billed.

In either event, corrective action is necessary.

3672.3 Corrective Action When Nonphysician Services Are Furnished to Hospital Inpatients.—Prepayment Denials - Carriers will deny claims from a beneficiary or supplier for nonphysician services furnished to hospital inpatients. These include ambulance and other services identified with "inpatient" as place of service. They will notify you of the denial using the record format shown in §3672.5 for claims with charges of $50 or more. This $50 tolerance will be reevaluated when you and the carriers have established a functioning exchange. In all cases, the carrier will notify the beneficiary and, if assigned, the supplier that action will be taken to have the services paid by the hospital, if it has not done so.

When you receive the report, determine the identity of the hospital and the corrective action to take depending upon whether the supplier has been paid by the hospital or the beneficiary, or that the supplier remains unpaid.

1. Hospital Has Paid the Supplier.—Inform the carrier to see that the supplier refunds any amount collected from the beneficiary or person acting on his behalf.

2. Hospital Has Not Paid the Supplier.—Instruct the hospital to determine whether the beneficiary has paid the supplier. If the beneficiary has, the hospital is to reimburse him. If the beneficiary has not, the hospital pays the supplier's full charge or such reduced charge as it can negotiate.

At least once every 6 months, select a valid statistical sample of cases reported by carriers and verify that the hospital has taken the required corrective action. Contact the beneficiary and/or the supplier to verify the hospital's allegations. If you find noncompliance by a hospital, ask the OIG field office for further guidance.

If the hospital is paid under the cost reimbursement system, it may include the additional payment to the supplier as a program cost (subject to the usual rules regarding reasonableness, etc.). Adjustment bills are not processed for money only adjustments.

Any PPS payment to the hospital is considered payment in full for the admission.

3672.4 Recovery of Overpayment When Nonphysician Services Furnished to Hospital Inpatient Paid by Carrier.—

A. Carrier Action.—If the carrier paid the bill, it did not know that the services were for an inpatient until its matching operations identified the problem using the periodic payment files you furnished. The carrier reports to you any cases identified in this operation using the format in §3672.5. Charges totaling $50 or less are ignored and not sent to you.

B. Intermediary Actions on Recovery.—Ascertain the identity of the hospital and determine whether:

1. The Hospital Paid the Supplier.—If so, inform the carrier.

- Assigned claim - the carrier will:
  - Contact the supplier;
  - Instruct supplier to reimburse the beneficiary any amount collected for deductible and coinsurance;
  - Recover the overpayment;

- Send adjustment queries if necessary; and
- Develop any program abuse.

- o Unassigned claims - the carrier will:

  - Contact supplier;
  - Instruct supplier to reimburse the beneficiary for the full amount beneficiary paid including deductible and coinsurance;
  - Send adjustment queries if necessary; and
  - Develop any program abuse.

2. The Hospital Has Not Paid The Supplier.—If the hospital has not paid the supplier:

- o Recover from the hospital the amount that the carrier paid. (See field 25 of the record in §3672.5.) Note, however, that if the hospital is not subject to PPS and did not bill, it may claim an appropriate related amount on the cost report. Such amount may be credited to the recovery of the overpayment as described in subsection C. Adjustment bills are not needed unless you need them to update your PS&R record.

- o Instruct the hospital to reimburse:

  - The beneficiary or someone on his behalf the amount of the paid deductible and/or coinsurance for the services in question and, for unassigned claims, the difference between the submitted charges and the approved charges.

  - The supplier (subject to possible negotiation of a lower amount). If the claim was assigned: the applied and unpaid amount for deductible and/or coinsurance, if applicable and the difference between reimbursed and actual charge. If the claim was unassigned: the difference between negotiated rate and carrier reimbursement amount. (The hospital may attempt to negotiate a lower charge with the supplier using any leverage it has based upon the supplier's desire to serve the hospital's Medicare patients in the future.)

- o If the carrier incorrectly paid the beneficiary or supplier on a Part B claim for items or services covered under Part A, the hospital is responsible for making payment to you to reimburse the Part B program for the incorrect payment.

  If the hospital is on cost reimbursement, the amount owed is a Part A cost and there would not be a payment from the hospital to the Part B program or a transfer of funds from the Part A to the Part B trust fund. If the hospital is under PPS, the hospital reimburses you in full since it was already paid. Credit the Part B trust fund.

C. Compliance Check.—At least once every 6 months, select a valid statistical sample of cases reported and verify that the hospital has taken the required corrective action. If the aberrant billing continues, notify the hospital in writing to correct its procedures. Persistent problems in violation of the hospital's participation agreement could result in a referral to the OIG for fraud and abuse.

3672.5 Format and Content of A/B Data Match Record Furnished by Carrier.—

FIELD NUMBER	TITLE	LENGTH	POSITIONS	NOTES
1	Intermediary Number	5	1-5	HCFA identifying number of intermediary requesting information.

3674. COORDINATION WITH THE PRO

3674.1 Waiver of Liability Provision.—(See §§3430ff. for a complete explanation of the waiver of liability provision.)

The basic premise of the waiver provision of section 1879 of the Social Security Act is that beneficiaries who did not know, and did not have reason to know, that services were not covered, are protected from liability in two specific denial situations: (1) when the services are found not to be reasonable and necessary (which includes adverse level of care determinations), and (2) when custodial care is involved. If the beneficiary had knowledge of the noncoverage of services, the ultimate liability rests with the beneficiary. When neither the beneficiary nor the provider knew, or reasonably could have been expected to know, that services were not covered, the program accepts liability. Where the provider had such knowledge, liability falls upon it, i.e., the provider can not charge the beneficiary for such services (other than deductibles and coinsurance), even though no program payment will be made.

Waiver of liability may apply to Part A and Part B services furnished by participating and nonparticipating hospitals (domestic and foreign), SNFs, HHAs, and other providers. (See §3430.) Coinsurance and deductibles may be charged the beneficiary where he receives the benefit of this waiver provision.

The PRO is responsible for making waiver determinations relating to cases it reviews for the hospital and beneficiary. The PRO informs you if payment should be made through the procedures described in §3900.

Payment for services disapproved by a PRO may not be made except under the waiver of liability provision. (See §3432.3.) If neither the beneficiary nor provider is liable for denied services, and the PRO determines that additional time is required to arrange for post discharge care, payment can be made for not more than 2 days.

Medically unnecessary or custodial care days (irrespective of whether paid for under waiver of liability), including "grace days," cannot be used to satisfy the 3 day prior hospitalization requirement for SNF payment.

3674.2 Responsibilities of Hospitals, PROs, and Intermediaries For Medical Review.— The Social Security Act (Act), as amended by the Tax Equity and Fiscal Responsibility Reform Act of 1982 (TEFRA, Public Law (PL) No. 97-248), requires that a PRO (in accordance with its contract with HCFA) review services and items provided by physicians, other health care practitioners, and providers of health care services for which Medicare payment is sought. The PRO's review determines if:

- Such items and services are reasonable and medically necessary, and meet specific Medicare coverage requirements as outlined in §§3100ff. and the Coverage Issues Manual;
- Quality of such services meets professionally recognized standards of health care; and

- Services and items proposed to be provided in a hospital or other health care facility on an inpatient basis are medically appropriate, or whether they could be provided more effectively and economically on an outpatient basis or in a different type of inpatient health care facility.

In addition, the Social Security Amendments of 1983 (PL No. 98-21) specifies that in hospitals subject to PPS, PROs must review:

- The validity of diagnostic information supplied by the provider;
- The completeness, adequacy, and quality of care provided;
- The appropriateness of admissions and discharges; and
- The appropriateness of care provided or proposed to be provided for which payment is sought on an "outlier" basis.

The PRO is responsible for these determinations. You are responsible for the adjudication of other factors (e.g., eligibility and payment amount) and for making the payment. This joint responsibility requires that the PRO notify you of its denial determinations, all outlier and preadmission determinations and diagnostic or procedural coding changes.

Where medical review is done prior to billing (cost outliers, and preadmission review), the hospital reports the results of the PRO review on the HCFA-1450 in Items 87-90. (See §3610.) Where the PRO reviews bills after your processing, it reports adjustments to you utilizing procedures in §3900.

Continue to screen claims for statutorally excluded items or services (e.g., dental and cosmetic). Screen claims for items and services outlined in the Coverage Issues Manual. When you identify claims requiring medical determination, refer them to the PRO for review.

3674.3 Responsibility for Issuing Denial Notices and Making Limitations of Liability Determinations.--The PRO is responsible for issuing denial notices and making limitation of liability determinations for cases it reviews. The PRO reports the results of its medical review activity so that you can prepare adjustment bills as needed. Do not issue a denial notice to the beneficiary or the hospital for cases that have been reviewed by the PRO. The beneficiary and hospital are notified by the PRO.

You are responsible for issuing denial notices only where you make denial determinations, e.g., SNF, HHA, and outpatient bills or denials based upon eligibility.

3674.4 PRO Prepayment Review System (PRS).--

A. PRS Overview.--HCFA has developed and provided a system for you to use to provide PROs with a means to insure prepayment review of claims where it is required, e.g., pre-admission and pre-procedure review.

The system compares inpatient hospital bill information to a table of condition sets supplied by the PRO. It provides the individual PRO with the flexibility to select which claims will be subjected to prepayment review.

The system does not replace the Medicare Code Editor or other edits defined in §3770.1, nor does it perform any edits for validity of the PRO table of condition sets.

B. Installation Requirements.—Use PRS in PPS and waiver States unless all hospital inpatient claims are reviewed by the PRO on a prepayment basis, or you use a system which provides edits acceptable to the PRO and the RO has approved it. If so, continue your system.

C. Processing Requirements.—The PRS determines which claims require PRO medical review determinations prior to payment based on the table of condition sets.

Do not use PRS when:

- o Field locator 87 contains 1, 3, 4, or 6.
- o Field locator 21 contains code 30.
- o The patient is notified that he no longer needs inpatient care (value code 31 present in one of the field locators 46 through 49).

PROs review all cases involving code 31 on post-payment basis.

Each condition set within the PRO table contains the following items:

Condition Set Number, a four position alpha numeric field assigned by the PRO to identify a unique condition set.

PRO Identification Number, self-explanatory.

Action Code, a one position alpha numeric field which defines how you are to handle the claim that meets the specific conditions within the set. Possibilities are:

- o Forward to PRO for medical review or return to hospital for PRO medical review (these bills may be considered incorrect and handled as described in §3600.1.C).

  In addition, each condition set may contain the following items in any combination:

  Physician Identification Number, a 12 position alpha numeric field identifying either the attending or other physician.

  Principal Diagnosis Code, self-explanatory.

  Principal Diagnosis "Not" Flag, a one position alpha code (N) which indicates the listed principal diagnosis code would not be included in the condition set, e.g., DRG 036 without the principal diagnosis in §366.20.

  Procedure Code, self-explanatory.

Procedure Code "Not" Flag, a one position alpha code (N) which indicates the procedure code in the condition set would not be included in any procedure code position on the claim.

Admission Type Code, a one position numeric code; 1=emergency, 2=urgent, 3=elective, 4=new born, and "blank" = any type.

Days Less Than, a two position numeric field to describe a length of stay which is less than the limit defined in the condition set.

DRG Number, self-explanatory.

Admission Quarter Code, a three position code indicating the quarter and year (QYY) in which the admission occurred.

FI/PRO Code, a two position alpha numeric code which can be mutually defined for use between you and PRO e.g., the last two(2) position of the PRO preadmission authorization code.

Physician Type, a one position alpha field used to distinguish between the attending or other physician in a condition set; A= attending physician, O= other physician and "blank" = either physician.

Provider Number, self-explanatory.

Individual bill record data needed:

The PRS system requires the following data:
Provider number
Attending physician identification number
Other physician identification number
Principal diagnosis code
First procedure code
Second procedure code
Third procedure code
Admission type code
Admission date
Statement through date
DRG
FI/PRO code data
PRO identification if you process claims for more than one PRO (unless you obtain this from the provider number).

When a condition set matches data on the individual claim, the PRS returns the condition set number and the action code. The condition set number identifies the reason for the edit. The action code tells you whether to develop the claim with the hospital or the PRO, depending upon your local arrangement.

The system identifies a maximum of five (5) occurrences or condition set numbers on each claim.

Claims identification prior to implementation of this system, develop your own method of associating bills in your work-in-process record with the condition and action code output of the PRS when matches occur. The PRS does not provide identifying information for individual claims, e.g., HICN. Determine the data elements and methods of returning claims to the hospital for any necessary PRO medical review when required. Coordinate with the PRO the data elements necessary for claims identification and the method of data exchange when the claim is to be referred to the PRO for medical review activity.

D. PRO Table Requirements.—

1. Timeframes and Testing.—The PRO is responsible for providing a table of condition sets to you on a quarterly basis. The table may be provided on tape or hard copy data entry forms and delivered to you no later than 30 days before the end of the current quarter. First delivery will be by September 3, 1985. Jointly develop with the PRO a test of each table to insure the PRO's intentions are met and that it understands how to use PRS.

Allow time for at least two tests and table correction cycles, providing you and the PRO with five(5) working days to submit test results and a corrected table when the table is found to contain errors, or approval sign offs when the table is correct.

The PRO is responsible for editing its table of condition sets for the validity of codes and code combination logic.

2. Table Updates.—The PRO provides a complete table of condition sets to you on a quarterly basis. Each table contains all condition sets which apply to claims processed during the quarter.

E. PRO Responsibilities.—

1. Timely updates to the table of condition sets.

2. Testing of table of condition sets with you.

3. Evaluation and impact of condition sets and the PRS.

4. Enforcement of appropriate provider coding in field locator 87.

F. Intermediary Responsibilities.—

1. Timely installation of the PRS, including interface with your systems.

2. Timely installation of the quarterly updates to the table of condition sets.

3. Testing the table of condition sets with the PRO.

4. Proper disposition of claims matching condition sets by the specific action code.

G. Intermediary and PRO Coordinated Responsibilities.—

1. You and the PRO must coordinate the following prior to implementation:

   - The definition and subsequent disposition of claims based upon PRO action codes within the table, e.g., forwarded to PRO for medical review, returned to the hospital for PRO medical review.
   - Determine which PRO action codes take precedence when a claim matches more than one set of conditions.
   - The definition and utilization of the PRO/FI code field.
   - Definition of the claim identification information to be forwarded to the PRO as a result of matches to condition sets when the action code indicates the claim should be forwarded to the PRO and the method of data exchange. (See H below.)
   - Determining the method of updating tables; i.g., tape or hard copy data entry forms.

H. Intermediary/PRO Electronic Exchange of Data.—Where claims are forwarded to the PRO for medical review rather than to the hospital and you and the PRO have agreed upon electronic exchange of data, locally designed formats are acceptable only where you and the PRO deal exclusively with each other (i.e., where neither deals with multiple PROs or intermediaries). Where you must provide PRS records in electronic format to multiple PROs use the UNIBILL format in §3876. Use Action Code 5 in the second position to identify a PRO PRS edit and add the lst three PRS condition codes in positions 1918-1929 and an indicator in position 1930 when more than three PRS condition set codes exist on a bill. Leave unavailable data elements (e.g., Medicare Reimbursement amount, date approved) blank. Use of this format provides a national format for intermediaries dealing with multiple PROs.

PROs which must return PRS results to more than one intermediary use the adjustment record format in §3900. The PRO indicates that all charges are approved by placing a code 9 in field 7 and leaves fields 8 through 16 blank. The record is further identified by a 3 in field 20 if UNIBILL format is returned, or a 4 if the UNIBILL format is not returned.

3674.5 PRO Reporting on Medical Review.--

A. General.—Routinely provide PROs with UNIBILL data from which they determine which claims to review. See §3770.1 for a description of your responsibility for reporting.

NOTE: Report on all hospital inpatient services (PPS, non-PPS, including specialty, distinct part units and SNF swing-bed) and all outpatient surgery hospital bills as defined in §3770.1.

After completion of its MR, the PRO initiates an adjustment record when the reimbursement amount or utilization changes. The PRO reports to you and to the hospital any claims that need adjustment because of:

- o A change in the DRG;
- o Admission denied;
- o Day outlier days denied;
- o Non-PPS hospital or SNF swing-bed days denied;
- o Incorrect date for hospital to begin charging the beneficiary;
- o Failure to provide medical documentation for review;
- o Cost outlier services denied;
- o Partial or complete reversals of inpatient bills resulting from reconsiderations or appeals;
- o Change in discharge status in a PPS hospital;
- o Lack of physician attestation;
- o A change in outpatient coding;
- o Outpatient services denied; or
- o Reversals or changes in outpatient surgical claims resulting from reconsiderations or appeals.

Where volume is very low, and the RO gives approval, hardcopy may be used.

Situations that are handled outside the automatic notice process through a letter or memorandum are:

- o Coverage issues identified in the Coverage Issues Manual (HCFA-Pub. 6) which involve charges in non-PPS hospitals and exempt units;
- o Corrections to previously adjusted claims;
- o Errors detected in the UNIBILL record resulting from PRO adjustments; or
- o DRG changes resulting from a change in age or sex.

All claims, regardless of the discharge date, that have been determined to be cost outliers will be priced including the outlier portion. The PRO identifies the cost outlier claim for post-payment review when condition code 61 is in the UNIBILL record positions 352 thru 365. When charges are denied as a result of a cost outlier review, the PRO furnishes the appropriate revenue code(s) and charges for the denied services on the adjustment record. (Instructions in the Hospital Manual require the hospital to provide the PRO with the revenue code applicable to the detail charges.)

With respect to a change in the DRG, PROs report only cases where changes in coding result in changes in the DRG. The PRO uses an approved Grouper program to avoid needless reporting of adjustments.

PROs report outpatient surgery cases to you when there is a change in reimbursement (an outpatient service is denied, a HCPCS outpatient surgery code is changed, or a previous denial is reversed). However, for those procedures subject to the ASC payment limitation, PROs report to you only if the change results in assignment to a new payment group.

The format and content of the record are described in subsections D and E. The PRO furnishes the unaltered UNIBILL record to you only if you can electronically process the adjustment more effectively with it. You, the PRO, and the RO must agree upon any deviation from the standard record format.

B. Responsibility Upon Receipt of the Record.—Prepare and process an adjustment bill within 60 days of receipt of the PRO adjustment record or the batch clearance record.

Report the receipt date of the PRO Adjustment Record (hardcopy or tape) or the batch clearance tape as the date received on the debit UNIBILL record in positions 1955 thru 1960. (See §3876.) When using the batch clearance receipt date, report condition code 63 in UNIBILL positions 352 through 365.

If you receive the PRO-Report for any action reason (field 7) before receiving HCFA's batch acceptance record, you may process the adjustment and count it processed. This permits you to complete and count your adjustment action more quickly. However, if your original bill results in a RTI, you will also receive a RTI on the adjustment. Depending upon your system for handling RTIs and adjustments, you may defer processing the PRO adjustment until you receive the batch acceptance record.

A reversal or modification of the PRO's initial adjustment will be sent to you electronically in the PRO Adjustment Record. (See subsections D and E.) Process a reversal or modification as an adjustment to the previously processed PRO adjustment. Use the P indicator in the third position of bill type to show the PRO was the source of this action. The previous debit becomes the credit on reversal; change the P on the new credit to an 8.

Process inpatient adjustments through MCE, Grouper, and Pricer. Process outpatient adjustments through Medicare OCE and the ASC Pricer. Return MCE or OCE exceptions to the PRO for resolution when the error relates to PRO submitted data. Prepare an adjustment UNIBILL for HCFA, the PRO, and the carrier. Show the letter P instead of the number 7 in the last position of the type of bill. Include the control data shown by the PRO in field 18 and 19 of the adjustment record on your adjustment debit or on the RTI correction if you use that process to make the adjustment. If you use the RTI correction process to make the adjustment, show the letter P in the third position of bill type, and forward the records to the PRO.

To identify adjustments you initiated, the third position of the type of bill on the debit is an I instead of 7. When the hospital is the source of an adjustment, the third position of type of bill for the debit is 7. (See §3876.1, but note that you must use the letter P in the last position of the type of bill, regardless of facility type, if you want to receive credit for processing the PRO adjustment. You may also use the I in the third position of the type of bill regardless of facility type. HCFA does not edit these codes against facility type.)

Use debit/credit pairs on all PRO adjustments including outpatient hospital surgery records. Cancel only adjustments are not acceptable, except in cases of incorrect provider identification or HICNs. Where the PRO makes a denial on an outpatient surgical bill, place an override code of 4 in the iteration of field 40 that represents the applicable revenue center codes related to the denied charges. Enter the date you forwarded UNIBILL to the PRO in field 81 (positions 1967-1972) now entitled "Scheduled Payment Date."

NOTE: For CPEP purposes the following UNIBILL entries are used in calculating the timeliness of processing PRO adjustment bills. Field 80 "Date Approved" determines the quarter in which the adjustment bill was processed. The bill must be an adjustment, with an action code of 3 "secondary debit adjustment" and a "P" in the third position of bill type to indicate the PRO is the source of the adjustment. Calculation of timeliness is based upon the difference between field 79 "Date Received" and field 81 "Scheduled Payment Date" which, for adjustment bills is the date forwarded.

The PRO reports charges for denied services to you in the appropriate revenue codes. Add them to any other noncovered charges for the specific revenue code and to the total noncovered charges. Also, where days are denied and the provider is liable, reduce cost report days and utilization days. Reduce Pricer calculation days by the number of days shown in field 9. Add occurrence span code 76 or 77 as appropriate in UNIBILL for any "from" and "through" dates in field 9. (See §3654 for additional instructions for processing adjustment bills.)

Where the PRO's MR indicates additional days or procedures are appropriate, it indicates this in field 7, "Reason for PRO Action." This field, in conjunction with field 8, "PRO Review Adjustment Code," indicates whether days (or charges) are being added or denied.

Where day outlier days or non-PPS days are denied, the PRO reports only the accommodation charges to you because it does not know what ancillary charges are applicable. Process your adjustment, deleting accommodations only, but do not permit processing of an inpatient Part B bill for the same period. If the hospital requests to bill for inpatient Part B services for the same period, in addition to the Part B bill, require another Part A adjustment bill deleting ancillary charges for the days denied before processing the Part B bill. Do not adjust your PS&R system or the hospital's cost report because of the minimal ancillary services that are recorded under Part A instead of Part B. Whenever outlier days or non-PPS hospital days are denied by the PRO, reduce cost report days and utilization days. Reduce utilization days if there is beneficiary liability as a result of the PRO's denial. In New Jersey, there may be additional changes in utilization due to the State's waiver from PPS.

Inform the hospital of a PRO initiated adjustment, either through your remittance record or by means that you develop.

C. Operational Procedures.--Each tape received from the PRO complies with the following requirements.

1. Magnetic Tape Reel External Identification Label.—Each reel of magnetic tape is identified with an external label prepared as follows:

- File Code - PRO-REPORT;
- Sub Code - PRO Identification Number;
- Oper. Code - Date Created (MMDDYY); and
- Reel No. - 1 of 1, 1 of 2, etc.

2. Control Identification.--

- FIRST First four characters of the batch number of the first record on the reel.
- LAST First four characters of the batch number of the last record on the reel.
- RECORDING CHARACTERISTICS - 9 track, 1600 BPI.

3. File Specifications.—

- Labeling Conventions - No Internal Label.
- Record Size - 450 characters. If UNIBILL is also needed, an additional 2000 characters are included.
- Block Size - Unblocked (one record per block).

D. PRO Inpatient Adjustment Record Layout and Description.—

Fld	Description	Psn.	Picture	Just.	From-Thru
1	Intermediary Number	5	9(5)		001-005
2	Intermediary Control Number	15	X(15)	L	006-020

NOTE: The PRO reproduces any information here that you show in field 82 of the UNIBILL (positions 1973-1987). This is any data you need that is not otherwise included in the adjustment record. For PRO Adjustment Review code n, complete reversal on appeal, the PRO enters the ICN from the adjustment UNIBILL. Retrieve the prior adjustment bill from history and process as an adjustment to the adjustment.

Fld	Description	Psn.	Picture	Just.	From-Thru
3	Beneficiary HICN	12	X(12)	L	021-032
4	Medicare Provider No.	6	X(6)	L	033-038
5	Admission Date	6	9(6)		039-044

NOTE: Some PROs/FIs have agreed to use the discharge date for the purpose of record identification. Where such arrangements have been made, use the discharge date in place of the admission date.

Fld	Description	Psn.	Picture	Just.	From-Thru
6a	Record Type 1 = inpatient 2 = outpatient	1	9		045-045
6b	Filler	7			046-052

8	PRO Review Adjustment Code a. Entire Admission Denied (sample review, transfers to distinct part or another hospital, questionable admission from code editor, etc.). b. Non-PPS hospital days denied. (NOTE: If entire admission in non-PPS hospital is denied, the PRO uses code a.)	1	X		054-054

c. DRG change resulting from change (single or multiple) in discharge status or any diagnosis or procedure. (NOTE: Where change in age or sex appears appropriate, handle the claim outside the automatic notice process. See §3537B to resolve age or sex discrepancies.)

d. Day outlier days denied.
e. Cost outlier charges denied.
f. Incorrect date for hospital to begin charging beneficiary. From date indicates first day of beneficiary liability; no thru date shown.
g. Combination of c. and d.
h. Combination of c. and e.
i. Combination of c. and f. - (see f. above)
j. Deemed admission (covered level of care following a noncovered admission)
k. Combination of c. and j.
l. Combination of d. and j.
m. Combination of e. and j.
n. Entire previous adjustment reversed (on appeal or other review).
o. Previous adjustment modified (on appeal or other review).
p. Change in discharge status, per diem payment applicable.

9 From and Thru Dates Associated with PRO Review Adjustment Codes b, d, f, g, i, j, k, l, m, n, or o (Occurs 4 times)

	Psn.	Picture	Just.	From-Thru
a. From Date	6	X(6)	L	055-060
b. Thru Date	6	X(6)	L	061-066 Repeated as needed thru 102

NOTE: The days denied are shown for PRO Review Adjustment Codes b, d, f, g, and l. For PRO Review Adjustment Codes j - m, derive the approved admission date by adding 1 day to the last through date in field 9. For PRO Review Adjustment Codes n, and o, days approved are shown in field 9 (positions 055-102).

10 Charges Denied or Approved for Code b, d, e, g, h, l, m, n, or o (Occurs 10 Times)

a. Revenue Center Code	3	999	R	103-105
b. Units	3	9(3)	R	106-108
c. Rate (if accommodations)	7	9(5)V99	R	109-115
d. Charges	8	9(6)V99	R	116-123 Repeated as needed thru 312

NOTE: For PRO Review Adjustment Codes n and o, charges for services previously denied but now approved are shown in field 10 (positions 103-312).

Fld	Description	Psn.	Picture	Just.	From-Thru
11	Filler	49			313-361
12	Revised Grouper Input				
	a. Discharge Status	2	99	R	362-363

NOTE: DRGs 121, 122, 123, 385, 433, and 456 are changed by changes in discharge status. Therefore, changes in discharge status for DRG changes are furnished only where the old or new DRG is one of the above. Where per diem payment is involved because discharge status is changed to, or from, status code 02 (discharged/transferred to another short term hospital, see field 8, code p.)

Fld	Description	Psn.	Picture	Just.	From-Thru
	b. Principal Diagnosis	5	XXXXX	L	364-368
	c. Other Diagnoses (occurs 4 times)	20		L	369-388
	First diagnosis	5	XXXXX	L	369-373
	Second diagnosis	5	XXXXX	L	374-378
	Third diagnosis	5	XXXXX	L	379-383
	Fourth diagnosis	5	XXXXX	L	384-388
	d. Principal Procedure	4	XXXX	L	389-392
	e. Other Procedure (occurs 2 times)	8	X(8)	L	393-400
	First procedure	4	XXXX	L	393-396
	Second procedure	4	XXXX	L	397-400

NOTE: When the PRO adds surgical procedures as a result of MR, derive a date for the procedure. Assume the date of the procedure is the day after admission. Since there is no space on the PRO Adjustment Record to add an operating physician number, bypass any edits requiring one.

Fld	Description	Psn.	Picture	Just.	From-Thru

NOTE: When the PRO includes data in fields 18 or 19, reproduce this information for field 18 in positions 1900-1905 and field 19 in positions 1906-1917 on the UNIBILL debit adjustment record.

20	UNIBILL Indicator 1 = UNIBILL not included 2 = UNIBILL is included	1	X(1)		450
21	UNIBILL RECORD Option	2000	X(2000)		451-2450

3674.6 Edits for PRO Report on Medical Review.--

A. Intermediary Edits.—Use the following edits to the PRO Report on Medical Review. Return adjustment records which fail the edits with the report format in D.

Fields that are not needed for your processing are not edited. For example, if you do not use the initial bill intermediary control number or the admission date in your adjustment process, do not edit these fields. Also, do not return the record for a missing intermediary number if you can find the proper record in your system. Fields 18 and 19, Processing Date at PRO and PRO Control Number, need not be edited; however, reproduce data shown in these fields on the UNIBILL debit adjustment record.

Process PRO adjustments which involve Revised Grouper Input, field 13, through the MCE to identify coding inconsistencies. Errors which involve nonspecific principal diagnosis, questionable admission, nonspecific O.R. procedures, and open biopsy check may be ignored since these codes are approved by the PRO. Return all other errors resulting from the MCE based upon the assumption that keying errors have occurred. Process PRO outpatient adjustments with revised coding through Medicare OCE and the ASC Pricer.

B. Edits for PRO Report to Intermediary on Medical Review (Adjustment Record).—

Inpatient

	Field	Edit	
2.	Intermediary Control Number (if used)	2a.	If used, either incomplete or invalid.
		2b.	Absent.
3.	HICN	3a.	Missing.
		3b.	No match to intermediary file.
4.	Medicare Provider No.	4a.	Incomplete or missing.
		4b.	No match to intermediary file.
		4c.	Not a hospital provider number see §3507.2.
5.	Admission Date (if used)	5a.	Incomplete, invalid, or missing
		5b.	No match to any admission date on file for this HICN and provider number.

Field	Edit	
7. Reason for PRO Action	7a.	Missing.
	7b.	Invalid, not a 1, 2, 3, 4 or 5.
8. PRO Adjustment Code	8a.	Missing.
	8b.	Invalid, not a through "p."
9. From and Thru Dates	9a.	Invalid, incomplete, or missing.

NOTE: The adjustment codes f and i have a from date without a thru date.

	9b.	Dates not within from and thru dates of matching bill.
10. Charges for Services Denied or Approved		
a. Revenue Center Code	10a.1.	Invalid, incomplete, or missing (at least one revenue center code must be shown for PRO Review. For adjustment codes b, d, and e, revenue codes should be 10X thru 15X or 20X or 21X).
b. Units	10b.1.	Missing (units must be shown for revenue center codes 10X thru 15X or 20X and 21X).
c. Rate	10c.1.	Missing (rate must be present when units are present).
d. Charges	10d.1.	Invalid, incomplete, or missing (see 10a.1.).
	10d.2.	Denied or approved charges are more than billed charges for revenue code.
12. Revised Grouper Input		

NOTE: Adjustments with revised Grouper input must process through the MCE.

a. Discharge Status	12.a.	Not always required, but if present, must be 01, 02, 03, 04, 05, 06, 07, 20, or 30.
b. Principal Diagnosis	12.b.1.	Must be present where field 8 equals c, g, h, or i.
13. New DRG	13.a.	Invalid or incomplete, must be 001 through 473 or effective with 10/1/85 discharges, 471.

Field		Edit	
14.	Adjusted No. of Grace Days Approved	14.a.	Invalid (must be 1 or 2).
17.	PRO Identification	17.a.	Incomplete, must be 5 position alpha numeric.
20.	UNIBILL Indicator	20.a.	Invalid (must be a 1 or 2).
21.	UNIBILL Record Option	21.a.	Absent and field 20 = 2.

In addition to the above edits, MCE errors that are applicable are:

Error	Edit
MCE 1	Age conflict - (e.g., 27 year old newborn).
MCE 2	Sex conflict - (e.g., male hysterectomy).
MCE 3	Invalid diagnoses or procedures - Codes which are not valid ICD-9-CM codes.
MCE 4	Invalid 4th and 5th digit - Codes for which the 4th or 5th digit is invalid or missing.
MCE 5	E-code as principal diagnosis - No E-code is allowed as a principal diagnosis, since E-codes are "cause" codes (accidents, etc.).
MCE 6	Manifestation code as principal diagnosis -Manifestation codes are not allowed as principal diagnoses because they are manifestations of some other underlying disease.
MCE 8	Unacceptable principal diagnosis - These are selected "V" codes which are unacceptable as principal diagnoses. For example, V659 (unspecified reason for consultation).
MCE 11	Noncovered procedures - These are procedures not covered by Medicare. An implantation of electromagnetic hearing aid is an example.
MCE 13	Invalid age - These are ages that are not between 0 years and 124 years. When an invalid age is reported, any diagnosis that is subject to an age check will show the related error message to the right of the diagnosis.
MCE 14	Invalid sex - These are sex codes that are not reported as 1 (male) or 2 (female). When an invalid sex code is reported, any diagnosis and/or procedure that is subject to a gender check will show the related error message to the right of the diagnosis and/or procedure.

C. Edits for PRO Report on Medical Review (Adjustment Record).--

Outpatient

	Field		Edit
2.	Intermediary Control Number	2a.	If used, either incomplete or invalid.
	(if used)	2b.	Absent.
3.	HICN	3a.	Missing.
		3b.	No match to intermediary file.
4.	Medicare Provider No.	4a.	Incomplete or missing.
		4b.	No match to intermediary file.
		4c.	Not a hospital provider number see §3507.2.
5.	From or Thru Date	5a.	Incomplete, invalid, or missing.
6.	Record Type	6a.	Absent.
		6b.	Invalid not a 1 or 2.
7.	Reason for PRO Action	7a.	Missing.
		7b.	Invalid, not a 1, 2, 3, 4, or 5.
8.	PRO Adjustment Code	8a.	Missing.
		8b.	Invalid, not q, r, s, t, or u.
9.	From and Thru Dates	9a.	Invalid, incomplete, or missing.
		9b.	Dates not within from and thru dates of matching bill.
10.	Charges for Services Denied		
	a. Revenue Center Code	10a.1.	Invalid, incomplete, or missing.
	b. Units	10b.1.	Missing.
	c. Charges Denied	10c.1.	Invalid, incomplete, or missing.
		10c.2.	Denied charges are more than billed charges for revenue code.

	Field	Edit	
12.	HCPCS Code		

NOTE: Adjustments with revised HCPCS code must process through the OCE.

	Field	Edit	
a.	Revenue Center Code	12.a.	Invalid, incomplete or missing.
b.	HCPCS Code	12.b.1.	Invalid, incomplete or missing.
c.	Units	12.c.1	Missing
d.	Charges Denied	12.d.1	Invalid, incomplete or missing.
e.	Action Code	12.e.1	Invalid, (must be 1 or 2).
16a	Arkansas or MDC System Paid Date	16.a	Invalid, incomplete or missing.
17.	PRO Identification	17.a.	Incomplete, must be 5 position alpha numeric.
20.	UNIBILL Indicator	20.a.	Invalid (must be a 1 or 2).
21.	UNIBILL Record Option	21.a.	Absent and field 20 = 2.

In addition to the above edits, OCE errors that are applicable are:

Error	Edit
OCE 1	Invalid diagnoses or procedures - Each diagnosis code is checked against a table of valid ICD-9-CM diagnosis codes and each procedure code is checked against a table of valid HCPCS codes.
OCE 2	Invalid 4th and 5th digit - Codes which require a 4th or 5th digit for which the 4th or 5th digit is invalid or missing.
OCE 3	E-code as principal diagnosis - No E-code is allowed as a principal diagnosis, since E-codes are "cause" codes (accidents, etc.).
OCE 4	Age conflict - There is a conflict between any diagnosis or procedure and the patient's age.
OCE 5	Sex conflict - There is a conflict between any diagnosis or procedure and the patient's sex (e.g., male hysterectomy).
OCE 6	Questionable Covered Procedures - These are procedures which may be covered under the Medicare program, depending on the medical circumstances.
OCE 7	Noncovered procedures - These are procedures not covered by Medicare. An implantation of electromagnetic hearing aid is an example.

Error	Edit
OCE 8	Medicare as secondary payer - MSP alert - Addendum E, pages E-61-68 identify situations that may involve automobile medical, no-fault or liability insurance. See §§33419.5 and 3489.4B for processing instructions and tolerances.
OCE 9	Invalid age - If the age is not between 0 years and 124 years, the OCE assumes the age is in error.
OCE 10	Invalid sex - The sex code reported must be either 1 (male) or 2 (female).
OCE 11	Date range - The OCE checks the from date in Item 22 on Form HCFA-1450. Billing dates not in the acceptable range of 7/1/87 through 9/30/88 are not edited. Continue processing the bill in your system.
OCE 12	Valid date - The OCE checks the month, day, and year from Item 22 (from date). If the date is impossible, return the bill to the hospital and request a corrected bill with a valid date.
OCE 13	Unlisted procedures - These are codes for surgical procedures (i.e., codes generally ending in 99). For listings of these codes and development instructions, see §3626.4.

D. Data Records to Return to the PRO.--Edit PRO adjustment records. If any of the following situations occur, generate the proper record as shown below and send the record to the PRO and the RO.

o Adjustment records which fail the edits as described in subsection B may be considered incorrect and handled as described in §3600.1D; return to the PRO using the associated error code with this message:

> "The following cases contained errors on the PRO report to the intermediary on MR. Please correct these errors and return them."

In the following situations, send the summary report to the PRO with this message:

> "Delete from your pending file; no adjustment is necessary."

o Inpatient adjustment records for PPS hospitals containing changes which do not result in a change in DRG, a denial, or a change in discharge status.

o Inpatient adjustment records for other than PPS hospitals that do not result in a change in reimbursement.

- o Outpatient surgical records subject to the ASC payment limitation for which the payment group does not change.

- o Inpatient adjustment records requesting a change in utilization where none is appropriate.

TO: Name and Address of PRO

FROM: Intermediary, Name, and Number

SUBJECT: FI Report to PRO on Nonprocessable Adjustment Records

PRO Control Number (if provided)	HICN	Provider#	Adms. Date (if provided; if you and PRO have agreed to use discharge date, show that date)	Reason for Return	Error Code
				a. PRO error. b. No denial, change in DRG, or discharge status for PPS hospital. c. No change in reimbursement for non-PPS hospital bill. d. No change in utilization. (Applies only to NJ.) e. No change in payment group for outpatient surgical claims.	

3676. ENFORCEMENT OF PROVIDER BILLING TIMELINESS AND ACCURACY STANDARD TO CONTINUE PIP

A. General.—To remain on PIP, providers, with the exception of HHAs, must submit 85 percent of its bills timely and accurately. Timely and accurately means that 85 percent of its bills (excluding those listed below) are submitted within 30 days of discharge and pass your front-end edits for consistency and completeness. A bill is not considered received unless it can pass your edits. Accumulate statistics on inpatient and SNF billing performance for each PIP provider to monitor whether it meets this requirement. Accumulate statistics for home health and use internally as an alert for potential problems. Assist the HHAs in identifying and correcting inaccuracies. These instructions do not effect bi-weekly payments for pass-thrus (Provider Reimbursement Manual §2405.2) and for adjustments to indirect cost for medical education (PRM §2405.3).

The evaluation for timeliness of billing should be consistent with the frequency for monitoring the payment amounts under the PIP program. Thus, for non-PPS providers the evaluation process is scheduled at 3 month intervals and PPS providers are evaluated every 4 months. The evaluation includes data from the entire 3 or 4 month period. In determining whether a provider submitted its bills within 30 days of discharge or thru date on interim bills, count the date from item 22 to the date you receive it. If the provider does not meet the criteria, discontinue PIP immediately, except for HHAs. The periodic performance report that you provide in accordance with subsection B will constitute advance notice before discontinuing PIP.

Exclude the following:

- MSP cases (value codes 12-16);
- PRO prepayment review cases (code 1 or 3 in Item 87);
- Discharge before October 1, 1985;
- Any other special situations identified by the provider or you that are documented as beyond provider control. Exclusions must be approved by the RO; and
- Bills that have not passed your front-end edits for acceptance. (Such bills are counted only when acceptable to your edit processes.)

Accumulate statistics monthly. Summarize them for the entire evaluation period.

B. Procedure for Measuring and Reporting to Providers.—Accumulate a record for each bill that passes your front-end edits. Count the bill in the month received regardless of the discharge month. No later than 10 work days after the end of the month, provide a report to each provider, except HHAs, for the month indicating the following:

- The total number of bills received;
- The number not excluded;

- The number not excluded received in 30 days or less;
- The percentage not excluded received in 30 days or less.

Also, for providers that fail to meet the standard, provide individual case identification of claims that were not billed within 30 days of discharge. List only claims that are not excluded identified in subsection A. Furnish the report in electronic media, unless you determine paper listing would be cheaper to process. If electronic media is used, use the following record format. Determine the physical characteristics of the file.

Fld.	Description	Psn.	Picture	Just.	From	Thru
1	Provider Number	6	X(6)	L	001	006
2	Blank	3	X(3)		007	009
3	Blank	1	X		010	
4	HIC Number	12	X(12)	L	011	022
5	Blank	1	X		023	
6	Beneficiary Surname	6	X(6)	L	024	029
7	Blank	1	X		030	
8	Patient Control Number	17	X(17)	L	031	047
9	Blank	1	X		048	
10	From Date	6	9(6)		049	054
11	Blank	1	X		055	
12	Discharge or Thru Date	6	9(6)		056	061
13	Blank	1	X		062	
14	Date Bill Received	6	9(6)		063	068
15	Blank	1	X		069	
16	Days Elapsed	4	9(4)	R	070	073

If sub-provider identification is used, positions 7, 8, and 9 may be utilized.

C. Reinstatement of PIP.—Do not reinstate PIP for a provider until it meets all criteria in PRM §§2405.1B and 2407 and has met the requirements in subsection A for timeliness and accuracy for 6 consecutive months.

D. New Request for PIP.—Evaluate new requests for PIP as in subsections A and B. At least 3 months experience is required for new requests, (except for new providers with less experience).

E. Hospitals on 100 Percent PRO Prepayment Review.—The 30 day requirements for submitting bills to intermediaries is not applicable. The RO makes determinations of timely and accurate bill submission by hospitals for which the PRO reviews 100 percent of the discharges before payment. However, other standards remain applicable for retaining PIP in such cases. See PRM §§2405.1B and 2407 for the requirements.

F. Intermediary Electronic Reporting of Provider Remittance Data.—At the provider's option send an electronic remittance record to an institutional provider for each claim submitted electronically. The recommended format is the format of the UNIBILL file which you submit to HCFA (§§387ff.); however, use any format mutually acceptable to you and provider. Items to negotiate with the provider:

- Physical file characteristics.
- Electronic media by which data will be sent.
- Frequency of transmission.
- Coordination of remittance file with provider payments.

  Remittance file goes directly to providers.
  Remittance file goes through third party billers.

1. Association of Remittance Data With Provider Records.—To assist in the association of the remittance record with the provider's files, return to the provider an association number it supplied on the related provider bill. This number could be Item 3, Patient Control Number on the HCFA-1450 or the medical record number, whichever you and the provider agree upon.

2. Scope of Remittance to be Electronically Reported.—Within these procedures we contemplate only the transmission of remittance data directly associated with a claim. Report separately adjustments such as provider suspensions, accelerated payments.

3. Implementation of Capability to Electronically Report Provider Remittance Data.—Initiate contacts with electronic billers to set up arrangements for supplying the appropriate electronic remittance records. Negotiate with the provider the specific implementation dates.

3678. ESTABLISHING PACEMAKER REGISTRY RECORDS - PACEMAKER RELATED ICD-9-CM PROCEDURE CODES

A. General.—Public Law 98-369 requires the Secretary to provide a registry for all permanent pacemaker devices and leads for which payment is made under Medicare. For inpatient services rendered through September 30, 1987 edit all hospital bills for ICD-9-CM codes 37.70 and/or 37.73-37.85 inclusive. For inpatient services rendered beginning October 1, 1987 edit all hospital bills for new ICD-9-CM codes 37.70-37.77 and/or 37.80-37.89 inclusive. For outpatient services rendered beginning January 1, 1988 edit all hospital bills for CPT-4 codes 33200-33208, 33212, 33216, 33218, 33219, and 33232. Where any of these are present, request additional data from the provider. If the hospital refuses to supply the information, deny the claim. The hospital may not charge the beneficiary in such cases, except for deductible and coinsurance.

Submit the collected data to HCFA using the format in subsection B, and the instructions below.

You have several options as to how to request the data.

- o Mail the letter shown in subsection E to the provider. Print it locally;
- o Supply your providers with a stock of letters that they can complete as they prepare bills involving pacemakers and leads; or
- o Give your providers an electronic format for wire submission. Use specifications identical or similar to those in subsection B to facilitate retransmittal to HCFA. An electronic format enables you to refuse bills without accompanying pacemaker data, reducing your processing costs by avoiding postpayment denials.

Under any of these methods establish a control to assure that the pacemaker registry data is obtained.

The report from the hospital identifies all components implanted, explanted, or replaced in the specific procedure. Prepare a separate electronic record to send to HCFA on a quarterly basis for each device implanted or explanted during the subject procedure. For example, if a pulse generator were replaced, prepare two records: one for the explanted and one for the implanted pulse generator. In the case of implanted leads, there may not be an explant since leads that are replaced are often not explanted.

Submit the file to HCFA by the 15th day of the month following the end of each calendar quarter. Include all registry data collected since your last transmission.

Quarter Ends	Submit by
3/31	4/15
6/30	7/15
9/30	10/15
12/31	1/15

Submit a magnetic tape file conforming to the following physical characteristics.

Physical File Specifications - Magnetic Tape.—Tape characteristics - 9 track, 8 1/2" to 10 1/2" reels with silver mylar reflector (standard reels) with write ring removed.

Parity - Odd
Recording Density - 1600 bytes per inch
Recording Code - Extended Binary Coded Decimal
File Label - None. The tape must have an end of file mark. The first data record on the file contains the acronym PACEMAKER in the first nine positions of the record, blanks in the remaining positions and serves the function of a file label.

Physical Record Length 148 characters

Block Size 148 characters

The external label on the reel must appear as follows:

From: ______*______

To:
HCFA-BDMS, PCDMB
Pacemaker Registry F-3EQ17
Date tape created (MMDDYY)
Equitable Bldg.
1717 Whitehead Rd.
Baltimore, MD 21207

(Use this new address effective 10/1/87)

*Identification of Intermediary

If you have had no pacemaker activity during the quarter, submit a note to that effect to the address shown above.

B. Data Format for Submission to HCFA.—

Field Number	Field Name	Picture	Justified	Positions
1	Provider Number	X(6)	L	1-6
2	HICN	X(12)	L	7-18
3	Patient Name			
	Last	X(6)	L	19-24
	First Initial	X		25-25
	Middle Initial	X		26-26
4	Procedure Date (MMDDYY)	9(6)	L	27-32
5	Ordering Physician Number	X(16)	L	33-48
6	Ordering Physician Name	X(13)	L	49-61
7	Operating Physician Number	X(16)	L	62-77
8	Operating Physician Name	X(13)	L	78-90
9	Record Identification Code	X		91-91
10	Manufacturer Identification	XXX	L	92-94
11	Model Number	X(15)	L	95-109
12	Serial Number	X(20)	L	110-129
13	Warranty Expiration Date (MMDDYY)	X(6)	L	130-135
14	Implant Date (explanted or replaced device) (MMDDYY)	X(6)	L	136-141
15	Lead Left in Patient yes(Y) no(N)	X		142-142
16	Returned to Manufacturer yes(Y) no(N)	X		143-143
17	Intermediary Number	X(5)	L	144-148

C. Field Definitions.—

1. Provider Number: The Medicare provider number identifying the hospital in which this procedure was performed.

2. HICN: The Health Insurance Claim Number of the beneficiary receiving this procedure.

3. Patient Name: The name of the patient receiving this procedure.

4. Procedure Date: The date this procedure was performed. (MMDDYY)

5. Ordering Physician Number: The identification number of the physician who ordered the implant or explant. Use the number established for the PRO.

6. Ordering Physician Name: The last name of the physician who ordered the implant or explant.

7. Operating Physician Number: The identification number of the physician performing this procedure. Use the number established for the PRO.

8. Operating Physician Name: The last name of the physician performing this procedure.

9. Record Identification Code:

A one position code identifying the type of procedure. Where multiple procedures are performed submit a separate record for each.

1 = Implanted Pulse Generator
2 = Implanted Atrial Lead
3 = Implanted Ventricular Lead
5 = Explanted Pulse Generator
6 = Explanted Atrial Lead
7 = Explanted Ventricular Lead

10. Manufacturer Identification: The following list has been revised to cross-refer models and brand names (which had been incorrectly listed as manufacturers) with appropriate manufacturers. Clarifying information is in parenthesis. Use the code indicated in parenthesis to identify the correct manufacturer. This information identifies the manufacturer of the implanted or explanted device. Identification numbers follow.

* Brand Names or Model Designation.

11. Model Number: The model number of the device implanted or explanted in this procedure.

12. Serial Number: A number that uniquely identifies the specific device.

13. Warranty Expiration Date: The expiration date of the warranty on the particular device (MMDDYY). If there is a lifetime warranty, use code 999999. If no warranty exists, use code NNNNNN. If unknown, use code UUUUUU. (Code UUUUUU is acceptable for explants only.)

14. Implant Date (explanted or replaced device): For explanted or replaced devices only (Record Identification Codes 5, 6, or 7) give the date of implant for the explanted or replaced device (MMDDYY). If unknown, fill the field with Us (i.e., UUUUUU).

15. Lead Left in Patient: A code to indicate whether a lead explant was performed in connection with an implant (Record Identification codes 2, and 3) or whether the former lead was left in the patient. Use this coding for implant records only. Y = Former lead left in patient; N = Former lead explanted or no former lead exists.

16. Returned to Manufacturer: A code to indicate whether a device which has been explanted has been returned to the manufacturer. Y = Returned; N = Not Returned.

17. Intermediary Number: The Medicare number of the intermediary servicing the provider identified in this record.

D. Edit Specifications.—

Field

1 Provider Number - 1st 2 positions - Valid State code; 3rd position may be alpha or numeric. If alpha: S=Psychiatric Unit, T=Rehabilitation Unit, U=Swing-Bed Hospital, and V=Alcohol Drug Unit.

Check that the last four digits are correct for that type of provider.

0001-0999, 1200-1299, 2000-2299, 3025-3099, 3300-3399, 4000-4499.

2 HICN

If the HICN starts with a number, it should conform to the following specifications:

The 1st three digits, the "area," must fall within the ranges 001-626 or 697-729.

The next two digits, the "Group" must fall within the range 01-99 (00 is not assigned).

The last four digits, the "serial" must fall within the range 0001-9999 (0000 is not assigned).

The next position must contain one of the following tellers:

A, B, C, D, E, F, J, K, or W.

A is followed by a blank.

B is followed by a blank, 1-9, A, D, G, H, J, K, L, N, P, Q, R, T, W, or Y.

C must be followed by any number 1-9, or any letter A-Z.

D may be followed by a blank, 1-9, A, C, D, G, H, J-N, P-T, or V-Z.

E may be followed by a blank, 1-9, A-D, F-H, J, L, or M.

F must be followed by 1-8.

J must be followed by 1-4.

K must be followed by 1-9, A-H, J, L, or M.

W may be followed by a blank, 1-9, B, C, F, G, J, R, or T.

T may be followed by a blank, A-H, J-N, Q-Z, 2-9.

M may be followed by a blank.

If the HICN starts with a letter, it should conform to the following specifications:

If the letter is A, it is followed by 000001-991273, 995000-999999.

If the first two characters are MA, WA, CA, or PA, or the first 3 characters are WCA, the next six characters must be in the ranges 000001-415935, 995000-999999.

RRB HICN must conform to the following specifications:

A. Six Digit Numbers

Prefix	6 Digit Number
A, MA, WA, CA, WCA, PA, JA	000001-991273, 995000-999999
WD, WCD, PD	000001-415935, 995000-999999
H, MH, WH, WCH, PH	000001-049159, 995000-999999

B. Nine Digit Numbers

The valid prefixes are as shown on A, above. The number portion must meet the same specifications as a non-RRB HICN.

3.	Patient Name	No edits.
4.	Procedure Date (MMDDYY)	Month portion must be 01-12 Day portion must be 01-31 Year portion must be greater than 84, but not greater than the year tape created.
5.	Ordering Physician Number	Edit according to specifications of PRO physicians number.
6.	Ordering Physician Name	Blank is not acceptable.

7. Operating Physician Number	See 5, above.
8. Operating Physician Name	Blank is not acceptable.
9. Record Identification Code	Must be in range 1-7 excluding 4.
10. Manufacturer Identification	Must be valid number as shown in field definition.
11. Model Number	Blank is not acceptable.
12. Serial Number	Blank is not acceptable. For explanted devices whose serial numbers cannot be read, enter UUUUUU in the first six positions of the field. (It is not necessary to fill the 20 position field with Us, but you may do so in the interest of saving programming costs.)
13. Warranty Expiration Date	Must be valid date greater than, or equal to field 4 (this applies only to implants; i.e., record codes 1, 2, and 3). Enter: . NNNNNN if no warranty exists, . UUUUUU if unknown, or . 999999 if a lifetime warranty.
14. Implant Date of Explanted or Replaced Device	Must be valid date less than field 4 above or UUUUUU if unknown.
15. Lead Left in Patient	Must be "Y" or "N."
16. Returned to Manufacturer	Must be "Y" or "N."
17. Intermediary Number	Constant - must be your intermediary number.

Duplicate Records:

Effective with the quarter ending 9/30/86, a new check is being added to the pacemaker computer process. When exact duplicate records (all 148 fields alike) are submitted, the first duplicate record will be processed normally (it may have field rejects or be accepted). All subsequent duplicates will reject with a message—

"******DUPLICATE RECORD******" printed on line one above the PROV, HICN, and NAME fields.

E. Sample Letter To Secure Pacemaker Data From Providers

1.Date:________ (MMDDYY)

2.Name of Hospital:____________________ **3.Provider Number:**____________

4.Patient Name:________________________________ **5.HICN:**____________ **6.Date of Admission:**________ (MMDDYY)

7.ICD-9-CM Procedure Code:_____ **8.Procedure Date:**________ (MMDDYY) **9.Medical Record #:**__________________ **10.Patient Control #:**__________________

The medical information on the claim you recently submitted for the above confinement indicates pacemaker related services. Section 2304 of P.L. 98-369 requires that we obtain from you the information listed below for inclusion in the Food and Drug Administration's Pacemaker Registry. Your response to this request within 60 days of the date of this letter is appreciated. Please see Section 449.F for instructions on completing the form.

11.Physician Identification: Physician Ordering Implant/Explant Operating Physician

Number a.__________________ Number c.__________________

Name b.__________________ Name d.__________________

12.Pacemaker Information:

Component	Mfgr	Model#	Serial #	Warranty Expiration Date (MMDDYY)	IMPLANTS ONLY Leads Left In Patient	EXPLANTS ONLY Returned To Mfgr	Date Device Implanted (MMDDYY)
Implants

(7)Ventricular Lead	a)____	b)________	c)____________________	d)________		f)Y_ or N_	g)__________

F. Use of Sample Letters to Secure Pacemaker Data from Providers.—The sample letter to secure pacemaker data from providers must have the header information entered by you. Fill-in items 1-10 at the top of the sample letter and send it to the provider for completion. You may manage the sample letter as needed to fit your equipment (e.g., if you choose to, it may be turned sidewise).

Upon receipt of the completed form from the provider, key the following items: (If you key in the following order, no reformatting will be necessary.)

3. Provider Number;

5. HIC Number;

4. Patient Name (as defined in the data format, subsection B above);

8. Procedure Date;

11. a, b, c, and d, the physician name and number for both ordering and operating physicians. (When keying physician name, key first 13 letters of surname only.);

12. (1), (2), (3), (5), (6), or (7) if more than one line is filled in, you have to create a separate record, repeating all of the above elements for each such line. In any event, key a-d for each line keyed and e) Lead Left in Patient for implant lines (2), or (3) keyed, and f)-g) Returned to Manufacturer and Prior Implant Date for each explant ((5), (6), or (7)) line keyed.); and

You must also key your intermediary number.

Follow the Data Format for Submissions to HCFA shown in subsection B above. Prior to submission perform all the edits specified in subsection D. HCFA will also perform these edits.

G. Rejected Records.—Records you submit that fail edits in subsection D. will be listed and sent to you by CO in the format shown below. Incorrect fields will be marked with asterisks. Make necessary corrections and include the corrected records in the pacemaker tape you submit the following quarter.

```

The column headings above cross refer in general to field definitions shown in subsection C, with the following exceptions:

REC# - Sequential record numbers assigned to failed edits encountered within a specific quarterly data submittal.

PHYS:NUMBER-NAME - Two numbers, which may be identical, must be shown. The top one represents the ordering physician, the bottom one the operating physician.

PHYS-ORD/OPER - Two names, which may be identical, must be shown. The top one represents the ordering physician, the bottom one the operating physician.

R - Record identification code (1-3 or 5-7)

W-DATE - Warranty expiration date for this particular device.

O-DATE - Implant date of the explanted or replaced device.

L - Lead left in patient? Y = yes N = no

M - Device returned to manufacturer? Y = yes N = no

H. Payment Denial for Failure to Submit Required Pacemaker Registry Data.--For implants provided September 21, 1987 or later, either implement edits to refuse bills received without accompanying pacemaker data or continue your post-payment development process. If you continue your post-payment development process, deny claims and recover payments when the registry data is not furnished. Send written notice of your denial determination to the beneficiary with a copy to the provider. Inform the beneficiary that the hospital may not charge him/her for such services, with the exception of the deductible and coinsurance. State the reason for the determination and the effective date and grant the provider 45 days from the date of this notice to submit information or evidence to demonstrate that the determination is in error. Also, inform the provider of its right to a hearing.

If you install a prepayment edit (use edit criteria in subsection D to assure accurate data) that precludes payment until registry data is furnished and the provider insists on payment, issue a denial letter and follow the above instructions.

When receiving tapes from providers refer to §3600, Addendum A, B, C, and D.

For magnetic tape records, record type number 81 must be included for procedure codes listed in §3678A.

When processing paper bills return incomplete bills to providers for required pacemaker data before payment.

Records failing edits are returned to you each quarter. Correct them and resubmit them with new pacemaker records for the next quarter.

Billing in Situations Where Medicare is Secondary Payer
Cost Reimbursement Providers

3679. BILLING PROCEDURES WHERE SERVICES ARE REIMBURSABLE UNDER WORKERS' COMPENSATION

A. General.--Payment may not be made under Medicare for any items and services to the extent that payment has been made, or can reasonably be expected to be made for such items or services under a WC law or plan of the United States or a State. For an explanation of these provisions see §§3407-3416.

Expenses for services for which Medicare payment may not be made because of these provisions are not counted toward Part A or Part B deductible amounts or against the number of inpatient care days available to the beneficiary.

Where Medicare is determined to be the primary payer, Medicare is shown on line A of Item 57. Where Medicare is secondary, Medicare is shown on line B. In addition, where the provider is billing Medicare because the WC plan denied payment, occurrence code 24 (insurance denied) and the date of denial are shown in Items 28-32 (occurrence codes). The reason for the denial is shown in remarks (Item 94). All bills where Medicare is not primary payer because of these provisions are prepared in accordance with the following instructions. In applying the guidelines, it may be necessary to determine the current Medicare interim reimbursement amount (without regard to deductible or coinsurance). See §3683 for instructions to determine this amount.

B. Inpatient Bills - Full Payment by WC.--If the payment from the WC plan for Medicare covered services (as determined by the formula in subsection C5) equals or exceeds the provider's charges for those services or the current Medicare interim reimbursement amount (without regard to deductible or coinsurance) or the provider accepts, or is required under the WC law to accept, the payment as payment in full, no payment is due from Medicare and no utilization is charged. However, the provider submits a bill for determining the benefit period. Process the bill in accordance with §3604 with the following modifications:

o The provider completes the total and noncovered charges columns as if there had been no other payment.

The provider shows total covered and noncovered days in the usual manner. Days paid by the WC plan are counted as covered days.

The provider enters the amount paid by the WC plan for Medicare covered services in value codes (Items 46-49).

The provider enters condition 77 in Items 35-39 when it accepts, or is required under the WC law to accept, the WC plan's payment as payment in full.

o Do not complete the nonpayment code.

Enter in field 22 of the UNIBILL RECORD the days you determine to be charged to the beneficiary's Medicare utilization record. This figure should be zero.

Enter in field 24 of the UNIBILL RECORD zero days.

Enter in field 39 of the UNIBILL RECORD value code 15 to identify the primary payer.

Enter in field 40 of the UNIBILL RECORD the amount Medicare would have paid in the absence of the WC plan's payment. (Do not record this amount on the PS&R report.)

Do not record days or charges on the PS&R report.

Submit the bill to HCFA in the format described in §3876.

C. Inpatient Bills - Partial Payment by WC.—If the payment from the WC plan for Medicare covered services (as determined by the formula in 5) is less than the provider's charges for those services and the current Medicare interim reimbursement amount (without regard to deductible or coinsurance) and the provider does not accept, and is not required under the WC law to accept, the payment as payment in full, process the bill in accordance with §3604 with the following modifications:

1. Determining covered and noncovered charges

The provider completes the total and noncovered charges columns as if there had been no other payment.

2. Determining covered and noncovered days

The provider shows total covered and noncovered days in the usual manner. Days paid by the WC plan are counted as covered days.

Calculate the days to be charged to the beneficiary as determined in subsection 3 below and report this result in the appropriate field of the UNIBILL RECORD as described in 7 below.

3. Determining utilization and coinsurance

Where the stay involves coinsurance days, determine utilization chargeable to the beneficiary if the provider cannot. Complete Items 25 and 61 (coinsurance) accordingly. No adjustment to Item 23 (covered days) is made based on this determination. The provider completes Item 23 in the usual manner.

Charge utilization as follows:

o Subtract the WC plan's payment that applies to Medicare covered services as determined under subsection 5 and any applicable deductible and coinsurance amounts from the Medicare interim reimbursement for the stay (unreduced by deductible and coinsurance). This yields the Medicare secondary payment.

o Divide this amount by the amount Medicare would have paid as primary payer (i.e., the Medicare interim reimbursement for the stay reduced by deductible and coinsurance).

- o Multiply this percentage by the number of covered days in the stay.

A partial day resulting from this calculation is not charged as a full day if it is less than .5 of a day. It is charged as a full day if it is .5 or more.

EXAMPLE I: Deductible Involved

An individual was hospitalized 15 days, for which the total charges were $5,000. The WC plan paid $2,400 for Medicare covered services. No part of the Medicare inpatient deductible of $520 had been met. The current Medicare interim reimbursement (without regard to deductible or coinsurance) for the services in the absence of the WC plan's payment would have been $3,600. This amount minus the WC plan's payment and the inpatient deductible is $680 ($3,600 - $2,400 - $520). Medicare would have paid $3,080 as primary payer ($3,600 - $520). Calculate the beneficiary's utilization as follows: $680 divided by $3,080 = .220 x 15 days = 3.31 or 3 days when rounded.

EXAMPLE II: Coinsurance Involved

An individual was hospitalized for 20 days (all of which were LTR days) for which total charges were $14,000. The WC plan paid $6,000 for Medicare covered services. The applicable coinsurance amount was $5,200. The current Medicare interim reimbursement amount (without regard to deductible or coinsurance) for the services, in absence of the WC plan's payment, would have been $12,000. The Medicare secondary payment amount is $800 (the current Medicare interim reimbursement amount of $12,000 minus the WC plan's payment of $6,000 and the applicable coinsurance amount of $5,200). Medicare would have paid $6,800 as primary payer ($12,000 - $5,200). Calculate the beneficiary's utilization as follows: $800 divided by $6,800 = .117 x 20 days = 2.35 or 2 days when rounded.

Charge coinsurance days as follows:

- o If the days resulting from the utilization calculation are fewer than the full days available for the stay, no coinsurance days are billed.
- o If the days resulting from the utilization calculation are greater than the full days available for the stay, coinsurance days are billed for the excess days.

Where the provider performs the utilization calculation above, perform the same calculation to verify that Items 25 and 61 (coinsurance) have been completed correctly. Advise the provider of any discrepancies.

EXAMPLE 1:

A beneficiary has 17 full days available at the time of admission. The hospital stay was 20 days. The provider bills 20 days in covered days as if there were no other payer involved. After performing the calculation to determine utilization chargeable, it is determined that the beneficiary can be charged with 10 days. Therefore, no coinsurance days are billed. In the absence of another insurer's payment, 3 days would have been billed in Item 25 (coinsurance).

Enter in field 24 of the UNIBILL RECORD, 20 days.

EXAMPLE 2:

A beneficiary has 30 coinsurance days available at the time of admission. The hospital stay was 20 days. The provider bills 20 days in covered days as if there were no other payer involved. After performing the calculation to determine utilization chargeable, it is determined that the beneficiary can be charged with 10 days. Therefore, only 10 coinsurance days are billed. In the absence of another insurer's payment, 20 days would have been billed in Item 25 (coinsurance).

Enter in field 25 or 26 of the UNIBILL RECORD, 10 days. In addition, enter in field 24 of the UNIBILL RECORD, 20 days.

4. Special entries on the bill

The identifying information is shown in Items 57-75 on the first payer line. Occurrence code 04 and the associated date is shown in Items 28-32. Condition code 02 is shown in Items 35-39. Value code 15, with the amount paid is shown in value codes (Items 46-49). The address of the WC plan is shown in Item 34 or remarks (Item 94).

5. Determining amount of primary payer payment that applies to Medicare covered services

The provider indicates the primary payer's allocation of its payment between covered and noncovered Medicare services by entering the amount paid by the primary payer toward Medicare covered services in value codes (Items 46-49). Where the provider cannot determine the services covered by the primary payment, it applies a ratio of Medicare covered charges to total charges for the stay to the primary payment amount to determine the portion attributable to Medicare covered services and enters this amount in value codes (Items 46-49).

EXAMPLE: Total charges were \$5,000. Medicare covered charges were \$4,000. The WC plan's payment was \$3,000. Since the provider cannot determine the allocation of the primary payer's payment, it determines the allocation as follows:

$$\frac{\$4,000}{\$5,000} \times \$3,000 = \$2,400$$

The provider shows \$2,400 in value codes (Items 46-49).

6. Determining the amount of Medicare payment

Subtract the payment by the WC plan for Medicare covered services from the current Medicare interim reimbursement amount (without regard to deductible or coinsurance) per §3683 and apply any applicable deductible and/or coinsurance to the remainder.

EXAMPLE 1:

Inpatient care was furnished to a Medicare beneficiary whose WC plan was the primary payer. The covered charges were $4,000. The WC plan paid $2,400 for Medicare covered services as determined in 5. No part of the Medicare inpatient deductible of $520 had been met previously. The Medicare interim reimbursement (without regard to deductible or coinsurance) at 90 percent of charges ($4,000 x 90 percent) would be $3,600. The deductible is determined as follows:

The lesser of $520 or the current Medicare interim reimbursement amount less the primary payer amount for Medicare covered services. In this case: $3,600 - $2,400 = $1,200 which exceeds $520. The deductible amount charged to the beneficiary is $520

As secondary payer, Medicare pays: The current Medicare interim reimbursement minus the WC plan's payment for Medicare covered services minus the inpatient deductible: $3,600 - $2,400 - $520 = $680. Medicare pays $680.

EXAMPLE 2:

Same facts as in Example 1 except the covered charges were $1,000, the primary payer's payment was $900 and the Medicare interim reimbursement (without regard to deductible or coinsurance) at 98 percent of charges was $980. The deductible is determined as follows:

The lesser of $520 or the current Medicare interim reimbursement amount less the primary payer amount for Medicare covered services. In this case: $980 - $900 = $80. Since $80 is less than $520 the deductible amount charged to the beneficiary is $80.

As secondary payer Medicare pays: The current Medicare interim reimbursement minus the WC plan's payment for Medicare covered services minus the inpatient deductible: $980 -$900 - $80 = 0.

The patient's liability is $80, the remaining $440 of the deductible will be due if the patient is rehospitalized during the same benefit period.

7. UNIBILL entries

Enter in field 22 of the UNIBILL RECORD the days to be charged to the beneficiary's Medicare utilization record as determined in 3.

Enter in field 24 of the UNIBILL RECORD the covered days reported by the provider in item 23. This figure is used to validate the Medicare days shown on the cost report.

Enter in field 39 of the UNIBILL RECORD value code 15 to identify the primary payer.

Enter in field 40 of the UNIBILL RECORD the amount paid by the WC plan for Medicare covered services that appears in value codes (Items 46-49).

D. Part B Inpatient Services.—These provisions apply for ancillary services to individuals who have exhausted or who are not entitled to Part A benefits. Handle billing as described in subsections E and F. If Part A benefits are exhausted during the inpatient stay, the Part B billing should not be prepared until the effect of the primary payment on Part A utilization is determined.

E. Outpatient Bills - Full Payment by WC.—If the payment from the WC plan for Medicare covered services (as determined by the formula in subsection F3) equals or exceeds the provider's charges for those services, or the current Medicare interim reimbursement amount (without regard to deductible or coinsurance) or the provider accepts, or is required under the WC law to accept the payment as payment in full, the provider does not submit a bill.

F. Outpatient Bills - Partial Payment by WC.—If the payment from the WC plan for Medicare covered services (as determined by the formula in 3) is less than the provider's charges for those services and the current Medicare interim reimbursement amount (without regard to deductible or coinsurance) and the provider does not accept, and is not required under the WC law to accept the payment as payment in full, process the bill in accordance with §3604 with the following modifications:

1. Determining covered charges

The provider shows in the covered charges column Medicare covered charges including those covered by the WC plan's payment.

2. Special entries on the bill

The identifying information is shown in Items 57-75 on the first payer line. Occurrence code 04 and the associated date is shown in Items 28-32. Condition code 02 is shown in Items 35-39. Value code 15, with the amount paid is shown in value codes (Items 46-49). The address of the WC plan is shown in item 34 or remarks (Item 94).

3. Determining amount of primary payer payment that applies to Medicare covered services

The provider indicates the primary payer's allocation of its payment between covered and noncovered Medicare services by entering the amount paid by the primary payer toward Medicare covered services in value codes (Items 46-49). Where the provider cannot determine the services covered by the primary payment, it applies a ratio of Medicare covered charges to total charges for the services to the primary payment amount to determine the portion attributable to Medicare covered services and enters this amount in value codes. The provider must be able to validate its ratio of covered and noncovered charges if so requested.

EXAMPLE: Total charges were $200. Medicare covered charges were $180. The WC plan's payment was $55. Since the provider cannot determine the allocation of the primary payer's payment, it determines the allocation as follows:

$$\frac{\$180}{\$200} \times \$55 = \$50$$

The provider shows $50 in value codes (Items 46-49).

4. Determining the amount of Medicare payment

Subtract the payment by the WC plan for Medicare covered services from the current Medicare interim reimbursement amount (without regard to deductible or coinsurance) per §3683. Apply any applicable deductible and/or coinsurance to the remainder.

EXAMPLE 1:

Outpatient care was furnished to a Medicare beneficiary whose WC plan was primary payer. The charges for the services were $180. No part of the beneficiary's Part B deductible had been met previously. The WC plan paid $50 for Medicare covered services as determined in Item 3. The Medicare interim reimbursement (without regard to deductible or coinsurance) for these services at 90 percent of charges (the provider's interim rate) would be $162. The deductible and coinsurance are calculated as follows:

The deductible is the lesser of $75 or the current Medicare interim reimbursement amount less the primary payer amount for Medicare covered services. In this case: $162 - $50 = $112 which exceeds $75. The Part B deductible amount charged to the beneficiary is $75.

The coinsurance is the charges minus the primary payer's payment minus the deductible times 20 percent. $180 (charges) - $50 (primary payer's payment) = $130 (charges subject to deductible and coinsurance) - $75 (deductible) = $55 x 20 percent = $11 coinsurance.

As secondary payer Medicare pays: The current Medicare interim reimbursement minus the WC plan's payment for Medicare covered services minus the deductible and coinsurance: $162 -$50 - $75 - $11 = $26. Medicare pays $26.

EXAMPLE 2:

Same facts as in Example 1 except the covered charges were $100, the primary payer's payment was $60 and the Medicare interim reimbursement (without regard to deductible or coinsurance) for the services at 90 percent of charges (the provider's interim rate) was $90. The deductible and coinsurance are calculated as follows:

The deductible is the lesser of $75 or the current Medicare interim reimbursement amount less the primary payer amount for Medicare covered services. In this case: $90 - $60 = $30. Since $30 is less than $75, the Part B deductible amount charged to the beneficiary is $30.

Since the $75 Part B deductible is not met there is no coinsurance amount and there is no Medicare payment. The patient's liability is $30 of the $75 deductible.

5. UNIBILL entries

Enter in field 30 of the UNIBILL RECORD value code 15 to identify the primary payer.

Enter in field 31 of the UNIBILL RECORD the amount paid by the WC plan for Medicare covered services that appears in value codes (Items 46-49).

G. Christian Science Sanatorium Bills - Full Payment by WC.--If the payment from the WC plan for Medicare covered services (as determined by the formula in subsection H5) equals or exceeds the sanatorium's charges for those services or the current Medicare interim reimbursement amount (without regard to deductible or coinsurance) or the sanatorium accepts, or is required under the workers' compensation law to accept, the payment as payment in full, no payment is due from Medicare and no utilization is charged to the beneficiary. However, the sanatorium submits a bill for determining the benefit period. Process the bill in accordance with §3604 with the following modifications:

o The sanatorium completes the total and noncovered charges columns as if there had been no other payment.

The sanatorium shows total covered and noncovered days in the usual manner. Days paid by the WC plan are counted as covered days.

The sanatorium enters the amount paid by the WC plan for Medicare covered services in value codes (Items 46-49).

The sanatorium enters condition code 77 in Items 35-39 when it accepts, or is required under the WC law to accept, the WC plan's payment as payment in full.

o Do not complete the nonpayment code.

Enter in field 22 of the UNIBILL RECORD the days you determine to be charged to the beneficiary's Medicare utilization record. This figure should be zero.

Enter in field 24 of the UNIBILL RECORD zero days.

Enter in the field 39 of the UNIBILL RECORD value code 15 to identify the primary payer.

Enter in field 40 of the UNIBILL RECORD the amount Medicare would have paid in the absence of the WC plan's payment. (Do not record this amount on the PS&R report.)

Do not record days or charges on the PS&R report.

Submit the bill to HCFA in the format described in §3876.

H. Christian Science Sanatorium Bills-Partial Payment by WC.—If the payment by the WC plan for Medicare covered services (as determined by the formula in 5) is less than the sanatorium's charges for those services and the current Medicare interim reimbursement amount (without regard to deductible or coinsurance) and the sanatorium does not accept, and is not required under the WC law to accept, the payment as payment in full, process the bill in accordance with §3604 with the following modifications:

1. Determining covered and noncovered charges

The sanatorium completes the total and noncovered charges columns as if there had been no other payment.

2. Determining covered and noncovered days

The sanatorium shows total covered and noncovered days in the usual manner. Count days paid by the WC plan as covered days.

Calculate the days to be charged to the beneficiary as determined in 3 and report this result in the appropriate field of the UNIBILL RECORD as described in 7.

3. Determining utilization and coinsurance

Where the stay involves coinsurance days, determine utilization chargeable to the beneficiary if the sanatorium cannot. Complete Items 25 and 61 (coinsurance) accordingly. No adjustment to Item 23 (covered days) is made based on this determination. The sanatorium completes Item 23 in the usual manner.

Charge utilization as follows:

- Subtract the WC plan's payment that applies to Medicare covered services as determined under 5 and any applicable deductible and coinsurance amounts from the Medicare interim reimbursement for the stay (unreduced by deductible and coinsurance). This yields the Medicare secondary payment.

- Divide this amount by the amount Medicare would have paid as primary payer (i.e., the Medicare interim reimbursement for the stay reduced by deductible and coinsurance).

- Multiply this percentage by the number of covered days in the stay.

A partial day resulting from this calculation is not charged as a full day if it is less than .5 of a day. It is charged as a full day if it is .5 or more. (See §3679C3 for utilization examples.)

Charge coinsurance days as follows:

- o If the days resulting from the calculation are fewer than the full days available for the stay, no coinsurance days are billed.

- o If the days resulting from the calculation are greater than the full days available for the stay, coinsurance days are billed for the excess days.

Where the sanatorium performs the utilization calculation perform the same calculation to verify that Items 25 and 61 (coinsurance) have been completed correctly. Advise the sanatorium of any discrepancies.

EXAMPLE 1:

A beneficiary has 17 full days available at the time of admission. The sanatorium inpatient stay was 20 days. The sanatorium bills 20 days in Item 27 (covered days) as if there were no other payer involved. After performing the calculation to determine utilization chargeable, it is determined that the beneficiary can be charged with 10 days. Therefore, no coinsurance days are billed. In the absence of another insurer's payment, 3 days would have been billed in Item 25 (coinsurance).

Enter in field 24 of the UNIBILL RECORD, 20 days.

EXAMPLE 2:

A beneficiary has 30 coinsurance days available at the time of admission. The sanatorium inpatient stay was 20 days. The sanatorium bills 20 days in Item 27 (covered days) as if there were no other payer involved. After performing the calculation to determine utilization chargeable, it is determined that the beneficiary can be charged with 10 days. Therefore, only 10 coinsurance days are billed. In the absence of another insurer's payment, 20 days would have been billed in Item 25 (coinsurance).

Enter in field 25 or 26 of the UNIBILL RECORD, 10 days. In addition, enter in field 24 of the UNIBILL RECORD, 20 days.

4. Special entries on the bill

The identifying information is shown in Items 57-75 on the first payer line. Occurrence code 04 and the associated date is shown in Items 28-32. Condition code 02 is shown in Items 35-39. Value code 15, with the amount paid is shown in value codes (Items 46-49). The address of the WC plan is shown in Item 34 or remarks (Item 94).

5. Determining amount of primary payer payment that applies to Medicare covered services

The sanatorium indicates the primary payer's allocation of its payment between covered and noncovered Medicare services by entering the amount paid by the primary payer toward Medicare covered services in value codes (Items 46-49). Where the sanatorium cannot determine the services covered by the primary payment, it applies a ratio of Medicare covered charges to total charges for the stay to the primary payment amount to determine the portion attributable to Medicare covered services and enters this amount in value codes (Items 46-49).

EXAMPLE: Total charges were $5,000. Medicare covered charges were $4,000. The WC plan's payment was $3,000. Since the sanatorium cannot determine the allocation of the primary payer's payment, it determines the allocation as follows:

$$\frac{\$4{,}000}{\$5{,}000} \times 3{,}000 = \$2{,}400$$

The sanatorium shows $2,400 in value codes (Items 46-49).

6. Determining the amount of Medicare payment

Subtract the payment by the WC plan for Medicare covered services from the current Medicare interim reimbursement amount (without regard to deductible or coinsurance) per §3683. Apply any applicable deductible and/or coinsurance to the remainder.

EXAMPLE 1:

A sanatorium furnished inpatient care to a Medicare beneficiary whose WC plan was primary payer. The covered charges were $4,000. The WC plan paid $2,400 for Medicare covered services as determined in Item 5. No part of the Medicare inpatient deductible of $520 had been met previously. The Medicare interim reimbursement (without regard to deductible or coinsurance) at 90 percent of charges ($4,000 x 90 percent) would be $3,600. The deductible is determined as follows:

The lesser of $520 or the current Medicare interim reimbursement amount less the primary payer amount for Medicare covered services. In this case: $3,600 - $2,400 = $1,200 which exceeds $520. The deductible amount charged to the beneficiary is $520.

As secondary payer Medicare pays: The current Medicare interim reimbursement minus the WC plan's payment for Medicare covered services minus the inpatient deductible: $3,600-$2,400-$520 = $680. Medicare pays $680.

EXAMPLE 2:

Same facts as in Example 1 except the covered charges were $1,000, the primary payer's payment was $900, and the Medicare interim reimbursement (without regard to deductible or coinsurance) at 98 percent of charges was $980. The deductible is determined as follows:

The lesser of $520 or the current Medicare interim reimbursement amount less the primary payer amount for Medicare covered services. In this case: $980 - $900 = $80. Since $80 is less than $520 the deductible amount charged to the beneficiary is $80.

As secondary payer Medicare pays: The current Medicare interim reimbursement minus the WC plan's payment for Medicare covered services minus the inpatient deductible: $980 -$900 - $80 = 0.

The patient's liability is $80, the remaining $440 of the deductible will be due if the patient reenters the sanatorium during the same benefit period.

7. UNIBILL entries

Enter in field 22 of the UNIBILL RECORD the days to be charged to the beneficiary's Medicare utilization record as determined in 3.

Enter in field 24 of the UNIBILL RECORD the covered days reported by the sanatorium in Item 23. This figure is used to validate the Medicare days shown on the cost report.

Enter in field 39 of the UNIBILL RECORD value code 15 to identify the primary payer.

Enter in field 40 of the UNIBILL RECORD the amount paid by the WC plan for Medicare covered services that appears in value codes (Items 46-49).

I. HHA Bills - Full Payment by WC.--If the payment from the WC plan for Medicare covered services (as determined by the formula in subsection J3) equals or exceeds the HHA's charges for those services or the current Medicare interim reimbursement amount or the HHA accepts, or is required under the WC law to accept the payment as payment in full, no payment is due from Medicare. The HHA does not submit a bill.

J. HHA Bills - Partial Payment by WC.--If the payment from the WC plan for Medicare covered services (as determined by the formula in 3) is less than the HHA's charges for those services and the current Medicare interim reimbursement amount and the HHA does not accept, and is not required under the WC law to accept, the payment as payment in full, process the bill in accordance with §3604 with the following modifications:

1. Determining charges and visits

The HHA shows in the charges and visits columns of the bill Medicare covered charges and visits including those covered by the WC plan's payment.

2. Special entries on the bill

The identifying information is shown in Items 57-75 on the first payer line. Occurrence code 04 and the associated date is shown in Items 28-32. Condition code 02 is shown in Items 35-39. Value code 15, with the amount paid is shown in value codes (Items 46-49). The address of the WC plan is shown in Item 34 or remarks (Item 94).

3. Determining amount of primary payer payment that applies to Medicare covered services

The HHA indicates the primary payer's allocation of its payment between covered and noncovered Medicare services by entering the amount paid by the primary payer toward Medicare covered services in value codes (Items 46-49). Where the HHA cannot determine the services covered by the primary payment, it applies a ratio of Medicare covered charges to total charges for the services to the primary payment amount to determine the portion attributable to Medicare covered services and enters this amount in value codes (Items 46-49). The HHA must be able to validate its ratio of covered and noncovered charges if so requested.

EXAMPLE: Total charges were $550. Medicare covered charges were $500. The WC plan's payment was $330. Since the HHA cannot determine the allocation of the primary payer's payment, it determines the allocation as follows:

$$\frac{\$500}{\$550} \times \$330 = \$300$$

The HHA shows $300 in value codes (Items 46-49).

4. Determining the amount of Medicare payment

Subtract the payment by the WC plan for Medicare covered services from the current Medicare interim reimbursement amount.

EXAMPLE 1: Per Visit Method

A beneficiary received 10 visits for which the HHA's current Medicare interim reimbursement amount at $50 per visit interim rate was $500. The WC plan paid $300 for Medicare covered services as determined in Item 3. As secondary payer Medicare pays:

- The Medicare interim reimbursement minus the WC plan's payment for Medicare covered services: $500-$300=$200. Medicare pays $200.

EXAMPLE 2: Percentage of Billed Charges Method

A beneficiary received 10 visits for which the HAA charged $50 per visit. The Medicare interim rate was 90 percent ($500 x 90 percent) which equaled $450. The WC plan paid $300 for Medicare covered services as determined in Item 3. As secondary payer Medicare pays:

- The Medicare interim reimbursement minus the WC plan's payment for Medicare covered services: $450-$300 = $150. Medicare pays $150.

5. UNIBILL entries

Enter in field 30 of the UNIBILL RECORD value code 15 to identify the primary payer .

Enter in field 31 of the UNIBILL RECORD the amount paid by the WC plan for Medicare covered services that appears in value codes (Items 46-49).

K. Conditional Payments.—Conditional Medicare benefits may be paid while a WC claim is contested. Where a claim is contested, the provider bills Medicare as usual. The provider requests conditional payment by entering occurrence code 04 and the associated date in Items 28-32, occurrence codes; and condition code 02 in Items 35-39. The provider enters value code 15 with zero value in Items (46-49) to indicate the type of other insurer and that conditional payment is requested. The identity of the other payer is shown on line A of Item 57, the identifying information about the insured is shown on line A of Items 65-68 and the address of the WC plan is shown in Item 34 or remarks (Item 94). In addition, an explanation of why the conditional payment is justified is shown in remarks (Item 94). (See §3412 for a more detailed explanation of conditional payment situations for contested WC claims and for follow-up procedures when conditional payments have been made.)

Process conditional payment bills following normal procedures. In addition, enter in the appropriate field of the UNIBILL record value code 15 and zero value to indicate that a conditional payment was made. Show this code and zero value in fields 39 and 40 for inpatient and Christian Science Sanatorium bills, and in fields 30 and 31 for outpatient, HHA, and other bills.

3680. BILLING PROCEDURES WHERE SERVICES ARE REIMBURSABLE UNDER AUTOMOBILE MEDICAL OR NO-FAULT INSURANCE, OR ANY LIABILITY INSURANCE

A. General.—Payment may not be made under Medicare for otherwise covered items or services to the extent that payment has been made, or can reasonably be expected to be made, for the items or services under automobile medical or no-fault insurance. In the case of liability insurance, primary Medicare benefits are paid conditionally and then recovered. For an explanation of these provisions see §§3419-3419.10 for liability insurance and §§3489-3489.9 for automobile medical or no-fault insurance.

Expenses for services for which Medicare payment may not be made because of these provisions are not counted toward Part A or Part B deductible amounts or against the number of inpatient care days available to the beneficiary.

Where Medicare is determined to be the primary payer, Medicare is shown on line A of Item 57. Where Medicare is secondary, Medicare is shown on line B. All bills where Medicare is not primary payer because of automobile medical or no-fault insurance are prepared in accordance with the following instructions. In applying the guidelines, it may be necessary to determine the current Medicare interim reimbursement amount (without regard to deductible or coinsurance). See §3683 to determine this amount. Where liability insurance is involved, follow subsection L.

B. Inpatient Bills - Full Payment by Automobile Medical or No-Fault Insurance.—If the payment from the automobile medical or no-fault insurer for Medicare covered services (as determined by the formula in subsection C5) equals or exceeds the provider's charges for those services or the current Medicare interim reimbursement amount (without regard to deductible or coinsurance) or the provider accepts, or is obligated to accept, the payment as payment in full, no payment is due from Medicare and no utilization will be charged to the beneficiary. However, the provider submits a bill for determining the benefit period. Process the bill in accordance with §3604 with the following modifications:

o The provider completes the total and noncovered charges columns as if there had been no other payment.

The provider shows total covered and noncovered days in the usual manner. Days paid by the automobile medical or no-fault insurer are counted as covered days.

The provider enters the amount paid by the automobile medical or no-fault insurer for Medicare covered services in value codes (Items 46-49).

The provider enters condition code 77 in Items 35-39 when it accepts, or is obligated to accept, the automobile medical or no-fault insurer's payment as payment in full.

o Do not complete the nonpayment code.

Enter in field 22 of the UNIBILL RECORD the days you determine to be charged to the beneficiary's Medicare utilization record. This figure should be zero.

Enter in field 24 of the UNIBILL RECORD zero days.

Enter in field 39 of the UNIBILL RECORD value code 14 to identify the primary payer.

Enter in field 40 of the UNIBILL RECORD the amount Medicare would have paid in the absence of the automobile medical or no-fault insurer's payment. (Do not record this amount on the PS&R report.)

Do not record days or charges on the PS&R report.

Submit the bill to HCFA in the format described in §3876.

C. Inpatient Bills - Partial Payment by Automobile Medical or No-Fault Insurance.--If the payment from the automobile medical or no-fault insurer for Medicare covered services (as determined by the formula in 5) is less than the provider's charges for those services and the current Medicare interim reimbursement amount (without regard to deductible or coinsurance) and the provider does not accept, and is not obligated to accept, the payment as payment in full, process the bill in accordance with §3670 with the following modifications:

1. Determining covered and noncovered charges

The provider completes the total and noncovered charges columns as if there had been no other payment.

2. Determining covered and noncovered days

The provider shows total covered and noncovered days in the usual manner. Days paid by the automobile medical or no-fault insurer are counted as covered days.

Calculate the days to be charged to the beneficiary as determined in 3 and report this result in the appropriate field of the UNIBILL RECORD as described in 7.

3. Determining utilization and coinsurance

Where the stay involves coinsurance days, determine utilization chargeable to the beneficiary if the provider cannot. Complete Items 25 and 61 (coinsurance) accordingly. No adjustment to Item 23 (covered days) is made based on this determination. The provider completes Item 23 in the usual manner.

Charge utilization as follows:

o Subtract the automobile medical or no-fault insurer's payment that applies to Medicare covered services as determined under 5 and any applicable deductible and coinsurance amounts from the Medicare interim reimbursement for the stay (unreduced by deductible and coinsurance). This yields the Medicare secondary payment.

o Divide this amount by the amount Medicare would have paid as primary payer (i.e., the Medicare interim reimbursement for the stay reduced by deductible and coinsurance).

- Multiply this percentage by the number of covered days in the stay.

A partial day resulting from this calculation is not charged as a full day if it is less than .5 of a day. It is charged as a full day if it is .5 or more.

EXAMPLE I: Deductible Involved

An individual was hospitalized 15 days, for which the total charges were $5,000. The automobile insurer paid $2,400 for Medicare covered services. No part of the Medicare inpatient deductible of $540 had been met. The current Medicare interim reimbursement (without regard to deductible or coinsurance) for the services in the absence of the automobile insurer's payment would have been $3,600. This amount minus the automobile insurer's payment and the inpatient deductible is $660 ($3,600 - $2,400 - $540). Medicare would have paid $3,060 as primary payer ($3,600 - $540). Calculate the beneficiary's utilization as follows: $660 divided by $3,060 = .215 x 15 days = 3.23 or 3 days when rounded.

EXAMPLE II: Coinsurance Involved

An individual was hospitalized for 20 days (all of which were LTR days) for which total charges were $14,000. The automobile insurer paid $6,000 for Medicare covered services. The applicable coinsurance amount was $5,400. The current Medicare interim reimbursement amount (without regard to deductible or coinsurance) for the services in absence of the automobile insurer's payment would have been $12,000. The Medicare secondary payment amount is $600 (the current Medicare interim reimbursement amount of $12,000 minus the automobile insurer's payment of $6,000 and the applicable coinsurance amount of $5,400). Medicare would have paid $6,600 as primary payer ($12,000 - $5,400). Calculate the beneficiary's utilization as follows: $600 divided by $6,600 = .090 x 20 days = 1.81 or 2 days when rounded.

Charge coinsurance days as follows:

- If the days resulting from the utilization calculation are fewer than the full days available for the stay, no coinsurance days are billed.

- If the days resulting from the utilization calculation are greater than the full days available for the stay, coinsurance days are billed for the excess days.

Where the provider performs the utilization calculation above, perform the same calculation to verify that Items 25 and 61 (coinsurance) have been completed correctly. Advise the provider of any discrepancies.

EXAMPLE 1:

A beneficiary has 17 full days available at the time of admission. The hospital stay was 20 days. The provider bills 20 days in covered days as if there were no other payer involved. After performing the calculation to determine utilization chargeable, it is determined that the beneficiary can be charged with 10 days. Therefore, no coinsurance days are billed. In the absence of another insurer's payment, 3 days would have been billed in Item 25 (coinsurance).

Enter in field 24 of the UNIBILL RECORD, 20 days.

EXAMPLE 2:

A beneficiary has 30 coinsurance days available at the time of admission. The hospital stay was 20 days. The provider bills 20 days in covered days as if there were no other payer involved. After performing the calculation to determine utilization chargeable, it is determined that the beneficiary can be charged with 10 days. Therefore, only 10 coinsurance days are billed. In the absence of another insurer's payment, 20 days would have been billed in Item 25 (coinsurance).

Enter in field 25 or 26 of the UNIBILL RECORD, 10 days. In addition, enter in field 24 of the UNIBILL RECORD, 20 days.

4. Special entries on the bill

The identifying information is shown in Items 57-68 on the first payer line. Occurrence code 01 or 02, as appropriate and the associated date is shown in Items 28-32. Value code 14, with the amount paid is shown in value codes (Items 46-49). The address of the automobile medical or no-fault insurer, is shown in Item 34 or remarks (Item 94).

5. Determining amount of primary payer payment that applies to Medicare covered services

The provider indicates the primary payer's allocation of its payment between covered and noncovered Medicare services by entering the amount paid by the primary payer toward Medicare covered services in value codes (Items 46-49). Where the provider cannot determine the services covered by the primary payment, it applies a ratio of Medicare covered charges to total charges for the stay to the primary payment amount to determine the portion attributable to Medicare covered services and enters this amount in value codes (Items 46-49).

EXAMPLE: Total charges were \$5,000. Medicare covered charges were \$4,000. The automobile medical insurer's payment was \$3,000. Since the provider cannot determine the allocation of the primary payer's payment, it determines the allocation as follows:

$$\frac{\$4,000}{\$5,000} \times \$3,000 = \$2,400$$

The provider shows \$2,400 in value codes (Items 46-49).

6. Determining the amount of Medicare payment

Subtract the payment by the automobile medical or no-fault insurer for Medicare covered services from the current Medicare interim reimbursement amount (without regard to deductible or coinsurance) per S3683. Apply any applicable deductible and/or coinsurance to the remainder.

EXAMPLE 1:

Inpatient care was furnished to a Medicare beneficiary whose automobile medical insurer was the primary payer. The covered charges were $4,000. The automobile medical insurer paid $2,400 for Medicare covered services as determined in Item 5. No part of the Medicare inpatient deductible of $540 had been met previously. The Medicare interim reimbursement (without regard to deductible or coinsurance) at 90 percent of charges ($4,000 x 90 percent) would be $3,600. The deductible is determined as follows:

The lesser of $540 or the current Medicare interim reimbursement amount less the primary payer amount for Medicare covered services. In this case: $3,600 -$2,400 = $1,200 which exceeds $540. The deductible amount charged to the beneficiary is $540.

As secondary payer, Medicare pays: The current Medicare interim reimbursement minus the automobile medical insurer's payment for Medicare covered services minus the inpatient deductible: $3,600 - $2,400 - $540 = $660. Medicare pays $660.

EXAMPLE 2:

Same facts as in Example 1 except the covered charges were $1,000, the primary payer's payment was $900 and the Medicare interim reimbursement (without regard to deductible or coinsurance) at 98 percent of charges was $980. The deductible is determined as follows:

The lesser of $540 or the current Medicare interim reimbursement amount less the primary payer amount for Medicare covered services. In this case: $980 - $900 = $80. Since $80 is less than $540, the deductible amount charged to the beneficiary is $80.

As secondary payer Medicare pays: The current Medicare interim reimbursement minus the automobile medical insurer's payment for Medicare covered services minus the inpatient deductible: $980 - $900 - $80 = 0.

The patient's liability is $80, the remaining $460 of the deductible will be due if the patient is rehospitalized during the same benefit period.

7. UNIBILL entries

Enter in field 22 of the UNIBILL RECORD the days to be charged to the beneficiary's Medicare utilization record as determined in 3.

Enter in field 24 of the UNIBILL RECORD the covered days reported by the provider in Item 23. This figure is used to validate the Medicare days shown on the cost report.

Enter in field 39 of the UNIBILL RECORD value code 14 to identify the primary payer.

Enter in field 40 the UNIBILL RECORD the amount paid by the automobile medical or no-fault insurer for Medicare covered services that appears in value codes (Items 46-69).

D. Part B Inpatient Services.--These provisions apply for ancillary services to individuals who have exhausted or who are not entitled to, Part A benefits. Handle billing as described in subsections E and F. If Part A benefits are exhausted during the inpatient stay, the Part B billing should not be prepared until the effect of the primary payment on Part A utilization is determined.

E. Outpatient Bills - Full Payment by Automobile Medical or No-Fault Insurance.--If the payment from the automobile medical or no-fault insurer for Medicare covered services (as determined by the formula in subsection F3) equals or exceeds the provider's charges for those services or the current Medicare interim reimbursement amount (without regard to deductible or coinsurance) or the provider accepts, or is obligated to accept, the payment as payment in full, the provider does not submit a bill.

F. Outpatient Bills - Partial Payment by Automobile Medical or No-Fault Insurance.--If the payment from the automobile medical or no-fault insurer for Medicare covered services (as determined by the formula in 3) is less than the provider's charges for those services and the current Medicare interim reimbursement amount (without regard to deductible or coinsurance) and the provider does not accept, and is not obligated to accept, the payment as payment in full, process the in accordance with §3604 with the following modifications:

1. Determining covered charges

The provider shows in the covered charges column, Medicare covered charges including those covered by the automobile medical or no-fault insurer's payment.

2. Special entries on the bill

The identifying information is shown in Items 57-68 on the first payer line. Occurrence code 01 or 02, as appropriate and the associated date is shown in Items 28-32. Value code 14, with the amount paid is shown in value codes (Items 46-49). The address of the automobile medical or no-fault insurer, is shown in Item 34 or remarks (Item 94).

3. Determining amount of primary payer payment that applies to the Medicare covered services

The provider indicates the primary payer's allocation of its payment between covered and noncovered Medicare services, by entering the amount paid by the primary payer toward Medicare covered services in value codes (Items 46-49). Where the provider cannot determine the services covered by the primary payment, it applies a ratio of Medicare covered charges to total charges for the services to the primary payment amount to determine the portion attributable to Medicare covered services and enters this amount in value codes (Items 46-49). The provider must be able to validate its ratio of covered and noncovered charges if so requested.

EXAMPLE: Total charges were $200. Medicare covered charges were $180. The automobile medical insurer's payment was $55. Since the provider cannot determine the allocation of the primary payer's payment, it determines the allocation as follows:

$$\frac{\$180}{\$200} \times \$55 = \$50$$

The provider shows $50 in value codes (Items 46-49).

4. Determining the amount of Medicare payment

Subtract the payment by the automobile medical or no-fault insurer for Medicare covered services from the current Medicare interim reimbursement amount (without regard to deductible or coinsurance) per §3683. Apply any applicable deductible and/or coinsurance to the remainder.

EXAMPLE 1:

Outpatient care was furnished to a Medicare beneficiary whose automobile medical insurer was primary payer. The charges for the services were $180. No part of the beneficiary's Part B deductible had been met previously. The automobile medical insurer paid $50 for Medicare covered services as determined in Item 3. The Medicare interim reimbursement (without regard to deductible or coinsurance) for these services at 90 percent of charges (the provider's interim rate) would be $162. The deductible and coinsurance are calculated as follows:

The deductible is the lesser of $75 or the current Medicare interim reimbursement amount less the primary payer amount for Medicare covered services. In this case: $162 - $50 = $112 which exceeds $75. The Part B deductible amount charged to the beneficiary is $75.

The coinsurance is the charges minus the primary payer's payment minus the deductible times 20 percent. $180 (charges) - $50 (primary payer's payment) = $130 (charges subject to deductible and coinsurance) - $75 (deductible) = $55 X 20 percent = $11 coinsurance.

As secondary payer, Medicare pays: The current Medicare interim reimbursement minus the automobile medical insurer's payment for Medicare covered services minus the deductible and coinsurance: $162 - $50 - $75 - $11 = $26. Medicare pays $26.

EXAMPLE 2:

Same facts as in Example 1 except the covered charges were $100, the primary payer's payment was $60, and the Medicare interim reimbursement (without regard to deductible or coinsurance) for the services at 90 percent of charges (the provider's interim rate) was $90. The deductible and coinsurance are calculated as follows:

The deductible is the lesser of $75 or the current Medicare interim reimbursement amount less the primary payer amount for Medicare covered services. In this case: $90 - $60 = $30. Since $30 is less than $75, the Part B deductible amount charged to the beneficiary is $30.

Since the $75 Part B deductible is not met, there is no coinsurance amount and there is no Medicare payment. The patient's liability is $30 of the $75 deductible.

5. UNIBILL entries

Enter in field 30 of the UNIBILL RECORD value code 14 to identify the primary payer.

Enter in field 31 of the UNIBILL RECORD the amount paid by the automobile medical or no-fault insurer for Medicare covered services that appears in value codes (Items 46-49).

G. Christian Science Sanatorium Bills - Full Payment by Automobile Medical or No-Fault Insurance.--If the payment from the automobile medical or no-fault insurer for Medicare covered services (as determined by the formula in subsection H5) equals or exceeds the sanatorium's charges for those services or the current Medicare interim reimbursement amount (without regard to deductible or coinsurance) or the sanatorium accepts, or is obligated to accept, the payment as payment in full, no payment is due from Medicare and no utilization is charged to the beneficiary. However, the sanatorium submits a bill for determining the benefit period. Process the bill in accordance with §3604 with the following modifications:

o The sanatorium completes the total and noncovered charges columns as if there had been no other payment.

The sanatorium shows total covered and noncovered days in the usual manner. Days paid by the automobile medical or no-fault insurer are counted as covered days.

The sanatorium enters the amount paid by the automobile medical or no-fault insurer for Medicare covered services in value codes (Items 46-49).

The sanatorium enters condition code 77 in Items 35-39 when it accepts, or is obligated to accept, the automobile medical or no-fault insurer's payment as payment in full.

o Do not complete the nonpayment code.

Enter in field 22 of the UNIBILL RECORD the days you determine to be charged to the beneficiary's Medicare utilization record. This figure should be zero.

Enter in field 24 of the UNIBILL RECORD zero days.

Enter in field 39 of the UNIBILL RECORD value code 14 to identify the primary payer.

Enter in field 40 of the UNIBILL RECORD the amount Medicare would have paid in the absence of the automobile medical or no-fault insurer's payment. (Do not record this amount on the PS&R report.)

Do not record days or charges on the PS&R report.

Submit the bill to HCFA in the format described in §3876.

H. Christian Science Sanatorium Bills - Partial Payment by Automobile Medical or No-Fault Insurance.--If the payment by the automobile medical or no-fault insurer for Medicare covered services (as determined by the formula in 5) is less than the sanatorium's charges for those services and the current Medicare interim reimbursement amount (without regard to deductible or coinsurance) and the sanatorium does not accept, and is not obligated to accept, the payment as payment in full, process the bill in accordance with §3604 with the following modifications:

1. Determining covered and noncovered charges

The sanatorium completes the total and noncovered charges columns as if there had been no other payment.

2. Determining covered and noncovered days

The sanatorium shows total covered and noncovered days in the usual manner. Days paid by the automobile medical or no-fault insurer are counted as covered days.

Calculate the days to be charged to the beneficiary as determined in 3 and report this result in the appropriate field of the UNIBILL RECORD as described in 7.

3. Determining utilization and coinsurance

Where the stay involves coinsurance days, determine utilization chargeable to the beneficiary if the sanatorium cannot and complete Items 25 and 61 (coinsurance) accordingly. No adjustment to Item 23 (covered days) is made based on this determination. The sanatorium completes Item 23 in the usual manner.

Charge utilization as follows:

o Subtract the automobile medical or no-fault insurer's payment that applies to Medicare covered services as determined under 5 below and any applicable deductible and coinsurance amounts from the Medicare interim reimbursement for the stay (unreduced by deductible and coinsurance). This yields the Medicare secondary payment.

o Divide this amount by the amount Medicare would have paid as primary payer (i.e., the Medicare interim reimbursement for the stay reduced by deductible and coinsurance.)

o Multiply this percentage by the number of covered days in the stay.

A partial day resulting from this calculation is not charged as a full day if it is less than .5 of a day. It is charged as a full day if it is .5 or more. (See §3680C3 for utilization examples.)

Charge coinsurance days as follows:

o If the days resulting from the above calculation are fewer than the full days available for the stay, no coinsurance days are billed.

- If the days resulting from the above calculation are greater than the full days available for the stay, coinsurance days are billed for the excess days.

Where the sanatorium performs the utilization calculation, perform the same calculation to verify that Items 25 and 61 (coinsurance) have been completed correctly. Advise the sanatorium of any discrepancies.

EXAMPLE 1:

A beneficiary has 17 full days available at the time of admission. The sanatorium inpatient stay was 20 days. The sanatorium bills 20 days in Item 27 (covered days) as if there were no other payer involved. After performing the calculation to determine utilization chargeable, it is determined that the beneficiary can be charged with 10 days. Therefore, no coinsurance days are billed. In the absence of another insurer's payment, 3 days would have been billed in Item 25 (coinsurance).

Enter in field 24 of the UNIBILL RECORD, 20 days.

EXAMPLE 2:

A beneficiary has 30 coinsurance days available at the time of admission. The sanatorium inpatient stay was 20 days. The sanatorium will bill 20 days in Item 27 (covered days) as if there were no other payer involved. After performing the calculation to determine utilization chargeable, it is determined that the beneficiary can be charged with 10 days. Therefore, only 10 coinsurance days are billed. In the absence of another insurer's payment, 20 days would have been billed in Item 25 (coinsurance).

Enter in field 25 or 26 of the UNIBILL RECORD, 10 days. In addition, enter in field 24 of the UNIBILL RECORD, 20 days.

4. Special entries on the bill

The identifying information is shown in Items 57-68 on the first payer line. Occurrence code 01 or 02, as appropriate and the associated date is shown in Items 28-32. Value code 14, with the amount paid is shown in value codes (Items 46-49). The address of the automobile medical or no-fault insurer is shown in Item 34 or remarks (Item 94).

5. Determining amount of primary payer payment that applies to Medicare covered services

The sanatorium indicates the primary payer's allocation of its payment between covered and noncovered Medicare services by entering the amount paid by the primary payer toward medicare covered services in value codes (Item 46-49). Where the sanatorium cannot determine the services covered by the primary payment, it applies a ratio of Medicare covered charges to total charges for the stay to the primary payment amount to determine the portion attributable to Medicare covered services and enters this amount in value codes (Items 46-49).

EXAMPLE: Total charges were $5,000. Medicare covered charges were $4,000. The automobile medical insurer's payment was $3,000. Since the sanatorium cannot determine the allocation of the primary payer's payment, it determines the allocation as follows:

$$\frac{\$4,000}{\$5,000} \times \$3,000 = \$2,400$$

The sanatorium shows $2,400 in value codes (Items 46-49).

6. Determining the amount of Medicare payment

Subtract the payment by the automobile medical or no-fault insurer for Medicare covered services from the current Medicare interim reimbursement amount (without regard to deductible or coinsurance) per §3683. Apply any applicable deductible and/or coinsurance to the remainder.

EXAMPLE 1:

A sanatorium furnished inpatient care to a Medicare beneficiary whose automobile medical insurer was the primary payer. The covered charges were $4,000. The automobile medical insurer paid $2,400 for Medicare covered services as determined in Item 5. No part of the Medicare inpatient deductible of $540 had been met previously. The Medicare interim reimbursement (without regard to deductible or coinsurance) at 90 percent of charges ($4,000 x 90 percent) would be $3,600. The deductible is determined as follows:

The lesser of $540 or the current Medicare interim reimbursement amount less the primary payer amount for Medicare covered services. In this case: $3,600 - $2,400 = $1,200 which exceeds $540. The deductible amount charged to the beneficiary is $540.

As secondary payer Medicare pays: The current Medicare interim reimbursement minus the automobile medical insurer's payment for Medicare covered services minus the inpatient deductible: $3,600 - $2,400 - $540 = $660. Medicare pays $660.

EXAMPLE 2:

Same facts as in Example 1 except the covered charges were $1,000, the primary payer's payment was $900, and the Medicare interim reimbursement (without regard to deductible or coinsurance) at 98 percent of charges was $980. The deductible is determined as follows:

The lesser of $540 or the current Medicare interim reimbursement amount less the primary payer amount for Medicare covered services. In this case: $980 - $900 = $80. Since $80 is less than $540, the deductible amount charged to the beneficiary is $80.

As secondary payer Medicare pays: The current Medicare interim reimbursement minus the automobile medical insurer's payment for Medicare covered services minus the inpatient deductible: $980 - $900 - $80 = 0.

The patient's liability is $80, the remaining $460 of the deductible will be due if the patient reenters the sanatorium during the same benefit period.

7. UNIBILL entries

Enter in field 22 of the UNIBILL RECORD the days to be charged to the beneficiary's Medicare utilization record as determined in 3.

Enter in field 24 of the UNIBILL RECORD the covered days reported by the sanatorium in Item 23. This figure is used to validate the Medicare days shown on the cost report.

Enter in field 34 of the UNIBILL RECORD value code 14 to identify the primary payer.

Enter in field 40 of the UNIBILL RECORD the amount paid by the automobile medical, no-fault, or liability insurer for Medicare covered services that appears in value codes (Items 46-49).

I. HHA Bills - Full Payment by Automobile Medical or No-Fault Insurance.--If the payment from the automobile medical or no-fault insurer for Medicare covered services (as determined by the formula in subsection J3) equals or exceeds the HHA's charges for those services or the current Medicare interim reimbursement amount or the HHA accepts, or is obligated to accept, the payment is as payment in full, no payment is due from Medicare. The HHA does not submit a bill.

J. HHA Bills - Partial Payment by Automobile Medical or No-Fault Insurance.--If the payment from the automobile medical or no-fault insurer for Medicare covered services (as determined by the formula in 3) is less than the HHA's charges for those services and the current Medicare interim reimbursement amount and the HHA does not accept, and is not obligated to accept, the payment as payment in full, process the bill in accordance with §3604 with the following modifications:

1. Determining charges and visits

The HHA shows in the charges and visits columns of the bill Medicare covered charges and visits including those covered by the automobile medical or no-fault insurer's payment.

2. Special entries on the bill

The identifying information is shown in Items 57-68 on the first payer line. Occurrence code 01 or 02, as appropriate with the associated date is shown in Items 28-32. Value code 14, with the amount paid is shown in value codes (Items 46-49). The address of the automobile medical or no-fault insurer is shown in Item 34 or remarks (Item 94).

3. Determining amount of primary payer payment that applies to Medicare covered services

The HHA indicates the primary payer's allocation of its payment between covered and noncovered Medicare services by entering the amount paid by the primary payer toward Medicare covered services in value codes (Items 46-49). Where the HHA cannot determine the services covered by the primary payment, it applies a ratio of Medicare covered charges to total charges for the services to the primary payment amount to determine the portion attributable to Medicare covered services and enters this amount in value codes (Items 46-49). The HHA must be able to validate its ratio of covered and noncovered charges if so requested.

EXAMPLE: Total charges were $550. Medicare covered charges were $500. The automobile medical insurer's payment was $330. Since the HHA cannot determine the allocation of the primary payer's payment, it determines the allocation as follows:

$$\frac{\$500}{\$550} \times \$330 = \$300$$

The HHA shows $300 in value codes (Items 46-49).

4. Determining the amount of Medicare payment

Subtract the payment by the automobile medical or no-fault insurer for Medicare covered services from the current Medicare interim reimbursement amount.

EXAMPLE 1: Per Visit Method

A beneficiary received 10 visits for which the HHA's current Medicare interim reimbursement amount at $50 per visit was $500. The automobile medical insurer paid $300 for Medicare covered services as determined in Item 3. As secondary payer Medicare pays:

o The Medicare interim reimbursement minus the automobile medical insurer's payment for Medicare covered services: $500 - $300 = $200. Medicare pays $200.

EXAMPLE 2: Percentage of Billed Charges Method

A beneficiary received 10 visits for which the HHA charged $50 per visit. The Medicare interim rate was 90 percent ($500 x 90 percent) which equaled $450. The automobile medical insurer paid $300 for Medicare covered services as determined in Item 3 above. As secondary payer Medicare pays:

- The Medicare interim reimbursement minus the automobile medical insurer's payment for Medicare covered services: $450 - $300 = $150. Medicare pays $150.

5. UNIBILL entries

Enter in field 30 of the UNIBILL RECORD value code 14 to identify the primary payer.

Enter in field 31 of the UNIBILL RECORD the amount paid by the automobile medical or no-fault insurer for Medicare covered services that appears in value codes (Items 46-49).

K. Automobile Medical or No-Fault Insurer Does Not Make Payment.--If the services are related to an automobile accident and an automobile insurer has been billed but does not make payment, e.g., the services are not covered under automobile medical or no-fault insurance or the individual's insurance coverage expired, the provider bills Medicare as usual. In addition, the proper occurrence code as indicated below is shown in Items 28-32, occurrence code 24 is completed to show the date the other payer denied the claim and the reason for denial is shown in Remarks (Item 94).

01 - auto accident

02 - auto accident, no-fault insurance

If the claim is contested by an automobile medical or no-fault insurer or for any other reason there will be a substantial delay, pay conditional primary benefits. The provider enters value code 14 with zero value in Items (46-49) to indicate the type of other insurer and that conditional payment is requested. The identity of the other payer is shown on line A of Item 57, the identifying information about the insured is shown on line A of Items 65-68. Show the proper occurrence code in items 28-32 and the address of the insurer in Item 34 or Remarks (Item 94). In addition, an explanation of why the conditional payment is justified is shown in Remarks (Item 94). (See S3489.4E for an explanation of policy and procedures for conditional payment situations for contested or delayed automobile medical or no-fault claims.

Process these conditional payment bills following normal procedures. In addition, enter in the appropriate field of the UNIBILL RECORD value code 14 and zero value to indicate that a conditional payment was made. Show this code and zero value in fields 39 and 40 for inpatient and Christian Science Sanatorium bills, and fields 30 and 31 for outpatient, HHA, and other bills.

L. Conditional Liability Claims.—If the services are related to an accident as defined in §3419.2 or a diagnosis/trauma code listed in §3419.5 is shown, and there is no potential primary payers other than a liability insurer, the provider bills Medicare for conditional primary payments. It bills Medicare even if it believes that there is a reasonable likelihood that the liability insurer will pay promptly. The claim is completed and processed in accordance with the last two paragraphs of subsection K. (See §§3419ff. for an explanation of policy and procedures for liability claims and §3419.7 for actions to take where a liability claim is filed.)

3681. BILLING PROCEDURES WHERE MEDICARE BENEFITS ARE SECONDARY TO EMPLOYER GROUP HEALTH PLANS WHEN INDIVIDUALS ARE ENTITLED TO BENEFITS SOLELY ON THE BASIS OF ESRD

A. General.--Medicare benefits are secondary to benefits payable under an employer group health plan (EGHP) in the case of individuals who are entitled to benefits solely on the basis of end stage renal disese (ESRD), during a period of up to 12 months. This provision is effective for items and services furnished on or after October 1, 1981, to beneficiaries whose 12-month period began in, or after, October 1981. For an explanation of these provisions see §§3490-3490.17.

Payment made by the ESRD-EGHP can be used to satisfy unmet deductibles and the individual's coinsurance. However, the portion of the stay paid for by the ESRD-EGHP is not charged to the beneficiary's Medicare utilization record.

Where Medicare is determined to be the primary payer, Medicare is shown on line A of Item 57. Where Medicare is secondary, Medicare is shown on line B. In addition, where the provider is billing Medicare because the ESRD-EGHP denied payment, occurrence code 24 (insurance denied) and the date of denial are in Items 28-32 (occurrence codes). The reason for the denial is in remarks (Item 94). All bills where Medicare is not primary payer because of coverage of an ESRD beneficiary by an EGHP are prepared in accordance with the following instructions. In applying the guidelines, it may be necessary to determine the current Medicare interim reimbursement amount (without regard to deductible or coinsurance). See §3683 to determine this amount.

When processing current claims in which you are first aware of ESRD-EGHP coverage, consider the possibility of prior incorrect payments. See §3490.4.

B. Inpatient Bills - Full Payment By ESRD-EGHP.--If an ESRD-EGHP payment for Medicare covered services (as determined by the formula in subsection C5) equals or exceeds the provider's charges for those services or the current Medicare interim reimbursement amount (without regard to deductible or coinsurance) or the provider accepts, or is obligated to accept, the ESRD-EGHP payment as payment in full, no payment is due from Medicare and no utilization will be charged to the beneficiary. However, the provider submits a bill for determining the benefit period. In addition, ESRD-EGHP payments can be used to satisfy unmet deductibles. Process the bill in accordance with §3604 with the following modifications:

o The provider completes the total and noncovered charges columns as if there had been no other payment.

Where blood is involved, the provider completes the blood items. (This data is for the beneficiary's utilization records only and is not to be used for the PS&R report.)

The provider does not complete coinsurance (no days are charged). However, inpatient deductible and total deductions are completed when applicable. (This data is for the beneficiary's utilization records only and is not to be used for the PS&R report.)

The provider shows total covered and noncovered days in the usual manner. Count days paid by the ESRD-EGHP are counted as covered days.

The provider enters the amount paid by the ESRD-EGHP for Medicare covered services in value codes (Items 46-49).

The provider enters occurrence code 33 and the first month of the 12 month period in Items 28-32.

The provider enters condition code 77 in Items 35-39 when it accepts, or is obligated to accept, the ESRD-EGHP payment as payment in full.

- Do not complete the nonpayment code.

Enter in field 22 of the UNIBILL RECORD the days you determine to be charged to the beneficiary's Medicare utilization record. This figure should be zero.

Enter in field 24 of the UNIBILL RECORD zero days.

Enter in field 39 of the UNIBILL RECORD value code 13 to identify the primary payer.

Enter in or field 40 of the UNIBILL RECORD the amount Medicare would have paid in the absence of the ESRD-EGHP's payment. (Do not record this amount on the PS&R report.)

Do not record days or charges on the PS&R report.

Submit the bill to HCFA in the format described in §3876. HCFA CO uses data reported in the blood deductible and inpatient deductible items to update deductibles. (This data is not to be used for the PS&R report.)

C. Inpatient Bills - Partial Payment by ESRD-EGHP.--If an ESRD-EGHP payment for Medicare covered services (as determined by the formula in 5) is less than the provider's charges for those services and the current Medicare interim reimbursement amount (without regard to deductible or coinsurance) and the provider does not accept, and is not obligated to accept, the ESRD-EGHP payment as payment in full, process the bill in accordance with §3604 with the following modifications:

1. Determining covered and noncovered charges

The provider completes the total and noncovered charges columns as if there had been no other payment.

2. Determining covered and noncovered days

The provider shows total covered and noncovered days in the usual manner. Count days paid by the ESRD-EGHP as covered days.

Calculate the days to be charged to the beneficiary as determined in 3 and report this result in the appropriate field of the UNIBILL RECORD as described in 7.

3. Determining utilization and coinsurance

Where an ESRD-EGHP pays an amount for Medicare covered services that is equal to, or less than, the deductible and coinsurance that would apply if Medicare was the primary payer, utilization is not reduced. Therefore, coinsurance is calculated in the usual manner. (See C6, example 4.)

Where an ESRD-EGHP pays an amount for Medicare covered services that is more than the deductible and coinsurance that would apply if Medicare was the primary payer, follow the procedures below to determine utilization and coinsurance.

Where the stay involves coinsurance days, determine utilization chargeable to the beneficiary if the provider cannot. Complete Items 25 and 61 (coinsurance) accordingly. No adjustment to Item 23 (covered days) is made based upon this determination. The provider completes Item 23 or 28 in the usual manner.

Charge utilization as follows:

- o Subtract the ESRD-EGHP payment that applies to Medicare covered services as determined under 5 from the Medicare interim reimbursement for the stay (unreduced by deductible and coinsurance). This yields the Medicare secondary payment.
- o Divide this amount by the amount Medicare would have paid as primary payer (i.e., the Medicare interim reimbursement for the stay reduced by deductible and coinsurance).
- o Multiply this percentage by the number of covered days in the stay.

A partial day resulting from this calculation is not charged as a full day if it is less than .5 of a day. It is charged as a full day if it is .5 or more.

EXAMPLE I: Deductible Involved

An individual was hospitalized 15 days, for which the total charges were $5,000. The ESRD-EGHP paid $2,400 for Medicare covered services. No part of the Medicare inpatient deductible of $520 had been met. The current Medicare interim reimbursement amount (without regard to deductible or coinsurance) for the services in absence of the ESRD-EGHP payment would have been $3,600. This amount minus the ESRD-EGHP payment is $1,200 ($3,600 - $2,400). Medicare would have paid $3,080 as primary payer ($3,600 - $520). Calculate the beneficiary's utilization as follows: $1,200 divided by $3,080 = .389 x 15 days = 5.84 or 6 days when rounded.

EXAMPLE II: Coinsurance Involved

An individual was hospitalized for 20 days (all of which were LTR days) for which total charges were $12,000. The ESRD-EGHP paid $6,000 for Medicare covered services. The applicable coinsurance amount was $5,200. The current Medicare interim reimbursement amount (without regard to deductible or coinsurance) for the services in absence of the ESRD-EGHP payment would have been $10,000. The Medicare secondary payment amount is $4,000 (the current Medicare interim reimbursement amount of $10,000 minus the ESRD-EGHP payment of $6,000). Medicare would have paid $4,800 as primary payer ($10,000 - $5,200). Calculate the beneficiary's utilization as follows: $4,000 divided by $4,800 = .833 x 20 days = 16.6 or 17 days when rounded. If the ESRD-EGHP payment in this example had been $5,200 or less, utilization would not be reduced. The beneficiary would have been charged with 20 days utilization.

Use this formula even when the ESRD-EGHP pays for only a specified number of days of a stay because of a payment limitation under the plan on the number of benefit days available. For example, a provider furnished 20 days of inpatient care. The ESRD-EGHP paid all of the charges for only the first 10 days. These charges were $4,500. No part of the Medicare inpatient deductible of $520 had been met. The current Medicare interim reimbursement (without regard to deductible or coinsurance) which Medicare could have paid for the 20 day stay in the absence of ESRD-EGHP coverage was $7,000. That amount minus the ESRD-EGHP payment was $2,500 ($7,000 - $4,500). Medicare would have paid $6,480 as primary payer ($7,000 - $520). The utilization charged to the beneficiary is calculated as follows: $2,500 divided by $6,480 = .385 x 20 days = 7.71 or 8 days when rounded.

Charge coinsurance days as follows:

o If the days resulting from the utilization calculation are fewer than the full days available for the stay, no coinsurance days are billed.

o If the days resulting from the utilization calculation are greater than the full days available for the stay, coinsurance days are billed for the excess days.

Where the provider performs the utilization calculation above, perform the same calculation to verify that Items 25 and 61 (coinsurance) have been completed correctly. Advise the provider of any discrepancies.

EXAMPLE 1:

A beneficiary has 17 full days available at the time of admission. The hospital stay was 20 days. The provider bills 20 days in covered days as if there were no other payer involved. After performing the calculation to determine utilization chargeable, it is determined that the beneficiary can be charged with 10 days. Therefore, no coinsurance days are billed. In the absence of another insurer's payment, 3 days would have been billed in Item 25 (coinsurance).

Enter in field 24 of the UNIBILL RECORD, 20 days.

EXAMPLE 2:

A beneficiary has 30 coinsurance days available at the time of admission. The hospital stay was 20 days. The provider bills 20 days in covered days as if there were no other payer involved. After performing the calculation to determine utilization chargeable, it is determined that the beneficiary can be charged with 10 days. Therefore, only 10 coinsurance days are billed. In the absence of another insurer's payment, 20 days would have been billed in Item 25 (coinsurance).

Enter in field 25 or 26 of the UNIBILL RECORD, 10 days. In addition, enter in field 24 of the UNIBILL RECORD, 20 days.

4. Special entries on the bill

The identifying information is shown in Items 57-75 on the first payer line. Value code 13, with the amount paid is shown in value codes (Items 46-49). Occurrence code 33 and the first month of the 12-month period is shown in Items 28-32. In addition, the address of the ESRD-EGHP is shown in Item 34 or remarks (Item 94).

5. Determining amount of primary payer payment that applies to Medicare covered services

The provider indicates the primary payer's allocation of its payment between covered and noncovered Medicare services by entering the amount it paid toward Medicare covered services in value codes (items 46-49). Where the provider cannot determine the services covered by the primary payment, it applies a ratio of Medicare covered charges to total charges for the stay to the primary payment amount to determine the portion attributable to Medicare covered services and enters this amount in value codes (Items 46-49).

EXAMPLE: Total charges were $5,000. Medicare covered charges were $4,000. The ESRD-EGHP payment was $3,000. Since the provider cannot determine the allocation of the primary payer's payment, it determines the allocation as follows:

$$\frac{\$4,000}{\$5,000} \times \$3,000 = \$2,400$$

The provider shows $2,400 in value codes (Items 46-49).

6. Determining the amount of Medicare payment

The Medicare payment is the lower of:

- The current Medicare interim reimbursement (without regard to deductible or coinsurance) per §3683 minus the amount paid by the ESRD-EGHP for Medicare covered services;

or

o The current Medicare interim reimbursement (without regard to deductible or coinsurance) per §3683 minus any applicable deductible or coinsurance amount.

This is accomplished by applying the following formulas:

Per Diem Reimbursement - Covered days times per diem rate minus the larger of:

o Total Deductions (The sum of Items 60-61);

or

o Amount paid by ESRD-EGHP for Medicare covered services (amount shown in value codes, Items 46-49).

Periodic Interim Payment (PIP) - Covered days times the gross per diem as determined in §3683 minus the larger of:

o Total Deductions (The sum of Items 60-61);

or

o Amount paid by ESRD-EGHP for Medicare covered services (amount shown in value codes, Items 46-49).

Percentage of Charge - Total charges (sum of covered and noncovered) identified by revenue code 001 less any Medicare noncovered charges times the percentage of charges, minus the larger of:

o Total Deductions (The sum of Items 60-61);

or

o Amount paid by ESRD-EGHP for Medicare covered services (amount shown in value codes, Items 46-49).

EXAMPLE 1: Per Diem or PIP Reimbursement Method

Inpatient care was furnished for 8 covered days to a Medicare beneficiary whose ESRD-EGHP was primary payer. The covered charges were $4,000. The ESRD-EGHP paid $2,400 for Medicare covered services as determined in Item 5. No part of the Medicare inpatient deductible of $520 had been met previously. The Medicare interim reimbursement (without regard to deductible or coinsurance) at $450 a day (8 x $450) would be $3,600. As secondary payer Medicare pays the lower of:

o The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the ESRD-EGHP payment: $3,600-$2,400 = $1,200.

o The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the inpatient deductible: $3,600-$520 = $3,080.

Medicare pays $1,200. The provider cannot charge the beneficiary since the $520 inpatient deductible was satisfied by the ESRD-EGHP payment.

EXAMPLE 2: Percentage of Charge Method

Inpatient care was furnished to a Medicare beneficiary whose ESRD-EGHP was primary payer. The covered charges were $4,000. The ESRD-EGHP paid $2,400 for Medicare covered services as determined in Item 5. No part of the Medicare inpatient deductible of $520 had been met previously. The Medicare interim reimbursement without regard to deductible or coinsurance) at 90 percent of charges ($4,000 x 90 percent) would be $3,600. As secondary payer Medicare pays the lower of:

o The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the ESRD-EGHP payment: $3,600-$2,400 = $1,200.

o The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the inpatient deductible: $3,600-$520 = $3,080.

Medicare pays $1,200. The provider cannot charge the beneficiary since the $520 inpatient deductible was satisfied by the ESRD-EGHP payment.

EXAMPLE 3:

Same facts as in Example (2) above except the ESRD-EGHP payment for Medicare covered services is $300.

As secondary payer Medicare pays the lower of:

o The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the ESRD-EGHP payment: $3,600 - $300 = $3,300.

o The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the inpatient deductible: $3,600 - $520 = $3,080.

Medicare pays $3,080. The beneficiary's liability is $220 (the amount the provider can charge the beneficiary). The beneficiary's $520 inpatient deductible is satisfied: $300 by the ESRD-EGHP payment and $220 by the beneficiary.

EXAMPLE 4:

Same facts as in Example (2) except the deductible has previously been met, the beneficiary was hospitalized for 20 days and only coinsurance days are available.

As secondary payer Medicare pays the lower of:

- The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the ESRD-EGHP payment: $3,600 - $2,400 = $1,200.

- The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the applicable coinsurance: $3,600 - $2,600 (20 coinsurance days at $130 per day) = $1,000.

Medicare pays $1,000. Since the ESRD-EGHP payment ($2,400) is less than the coinsurance ($2,600), utilization is not reduced and coinsurance is determined in the usual manner. Therefore, the beneficiary's liability is $200 (the $2,600 coinsurance minus the EGHP payment of $2,400).

7. UNIBILL entries

Enter in field 22 of the UNIBILL RECORD the days to be charged to the beneficiary's Medicare utilization record as determined in 3.

Enter in field 24 of the UNIBILL RECORD the covered days reported by the provider in Item 23. This figure is used to validate the Medicare days shown on the cost report.

Enter in field 39 of the UNIBILL RECORD value code 13 to identify the primary payer.

Enter in field 40 of the UNIBILL RECORD the amount paid by the ESRD-EGHP for Medicare covered services that appears in value codes (Items 46-49). (For the PS&R report, record the primary payment amount minus the amount in "Total Deductions.)"

D. Part B Inpatient Services.--These provisions apply for ancillary services for individuals who have exhausted their Part A benefits. Handle billing as described in sections E and F below. If Part A benefits are exhausted during the inpatient stay, the Part B billing should not be prepared until the effect of the primary payment on Part A utilization is determined.

E. Outpatient Bills - Full Payment by ESRD-EGHP.--If an ESRD-EGHP payment for Medicare covered services (as determined by the formula in subsection F3) equals or exceeds the provider's charges for those services or the current Medicare interim reimbursement amount (without regard to deductible or coinsurance) or the provider accepts, or is obligated to accept, the ESRD-EGHP payment as payment in full, and the provider knows the individual has already met his deductible, no bill is submitted. If an ESRD-EGHP payment equals or exceeds the composite rate (without regard to deductible or coinsurance) and the hospital-based renal dialysis facility knows the individual has already met his deductible, no bill is submitted. However, a bill is submitted to inform you of charges where the deductible may not yet be met. Although no payment can be made by Medicare, the expenses can be applied to the beneficiary's deductible. The provider completes the bill in the usual manner. In addition:

o The provider determines the charges as usual including those covered by the ESRD-EGHP's payment.

The provider enters the amount paid by the ESRD-EGHP for Medicare covered services in value codes (Items 46-49).

The provider enters occurrence code 33 and the first month of the 12 month period in Items 28-32.

The provider enters condition code 77 in Items 35-39 when it accepts, or is obligated to accept, the ESRD-EGHP payment as payment in full.

o Treat the charges shown in total charges as noncovered for reimbursement purposes.

Query to update the deductible but the bill need not be processed any further except to discontinue systems controls in internal operations. (The deductible should not be used for the PS&R report).

F. Outpatient Bills - Partial Payment by ESRD-EGHP.--If an ESRD-EGHP payment for Medicare covered services (as determined by the formula in 3) is less than the provider's charges for those services and the current Medicare interim reimbursement amount (without regard to deductible or coinsurance) and the provider does not accept, and is not obligated to accept, the ESRD-EGHP payment as payment in full, or is less than the composite rate (without regard to deductible and coinsurance), process the bill in accordance with §3604 with the following modifications:

1. Determining covered charges

The provider shows in the covered charges column, Medicare covered charges, including those covered by the ESRD-EGHP's payment.

2. Special entries on the bill

The identifying information is shown in Items 57-75 on the first payer line. Value code 13, with the amount paid is shown in value codes (Items 46-49). Occurrence code 33 and the first month of the 12-month period are shown in Items 28-32. In addition, the address of the ESRD-EGHP is shown in Item 34 or remarks (Item 94).

3. Determining amount of primary payer payment that applies to Medicare covered services

The provider indicates the primary payer's allocation of its payment between covered and noncovered Medicare services by entering the amount it paid toward Medicare covered services in value codes. Where the provider cannot determine the services covered by the primary payment, it applies a ratio of Medicare covered charges to total charges for the services to the primary payment amount to determine the portion attributable to Medicare covered services and enters this amount in value codes (Items 46-49). The provider must be able to validate its ratio of covered and noncovered charges if so requested.

EXAMPLE: Total charges were $110. Medicare covered charges were $90. The ESRD-EGHP payment was $88. Since the provider cannot determine the allocation of the primary payer's payment, it determines the allocation as follows:

$$\frac{\$90}{\$110} \times \$88 = \$72$$

The provider shows $72 in value codes (Items 46-49).

4. Determining the amount of Medicare payment

The Medicare payment is the lower of:

- The current Medicare interim reimbursement (without regard to deductible or coinsurance) per §3683 or the composite rate (without regard to deductible or coinsurance) minus the amount paid by the ESRD-EGHP for Medicare covered services;

or

- The current Medicare interim reimbursement (without regard to deductible or coinsurance) per §3683 or the composite rate (without regard to deductible or coinsurance) minus any applicable deductible or coinsurance amount.

That portion of the total charges equal to the ESRD-EGHP payment is credited toward any unmet deductible. Include this amount in any query to update the deductible.

NOTE: Examples 1 through 4 below are based upon percentage of billed charges.

EXAMPLE 1: ESRD-EGHP payment is less than unmet deductible

Outpatient services were furnished to a Medicare beneficiary for which the covered charges were $90. No part of the beneficiary's $75 Part B deductible had been met previously. The ESRD-EGHP paid $72 for Medicare covered services as determined in item 3. The Medicare interim reimbursement (without regard to deductible or coinsurance) for these services at 90 percent of charges (the provider's interim rate) would be $81. As secondary payer, Medicare pays the lower of:

o The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the ESRD-EGHP payment: $81-$72 = $9.

or

o The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the applicable deductible and coinsurance: $81-$75-$3* = $3.

*The coinsurance is calculated as follows:

$90 charges - $75 deductible = $15 x 20 percent = $3 coinsurance.

Medicare pays $3. The beneficiary's liability is $6 ($3 of the deductible and the $3 coinsurance). The beneficiary's $75 deductible is satisfied: $72 by the ESRD-EGHP payment and $3 by the beneficiary. (For the PS&R, record $75 deductible and $3 coinsurance.)

EXAMPLE 2: ESRD-EGHP payment is more than unmet deductible

Same facts as in Example (1) except the ESRD-EGHP's payment for Medicare covered services is $80.

As secondary payer Medicare pays the lower of:

o The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the ESRD-EGHP payment: $81-$80 = $1.

o The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the applicable deductible and coinsurance: $81-$75-$3* = $3.

*See Example (1) for coinsurance calculation.

Medicare pays $1. The provider may not charge the beneficiary since the deductible and coinsurance were met by the ESRD-EGHP payment. (For the PS&R report, record $75 deductible, $3 coinsurance, and $2 primary payment).

best copy available

EXAMPLE 3: ESRD-EGHP payment equals unmet deductible

Same facts as in Example (1) except the ESRD-EGHP's payment for Medicare covered services is $75.

As secondary payer Medicare pays the lower of:

- The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the ESRD-EGHP payment: $81-$75 = $6.

- The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the applicable deductible or coinsurance: $81-$75-$3*= $3.

*See Example (1) for coinsurance calculation.

Medicare pays $3. The provider may bill the beneficiary $3 for coinsurance. The $75 deductible is satisfied by the ESRD-EGHP payment. (For the PS&R report, record $75 deductible and $3 coinsurance.)

EXAMPLE 4: Deductible met prior to ESRD-EGHP payment

Same facts as in Example (1) except the deductible had been met previously.

As secondary payer Medicare pays the lower of:

- The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the ESRD-EGHP payment: $81-$72 = $9.

- The Medicare interim reimbursement (without regard to deductible or coinsurance) minus any applicable deductible or coinsurance: $81-$18* = $63.

*The coinsurance is calculated as follows:

$90 charge x 20 percent = $18 coinsurance.

Medicare pays $9. The hospital may not charge the beneficiary since the coinsurance is paid by ESRD-EGHP payment. (For the PS&R report, record $18 coinsurance and $54 primary payment.)

NOTE: Examples 5 through 7 below are based upon the composite rate

EXAMPLE 5:

An individual received 8 dialysis treatments for which a hospital-based renal dialysis facility charged $160 per treatment for a total of $1,280. No part of the beneficiary's $75 Part B deductible had been met previously. The ESRD-EGHP paid $1,024 for Medicare covered services. The composite rate per dialysis treatment is $131 or $1,048 for 8 treatments. As secondary payer, Medicare pays the lower of:

o The composite rate (without regard to deductible or coinsurance) minus the EGHP payment: $1,048-$1,024 = $24.

o The composite rate (without regard to deductible or coinsurance) minus the applicable deductible and coinsurance: $1,048-$75-$194.60* = $778.40.

*The coinsurance is calculated as follows:

$1,048 composite rate - $75 deductible = $973 x 20 percent = $194.60.

Medicare pays $24. The renal dialysis facility may not charge the beneficiary since the deductible and coinsurance were met by the ESRD-EGHP payment. (For the PS&R report, record $75 deductible, $194.60 coinsurance, and $754.40 primary payment.)

EXAMPLE 6:

An individual received 12 peritoneal dialysis treatments over a 1 month period for which an independent facility charged $150 per treatment. The facility bills on a monthly basis and its per treatment composite rate is $130 ($1,560 for 12 treatments). The facility also billed the individual separately billable parenteral items for which it charged $45. The Medicare reasonable charge for these services is $36. The beneficiary's $75 Part B deductible was previously met. The ESRD-EGHP paid 80 percent of the facility's charges, or $1,476 for Medicare covered services. As secondary payer, Medicare pays the lower of:

o The composite rate plus the Medicare reasonable charge for the separately billable services (without regard to deductible or coinsurance) minus the ESRD-EGHP payment: $1,560 + $36 = 1,596 - $1,476 = $120.

o The composite rate plus the Medicare reasonable charge for the separately billable services (without regard to deductible or coinsurance) minus the applicable coinsurance: $1,560 + $36 - $319.20* = $1,276.80.

* The coinsurance is calculated as follows:

$1,596 x 20 percent = $319.20

Medicare pays $120. The facility may not charge the beneficiary since the coinsurance was met by the ESRD-EGHP payment. (For the PS&R report, record $319.20 coinsurance and $1,156.80 primary payment.)

5. UNIBILL entries

Enter in field 30 of the UNIBILL RECORD value code 13 to identify the primary payer.

Enter in field 31 of the UNIBILL RECORD the amount paid by the ESRD-EGHP for Medicare covered services that appears in value codes (Items 46-49).

G. Christian Science Sanatorium Bills - Full Payment by ESRD-EGHP.--If an ESRD-EGHP payment for Medicare covered services (as determined by the formula in subsection H5) equals or exceeds the sanatorium's charges for those services or the current Medicare interim reimbursement amount (without regard to deductible or coinsurance) or the sanatorium accepts, or is obligated to accept, the ESRD-EGHP payment as payment in full, no payment is due from Medicare and no utilization will be charged to the beneficiary. However, the sanatorium submits a bill for determining the benefit period. In addition, ESRD-EGHP payments can be used to satisfy unmet deductibles. Process the bill in accordance with §3604 with the following modifications:

o The sanatorium completes the total and noncovered charges columns as if there had been no other payment.

The sanatorium does not complete coinsurance (no days are charged). However, inpatient deductible and total deductions are completed when applicable. (This data is for the beneficiary's utilization records only and is not to be used for the PS&R report.)

The sanatorium shows total covered and noncovered days in the usual manner. Count days paid by the ESRD-EGHP as covered days.

The sanatorium enters the amount paid by the ESRD-EGHP for Medicare covered services in value codes (Items 46-49).

The sanatorium enters code 33 and the first month of the 12 month period in Items 28-32.

The sanatorium enters condition code 77 in Items 35-39 when it accepts, or is obligated to accept, the ESRD-EGHP payment as payment in full.

o Do not complete the nonpayment code.

Enter in field 22 of the UNIBILL RECORD the days you determine to be charged to the beneficiary's Medicare utilization record. This figure should be zero.

Enter in field 24 of the UNIBILL RECORD zero days.

Enter in field 39 of the UNIBILL RECORD value code 13 to identify the primary payer.

Enter in field 40 of the UNIBILL RECORD the amount Medicare would have paid in the absence of the ESRD-EGHP's payment. (Do not record this amount on the PS&R report.)

Do not record days or charges on the PS&R report.

Submit the bill to HCFA in the format described in §3876. CO uses data reported in inpatient deductible to update the deductible. (This data is not to be used for the PS&R report).

H. Christian Science Sanatorium Bills - Partial Payment by ESRD-EGHP.--If an ESRD-EGHP payment for Medicare covered services (as determined by the formula in 5) is less than the sanatorium's charges for those services and the current Medicare interim reimbursement amount (without regard to deductible or coinsurance) and the sanatorium does not accept, and is not obligated to accept, the ESRD-EGHP payment as payment in full, process the bill in accordance with §3604 with the following modifications:

1. Determining covered and noncovered charges

The sanatorium completes the total and noncovered charges columns as if there had been no other payment.

2. Determining covered and noncovered days

The sanatorium shows total covered and noncovered days in the usual manner. Days paid by the ESRD-EGHP are counted as covered days.

Calculate the days to be charged to the beneficiary as determined in 3 and report this result in the appropriate field of the UNIBILL RECORD as described in 7.

3. Determining utilization and coinsurance

Where an ESRD-EGHP pays an amount for Medicare covered services that is equal to, or less than, the deductible and coinsurance that would apply if Medicare was the primary payer, utilization is not reduced. Therefore, coinsurance is calculated in the usual manner. (See C6, example 4.)

Where an ESRD-EGHP pays an amount for Medicare covered services that is more than the deductible and coinsurance that would apply if Medicare was the primary payer, follow the procedures below to determine utilization and coinsurance.

Where the stay involves coinsurance days, determine utilization chargeable to the beneficiary if the sanatorium cannot. Complete Items 25 and 61 (coinsurance) accordingly. No adjustment to Item 23 (covered days) is made based upon this determination. The sanatorium completes Item 23 in the usual manner.

Charge utilization as follows:

o Subtract the ESRD-EGHP payment that applies to Medicare covered services as determined under subsection 5 from the Medicare interim reimbursement for the stay (unreduced by deductible and coinsurance). This yields the Medicare secondary payment.

- Divide this amount by the amount Medicare would have paid as primary payer (i.e., the Medicare interim reimbursement for the stay reduced by deductible and coinsurance).

- Multiply the percentage by the number of covered days in the stay.

A partial day resulting from this calculation is not charged as a full day if it is less than .5 of a day. It is charged as a full day if it is .5 or more. (See §3681C3 for utilization examples.)

Charge coinsurance days as follows:

- If the days resulting from the utilization calculation are fewer than the full days available for the stay, no coinsurance days are billed.

- If the days resulting from utilization the calculation are greater than the full days available for the stay, coinsurance days are billed for the excess days.

Where the sanatorium performs the utilization calculation above, perform the same calculation to verify that Items 25 and 61 (coinsurance) have been completed correctly. Advise the sanatorium of any discrepancies.

EXAMPLE 1:

A beneficiary has 17 full days available at the time of admission. The sanatorium inpatient stay was 20 days. The sanatorium bills 20 days in Item 27 (covered days) as if there were no other payer involved. After performing the calculation to determine utilization chargeable, it is determined that the beneficiary can be charged with 10 days. Therefore, no coinsurance days are billed. In the absence of another insurer's payment, 3 days would have been billed in Item 25 (coinsurance).

Enter in field 24 of the UNIBILL RECORD, 20 days.

EXAMPLE 2:

A beneficiary has 30 coinsurance days available at the time of admission. The sanatorium inpatient stay was 20 days. The sanatorium bills 20 days in Item 27 (covered days) as if there were no other payer involved. After performing the calculation to determine utilization chargeable, it is determined that the beneficiary can be charged with 10 days. Therefore, only 10 coinsurance days are billed. In the absence of another insurer's payment, 20 days would have been billed in Item 25 (coinsurance).

Enter in field 25 or 26 of the UNIBILL RECORD, 10 days. In addition, enter in field 24 of the UNIBILL RECORD, 20 days.

4. Special entries on the bill

The identifying information is shown in Items 57-75 on the first payer line. Value code 13, with the amount paid are shown in value codes (Items 46-49). Occurrence code 33 and the first month of the 12-month period is shown in Items 28-32. In addition, the address of the ESRD-EGHP is shown in Item 34 or remarks (Item 94).

5. Determining amount of primary payer payment that applies to Medicare covered services

The sanatorium indicates the primary payer's allocation of its payment between covered and noncovered Medicare services by entering the amount it paid toward Medicare covered services in value codes (Items 46-49). Where the sanatorium cannot determine the services covered by the primary payment, it applies a ratio of Medicare covered charges to total charges for the stay to the primary payment amount to determine the portion attributable to Medicare covered services and enters this amount in value codes (Items 46-49).

EXAMPLE: Total charges were $5,000. Medicare covered charges were $4,000. The ESRD-EGHP payment was $3,000. Since the sanatorium cannot determine the allocation of the primary payer's payment, it determines the allocation as follows:

$$\frac{\$4,000}{\$5,000} \times \$3,000 = \$2,400$$

The sanatorium shows $2,400 in value codes (Items 46-49).

6. Determining the amount of Medicare payment

The Medicare payment is the lower of:

- The current Medicare interim reimbursement (without regard to deductible or coinsurance) per §3683 minus the amount paid by the ESRD-EGHP for Medicare covered services;

or

- The current Medicare interim reimbursement (without regard to deductible or coinsurance) per §3683 minus any applicable deductible or coinsurance amount.

This is accomplished by the formulas in subsection C6.

For examples, see subsection C6.

7. UNIBILL entries

Enter in field 22 of the UNIBILL RECORD the days to be charged to the beneficiary's Medicare utilization record as determined in 3.

Enter in field 24 of the UNIBILL RECORD the covered days reported by the sanatorium in Item 23. This figure is used to validate the Medicare days shown on the cost report.

Enter in field 39 of the UNIBILL RECORD value code 13 to identify the primary payer.

Enter in field 40 of the UNIBILL RECORD the amount paid by the ESRD-EGHP for Medicare covered services that appears in value codes (Items 46-49). (For the PS&R, record the primary payment amount minus the amount in "Total Deductions").

I. HHA Bills - Full Payment by ESRD-EGHP.--If an ESRD-EGHP payment for Medicare covered services (as determined by the formula in subsection J3) equals or exceeds the HHA's charges for those services or the current Medicare interim reimbursement amount or the HHA accepts, or is obligated to accept, the ESRD-EGHP payment as payment in full, no payment is due from Medicare. The HHA does not submit a bill.

J. HHA Bills - Partial Payment by ESRD-EGHP.--If an ESRD-EGHP payment for Medicare covered services (as determined by the formula in 3) is less than the HHA's charges for those services and the current Medicare interim reimbursement amount and the HHA does not accept, and is not obligated to accept, the ESRD-EGHP payment as payment in full, process the bill in accordance with §3604 with the following modifications:

1. Determining charges and visits

The HHA shows in the charges and visits columns of the bill, Medicare covered charges and visits, including those covered by the ESRD-EGHP payment.

2. Special entries on the bill

The identifying information is shown in Items 57-75 on the first payer line. Value code 13, with the amount paid are shown in value codes (Items 46-49). Occurrence code 33 and the first month of the 12-month period are in Items 28-32. In addition, the address of the ESRD-EGHP is shown in Item 34 or remarks (Item 94).

3. Determining amount of primary payer payment that applies to Medicare covered services

The HHA indicates the primary payer's allocation of its payment between covered and noncovered Medicare services, by entering the amount it paid toward Medicare covered services in value codes (Items 46-49). Where the HHA cannot determine the services covered by the primary payment, it applies a ratio of Medicare covered charges to total charges for the services to the primary payment amount to determine the portion attributable to Medicare covered services and enters this amount in value codes (Items 46-49). The HHA must be able to validate its ratio of covered and noncovered charges if so requested.

EXAMPLE: Total charges were $550. Medicare covered charges were $500. The ESRD-EGHP payment was $330. Since the HHA cannot determine the allocation of the primary payer's payment, it determines the allocation as follows:

$$\frac{\$500}{\$550} \times \$330 = \$300$$

The HHA shows $300 in value codes (Items 46-49).

4. Determining the amount of Medicare payment.

Subtract the payment by the ESRD-EGHP for Medicare covered services from the current Medicare interim reimbursement amount.

EXAMPLE 1: Per Visit Method

A beneficiary received 10 visits for which the HHA's current Medicare interim reimbursement amount at $50 per visit interim rate was $500. The ESRD-EGHP paid $300 for Medicare covered services as determined in Item 3. As secondary payer Medicare pays:

- o The Medicare interim reimbursement minus the ESRD-EGHP payment for Medicare covered services: $500-$300 = $200. Medicare pays $200.

EXAMPLE 2: Percentage of Billed Charges Method

A beneficiary received 10 visits for which the HHA charged $50 per visit. The Medicare interim rate was 90 percent ($500 x 90 percent) which equaled $450. The ESRD-EGHP paid $300 for Medicare services as determined in Item 3. As secondary payer Medicare pays:

- o The Medicare interim reimbursement minus the ESRD-EGHP payment for Medicare covered services: $450-$300 = $150. Medicare pays $150.

5. UNIBILL entries

Enter in field 30 of the UNIBILL RECORD value code 13 to identify the primary payer.

Enter in field 31 of the UNIBILL RECORD the amount paid by the ESRD-EGHP for Medicare covered services that appear in value codes (Items 46-49).

K. ESRD-EGHP Denies Claim for Primary Benefits.--Pay primary Medicare benefits (if the beneficiary is not appealing the ESRD-EGHP denial) when an ESRD-EGHP denies a claim for primary benefits because:

o The beneficiary is not in a 12-month coordination period as defined in §§3490.5 and 3490.6;
o The beneficiary is not entitled to benefits under the plan;
o Benefits under the ESRD-EGHP are exhausted for the services involved; or
o The services are not covered by the ESRD-EGHP.

Where an ESRD-EGHP denies payment for any of these reasons, the provider shows occurrence code 24 (insurance denied) and the date of denial in Items 28-32 (occurrence codes). In addition, it provides the reason for the denial in Remarks (Item 94). Process these bills following normal billing procedures.

If an ESRD-EGHP denies a claim for primary benefits on the grounds that the services are not covered by the plan and you have reason to believe that the plan does cover the services or that the plan offers only secondary coverage of services covered by Medicare, do not pay Medicare benefits (primary or conditional). Deny the claim. The provider enters occurrence code 24 (insurance denied) and the date of denial in Items 28-32 (occurrence codes). In addition, it enters the annotation "Plan indicates services are not covered (and reason)" or "Plan offers only secondary coverage of services covered by Medicare" as appropriate in Remarks (Item 94). (See §§3490.4F and 3490.4G6 for action to take and §3722.4 for denial language.)

L. Conditional Payments.--If the beneficiary has appealed or is protesting the ESRD-EGHP's denial of the claim for any reason other than that it offers only secondary coverage of services covered by Medicare or because the time limit for filing the claim has expired (whether appealed or not) conditional primary Medicare benefits may be paid.

The provider requests conditional primary payment by entering value code 13 with zero value in Items (46-49) to indicate the type of other insurer and that conditional payment is requested. It also enters occurrence code 24 (insurance denied) and date of denial by the ESRD-EGHP in Items 28-32 (occurrence codes). The identity of the ESRD-EGHP is on line A of Item 57, the identifying information about the insured is on line A of Items 65-75, and the address of the ESRD-EGHP is in Item 34 or Remarks (Item 94). In addition, the annotation "Beneficiary has appealed or is protesting ESRD-EGHP denial" or "Time limit for filing the claim with the ESRD-EGHP has expired" as appropriate appears in Remarks (Item 94). (See §3490.4E for actions to take when making conditional primary payments.)

Process these bills following normal billing procedures. In addition, enter in the appropriate field of the UNIBILL RECORD value code 13 and zero value to indicate that a conditional payment was made. Show this code and zero value in fields 39 and 40 for inpatient bills, and in fields 30 and 31 for outpatient, HHA and other bills.

3682. BILLING PROCEDURES FOR WHERE MEDICARE BENEFITS ARE SECONDARY TO GROUP HEALTH PLANS FOR EMPLOYED BENEFICIARIES/SPOUSES AND THE DISABLED

A. General.—Medicare benefits are secondary to benefits payable under EGHPs for employed individuals age 65 or over and the spouses age 65 or over of employed individuals of any age. For items and services furnished from January 1, 1985 - April 30, 1986, Medicare was secondary payer for employed individuals age 65-69 and spouses age 65-69 of employed individuals of any age through 69. For items and services furnished from January 1, 1983 - December 31, 1984, Medicare was secondary payer for employed individuals age 65-69 and their spouses age 65-69. For an explanation of these provisions see §§3491-3491.18.

Effective for items and services provided on or after January 1, 1987 and before January 1, 1992, Medicare benefits are secondary to benefits payable under large group health plans (LGHPs), i.e., plans that have at least one employer of 100 or more employees for disabled beneficiaries under age 65. When this provision applies, providers enter value code 43 and the amount paid by the LGHP for Medicare covered services in Items 46-49. Process these bills as described below. This provision does not apply to beneficiaries entitled to benefits solely on the basis of ESRD.

NOTE: Whenever the term EGHP appears in this section, and in §§3683, 3685, 3688, 3694, and 3695, it applies to both the working aged and the disabled.

Payment made by the EGHP can be used to satisfy unmet deductibles and the individual's coinsurance. However, the portion of the stay paid by the EGHP is not charged to the beneficiary's Medicare utilization record.

Where Medicare is determined to be the primary payer, Medicare is shown on line A of Item 57. Where Medicare is secondary, Medicare is shown on line B. All bills where Medicare is not the primary payer because of EGHP coverage are prepared in accordance with the following instructions. In applying the guidelines, it may be necessary to determine the current Medicare interim reimbursement amount (without regard to deductible or coinsurance). See §3683 to determine this amount.

When processing current claims in which you are first aware of EGHP coverage, consider the possibility of prior incorrect payments. See §3491.6 if such a prior claim is identified.

B. Inpatient Bills - Full Payment by EGHP.—If an EGHP payment for Medicare covered services (as determined by the formula in subsection C5) equals or exceeds the provider's charges for those services or the current Medicare interim reimbursement amount (without regard to deductible or coinsurance) or the provider accepts, or is obligated to accept, the EGHP payment as payment in full, no payment is due from Medicare and no utilization charged to the beneficiary. However, the provider submits a bill for determining the benefit period. In addition, EGHP payments can be used to satisfy unmet deductibles. Process the bill in accordance with §3604 with the following modifications:

- The provider completes the total and noncovered charges columns as if there had been no other payment.

Where blood is involved, the provider completes the blood items. (This data is for the beneficiary's utilization records only and is not to be used for the PS&R report.)

The provider does not complete coinsurance (no days are charged). However, inpatient deductible and total deductions are completed when applicable. (This data is for the beneficiary's utilization records only and is not to be used for the PS&R report.)

The provider shows total covered and noncovered days in the usual manner. Count days paid by the EGHP as covered days.

The provider enters the amount paid by the EGHP for Medicare covered services in value codes (Items 46-49).

The provider enters condition code 77 in Items 35-39 when it accepts, or is obligated to accept, the EGHP payment as payment in full.

- Do not complete the nonpayment code.

Enter in field 22 of the UNIBILL RECORD the days you determine to be charged to the beneficiary's Medicare utilization record. This figure should be zero.

Enter in field 24 of the UNIBILL RECORD zero days.

Enter in field 39 of the UNIBILL RECORD value code 12 or 43 to identify the primary payer.

Enter in field 40 of the UNIBILL RECORD the amount Medicare would have paid in the absence of the EGHP's payment. (Do not record this amount on the PS&R report.)

Do not record days or charges on the PS&R report.

Submit the bill to HCFA in the format described in §3876. CO uses data reported in the blood deductible and inpatient deductible items to update deductibles. (This data is not to be used for the PS&R report.)

C. Inpatient Bills - Partial Payment by EGHP.--If an EGHP payment for Medicare covered services (as determined by the formula in 5) is less than the provider's charges for those services and the current Medicare interim reimbursement amount (without regard to deductible or coinsurance) and the provider does not accept, and is not obligated to accept, the EGHP payment as payment in full, process the bill in accordance with §3604 with the following modifications:

- o Determining covered and noncovered charges

The provider completes the total and noncovered charges columns as if there had been no other payment.

- o Determining covered and noncovered days

The provider shows total covered and noncovered days in the usual manner. Count days paid by the EGHP as covered days.

Calculate the days to be charged to the beneficiary as determined in 3 below and report this result in the appropriate field of the UNIBILL RECORD as described in 7 below.

3. Determining utilization and coinsurance

Where an EGHP pays an amount for Medicare covered services that is equal to, or less than, the deductible and coinsurance that would apply if Medicare was the primary payer, utilization is not reduced. Therefore, coinsurance is calculated in the usual manner. (See C6, example 4.)

Where an EGHP pays an amount for Medicare covered services that is more than the deductible and coinsurance that would apply if Medicare was primary payer, follow the procedures below to determine utilization and coinsurance.

Where the stay involves coinsurance days, determine utilization chargeable to the beneficiary if the provider cannot. Complete Items 25 and 61 (coinsurance) accordingly. No adjustment to Item 23 (covered days) is made based on this determination. The provider completes Item 23 or 28 in the usual manner.

Charge utilization as follows:

- o Subtract the EGHP payment that applies to Medicare covered services as determined under subsection 5 from the Medicare interim reimbursement for the stay (unreduced by deductible and coinsurance). This yields the Medicare secondary payment.

- o Divide this amount by the amount Medicare would have paid as primary payer (i.e., the Medicare interim reimbursement for the stay reduced by deductible and coinsurance).

- o Multiply this percentage by the number of covered days in the stay.

A partial day resulting from this calculation is not charged as a full day if it is less than .5 of a day. It is charged as a full day if it is .5 or more.

EXAMPLE I: Deductible Involved

An individual was hospitalized 15 days, for which the total charges were $5,000. The EGHP paid $2,400 for Medicare covered services. No part of the Medicare inpatient deductible of $520 had been met. The current Medicare interim reimbursement amount (without regard to deductible or coinsurance) for the services in absence of the EGHP payment would have been $3,600. This amount minus the EGHP payment is $1,200 ($3,600 - $2,400). Medicare would have paid $3,080 as primary payer ($3,600 - $520). Calculate the beneficiary's utilization as follows: $1,200 divided by $3,080 = .389 x 15 days = 5.84 or 6 days when rounded.

EXAMPLE II: Coinsurance Involved

An individual was hospitalized for 20 days (all of which are LTR days) for which total charges were $12,000. The EGHP paid $6,000 for Medicare covered services. The applicable coinsurance amount was $5,200. The current Medicare interim reimbursement amount (without regard to deductible or coinsurance) for the services in absence of the EGHP payment would have been $10,000. The Medicare secondary payment amount is $4,000 (the current Medicare interim reimbursement amount of $10,000 minus the EGHP payment of $6,000). Medicare would have paid $4,800 as primary payer ($10,000 - $5,200). Calculate the beneficiary's utilization as follows: $4,000 divided by $4,800 = .833 x 20 days = 16.6 or 17 days when rounded. If the EGHP payment in this example had been $5,200 or less, utilization would not be reduced. The beneficiary would have been charged with 20 days utilization.

Use this formula even when the EGHP only pays for a specified number of days of a stay because of a payment limitation under the plan on the number of benefit days available. For example, a provider furnished 20 days of inpatient care. An EGHP paid all of the charges for the first 10 days. These charges were $4,500. No part of the Medicare inpatient deductible of $520 had been met. The current Medicare interim reimbursement (without regard to deductible or coinsurance) which Medicare would have paid for the 20 day stay in the absence of EGHP coverage was $7,000. That amount minus the EGHP payment was $2,500 ($7,000 - $4,500). Medicare would have paid $6,480 as primary payer ($7,000 - $520). The utilization charged to the beneficiary is calculated as follows: $2,500 divided by $6,480 = .385 X 20 days = 7.71 days or 8 days when rounded.

Charge coinsurance days as follows:

- o If the days resulting from the utilization calculation are fewer than the full days available for the stay, no coinsurance days are billed.

- o If the days resulting from the utilization calculation are greater than the full days available for the stay, coinsurance days are billed for the excess days.

Where the provider performs the utilization calculation above, perform the same calculation to verify that Items 25 and 61 (coinsurance) have been completed correctly. Advise the provider of any discrepancies.

EXAMPLE 1:

A beneficiary has 17 full days available at the time of admission. The hospital stay was 20 days. The provider bills 20 days in covered days as if there were no other payer involved. After performing the calculation to determine utilization chargeable, it is determined that the beneficiary can be charged with 10 days. Therefore, no coinsurance days are billed. In the absence of another insurer's payment, 3 days would have been billed in Item 25 (coinsurance).

Enter in field 24 of the UNIBILL RECORD, 20 days.

EXAMPLE 2:

A beneficiary has 30 coinsurance days available at the time of admission. The hospital stay was 20 days. The provider bills 20 days in covered days as if there were no other payer involved. After performing the calculation to determine utilization chargeable, it is determined that the beneficiary can be charged with 10 days. Therefore, only 10 coinsurance days are billed. In the absence of another insurer's payment, 20 days would have been billed in Item 25 (coinsurance).

Enter in field 25 or 26 of the UNIBILL RECORD, 10 days. In addition, enter in field 24 of the UNIBILL RECORD, 20 days.

4. Special entries on the bill

The identifying information is shown in Items 57-75 on the first payer line. Value code 12 or 43, with the amount paid are shown in value codes (Items 46-49). The address of the EGHP is shown in Item 34 or remarks (Item 94).

5. Determining amount of primary payer payment that applies to Medicare covered services

The provider indicates the primary payer's allocation of its payment between covered and noncovered Medicare services by entering the amount paid by the primary payer toward Medicare covered services in value codes (Items 46-49). Where the provider cannot determine the services covered by the primary payment, it applies a ratio of Medicare covered charges to total charges for the stay to the primary payment amount to determine the portion attributable to Medicare covered services and enters this amount in value codes (Items 46-49).

EXAMPLE: Total charges were $5,000. Medicare covered charges were $4,000. The EGHP payment was $3,000. Since the provider cannot determine the allocation of the primary payer's payment, it determines the allocation as follows:

$$\frac{\$4,000}{\$5,000} \times \$3,000 = \$2,400$$

The provider shows $2,400 in value codes (Items 46-49).

6. Determining the amount of Medicare payment

The amount of Medicare payment is the lower of:

- The current Medicare interim reimbursement (without regard to deductible or coinsurance) per §3683 minus the amount paid by the EGHP for Medicare covered services;

or

- The current Medicare interim reimbursement (without regard to deductible or coinsurance) per §3683 minus any applicable deductible or coinsurance amount.

This is accomplished by applying the following formulas:

Per Diem Reimbursement - Covered days times per diem rate minus the larger of:

- Total Deductions (the sum of Items 60-61);

or

- Amount paid by EGHP for Medicare covered services (amount shown in value codes, Items 46-49).

Periodic Interim Payment (PIP) - Covered days times the gross per diem as determined in §3683 minus the larger of:

- Total Deductions (the sum of Items 60-61);

or

- Amount paid by EGHP for Medicare covered services (amount shown in value codes, Items 46-49).

Percentage of Charge - Total charges (sum of covered and noncovered) identified by revenue code 001 less any Medicare noncovered charges times the percentage of charges, minus the larger of:

- Total Deductions (the sum of Items 60-61);

or

- Amount paid by EGHP for Medicare covered services (amount shown in value codes, Items 46-49).

EXAMPLE 1: Per Diem or PIP Reimbursement Method

Inpatient care was furnished for 8 covered days to a Medicare beneficiary whose EGHP was primary payer. The covered charges were $4,000. The EGHP paid $2,400 for Medicare covered services as determined in Item 5. No part of the Medicare inpatient deductible of $520 had been met previously. The Medicare interim reimbursement (without regard to deductible or coinsurance) at $450 a day (8 x $450) would be $3,600. As secondary payer Medicare pays the lower of:

- The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the EGHP payment: $3,600-$2,400 = $1,200.

- The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the inpatient deductible: $3,600-$520 = $3,080.

Medicare pays $1,200. The provider cannot charge the beneficiary since the $520 inpatient deductible was satisfied by the EGHP payment.

EXAMPLE 2: Percentage of Charge Method

Inpatient care was furnished to a Medicare beneficiary whose EGHP was primary payer. The covered charges were $4,000. The EGHP paid $2,400 for Medicare covered services as determined in Item 5. No part of the Medicare inpatient deductible of $520 had been met previously. The Medicare interim reimbursement (without regard to deductible or coinsurance) at 90 percent of charges ($4,000 x 90 percent) would be $3,600. As secondary payer Medicare pays the lower of:

- The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the EGHP payment: $3,600-$2,400 = $1,200.

- The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the inpatient deductible: $3,600-$520 = $3,080.

Medicare pays $1,200. The provider cannot charge the beneficiary since the $520 inpatient deductible was satisfied by the EGHP payment.

EXAMPLE 3:

Same facts as in Example (2) above except the EGHP payment for Medicare covered services is $300.

As secondary payer Medicare pays the lower of:

- The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the EGHP payment: $3,600 - $300 = $3,300.

- The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the inpatient deductible: $3,600 - $520 = $3,080.

Medicare pays $3,080. The beneficiary's liability is $220 (the amount the provider can charge the beneficiary). The beneficiary's $520 inpatient deductible is satisfied: $300 by the EGHP payment and $220 by the beneficiary.

EXAMPLE 4:

Same facts as in Example (2) except the deductible has previously been met, the beneficiary was hospitalized for 20 days and only coinsurance days are available.

As secondary payer Medicare pays the lower of:

- The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the EGHP payment: $3,600 - $2,400 = $1,200.

- The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the applicable coinsurance: $3,600 - $2,600 (20 coinsurance days at $130 per day) = $1,000.

Medicare pays $1,000. Since the EGHP payment ($2,400) is less than the coinsurance ($2,600), utilization is not reduced and coinsurance is determined in the usual manner. Therefore, the beneficiary's liability is $200 (the $2,600 coinsurance minus the EGHP payment of $2,400).

7. UNIBILL entries

Enter in field 22 of the UNIBILL RECORD the days to be charged to the beneficiary's Medicare utilization record as determined in 3.

Enter in field 24 of the UNIBILL RECORD the covered days reported by the provider in Item 23. This figure is used to validate the Medicare days shown in the cost report.

Enter in field 39 of the UNIBILL RECORD value code 12 or 43 to identify the primary payer.

Enter in field 40 of the UNIBILL RECORD the amount paid by the EGHP for Medicare covered services that appears in value codes (Items 46-49). (For the PS&R report, record the primary payment amount minus the amount in "Total Deductions".)

D. Part B Inpatient Services.—These provisions apply for ancillary services for individuals who have exhausted their Part A benefits. Handle billing as described in subsections E and F. If Part A benefits are exhausted during the inpatient stay, the Part B billing should not be prepared until the effect of the primary payment on Part A utilization is determined.

E. Outpatient Bills - Full Payment by EGHP.—If an EGHP payment for Medicare covered services (as determined by the formula in subsection F3) equals or exceeds the provider's charges for those services or the current Medicare interim reimbursement amount (without regard to deductible or coinsurance) or the provider accepts, or is obligated to accept, the EGHP payment as payment in full, and the provider knows the individual has already met his deductible, no bill is submitted. However, a bill is submitted to inform you of charges where the deductible may not yet be met. Although no payment can be made by Medicare, the expenses can be applied to the beneficiary's deductible. The provider completes the bill in the usual manner. In addition:

o The provider determines the charges as usual, including those covered by the EGHP's payment.

The provider enters the amount paid by the EGHP for Medicare covered services in value codes (Items 46-49).

The provider enters condition code 77 in Items 35-39 when it accepts, or is obligated to accept, the EGHP payment as payment in full.

o Treat the charges shown in total charges as noncovered for reimbursement purposes.

Query to update the deductible but the bill need not be processed any further except to discontinue systems controls in internal operations. (The deductible should not be used for the PS&R report.)

F. Outpatient Bills - Partial Payment by EGHP.—If an EGHP payment for Medicare covered services (as determined by the formula in 3) is less than the provider's charges for those services and the current Medicare interim reimbursement amount (without regard to deductible or coinsurance) and the provider does not accept, and is not obligated to accept, the EGHP payment as payment in full, process the bill in accordance with §3604 with the following modifications:

1. Determining covered charges

The provider shows in the covered charges column, Medicare covered charges, including those covered by the EGHP's payment.

2. Special entries on the bill

The identifying information is shown in Items 57-75 on the first payer line. Value code 12 or 43, with the amount paid are shown in value codes (Items 46-49), and the address of the EGHP is shown in Item 34 or remarks (Item 94).

3. Determining amount of primary payer payment that applies to Medicare covered services

The provider indicates the primary payer's allocation of its payment between covered and noncovered Medicare services, by entering the amount it paid toward Medicare covered services in value codes (Items 46-49). Where the provider cannot determine the services covered by the primary payment, it applies a ratio of Medicare covered charges to total charges for the services to the primary payment amount to determine the portion attributable to Medicare covered services and enters this amount in value codes (Items 46-49). The provider must be able to validate its ratio of covered and noncovered charges if so requested.

EXAMPLE:

Total charges were $110. Medicare covered charges were $90. The EGHP payment was $88. Since the provider cannot determine the allocation of the primary payer's payment, it determines the allocation as follows:

$$\frac{\$90}{\$110} \times \$88 = \$72$$

The provider shows $72 in value codes (Items 46-49).

4. Determining the amount of Medicare payment

The Medicare payment is the lower of:

- The current Medicare interim reimbursement (without regard to deductible or coinsurance) per §3683 minus the amount paid by the EGHP for Medicare covered services;

or

- The current Medicare interim reimbursement (without regard to deductible or coinsurance) per §3683 minus any applicable deductible or coinsurance amount.

That portion of the total charges equal to the EGHP payment is credited toward any unmet deductible. Include this amount in any query to update the deductible.

EXAMPLE 1: EGHP payment is less than unmet deductible

Outpatient services were furnished to a Medicare beneficiary for which covered charges were $90. No part of the beneficiary's $75 Part B deductible had been met previously. The EGHP paid $72 for Medicare covered services as determined in Item 3 above. The Medicare interim reimbursement (without regard to deductible or coinsurance) for these services at 90 percent of charges (the provider's interim rate) would be $81. As secondary payer, Medicare pays the lower of:

o The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the EGHP payment: $81-$72 = $9.

o The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the applicable deductible and coinsurance: $81-$75-$3* = $3.

*The coinsurance is calculated as follows:

o $90 charges - $75 deductible = $15 x 20 percent = $3 coinsurance.

Medicare pays $3. The beneficiary's liability is $6 ($3 of the deductible and the $3 coinsurance). The beneficiary's $75 deductible is satisfied: $72 by the EGHP payment and $3 by the beneficiary. (For the PS&R, record $75 deductible and $3 coinsurance.)

EXAMPLE 2: EGHP payment is more than unmet deductible

Same facts as in Example (1) except the EGHP's payment for Medicare covered services is $80.

As secondary payer Medicare pays the lower of:

o The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the EGHP payment: $81-$80 = $1.

o The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the applicable deductible and coinsurance: $81-$75-$3* = $3.

*See Example (1) for coinsurance calculation.

Medicare pays $1. The provider may not charge the beneficiary since the deductible and coinsurance were met by the EGHP payment. (For the PS&R, record $75 deductible, $3 coinsurance, and $2 primary payment.)

EXAMPLE 3: EGHP payment equals unmet deductible

Same facts as in Example (1) except the EGHP's payment for Medicare covered services is $75.

As secondary payer Medicare pays the lower of:

- The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the EGHP payment: \$81-\$75 = \$6.

- The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the applicable deductible and coinsurance: \$81-\$75-\$3* = \$3.

*See Example (1) for coinsurance calculation.

Medicare pays \$3. The provider may bill the beneficiary \$3 for coinsurance. The \$75 deductible is satisfied by the EGHP payment. (For the PS&R report, record \$75 deductible and \$3 coinsurance.)

EXAMPLE 4: Deductible met prior to EGHP payment

Same facts as in Example (1) except the deductible has been met previously.

As secondary payer Medicare pays the lower of:

- The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the EGHP payment: \$81-\$72 = \$9.

- The Medicare interim reimbursement (without regard to deductible or coinsurance) minus the applicable deductible and coinsurance: \$81-\$18* = \$63.

*The coinsurance is calculated as follows:

\$90 charges x 20 percent = \$18 coinsurance.

Medicare pays \$9. The hospital may not charge the beneficiary since the coinsurance is paid by the EGHP payment. (For the PS&R report, record \$18 coinsurance and \$54 primary payment.)

5. UNIBILL entries

Enter in field 30 of the UNIBILL RECORD value code 12 or 43 to identify the primary payer.

Enter in field 31 of the UNIBILL RECORD the amount paid by the EGHP for Medicare covered services that appears in value codes (Items 46-49).

G. Christian Science Sanatorium Bills - Full Payment by EGHP.--If an EGHP payment for Medicare covered services (as determined by the formula in subsection H5) equals or exceeds the sanatorium's charges for those services or the current Medicare interim reimbursement amount (without regard to deductible and coinsurance) or the sanatorium accepts, or is obligated to accept, the EGHP payment as payment in full, no payment is due from Medicare and no utilization will be charged to the beneficiary. However, the sanatorium submits a bill for determining the benefit period. In addition, EGHP payments can be used to satisfy unmet deductibles. Process the bill in accordance with §3604 with the following modifications:

- The sanatorium completes the total and noncovered charges columns as if there had been no other payment.

The sanatorium does not complete coinsurance (no days are charged). However, inpatient deductible and total deductions are completed when applicable. (This data is for the beneficiary's utilization records only and is not to be used for the PS&R report.)

The sanatorium shows total covered and noncovered days in the usual manner. Count days paid by the EGHP as covered days.

The sanatorium enters the amount paid by the EGHP for Medicare covered services in value codes (Items 46-49).

The sanatorium enters condition code 77 in Items 35-39 when it accepts, or is obligated to accept, the EGPH payment as payment in full.

- Do not complete the nonpayment code.

Enter in field 22 of the UNIBILL RECORD the days you determine to be charged to the beneficiary's Medicare utilization record. This figure should be zero.

Enter in field 24 of the UNIBILL RECORD zero days.

Enter in field 39 of the UNIBILL RECORD value code 12 or 43 to identify the primary payer.

Enter in field 40 of the UNIBILL RECORD the amount Medicare would have paid in the absence of the EGHP's payment. (Do not record this amount on the PS&R report.)

Do not record days or charges on the PS&R report.

Submit the bill to HCFA in the format described in §3876. CO uses data reported in inpatient deductible to update the deductible. (This data is not to be used for the PS&R report.)

H. Christian Science Sanatorium Bills - Partial Payment by EGHP.—If an EGHP payment for Medicare covered services (as determined by the formula in 5) is less than the sanatorium's charges for those services and the current Medicare interim reimbursement amount (without regard to deductible and coinsurance) and the sanatorium does not accept, and is not obligated to accept, the EGHP payment as payment in full, process the bill in accordance with §3604 with the following modifications:

1. Determining covered and noncovered charges

The sanatorium completes the total and noncovered charges columns as if there had been no other payment.

2. Determining covered and noncovered days

The sanatorium shows total covered and noncovered days in the usual manner. Count days paid by the EGHP as covered days.

Calculate the days to be charged to the beneficiary as determined in 3 below and report this result in the appropriate field of the UNIBILL RECORD as described in 7 below.

3. Determining utilization and coinsurance

Where an EGHP pays an amount for Medicare covered services that is equal to, or less than, the deductible and coinsurance that would apply if Medicare was the primary payer, utilization is not reduced. Therefore, coinsurance is calculated in the usual manner. (See subsection C6, example 4.)

Where an EGHP pays an amount for Medicare covered services that is more than the deductible and coinsurance that would apply if Medicare was the primary payer, follow the procedures below to determine utilization and coinsurance.

Where the stay involves coinsurance days, determine utilization chargeable to the beneficiary, if the sanatorium cannot. Complete Items 25 and 61 (coinsurance) accordingly. No adjustment to Item 23 (covered days) is made based upon this determination. The sanatorium completes Item 23 in the usual manner.

Charge utilization as follows:

- o Subtract the EGHP payment that applies to Medicare covered services as determined under 5 from the Medicare interim reimbursement for the stay (unreduced by deductible and coinsurance). This yields the Medicare secondary payment.

- o Divide this amount by the amount in Medicare would have paid as primary payer (i.e., the Medicare interim reimbursement for the stay reduced by deductible and coinsurance.)

- o Multiply the percentage by the number of covered days in the stay.

A partial day resulting from this calculation is not charged as a full day if it is less than .5 of a day. It is charged as a full day if it is .5 or more. (See §3682C3 for utilization examples.)

Charge coinsurance days as follows:

- o If the days resulting from the utilization calculation are fewer than the full days available for the stay, no coinsurance days are billed.

- o If the days resulting from the utilization calculation are greater than the full days available for the stay, coinsurance days are billed for the excess days.

Where the sanatorium performs the utilization calculation above, perform the same calculation to verify that Items 25 and 51 (coinsurance) have been completed correctly. Advise the sanatorium of any discrepancies.

EXAMPLE 1:

A beneficiary has 17 full days available at the time of admission. The sanatorium inpatient stay was 20 days. The sanatorium bills 20 days in Item 27 (covered days) as if there were no other payer involved. After performing the calculation to determine utilization chargeable, it is determined that the beneficiary can be charged with 10 days. Therefore, no coinsurance days are billed. In the absence of another insurer's payment, 3 days would have been billed in Item 25 (coinsurance).

Enter in field 24 of the UNIBILL RECORD, 20 days.

EXAMPLE 2:

A beneficiary has 30 coinsurance days available at the time of admission. The sanatorium inpatient stay was 20 days. The sanatorium bills 20 days in Item 27 (covered days) as if there were no other payer involved. After performing the calculation to determine utilization chargeable, it is determined that the beneficiary can be charged with 10 days. Therefore, only 10 coinsurance days are billed. In the absence of another insurer's payment 20 days would have been billed in Item 25 (coinsurance).

Enter in field 25 or 26 of the UNIBILL RECORD, 10 days. In addition, enter in field 24 of the UNIBILL RECORD, 20 days.

4. Special entries on the bill

The identifying information is shown in Items 57-75 on the first payer line. Value code 12 or 43, with the amount paid are shown in value codes (Items 46-49). The address of the EGHP is shown in Item 34 or remarks (Items 94).

5. Determining amount of primary payer payment that applies to Medicare covered services

The sanatorium indicates the primary payer's allocation of its payment between covered and noncovered services, by entering the amount paid by the primary payer toward Medicare covered services in value codes (Items 46-49). Where the sanatorium cannot determine the services covered by the primary payment, it applies a ratio of Medicare covered charges to total charges for the stay to the primary payment amount to determine the portion attributable to Medicare covered services and enters this amount in value codes (Items 46-49).

EXAMPLE: Total charges were $5,000. Medicare covered charges were $4,000. The EGHP payment was $3,000. Since the sanatorium cannot determine the allocation of the primary payer's payment, it determines the allocation as follows:

$$\frac{\$4,000}{\$5,000} \times \$3,000 = \$2,400$$

The sanatorium shows $2,400 in value codes (Items 46-49).

6. Determining the amount of Medicare payment

The Medicare payment is the lower of:

o The current Medicare interim reimbursement (without regard to deductible and coinsurance amounts) per §3683 minus the amount paid by the EGHP for Medicare covered services;

or

o The current Medicare interim reimbursement (without regard to deductible and coinsurance) per §3683 minus any applicable deductible and coinsurance amount.

This is accomplished by applying the formulas in subsection C6.

For examples, see subsection C6.

7. UNIBILL entries

Enter in field 22 of the UNIBILL RECORD the days to be charged to the beneficiary's Medicare utilization record as determined in 3.

Enter in field 24 of the UNIBILL RECORD the covered days reported by the sanatorium in Item 23. This figure is used to validate the Medicare days shown on the cost report.

Enter in field 39 of the UNIBILL RECORD value code 12 or 43 to identify the primary payer.

Enter in field 40 of the UNIBILL RECORD the amount paid by the EGHP for Medicare covered services that appears in value codes (Items 46-49). (For the PS&R, record the primary payment amount minus the amount in "Total Deductions.")

I. HHA Bills - Full Payment by EGHP.—If the EGHP payment for Medicare covered services (as determined by the formula in subsection J3) equals or exceeds the HHA's charges for those services or the current Medicare interim reimbursement amount or the HHA accepts, or is obligated to accept, the EGHP payment as payment in full, no payment is due from Medicare. The HHA does not submit a bill.

J. HHA Bills - Partial Payment by EGHP.—If an EGHP payment for Medicare covered services (as determined by the formula in 3) is less than the HHA's charges for those services and the current Medicare interim reimbursement amount and the HHA does not accept, and is not obligated to accept, the EGHP payment as payment in full, process the bill in accordance with §3604 with the following modifications:

1. Determining charges and visits

The HHA shows in the charges and visits columns of the bill Medicare covered charges and visits including those covered by the EGHP payment.

2. Special entries on the bill

The identifying information is shown in Items 57-75 on the first payer line. Value code 12 or 43, with the amount paid are shown in value codes (Items 46-49). The address of the EGHP is shown in Item 34 or remarks (Item 94).

3. Determining amount of primary payer payment that applies to Medicare covered services

The HHA indicates the primary payer's allocation of its payment between covered and noncovered Medicare services, by entering the amount it paid toward Medicare covered services in value codes (Items 46-49). Where the HHA cannot determine the services covered by the primary payer, it applies a ratio of Medicare covered charges to total charges for the services to the primary payment amount to determine the portion attributable to Medicare covered services and enters this amount in value codes (Items 46-49). The HHA must be able to validate its ratio of covered and noncovered charges if so requested.

EXAMPLE: Total charges were $550. Medicare covered charges were $500. The EGHP payment was $330. Since the HHA cannot determine the allocation of the primary payer's payment, it determines the allocation as follows:

$$\frac{\$500}{\$550} \times \$330 = \$300$$

The HHA shows $300 in value codes (Items 46-49).

4. Determining amount of Medicare payment

Subtract the payment by the EGHP for Medicare covered services from the current Medicare interim reimbursement amount.

EXAMPLE 1: Per Visit Method

A beneficiary received 10 visits for which the HHA's current Medicare interim reimbursement amount at $50 per visit interim rate was $500. The EGHP paid $300 for Medicare covered services as determined in Item 3 above. As secondary payer Medicare pays the following:

The Medicare interim reimbursement minus the EGHP payment for Medicare covered services: $500-$300 = $200. Medicare pays $200 as secondary payer.

EXAMPLE 2: Percentage of Billed Charges Method

A beneficiary received 10 visits for which the HHA charged $50 per visit. The interim rate was 90 percent ($500 x 90 percent) which equaled $450. The EGHP paid $300 for Medicare covered services as determined in Item 3. As secondary payer Medicare pays the following:

The Medicare interim reimbursement minus the EGHP payment for Medicare covered services: $450-$300 = $150. Medicare pays $150.

5. UNIBILL entries

Enter in field 30 of the UNIBILL RECORD value code 12 or 43 to identify the primary payer.

Enter in field 31 of the UNIBILL RECORD the amount paid by the EGHP for Medicare covered services that appears in value codes (Items 46-49).

K. EGHP Denies Claim for Primary Benefits.--Pay primary Medicare benefits (if the beneficiary is not appealing the EGHP denial) when an EGHP denies a claim for primary benefits because:

- o The employer does not employ 20 or more employees;
- o The beneficiary is not entitled to benefits under the plan;
- o Benefits under the EGHP are exhausted for the services involved; or
- o The services are not covered by the EGHP.

Where an EGHP denies payment for any of these reasons, the provider shows occurrence code 24 (insurance denied) and the date of denial in Items 28-32 (occurrence codes). In addition, it provides the reason for the denial in remarks (Item 94). Process these bills following normal billing procedures. (See §3491.11A.)

If an EGHP denies a claim for primary benefits because the plan offers only secondary coverage of services covered by Medicare and it does not allege that the employer has fewer than 20 employees, Medicare benefits may not be paid (primary or conditional). Deny the claim unless the EGHP or provider alleges that the employer has fewer than 20 employees. The provider enters occurrence code 24 (insurance denied) and the date of denial in Items 28-32 (occurrence codes). In addition, it enters the annotation "Plan offers secondary coverage of services covered by Medicare." (See §3491.11C for actions to take and §3722.4 for denial language.) If the provider indicates that the employer has fewer than 20 employees, pay primary Medicare benefits. The provider enters the annotation "Plan offers only secondary coverage of services covered by Medicare/EGHP has fewer than 20 employees" in remarks "Item 94" to avoid development of the claim by you.

L. Conditional Payments.--If the beneficiary has appealed or is protesting the EGHP denial of the claim for any reason other than that the EGHP offers only secondary coverage of services covered by Medicare or because the time limit for filing the claim with it has expired (whether appealed or not) conditional primary Medicare benefits may be paid.

The provider requests conditional primary payment by entering value code 12 with zero value in Items (46-49) to indicate the type of other insurer and that conditional payment is requested. It also enters occurrence code 24 (insurance denied) and date of denial by the EGHP in Items 28-32 (occurrence codes). The identity of the EGHP is on line A of Item 57, the identifying information about the insured is on line A of Items 65-75, and the address of the EGHP is in Item 34 or remarks (Item 94). In addition, the annotation "Beneficiary has appealed or is protesting EGHP denial" or "Time limit for filing the claim with the EGHP has expired" as appropriate appears in remarks (Item 94). (See §3491.11B, for actions to take when making conditional primary payments.)

Process these bills following normal billing procedures. In addition, enter in the appropriate field of the UNIBILL RECORD value code 12 and zero value to indicate that a conditional payment was made. Show this code and zero value in fields 39 and 40 for inpatient and Christian Science Sanatorium bills, and in fields 30 and 31 for outpatient, HHA and other bills.

3683. HOW TO DETERMINE CURRENT MEDICARE INTERIM REIMBURSEMENT AMOUNT

When the procedure requires determining the current Medicare interim reimbursement amount, use the following guidelines before adjustment for the other insurance payment:

- Per diem (per visit) reimbursement - Multiply the per diem (per visit) interim rate times the number of covered days (visits). Do not make any reduction for deductible or coinsurance.

- Percentage of billed charges - Multiply the current percentage of charges used for the interim rate by the total covered charges. Do not make any reduction for deductible or coinsurance.

- Periodic Interim Payments (PIP) - Determine a gross per diem or per visit (without reduction for deductibles or coinsurance) based on the provider's current PIP amount (See HCFA-PUB 15-1 §2407). Multiply this amount by the number of covered days (visits).

Use the above per diem (per visit) or percentage of billed charges rate in calculating Medicare liability for prior year claims processed in the current year.

Providers also use these guidelines. Therefore, inform providers of the applicable per diem (per visit) or percentage rates and of any changes.

For providers not on PIP, a provider's interim reimbursement on a bill-by-bill basis will be eliminated or reduced. (See §§3679, 3680, 3681, and 3682.)

For providers on PIP, a reduction in interim reimbursement received through PIP is necessary. Where Medicare is determined not to have any liability, reduce the PIP amount to reflect that no interim reimbursement is due. Where Medicare is determined to be secondarily liable and the primary payer is an insurer addressed in §3679 or §3680 reduce the PIP amount to reflect the primary payment. Where Medicare is determined to be secondarily liable and the primary payer is an EGHP as addressed in §3681 or §3682, reduce the PIP amount to reflect any excess of the primary payment over the applicable deductible and coinsurance.

Accomplish any reduction in the PIP amount by offset against the next payment or by taking estimated deductions into account in establishing the PIP amount.

NOTE: No reduction is made to the PIP amount with regard to conditional payments since in these situations payment is made, although conditionally, as if Medicare were fully liable for the stay.

3684. BENEFITS EXHAUSTED SITUATIONS WHEN MEDICARE IS SECONDARY PAYER FOR COST REIMBURSMENT PROVIDERS

If Medicare has secondary liability for an inpatient stay, services that would otherwise not be covered because the beneficiary had exhausted benefits may be covered after the impact of the primary payment on utilization is determined. Since the primary payment extends the covered portion of the beneficiary's stay, the primary payment effects Medicare covered charges in benefits exhausted situations. At the same time, the ratio of Medicare covered charges to total charges determines the portion of the primary payment that is allocated to Medicare covered services. The primary payment's effect on Medicare covered services must be considered before allocating the primary payment.

To determine Medicare covered charges in benefits exhausted situations in other than a PPS hospital, proceed as in the example below. For PPS hospitals, see §3685.

EXAMPLE

Facts:

Total Charges	$ 5,000
Medicare Covered Charges (without regard to benefits exhausted)	$ 4,500
Medicare Covered Charges for Day 1-7	$ 3,000
Primary Payment (unallocated)	$ 3,000
Remaining Benefit Days	3
Covered Medicare Days (without regard to benefits exhausted)	10
Currrent Medicare Per Diem Interim Reimbursement Rate	$ 480

Steps:

Determine what the current Medicare interim reimbursement would be if benefits were not exhausted (and no primary payments were involved).

EXAMPLE: $480 X 10 days = $4,800

Determine the amount of the primary payment that would apply to Medicare services if benefits were not exhausted.

- o If the primary payer's allocation can be determined, use it.

  EXAMPLE: Not applicable

- o If the primary payer's allocation cannot be determined, apply a ratio of Medicare covered charges (without regard to benefits exhausted) to total charges for the stay to the total primary payment to determine the portion that would be attributable to Medicare.

EXAMPLE: $\frac{\$4,500}{\$5,000} \times \$3,000 = \$2,700$

Determine the Medicare secondary payment that would be made in the absence of benefits exhausted (without regard to deductible or coinsurance) by subtracting Step 2 from Step 1.

EXAMPLE: $4,800 - $2,700 = $2,100

Determine the benefit days that would be chargeable absent benefits exhausted by applying a ratio of Step 3 to Step 1 to the number of Medicare covered days without regard to benefits exhausted.

EXAMPLE: $\frac{\$2,100}{\$4,800} \times 10 = 4.375$

Determine the number of days for which benefits are actually available.

EXAMPLE: 3 days

If the number of days in Step 5 is greater than the number of days in Step 4, the primary payment extends Medicare coverage over the entire stay. The case no longer involves benefits exhaustion. All otherwise covered days and charges are reported as covered for statistical and reimbursement purposes. The amount in Step 3 is the Medicare secondary payment (without regard to deductible or coinsurance) and the number of days determined in Step 4 are charged to the beneficiary's utilization record.

EXAMPLE: Not applicable since Step 5 is less than Step 4

If the number of days in Step 5 is less than the number of days in Step 4, the beneficiary does not have sufficient benefit days available to cover the entire stay. Proceed as follows:

- o Charge the days in Step 5 to the beneficary's utilization record

EXAMPLE: 3 days

- o Multiply the number of Medicare covered days without regard to benefits exhausted by the ratio of the number of days in Step 5 to the number of days in Step 4 to determine the days recorded as covered for statistical purposes.

EXAMPLE: $\frac{3}{4.375} \times 10 = 6.86 = 7$ days

Charges for days 1-7 are shown as covered on the bill. Charges for days 8-10 are reported as noncovered.

- Redetermine the allocation of the primary payer's payment for covered services based upon the revised Medicare covered charges.

  EXAMPLE: $\frac{\$3,000}{\$5,000}$ X \$3,000 = \$1,800

- Determine Medicare current interim reimbursement for days recorded as covered for statistical purposes.

  EXAMPLE: \$480 X 7 days = \$3,360

- Determine Medicare's secondary payment.

  EXAMPLE: \$3,360 - \$1,800 = \$1,560

3685. BILLING PROCEDURES FOR HOSPITALS ON PROSPECTIVE PAYMENT WHEN MEDICARE IS SECONDARY PAYER

A. General.—Instructions for processing claims in which Medicare is secondary payer are provided in §§3679-3684. Special instructions applicable only to services furnished by hospitals under PPS are below.

1. Determining the Medicare Payment Rate.—The Medicare payment rate is the amount Medicare would otherwise pay under PPS on an interim basis. The payment rate consists of the total prospective payment amount for the discharge and interim payments for those items that will be reimbursed . It is determined without regard to deductible or coinsurance. The amount is computed in the same manner for PIP and non-PIP hospitals and is the sum of:

o The total prospective payment amount, including any outlier payment, as determined by PRICER for the DRG;

o The estimated adjustment for the indirect costs of medical education, as determined by Pricer based upon the Federal portion of the total prospective payment, and;

o A per diem payment for items that are reimbursed on a reasonable cost basis. See §2405.2 of HCFA Pub. 15-1 for cost elements to be included in the payment. Divided estimated reimbursable costs for the current year by estimated Medicare days to compute a per diem rate by the number of days in the stay for which benefits are payable. Since the basic prospective payment is payable if a beneficiary has at least one covered day in the stay, payable days may exceed covered days if there are nonoutlier days before entitlement or after benefits are exhausted.

2. Determining Amount of Primary Payer Payment That Applies to Medicare Covered Services.--The hospital indicates the primary payer's allocation of its payment between covered and noncovered Medicare services by entering the amount paid by the primary payer toward Medicare covered services in value codes (Items 46-49). Where the hospital cannot determine the services covered by the primary payment, it applies a ratio of Medicare covered charges to total charges for the stay to the primary payment amount to determine the portion attributable to Medicare covered services and enters this amount in value codes (Items 46-49). Treat all services (other than those for which the beneficiary may be charged, such as a private room that is not medically necessary) furnished on any day for which benefits are payable as covered.

If a benefit exhausted case is also a day outlier, Medicare covered charges cannot be determined until the impact of the primary payment on utilization is determined. See 4 below for determining covered charges in this situation.

3. Effect of Primary Payment on Part A Utilization and Coinsurance.—If the primary payer's payment is less than the Medicare payment rate, the beneficiary will be charged with utilization and coinsurance as follows:

- If the primary payer is an EGHP and it pays an amount for Medicare covered services that is equal to or less than the deductible and coinsurance that would apply if Medicare was primary payer, utilization is not reduced. Therefore, coinsurance is determined in the usual manner.

- If the primary payer is an EGHP and it pays an amount for Medicare covered services that is more than the deductible and coinsurance that would apply if Medicare was the primary payer, follow the procedures below for determining utilization chargeable. Coinsurance is calculated on the basis of the adjusted utilization.

- If the primary payer is WC, automobile medical or no-fault insurer, follow the procedures below for determining utilization chargeable. Coinsurance is calculated on the basis of the adjusted utilization.

Charge utilization as follows for EGHPs:

- Subtract the EGHP payment that applies to Medicare covered services as determined in subsection 2 from the Medicare payment rate (unreduced by deductible and coinsurance). This yields the Medicare secondary payment.

- Divide this amount by the amount Medicare would have paid as primary payer (the Medicare payment rate reduced by deductible and coinsurance).

- Multiply this percentage by the number of payable days in the stay.

A partial day resulting from this calculation is not charged as a full day if it is less than .5 of a day. It is charged as a full day if it is .5 or more. Where the number of payable days in the stay exceed the number of days for which benefits are available (e.g., benefits are exhausted during the nonoutlier portion of the stay), the number of utilization days charged may not exceed the actual days available. If regular benefit days are exhausted during the basic portion of the stay and lifetime days are used for the outlier portion of the stay, separately compute the chargeable days for each portion of the stay. See 4 to determine the impact of the primary payment on utilization days in benefits exhausted situations involving a day outlier case.

EXAMPLE 1:

A beneficiary enters the hospital with two lifetime reserve days remaining and elects to use them. The beneficiary is discharged after 15 days, before the outlier threshold is reached. The Medicare payment rate is \$5,000. The primary payer amount for Medicare covered services is \$3,000. The applicable coinsurance amount is \$492 (2 LTR days at \$246 a day). Medicare would have paid \$4,508 as primary payer (\$5,000 -\$492).

Medicare secondary liability = \$5,000 - \$3,000 = \$2,000

$$\text{Utilization days potentially chargeable} = \frac{\$2,000}{\$4,508} \times 15 \text{ days} = 7 \text{ days}$$

In this case, only the actual days of coverage in the stay, or two days, are charged for utilization purposes.

EXAMPLE 2:

A beneficiary enters the hospital with two regular coinsurance days remaining and is discharged after 15 days. The outlier threshold is 10 days and the beneficiary elects to use lifetime reserve days for the outlier portion of the stay. The primary payer amount for Medicare covered services (i.e., the entire stay) was $3,000. The Medicare payment rate is $5,000. The applicable coinsurance amount is $1,476 (2 coinsurance days at $123 a day and 5 LTR days at $246 a day). Medicare would have paid $3,524 as primary payer ($5,000 - $1,476).

Medicare secondary liability = $5,000 - $3,000 = $2,000

Regular benefit days chargeable =

$$\frac{\$2{,}000}{\$3{,}524} \text{ X 10 days in basic portion of stay} = 6 \text{ days}$$

The beneficiary would be charged 2 coinsurance days, since only 2 days were available.

Lifetime reserve days chargeable =

$$\frac{\$2{,}000}{\$3{,}524} \text{ X 5 days in outlier portion of stay} = 3 \text{ days}$$

The beneficiary would be charged for 3 lifetime reserve days and coinsurance will be determined on this basis.

EXAMPLE 3:

Same facts as Example 2 except that the beneficiary enters the hospital with 7 regular coinsurance days remaining. Six regular coinsurance days would be chargeable for the basic portion of the stay. For the outlier portion of the stay, one coinsurance day and two lifetime reserve days would be chargeable.

NOTE: For additional utilization examples see §§3681C3 and 3682C3. These examples apply to cost reimbursement providers, not PPS hospitals. Therefore, when utilizing them insert the term "Medicare payment rate" in place of the term "current Medicare interim reimbursement for the stay" wherever it appears.

Charge utilization as follows for WC, automobile medical or no-fault insurer.

o Subtract the primary payer's payment (WC, automobile medical or no-fault insurance) that applies to Medicare covered services as determined in subsection 2 and any applicable deductible and coinsurance amounts from the Medicare payment rate (unreduced by deductible and coinsurance). This yields the Medicare secondary payment.

o Divide this amount by the amount Medicare would have paid as primary payer (i.e., the Medicare payment rate reduced by deductible and coinsurance).

o Multiply this percentage by the number of payable days in the stay.

A partial day resulting from this calculation is not charged as a full day if it is less than .5 of a day. It is charged as a full day if it is .5 or more. Where the number of payable days in the stay exceed the number of days for which benefits are available (e.g., benefits are exhausted during the nonoutlier portion of the stay), the number of utilization days charged may not exceed the actual days available. If regular benefit days are exhausted during the basic portion of the stay and lifetime days are used for the outlier portion of the stay, separately compute the chargeable days for each portion of the stay. See subsection 4 to determine the impact of the primary payment on utilization days in benefits exhausted situations involving a day outlier case.

EXAMPLE 1:

A beneficiary enters the hospital with two lifetime reserve days remaining and elects to use them. The beneficiary is discharged after 15 days, before the outlier threshold is reached. The Medicare payment rate is $5,000. The primary payer amount for Medicare covered services is $3,000. The applicable coinsurance amount is $492 (2 LTR days at $246 a day). Medicare would have paid $4,508 as primary payer ($5,000 -$492).

Medicare secondary liability = $5,000 - $3,000 - $492 = $1,508

Utilization days potentially chargeable = $\frac{\$1,508}{\$4,508}$ X 15 days = 5 days

In this case, only the actual days of coverage in the stay, or two days, are charged for utilization purposes.

EXAMPLE 2:

A beneficiary enters the hospital with two regular coinsurance days remaining and is discharged after 15 days. The outlier threshold is 10 days, and the beneficiary elects to use lifetime reserve days for the outlier portion of the stay. The primary payer amount for Medicare covered services (i.e., the entire stay) was $3,000. The Medicare payment rate is $5,000. The applicable coinsurance amount is $1,476 (2 coinsurance days at $123 a day and 5 LTR days at $246 a day). Medicare would have paid $3,524 as primary payer ($5,000 - $1,476).

Medicare secondary liability = $5,000 - $3,000 - $1,476 = $1,524

Regular benefit days chargeable =

$\frac{\$1,524}{\$3,524}$ X 10 days in basic portion of stay = 4 days

The beneficiary is charged 2 coinsurance days, since only 2 days were available.

Lifetime reserve days chargeable =

$\frac{\$1,524}{\$3,524}$ X 5 days in outlier portion of stay = 2 days

The beneficiary is charged for 2 lifetime reserve days and coinsurance is determined on this basis.

EXAMPLE 3:

Same facts as Example 2 except that the beneficiary enters the hospital with 5 regular coinsurance days remaining. Four regular coinsurance days are chargeable for the basic portion of the stay. For the outlier portion of the stay, one regular coinsurance day and one lifetime reserve day is chargeable.

NOTE: For additional utilization examples see SS3679C3 and 3680C3. These examples apply to cost reimbursement providers, not PPS hospitals. Therefore, when utilizing them, insert the term "Medicare payment rate" in place of the term "current Medicare interim reimbursement for the stay" wherever it appears.

4. Benefits Exhausted Situations Involving a Day Outlier.--If Medicare has secondary liability for an inpatient stay, outlier days that would otherwise not be covered because the beneficiary had exhausted benefits may be covered after the impact of the primary payment on utilization is determined. In these situations, the primary payment effects Medicare covered charges. Since the primary payment is allocated to Medicare based on a ratio of Medicare covered charges to total charges, the primary payment's effect on Medicare covered charges must be taken into account before allocating the primary payment.

To determine Medicare covered charges in benefits exhausted situations involving a day outlier, proceed as in the following example:

EXAMPLE

Facts:	Total Charges	$5,000
	Medicare Covered Charges (without regard to benefits exhausted)	$4,500
	Medicare Covered Charges for Days 1-7	$3,000
	Primary Payment (unallocated)	$3,000
	Remaining Benefit Days	3
	Covered Medicare Days (without regard to benefits exhausted)	10
	Outlier Threshold	5
	Medicare Payment Rate (without regard to benefits exhausted)	$4,800
	Medicare Payment Rate Days 1-7	$4,000

STEPS: 1. Determine what the Medicare payment rate would be if benefits were not exhausted (and no primary payments were involved).

EXAMPLE: $4,800

2. Determine the amount of the primary payment that would apply to Medicare covered services if benefits were not exhausted.

If the primary payer's allocation can be determined, use it.

EXAMPLE: Not applicable

If the primary payer's allocation cannot be determined, apply a ratio of Medicare covered charges (without regard to benefits exhausted) to total charges for the stay to the total primary payment to determine the portion that would be attributable to Medicare.

EXAMPLE: $\frac{\$4,500}{\$5,000} \times 3000 = \$2,700$

3. Determine the Medicare secondary payment that would be made in the absence of benefits exhausted (without regard to deductible or coinsurance) by subtracting Step 2 from Step 1.

EXAMPLE: $4,800 - 2,700 = $2,100

4. Determine the benefit days that would be chargeable absent benefits exhausted by applying a ratio of Step 3 to Step 1 to the number of Medicare covered days without regard to benefits exhaustion.

EXAMPLE: $\frac{\$2,100}{\$4,800} \times 10 = 4.375$ days

5. Determine the number of days for which benefits are available.

EXAMPLE: 3 days

6. If the number of days in Step 5 is greater than the number of days in Step 4, the primary payment extends Medicare coverage over the entire stay. The case no longer involves benefits exhaustion. All otherwise covered days and charges are reported as covered for statistical and reimbursement purposes. The amount in Step 3 is the Medicare secondary payment (without regard to deductible or coinsurance) and the number of days determined in Step 4 are charged to the beneficiary's Medicare utilization record.

EXAMPLE: Not applicable since Step 5 is less than Step 4.

7. If the number of days in Step 5 is less than the number of days in Step 4, the beneficiary, does not have sufficient benefit days available to cover the entire stay. Proceed as follows:

- Charge the days in Step 5 to the beneficiary's Medicare utilization record.

EXAMPLE: 3 days

Multiply the number of Medicare covered days without regard to benefits exhausted by the ratio of the number of days in Step 5 to the number of days in Step 4.

The number of days and related charges recorded as covered for statistical and reimbursement purposes will be the greater of the number of days computed in this step or the number of days in the nonoutlier portion of the stay.

EXAMPLE: $\frac{3}{4.375}$ X 10 = 6.86 = 7 days

If the outlier threshold was fewer than 7 days, charges for days 1-7 would be recorded as covered. If the outlier threshold was 7 days, or more, charges for the nonoutlier portion of the stay would be recorded as covered. Since the outlier threshold is 5 days in this example, 7 days would be considered covered and the charges for days 1-7 would be reported as covered for statistical and reimbursement purposes.

Redetermine the allocation of the primary payer's payment for covered services based on the revised Medicare covered charges.

EXAMPLE: $\frac{\$3,000}{\$5,000}$ X \$3,000 = \$1,800

Determine Medicare payment rate for days recorded as covered for statistical purposes.

EXAMPLE: \$4,000

Determine Medicare's secondary payment.

EXAMPLE: \$4,000 - \$1,800 = \$2,200

B. Primary Payer Pays in Full.—No Medicare payment will be made if the payment by the primary payer for Medicare covered services (as determined by the formula in A2 above) equals or exceeds the hospital's charges for those services or the hospital accepts, or is obligated to accept, the payment as payment in full for the services.

If WC, automobile medical or no-fault insurance primary to Medicare precludes any Medicare payment, the hospital submits a no-payment bill. Process the bill in accordance with SS3679B or 3680B as appropriate. If an EGHP primary to Medicare precludes any Medicare payment, the hospital submits a no-payment bill. Process the bill in accordance with S3681B or S3682B as appropriate.

C. Primary Payer Pays Less Than Full.--If the primary payment for Medicare covered services (as determined by the formula in subsection A2) is less than the hospital's full charges for those services and the hospital does not accept, and is not obligated to accept, the payment as payment in full, the hospital must identify the primary payer and indicate the amount of the primary payment that is allocated for Medicare covered services. It shows the identifying information in Items 57-75 on the first payer line, and the appropriate value code with the amount paid is shown in value codes (Items 46-49).

Your action in varying situations is described below.

1. Primary Payment Equals or Exceeds Medicare Payment Rate.--If the primary payment equals or exceeds the Medicare payment rate, no payment is due from Medicare. If the primary payer is WC, automobile medical or no-fault insurer, process the bill in accordance with SS3679B or 3680B as appropriate. If the primary payer is an EGHP process the bill in accordance with S3681B or S3682B as appropriate.

2. Primary Payment is Less Than Medicare Payment Rate.--

a. Primary Payer is WC, Automobile Medical or No-Fault Insurance.--If the primary payer is WC, automobile medical or no-fault insurer, Medicare's liability is equal to the Medicare payment rate, less the primary payment amount allocated for Medicare covered services and the applicable deductible and coinsurance amount. See below to apply the primary payment amount and coinsurance and deductibles to Medicare payments. The applicable deductible and coinsurance amount is the lesser of the deductible and coinsurance determined under the usual rules or the Medicare payment rate less the primary payer amount for Medicare covered services. The beneficiary's liability is limited to the applicable deductible and coinsurance amount.

If the primary payer is WC process the bill in accordance with S3679C. If the primary payer is an automobile medical or no-fault insurer, process the bill in accordance with S3680C. For hospitals not on PIP, subtract the primary payment and the applicable deductible and coinsurance amounts from the total prospective payment amount (A.1.a) for the beneficiary's stay. If the primary payment amount and applicable deductible and coinsurance exceed the total prospective payment amount, subtract the excess from prospective payments due the hospital for other discharges. Do not adjust biweekly payments for the indirect costs of medical education (A.1.b) and for Items reimbursed on a reasonable cost basis (A.1.c) as a result of primary payment amounts. Biweekly payment is the method by which the amounts in A.1.b and A.1.c are paid on an interim basis for both PPS-PIP and PPS non-PIP hospitals. (See the Provider Reimbursement Manual, Part I, SS2405.2 and 2405.3.) A primary payment amount in excess of the total prospective payment amount for a particular discharge need not be identified to, and subtracted from, the biweekly payments because the hospitals cost report provides for subtraction of total primary payments from the aggregate of all Medicare payments otherwise due.

For hospitals on PIP (see the Provider Reimbursement Manual, Part I, §2405.1.b), reduce the PIP amount for prospective payments to reflect the primary payment. Any reduction in PIP payments may be accomplished by offsetting against the next payment or by taking estimated reductions into account in establishing the PIP payment level. All adjustments resulting from primary payment amounts are reflected only in the PIP payment level. As with non-PIP hospitals, do not adjust biweekly payments for amounts addressed in A.1.b and A.1.c.

NOTE: No reduction is made to the PIP amount with regard to conditional payments. In these situations payment is made, although conditionally, as if Medicare were fully liable.

b. Primary Payer is an EGHP.—If the primary payer is an EGHP, Medicare's liability is equal to the Medicare payment rate less the greater of: the primary payer payment amount allocated for Medicare covered services or the applicable deductible and coinsurance amounts. In this case see below to apply the primary payment amount or deductibles and coinsurance. The applicable deductible and coinsurance amount is determined under the usual rules.

The beneficiary has no liability for Medicare covered services if the primary payment is greater than the applicable deductible and coinsurance amounts. Otherwise, the beneficiary's liability is limited to the applicable deductible and coinsurance amounts less the primary payment.

Process the bill in accordance with §3681C or §3682C as appropriate. For hospitals not on PIP, subtract the greater of the primary payment or the applicable deductible and coinsurance amount from the total prospective payment amount (A.1.a) for the beneficiary stay. If the applicable deductible and coinsurance or primary payment amount exceeds the total prospective payment amount, subtract the excess from prospective payments due the hospital for other discharges. Do not adjust biweekly payments for the indirect costs of medical education (A.1.b) and for items that are reimbursed on a reasonable cost basis (A.1.c) as a result of primary payment amounts. Biweekly payments is the method by which the amounts in A.1.b and A.1.c are paid on an interim basis for both PPS-PIP and PPS non-PIP hospitals. (See the Provider Reimbursement Manual, Part I, §§2405.2 and 2405.3.) A primary payment amount in excess of the total prospective payment amount for a particular discharge need not be identified to, and subtracted from, the biweekly payments because the hospitals cost report provides for subtraction of total primary payments from the aggregate of all Medicare payments otherwise due.

For hospitals on PIP (see the Provider Reimbursement Manual, Part I, §2405.1.b), reduce the PIP amount for prospective payments to reflect any excess of the primary payment amount over the applicable deductible and coinsurance amount. Any reduction in PIP payments may be accomplished by offsetting against the next payment or by taking estimated reductions into account in establishing the PIP payment level. All adjustments resulting from primary payment amounts are reflected only in the PIP payment level. As with non-PIP hospitals, do not adjust biweekly payments for amounts addressed in A.1.b and A.1.c.

NOTE: No reduction is made to the PIP amount with regard to conditional payments. In these situations payment is made, although conditionally, as if Medicare were fully liable.

3686. DEVELOPMENT OF CLAIMS WHERE THERE MAY BE OTHER PAYER INVOLVEMENT

Where Medicare is indicated as primary payer on the HCFA-1450, assume in the absence of evidence to the contrary, that the provider has correctly determined that there is no other primary coverage and process the claim accordingly. If you have reason to believe that Medicare may be secondary payer, e.g., based upon information from an outside source, information included in your data base obtained from the regional data exchange or a Y trailer code A thru I (See §§3512.8 or 3535.1) received in response to a query, contact the provider with your explanation of why Medicare may be the secondary payer. Ask the provider to determine if there is another payer primary to Medicare. If so, instruct the provider to bill the other payer as primary.

Where condition code 08 is reported in Items 35-39 of the HCFA-1450, develop to determine the proper payer based on information included in your data base obtained from the regional data exchange or other internal source. If you are still unable to determine the proper payer after checking your data base, contact the beneficiary and take the following actions:

o Where the beneficiary indicates other insurance coverage, request the provider to bill that insurer as primary;

o Where the beneficiary indicates no other insurance coverage, process the claim for payment; or

o Where the beneficiary refuses to provide information, deny the claim and notify the beneficiary accordingly. (See §3722.4 for denial language.)

3687. DEVELOPMENT OF ESRD CLAIMS WHERE BASIS FOR MEDICARE ENTITLEMENT CHANGES

During the 12 month period in which Medicare may be secondary, develop all cases where a beneficiary's basis for Medicare entitlement changes from entitlement based solely upon ESRD (S2 trailer code) to entitlement based upon ESRD and disability (S3 trailer code). Medicare ceases to be secondary payer for ESRD individuals when entitlement changes to disability. However, the S3 trailer code does not provide the month the Medicare entitlement based on disability begins. To prevent erroneous billing, contact your local SSO whenever you receive an S3 trailer code during the 12 month period in which Medicare may be secondary. Ask the SSO to identify the beneficiary's date of entitlement to Medicare based upon disability (usually the 25th month after disability benefits began). Indicate that the information is needed to determine when the period for which the beneficiary is entitled to Medicare solely because of the ESRD provision ends.

3688. DEDUCTIBLE AND/OR COINSURANCE RATES APPLICABLE ON MEDICARE SECONDARY CLAIMS WHEN AN INPATIENT STAY SPANS TWO CALENDAR YEARS

Where Medicare is secondarily liable because another payer primary to Medicare has made payment on an inpatient claim, and the stay spans two calendar years, the provider bills the deductible and/or coinsurance rate applicable to the year in which Medicare utilization is charged. Medicare utilization (calculated in accordance with instructions in §§3679C3, 3680C3, 3681C3, 3682C3, and 3685A3) is charged beginning with the first day of the stay. This rule applies even though the primary payer paid for only a specified number of days of a stay, e.g., the primary payer's plan covers the first 20 days of a 30 day stay.

Where the Medicare utilization involves coinsurance days spanning two calendar years, the provider bills coinsurance for each coinsurance day in accordance with the applicable coinsurance rate for the year in which the day was utilized. The provider uses value codes 09 and 11, form locators 46 through 49, to show specific coinsurance amounts. See §3876 for reporting coinsurance days on UNIBILL.

EXAMPLE 1:

A beneficiary is in a new benefit period and was admitted to the hospital on December 15, 1984, and discharged on January 14, 1985. An EGHP primary to Medicare paid the first 20 days of the stay. The provider enters $356 deductible (the applicable deductible for the first year in which Medicare utilization is charged).

EXAMPLE 2:

A beneficiary was admitted to the hospital on December 15, 1984, and discharged on January 14, 1985. Only coinsurance days were available. An EGHP primary to Medicare paid the first 20 days of the stay. After performing the utilization calculation, the provider determined the beneficiary can be charged with 10 days utilization (December 15 thru December 24). The provider bills 10 days coinsurance at the 1984 rate ($89 x 10 = $890). The coinsurance amount is based upon the inpatient hospital deductible for the year in which days are utilized.

EXAMPLE 3:

A beneficiary was admitted to the hospital on December 25, 1984, and discharged on January 24, 1985. Only coinsurance days were available. An EGHP primary to Medicare paid the first 20 days of the stay. After performing the utilization calculation, the provider determined the beneficiary can be charged with 10 days utilization (December 25, 1984 thru January 3, 1985). The provider bills 7 days coinsurance at the 1984 rate ($89 x 7 = $623) and 3 days coinsurance at the 1985 rate ($100 x 3 = $300). The coinsurance amount is based upon the inpatient hospital deductible for the year in which days are utilized. The data is reported on the HCFA-1450 as follows:

Value code 09 Medicare Coinsurance Amount in First Calendar Year	$623.00
Value Code 11 Medicare Coinsurance Amount in Second Calendar Year	$300.00
Form locator 25 Coinsurance Days	10
Form locator 61 Coinsurance Amount	$923.00

3689. COORDINATION OF OTHER INSURANCE COVERAGE WITH CARRIERS

Coordinate determinations regarding other insurance coverage with carriers in your service areas by providing the carrier with a copy of all hospital inpatient UNIBILL records; and of SNF inpatient and all outpatient UNIBILL records that contain value codes 12, 13, 14, 15, or 16. (See §3770.2.) Carriers will extract data from these records for Medicare secondary payer development and process claims accordingly.

3693. REVIEW PROTOCOL FOR MEDICAL SECONDARY PAYER

Medicare is secondary payer for:

- Claims involving Medicare beneficiaries age 65 or older who are insured by EGHP coverage based upon their own employment or that of their spouses of any age. Amendments extending the working aged provisions beyond age 69 apply to items and services furnished on or after May 1, 1986. (See §3491.);

- Claims during a period of up to 12 months involving beneficiaries entitled to Medicare solely on the basis of ESRD who have EGHP coverage. (See §3490.);

- Claims involving automobile medical or no-fault insurance or any liability insurance. (See §3419.);

- Claims involving WC or BL; and

- Claims involving Medicare beneficiaries under age 65 who are disabled by Social Security definition and are covered by a large group health plan (employers with 100 or more employees) based upon their employment or that of a family member. The amendment applies to items and services furnished on or after January 1, 1987.

The following sections provide a methodology for reviewing certain hospitals' MSP policies and practices which may reflect inconsistencies affecting MSP savings. Review admission and bill processing procedures and hospital billing data.

3693.1 Frequency of Reviews and Selection Criteria.—Each year conduct a review of 10 percent of the hospitals for which you have Medicare responsibility. Considering the variances within each State as to number of hospitals that would be reviewed, review a minimum of 4 and a maximum of 20 hospitals. (For FY 1987, prorate the number of required reviews based on the number of months remaining in the year, retaining as a minimum 4 reviews.) Providers to consider may include hospitals not properly developing MSP claims, not submitting "no payment" bills, not submitting auto medical cases although they may have shock trauma units specializing in emergency admissions, etc.

3693.2 Methodology For Review of Admission and Bill Processing Procedures.—

A. Review of Hospital Payer Policies.—Obtain the following information from the hospital's administration office regarding the facility's policies on identification of other resources primary to Medicare.

What are their policies on identification and billing of working aged and disabled beneficiaries with other insurance?

- Is information obtained on the patient's and the patient's spouse's employer or on the employment of any other family member?

- On the patient's and the spouse's age?

- On the patient's and the spouse's insurance coverage or the insurance coverage of any other family member?

What are the policies on identifying and billing accident and liability cases?

- Are accident cases separately identified?

- Are auto accidents distinguished from other accidents?

- Are WC or BL cases identified?

- Does the provider correctly complete the work-related condition code on the billing form?

What are the policies on identifying cases in which an ESRD beneficiary is in the 12-month coordination period?

- Are ESRD patients' histories tracked?

- If so, how?

- Is this information supplied to the billing department?

B. Implementing Payer Policies.—To determine whether policies are carried out in practice, visit the admitting department (inpatient and emergency) and for Medicare only analyze the admission forms. Determine from the admission forms or through discussions with admitting personnel whether the:

- Facility has a mechanism to identify other payer resources. (Are there line items to disclose other payer resources, e.g., if the patient is not employed, is information on the spouse obtained in relation to employment, age, place of employment and address, insurer's name and policy number?)

- Facility exercises the process to identify other payer resources. Review actual practices, instructional materials. If such line items exist, are they utilized? If there are no specific line items for disclosing other payer resources, is the information obtained by admissions personnel somewhere on the admissions forms, e.g., under "Comments," or is other space provided?

- Admission forms have specific line items to obtain WC (YES/NO) or BL (YES/NO) involvement. If not, is this information obtained somewhere on the form?

- Admission forms obtain information from, or about, the working spouse of the patient, e.g., place of employment, insurance and policy information. Admission forms obtain information about the patient's place of employment, insurance, and policy information.

o Facility codes admission forms for billing purposes in accident cases. Is there, or can there be, added to the admission form a priority for payers, e.g., "Primary," "Secondary," or working aged, ESRD, Aged-auto Accident, Aged Accident - other designations?

o Verify that the admission office is utilizing the admission development chart in §301 of the Hospital Manual as a guideline for identifying other payers at the time of admission.

Check to see if the hospital has on file a copy of the completed admission development chart or its equivalent. This may be in paper, microfilm or microfische. If the hospital has an on-line admission screen in place, the above requirement does not apply as long as it has documented procedures for collecting and reporting other primary payer information.

C. Observing Admissions.—Observe an admissions clerk during a Medicare admission or series of admissions. Are all other payer resources obtained including negative responses? (This is optional if hospital policy generally prohibits outsiders observing the admission process.)

D. MSP Information from Billing.—Obtain from the billing department the following:

o Is the information pertaining to a resource primary to Medicare and which is contained on the admission forms supplied in its entirety to the billing department? (The billing department will have to be made aware of a payer primary to Medicare, e.g., working aged, ESRD, auto accident.)

o Do circumstances arise where the billing department obtains information from the patient? If so, how complete is it? How is it obtained? For example, when an unconscious patient arrives at the hospital, who obtains the admission information and from what source? Is the regular admissions form used to obtain the information?

o Where the patient's condition on admission precludes his assisting in identifying other payer resources, are members of the patient's family contacted?

o Does the hospital search its records in accordance with Hospital Manual §263.7 to identify prior working aged claims? Is there a specific line item (YES/NO) to record this and an explanation of why records were not searched?

o Where there is a possiblity of WC liability, does the hospital bill WC directly rather than Medicare, bill both WC and Medicare, or only Medicare?

o Does the provider bill the Department of Labor first where the services are covered by the Federal BL program.

- o Does the facility have the ability to track WC cases on succeeding visits to the facility or the outpatient department? (Many times individuals may have to return to the hospital for additional medical services as a result of a WC occurrence.) Does the hospital correctly bill for the succeeding visits?

- o Does the facility bill more than one insurer simultaneously (Medicare/Private Insurer)? If so, what is the disposition of duplicative reimbursements?

- o Review the hospital's patient financial accounts to identify Medicare patients that may have credit balances due to payments received from both Medicare and another insurer. Where such credit balances are identified, recover the Medicare overpayment through the adjustment bill process.

- o In auto/accident injury, are reimbursement checks from an insurer made payable to the beneficiary and/or the facility? If so, what is the policy as to dispostion of these checks?

- o How does the facility bill in the following ESRD situations? (Does the hospital track and follow-up on patients' ESRD history and is it available to the bill department?)

  - — 12-month coordination period (3-month waiting period where applicable, 9 or 12-month secondary payer).
  - — Kidney transplant (exception to the 3-month waiting period).
  - — Self-Dialysis (exception to the 3-month waiting period).

Where the patient is in the ESRD coordination period and an employer has paid in part, or should pay, for the services, does the provider show the name and group number of the insurer, value code 13, and amount (as appropriate) on the bill?

3693.3 Methodology for Review of Hospital Billing Data.—Determine the sample period; recommended is one (1) month's submissions or the following sampling size:

Universe Size	Sample Size
60	all
61 - 120	40
121 - 300	50
301 or more	60

The universe to consider is the hospital's annual inpatient claims.

Review copies of the hospital's inpatient and emergency room (ER) Medicare beneficiary admission forms and complete the "Analysis of Forms" chart (Exhibit 1) and "Other Payer Utilization Data" form (Exhibit 2 or Exhibit 3).

Have hospital personnel provide all inpatient admission forms and all ER admission forms for all Medicare beneficiaries and all admissions over age 64 for the sample period.

Examine every form. Use the following analysis sequence:

- o Is the patient a Medicare beneficiary? (If not, select another admission form. If yes continue the analysis).

- o Is this an ESRD case within the first 12 months of treatment? (If not, continue analysis. If yes, complete Survey Sheet I (Exhibit 4).)

- o Is the beneficiary considered a "Working Aged" beneficiary or a disabled beneficiary with large group health plan coverage? (If not, continue analysis. If yes, complete Survey Sheet II (Exhibit 5).)

- o Is this a WC or BL case? (If not, continue analysis. If yes, complete Survey Sheet III (Exhibit 6).)

- o Is this an auto accident or other liability case? (If not, go to next admission form. If yes, complete Survey Sheet III (Exhibit 6).)

Obtain the HCFA-1450 for all cases involving other payers and determine the amount billed to Medicare for each case; record on the appropriate survey sheets.

Review the Form HCFA-1450 for the following MSP data. (Section 3670 defines these items in detail.)

Items 28 thru 32 - Occurrence Codes and Dates.—Occurrence codes should be completed to show the type and date of the accident.

01-Auto accident
02-Auto accident with no-fault insurance
03-Accident involving civil court process
04-Employment related accident
05-Other accident not described above
  This code is used to report that the hospital has developed for other casualty related payers and have determined that there are none.
24-Date insurance denied

When occurrence codes 01 thru 04 and 24 are entered, they must be accompanied by the entry of the appropriate value code in Items 46-49 if there is another payer involved.

Items 35 thru 39 - Condition Codes.—Condition codes should be completed with condition code 02 if the condition is employment related.

Items 46 thru 49 - Value Codes and Amounts.—Value codes and amounts should be completed to show the type of the other coverage and the amount paid by the other payer for Medicare covered services.

12-Working aged/beneficiary/spouse with EGHP
13-ESRD beneficiary in 12-month period with EGHP
14-Automobile, no-fault or any liability insurance

15-WC
16-PHS, other Federal agency
41-BL
42-VA
43-Disabled beneficiary with LGHP coverage.

Where the provider is requesting conditional payment, zeros should be entered beside the appropriate value code in this item.

Item 57A - Payer Identification.—Payer Identification should be completed to show the identity of the other payer primary to Medicare. All additional entries across line A (Items 58-64) supply information needed by the payer named in Item 57A.

Item 57 B, C - Payer Identification.—Payer Identification should be completed to show Medicare when Medicare is the secondary or tertiary payer.

Item 65A - Insured's Name.—Where Medicare is not the primary payer, the insured's name should be completed to show the name of the individual in whose name the insurance is carried.

In Item 65B, the provider should have entered the patient's name as shown on the HI card or other Medicare notice.

Item 67 - Patient's Relationship to the Insured.—This item indicates the relationship of the patient to the identified insured.

Item 68A, B, C - Certification/SSN/HICN.—On the same lettered line (A, B, or C) that corresponds to the line on which Medicare payer information is shown in Items 57-63, the provider should have entered the patient's Medicare HICN. If the provider is reporting any other insurance coverage higher in priority than Medicare (e.g., employer coverage for the patient or the spouse or during the first year of ESRD entitlement), the involved claim number for that coverage should be shown on the appropriate line.

Items 69 thru 75 - Employment Information Data.—These items are completed when the provider is claiming a payment and there is WC or/and EGHP involvement.

3693.4 Assessment of Hospital Review.—Prepare a narrative summary for each provider. Include selection criteria for the provider and your findings along with suggested recommendations, if appropriate. Include any discrepancies between the hospital's MSP policies and practices, as well as what provider innovations have been/are being devised to determine third party resources. Send a copy within 30 days of your survey to your RO:

HCFA
__________ Regional Office
Division of Program Operations
Attention: MSP Coordinator

Send the hospital a copy. Followup every 30 days until appropriate corrective action is taken. Report continued problems after three months to the RO MSP Coordinator.

Request for Information From the Public

3694. REQUEST FOR INFORMATION REQUIRED IN THE DEVELOPMENT OF MEDICARE SECONDARY PAYER CLAIMS

The items of information listed below have been approved by the Office of Management and Budget (OMB) under approval number 0938-0214 as the information you may request from providers and beneficiaries in the development of Medicare Secondary Payer (MSP) claims. You may not routinely collect information other than that given on these lists. You may have forms printed requesting some, or all, of the information on these lists. However, if you do so, the form must have the OMB approval number printed in the upper right-hand corner of the first page. It should read:

Form Approved
OMB NO. 0938-0214

The items of information (broken out by specific primary payer categories) that you may collect for MSP development are:

A. WC Including B/L

o Name and address of the WC or B/L carrier or State WC agency.

o Was WC payment a lump sum compromise payment? If so, what portion, if any, was allocated to medical and hospital expenses?

o Is the WC claim contested?

o If the WC claim is contested, does the carrier or the WC agency agree to notify you promptly when a final decision is reached?

o Will the WC carrier agree to reimburse Medicare the amount of the conditional payment if full WC benefits are awarded or if the particular services were reimbursed by a lump sum award?

o Is the Medicare beneficiary entitled to black lung medical benefits? If the Department of Labor or the WC carrier was billed before Medicare but not all services were covered, a copy of the explanation of benefit is needed.

o Date of accident which resulted in illness or injury.

o Brief description of accident or other cause of illness or injury.

o Request beneficiary's permission to contact the employer or the WC carrier for information concerning WC claim.

B. Automobile Medical, No-Fault, or Liability Insurance

o Was the treatment for an illness or injury which resulted from an automobile accident or other accident for which another party could be held responsible?

- Was it an automobile or nonautomobile accident?
- Date of accident which resulted in illness or injury.
- Brief description of accident or other cause illness or injury.
- Is the injury or illness covered by the individual's uninsured motorist coverage or by a State's uninsured motorist fund?
- Name, address, and telephone number of the party responsible for illness or injury.
- Name and address of the attorney, if one is involved.
- Liability carrier's claim file number.
- Has a request been received for medical records or bill from an attorney or insurance company?
- How much did it cost the beneficiary or attorney to obtain a liability insurance payment?

C. End State Renal Disease (ESRD) Beneficiaries Covered by Employer Group Health Plans (EGHP)

- Is patient entitled to Medicare based solely on the basis of ESRD?
- Date regular course of dialysis was initiated.
- Did the patient start self-dialysis training? If so, when?
- Did the patient receive a kidney transplant? If so, when?
- What was the first month of the patient's 12-month coordination period?
- Is patient covered by an EGHP?
- Did the provider check its records to ascertain if Medicare paid primary benefits for other services rendered during the 12-month coordination period for which there was EGHP coverage.

D. Working Aged Beneficiaries Covered by EGHP

- Is the patient or spouse working? If not, when did he/she stop?
- Does patient/spouse have EGHP coverage by reason of current employment?

- Spouse's date of birth.

- Is spouse entitled to Part A benefits?

- Does the employer employ 20 or more employees?

- If the working individual or the spouse is covered by a multiemployer group health plan which has at least one employer with 20 or more employees, has the multiemployer plan identified the individual as an employee of an employer of fewer than 20 employees?

- If the worker is disabled, was he/she determined disabled by SSA prior to age 65 or does his/her employer pay him/her sick or disability pay covered by the Federal Insurance Contribution Act?

- Request the EGHP to designate to whom to give any "excess" EGHP refund.

- To recover Medicare overpayment, request a transfer of funds from your private side where you are the EGHP.

- Request refund from the beneficiary if the beneficiary received direct payment from the EGHP.

E. Veterans Administration (VA)

Has the VA issued an authorization (i.e., a fee basis ID card) for benefits under its program?

- If a beneficiary was issued a fee basis ID card, what services were billed to the VA?

F. Other Exclusions

- Were services paid for by another governmental program such as under a research grant?

G. Any MSP Situation

- Has a claim been filed or does the beneficiary intend to file a claim with the other payer? If not, explain.

- Name. address, and telephone number of other insurer which may be responsible for payment of medical expenses.

- Has a claim been denied by the other insurer? If so, why?

- Request a copy of the other insurer's decision, i.e., the explanation of benefits or denial.

- o Request claims information not contained in the insurer's explanation of benefits or a denial from the insurer or the beneficiary.
- o Amount paid by the other insurer for Medicare covered services.
- o Date payment was received from other payer.
- o Policy, claim or group number.
- o Name and telephone number of individual at other payer assigned to handle claim.
- o Request completion of repayment agreement.
- o Justification for requesting conditional payment.
- o Request permission from the beneficiary to release Medicare payment information to other insurer.
- o Request a primary insurer to refund excess Medicare payment.

Limit the information collected for MSP development to these items. A distinction is drawn between information which is sought routinely and that which is sought nonroutinely. The distinction is based upon a requirement in the Paperwork Reductio Act that OMB approval be obtained when the identical question is posed to 10 or mo members of the public in a given year. Since the items above are OMB approved, you may ask for this information whenever necessary. OMB approval is not required when information for a specific application is requested annually from fewer than 10 members of the public. You may use this exemption to seek additional information to resolve an MSP issue on an exception basis, i.e., the information requested is not sought on a routine basis.

MSP Outpatient Claims Involving Lab Charges

3695. CALCULATION OF DEDUCTIBLE AND COINSURANCE FOR MSP OUTPATIENT CLAIMS INVOLVING LAB CHARGES PAID BY FEE SCHEDULE

A. General.—The following procedure describes how to calculate deductible and coinsurance for MSP outpatient claims which include charges for clinical diagnostic lab services (reimbursed on the basis of 100 percent of a fee schedule) and charges for nonlab services (subject to the regular deductible and coinsurance requirement) when a primary payer pays in part for the services, without designating how much of its payment is for each type of service.

B. Prorating Primary Payments.—Prorate the undesignated primary payer's payment for Medicare covered services by applying a ratio of this payment between lab and nonlab charges on the bill to determine what portion of the primary payer's payment is attributable to the nonlab charges.

NOTE: This ratio is based upon Medicare billed charges, not Medicare's payment under the fee schedule.

C. Calculation of Deductible and Coinsurance.—Deductible and coinsurance are calculated in the usual manner after applying the primary payer's payment allocated for nonlab services (as derived in subsection B above). Follow the guidelines in §§3679F4, 3680F4, and 3685C2a for determining the applicable deductible amount when the primary payer is WC, automobile medical, no-fault, or a liability insurer. See examples below for calculation of coinsurance.

EXAMPLE I - DEDUCTIBLE PREVIOUSLY MET

Outpatient services were furnished to a Medicare beneficiary for which the provider billed $100 for lab services and $200 for emergency room services. The lab fee schedule amount for the $100 lab services is $70. The beneficiary's Part B deductible was previously met. The primary payer paid $150 for Medicare covered services without designating what portion of its payment was for each type of service. Since the ratio of lab charges to nonlab charges is $100/$200, divide the primary payer's payment of $150 into two amounts based upon the same ratio: $100/$200 = $50/$100. Apply $50 of the primary payer's payment to the $70 lab fee schedule amount and the remaining $100 to the $200 in nonlab charges (emergency room services). Calculate the coinsurance in the usual manner based upon the $200 nonlab charges as follows:

o If the primary payer is automobile medical, no-fault, liability, or W/C insurer, the coinsurance for the nonlab charges is computed as follows: $200 (nonlab charges) minus $100 (primary payment allocated to nonlab charges) = $100 X .20 = $20. The applicable coinsurance amount charged is $20.

o If the primary payer is an EGHP, no coinsurance is charged since the primary payment of $100 allocated to nonlab charges is greater than the $40 regular coinsurance on the $200 in nonlab charges. (For the PS&R, record $40 coinsurance and $60 primary payment.)

EXAMPLE II - DEDUCTIBLE NOT MET

Outpatient services were furnished to a Medicare beneficiary for which the provider billed $100 for lab services and $200 for emergency room services. The lab fee schedule amount for the $100 lab services is $70. No part of the beneficiary's Part B deductible of $75 had been met previously. The primary payer paid $150 for Medicare covered services without designating what portion of its payment was for each type of service. Since the ratio of lab charges to nonlab charges is $100/$200, divide the primary payer's payment of $150 into two amounts based upon the same ratio: $100/$200 = $50/$100. Apply $50 of the primary payer's payment to the $70 lab fee schedule amount and the remaining $100 to the $200 in nonlab charges (emergency room services). Calculate the deductible and coinsurance in the usual manner based upon the $200 nonlab charges as follows:

o If the primary payer is automobile medical, no-fault, liability, or W/C insurer, the coinsurance for the nonlab charges is computed as follows: $200 (nonlab charges) minus $100 (primary payment allocated to nonlab charges) minus $75 (deductible) = $25 X .20 = $5. The applicable deductible amount charged is $75 and the applicable coinsurance amount charged is $5.

o If the primary payer is an EGHP, no deductible and coinsurance are charged since the primary payment of $100 allocated to nonlab charges is equal to the the $25 regular coinsurance and $75 deductible on the $200 in nonlab charges. (For the PS&R, record $75 deductible and $25 coinsurance.)

3696. MEDICARE SECONDARY PAYER (MSP) DATA EXCHANGE

A. Introduction.—HCFA initiatives have made available information pertinent to the identification of MSP beneficiaries. For example, selected contractors sent letters to aged beneficiaries advising them of the working aged provisions. Beneficiaries responded providing detailed information on working aged status. It is important that this information, as well as information on all other MSP situations known to you be made available to, and shared by, the entire contractor community. In order to facilitate and standardize the exchange of this information, a MSP Regional Data Exchange System (RDES) has been designed.

This exchange expands the lines of communication among contractors and reduces the duplication of effort to identify MSP sources. A timely exchange of MSP related information assures efficient and consistent development and recovery action.

Information on MSP situations is valid only as long as it is current. It is important to identify new MSP situations, update information on existing situations and revise the RDES. For example, contractors receiving data transfers from State Workers Compensation Commissions or other State Agencies are expected to include that information into the RDES. It is important to identify new working aged/spouse beneficiaries and disabled beneficiaries who may be entitled to compensation from other insurance to which Medicare plays a secondary role.

B. Tape Exchanges.—MSP data bases have been established in each region. Send prepared tapes as described in §§3696.1 and 3696.2 to the designated Regional Data Exchange Manager (RDEM) (Exhibit 1). The RDEM edits and merges all tapes received and returns a tape to you containing information on all identified beneficiaries in your region. Update your MSP data base with that information. You have the option of loading the entire regional file or selecting only your processing State(s) data. Specialty contractors; e.g., HHA or PEN load information from all areas they service. The RDEMs retain tape files from all other regions which you may request.

Maintain a current MSP data set containing the data elements listed in §3696.2 for all MSP situations for each beneficiary where Medicare has been determined not to be the primary payer. Where a data set is nonexistent, extract MSP data from independent sources (history or other files), thereby creating the necessary data set. Each situation has two options:

o Maintain your current MSP file when creating the data exchange tape and receive the RDEM updated exchange tape to update your current MSP file; or

o Convert your current MSP file to VSAM KSDS format and create your exchange tape. Use Prudential prepared programs to update your converted VSAM KSDS data set. This becomes your current MSP file.

Programs will be made available to you to update the converted VSAM KSDS data set you receive from the RDEM—the converted VSAM KSDS data set then becomes your current MSP file. However, if you select the first option, write a conversion program that takes your current MSP data set and creates the data exchange tape in the national standard format. (See §3696.1 for data transmission.)

C. Subsequent Tape Exchange.—Incorporate newly identified MSP situations and updates of existing situations into the RDES through subsequent tape exchanges.

o. Update Information to be Included by All Contractors.Incorporate all newly identified MSP situations or changes into the RDES. Regional/State tapes modified to reflect newly identified MSP situations to the prior tape submission will be exchanged on a quarterly basis — December, March, June and September. All tapes must be received by the RDEM servicing your region no later than the 10th day of the month following the end of each quarter. The RDEM will return the update tape no later than the 15th day of the following month. (See §3696.1 for data transmission.)

3696.1 MSP Data Exchange Tape Format.—All items described in the MSP Data Exchange Tape Record Layout in §3696.2 are "Required" if possessed by you in any format or file; i.e., place the information on the tape for the exchange. The following items are "MANDATORY":

- Health Insurance Claim Number (HICN);
- Beneficiary Last Name;
- Beneficiary First Name;
- Beneficiary State Code;
- Beneficiary Date of Birth;
- Beneficiary Sex Code;
- MSP Code;
- Intermediary/Carrier Code; and
- Maintenance Date.

When all "MANDATORY" items are not present, DO NOT INCLUDE that particular MSP situation for the beneficiary. "MANDATORY" means if a field is missing the entire record will reject.

A. Tape Characteristics.—

1. Label : NL**
2. Record Length : 650
3. Blocking Factor : 13,000
4. Track : 9
5. Density : 6250
6. Record Format : FB

**Designate on the external label whether a "complete file" or "processing State(s) only" is being sent to the RDEM.

B. MSP Data Exchange Tape Transmittal Shipment Sheet.—Use this form (Exhibit 3) for the exchange of MSP tapes. It serves as a control mechanism at both the sending and receiving contractor's site. It is self explanatory. Complete it in its entirety.

C. External Tape Label.—In addition to the tape transmittal shipment sheet, tape labels are required on tapes sent to and from the RDEM. The label must include the following information:

- Medicare MSP Regional Data Exchange;
- Region #____________;
- Contractor Name and ID Number;
- Data Set Name, Volume, Serial Number;
- Create Date; and
- Reel ______ of ______

D. Magnetic Tapes.—All magnetic tapes become the property of the receiver.

EXAMPLE 1: Tapes sent to RDEM become property of RDEM.

EXAMPLE 2: Tapes sent to contractor become property of contractor.

Therefore, the exact tape sent will not necessarily be returned.

3696.2 MSP Data Exchange Tape Record Layout.—

FIELD NAME	REC LEN	REC POS	DESCRIPTION

** CRITERIA FOR MSP ISSUES - Item 26 — "Effective Date" And Item 27 — "Termination Date"

"WORKING AGED"

"EFFECTIVE DATE":

- Should not be prior to January 1, 1983.
- The Medicare beneficiary's 65th birthday. (First day of month).
- The date the Medicare beneficiary becomes eligible on the Employer Group Health Plan (EGHP) if it is after his/her birthday.
- The date the Medicare beneficiary becomes entitled to Medicare if it is after his/her 65th birthday.

"TERMINATION DATE":

- The last day of the month in which the Medicare beneficiary retires.
- The day the Medicare beneficiary is terminated from the EGHP.
- The beneficiary's date of death.

"END STAGE RENAL DISEASE (ESRD)"

"EFFECTIVE DATE":

- Effective for all persons whose 12-month period began on or after October 1, 1981.
- The day the Medicare beneficiary became entitled to Medicare (kidney transplant).
- The day the Medicare beneficiary became entitled to Medicare (start of Home Dialysis treatment).
- The day the Medicare beneficiary became entitled to Medicare (Renal Dialysis treatment).

"TERMINATION DATE":

- 12 months from the Medicare effective date if the beneficiary had a self training dialysis course or kidney transplant.
- 9 months from the Medicare effective date if the beneficiary had a dialysis treatment.
- First day of the month in which the beneficiary becomes 65.

- The day the Medicare beneficiary is terminated from the EGHP.
- The beneficiary's date of death.

"AUTOMOBILE/NO-FAULT/OTHER LIABILITY"

"EFFECTIVE DATE":

- The date of the Medicare beneficiary's illness or accident (not prior to December 5, 1980).

"TERMINATION DATE":

- The date the case was settled with the liability insurance.
- The beneficiary's date of death.

"WORKERS' COMPENSATION

"EFFECTIVE DATE":

- Should not be prior July 1, 1966.
- The date of the job related illness or injury.
- The date Medicare became effective.

"TERMINATION DATE":

- The date of the Workers' Compensation.
- No termination date if insurer is responsible for medicals related to that injury or illness for life.
- The beneficiary's date of death.

"BLACK LUNG"

"EFFECTIVE DATE":

- Should not be prior to July 1, 1973.
- The date of the black lung related illness.
- The date Medicare became effective.

"TERMINATION DATE":

- The date of Department of Labor (DOL) settlement.

- No termination date if insurer is responsible for medicals related to that illness for life.
- The beneficiary's date of death.

"VETERANS ADMINISTRATION (VA)"

"EFFECTIVE DATE":

- Should not be prior to July 1, 1966.
- The first date of VA benefits.

"TERMINATION DATE":

- The date Medicare terminates.
- The date the VA is released from issuing benefits for the service related condition.
- The beneficiary's date of death.

FEDERAL PROGRAMS (PUBLIC HEALTH)

"EFFECTIVE DATE":

- Should not be prior to July 1, 1966.
- The first date of Federal Program (FP) benefits.

"TERMINATION DATE":

- The date Medicare terminates.
- The date the FP is released from issuing benefits.
- The beneficiary's date of death.

"SPOUSE WORKING AGED"

"EFFECTIVE DATE":

- Should not be prior to May 1, 1986.
- The Medicare beneficiary's 65th birthday. (First day of month).

- The date the Medicare beneficiary becomes eligible on his/her spouse's EGHP if it is on/or after his/her 65th birthday.

"TERMINATION DATE":

- The last day of the month in which the Medicare beneficiary's spouse retires.
- The day the Medicare beneficiary's spouse is terminated from the EGHP.
- The beneficiary's date of death.

"DISABLED PROVISION"

"EFFECTIVE DATE":

- Should not be prior to January 1, 1987.
- The date the disabled beneficiary became entitled to Medicare benefits.
- The date the Medicare beneficiary becomes eligible on the EGHP, if it is after the date he/she becomes entitled to Medicare.

"TERMINATION DATE":

- The day the disabled Medicare beneficiary is terminated from the EGHP.
- When the disabled beneficiary becomes entitled to aged benefits, terminate as disabled and classify as Working Aged.
- The beneficiary's date of death.

Exhibit 1 Regional Data Exchange Manager (RDEM).—The contractors listed below are the RDEMs' for the region specified.

REGION	CONTRACTOR/NAME/ADDRESS
I	Blue Cross/Blue Shield of Massachusetts 178 Forbes Rd. Suite 119 Braintree, MA 02184 617-849-4649

3697. COMPUTER PROGRAMS SUPPLIED BY HCFA TO SUPPORT MSP

A. Introduction.—MSP modules have been developed in an effort to standardize the processing of MSP claims. Updates to these modules will be furnished, as appropriate. The processes related to MSP have been identified below.

1. Review of Primary Claims (MSPPRIM).—Compares a claim for which Medicare is indicated as the primary payer, i.e., item 57 of the HCFA-1450 indicates Medicare as the primary payer on line A, against Medicare secondary data for the insured. If there is evidence of other insurance coverage for this claim, an indicator is set.

2. Review of Secondary Claims (MSPSEC).—Edits a claim for which Medicare is indicated as the secondary payer, i.e., item 57 of the HCFA-1450 indicates Medicare as the secondary payer on line B and another insurer as primary payer on line A. The situations involved are: EGHP, ESRD with EGHP, DIB with LGHP, auto medical/no-fault, liability, WC, and other federal agencies.

3. Payment Calculation for MSP Claims (MSPPAY).—Performs the following payment calculation processes for valid MSP claims:

- Computes the secondary payer payment amount, applicable deductible and coinsurance amounts;
- Reduces benefit utilization (if applicable); and
- Computes MSP savings.

B. Implementation.—Implementation of the MSPPRIM and MSPSEC modules are required. However, if you establish that you have systems in place which perform the same edits on all inputed claims on a prepayment basis and use the same data elements as MSPPRIM and MSPSEC, implementation of either one or both may be waived. Submit appropriate documentation to the RO for its review and determination.

To ensure uniformity of MSP calculations, implementation of the MSPPAY module by you is required. However, if you have a similar MSP calculation package you may apply for a temporary implementation delay due to other major system updates which may be needed to interface with MSPPAY. If you wish a temporary exemption from implementing MSPPAY submit documentation to your RO showing that your system generates the same output.

3697.1 Review of Primary Claims (MSPPRIM)

A. Introduction.—MSPPRIM is an MSP edit module that examines all inputed primary claims against beneficiary historical data searching for evidence of other insurance coverage. MSPPRIM performs the following functions:

- Receives appropriate data of the Medicare primary claim from the calling program.

- Obtains previously processed MSP data by calling a user module containing individual MSP beneficiary data obtained from prior claims.

- Returns to the calling module one of the following conditions after previously processed data for the beneficiary has been examined:

  - No previously processed MSP data for the beneficiary;

  - Other insurance coverage present during the period covered by the claim; or

  - Other insurance coverage present prior to, or after, the period covered by the claim.

B. Requisite MSPPRIM Data Elements and Return Codes.—The calling program must send the following data elements to MSPPRIM:

Field Name/Definition	Source
User Data	User specified
Test switch	User specified T = exhibit sending/returning data Space = do no exhibit
HICN	HCFA-1450, item 68A
Covers from date - Beginning service date of the period included on the claim (YYMMDD).	HCFA-1450, item 22
Covers thru date - Ending service date of the period included on the claim (YYMMDD).	HCFA-1450, item 22

MSPPRIM issues a return code indicating the result of processing the primary claim through this module. Return Code Table A contained in the Medicare Secondary Payment Technical Manual defines the specific return codes. Along with a return code, MSPPRIM also returns the data which caused the specific return code.

C. Proposed Claims Flow.—Take the following actions when you receive a claim from a provider for Medicare primary benefits:

- o Perform front-end edits;
- o Enter the claim into your processing system;
- o Control the claim;
- o Call MSPPRIM;
- o Receive return code from MSPPRIM; and
- o Process accordingly, i.e., suspend to develop or process to payment.

D. Installation.—You have received the MSP software on tape along with the Medicare Secondary Payment Technical Manual documenting and describing installation and execution of the MSP modules. The input and output data elements required of MSPPRIM are specifically referenced. You are responsible for installing, modifying, testing, and verifying the accurancy of the MSPPRIM module.

E. Processing Requirements.—The following requirements apply:

o Process all bills where Medicare is shown on line 57A of the HCFA-1450 as primary payer through the MSPPRIM module;

o MSPPRIM must interface with a user "MSP Control File," the definition of which is your responsibility. The "MSP Control File" is a generic term to indicate a file housing previously processed MSP data by beneficiary. The "MSP Control File" must contain all data elements required of MSPPRIM and MSPSEC but need not be limited solely to them;

o If MSPPRIM returns a code indicating another insurer, suspend, develop, and process the claim accordingly. If another insurer is not indicated, process the claim to payment;

o Resolve all error conditions and invalid MSP situations unveiled by MSPPRIM. Refer to the Medicare Secondary Payment Technical Manual for a list of return codes; and

o Update your "MSP Control File" after new and pertinent MSP claim information is received.

3697.2 Review of Secondary Claims (MSPSEC)

A. Introduction.—MSPSEC is an MSP edit module that reviews claim data for a valid MSP situation. The calling module sends to MSPSEC pertinent data from a claim in which Medicare has been determined to be a secondary payer. MSPSEC then performs the following functions:

o It reviews the claim for a valid MSP situation, e.g., age check, ESRD coordination period check, relationship check;

o If a valid MSP situation is found, the user's "MSP Control File" is automatically updated; or

o If an invalid MSP situation is found, MSPSEC returns to the calling module a code indicating the nature of the violation.

B. Requisite MSPSEC Data Elements and Return Codes.—The calling program must send the following elements, which are elaborated upon in the Medicare Secondary Payment Technical Manual, to MSPSEC:

Field Name/Definition	Source
User data	User specified
Test switch	User specified T = exhibit sending/returning data Space = do not exhibit data
HICN	HCFA-1450, item 68 (the Medicare line)
Patient's birth date - Beneficiary's date of birth in format (CCYYMMDD).	HCFA-1450, item 12
Entitlement date - Beneficiary's date of Medicare A/Medicare B eligibility.	Query/Reply from HCFA
Covers from date - Beginning service date of the period included on the claim.	HCFA-1450, item 22 (YYMMD
Covers thru date - Ending service date of the period included on the claim.	HCFA-1450, item 22 (YYMMDD)
Number other payers - Number of other payers that are primary to Medicare.	Determined by the calling program
Other payer data - The following information through "employer location" can occur twice, i.e., information about two insurers can be accepted by MSPSEC.	
Conditional payment - Denotes whether conditional payment has been requested. (Y = claim is conditional payment; N = claim is not conditional payment).	HCFA-1450, items 46-49 (zero amount with appropriate value code indicates conditional payment)
MSP code - Code identifying the other payer.	HCFA-1450, items 46-49 (value codes 12-16 and 41-43)

Field Name/Definition	Source
Payer identification number - Number identifying the organization from which the provider might expect some payment for the bill.	From your own system, if available
Other payer ID - Insured's unique identification number assigned by the payer.	HCFA-1450, item 68
Payer name - Name identifying the payer organization from which the provider might expect some payment for the bill.	HCFA-1450, item 57
Insured's name - Full name of the insured.	HCFA-1450, item 65
Insured's sex - Code indicating the sex of the insured.	HCFA-1450, item 66
Patient relationship - Code indicating the relationship of the patient to the insured.	HCFA-1450, item 67
Group name - Name of the group or plan through which the insurance is provided.	HCFA-1450, item 69
Insurance group number - Identification number, control number, or code assigned by the health insurance carrier to identify the group under which the individual is covered.	HCFA-1450, item 70
Employment information data - Code indicating whether the employment information given in the related areas applies to an insured, the patient or the patient's spouse.	HCFA-1450, item 71
Employment status code - Code used to define the employment status of the individual.	HCFA-1450, item 72
Employer name - Name of the employer that provides health care coverage for the individual.	HCFA-1450, item 73
Employee identification number - Identification number assigned by the employer to the individual.	HCFA-1450, item 74
Employer location - Address of the employer of the insured individual.	HCFA-1450, item 75

Document control number - A unique patient control number or document control number used by the provider or intermediary to distinguish each specific claim.	From a nonrequired item on the HCFA-1450 or from your system, if available.

MSPSEC can return up to two return codes, one for payer 1 and the other for payer 2. The return code indicates the result of processing the secondary claim through the MSP edit module. Return Code Table B in the Medicare Secondary Payment Technical Manual defines the specific return codes.

C. Proposed Claims Flow.—Take the following actions when you receive a claim from a provider or beneficiary for MSP benefits:

- o Perform front-end edits;
- o Enter the claim into your processing system;
- o Control the claim;
- o Call MSPSEC;
- o Receive return code from MSPSEC; and
- o Process accordingly, i.e., suspend for development or process to payment.

D. Installation.—You have received the MSP software on tape along with the Medicare Secondary Payment Technical Manual documenting and describing installation and execution of the MSP modules. The input and output data elements required of MSPSEC are referenced in the Medicare Secondary Payment Technical Manual. You are responsible for installing, modifying, testing, and verifying the accuracy of the MSPSEC module.

E. Processing Requirements.—The following requirements apply:

o Process all bills where Medicare is shown on line 57B of the HCFA-1450 as secondary payer through the MSPSEC module;

o MSPSEC must interface with a user "MSP Control File," the definition of which is your responsibility. The "MSP Control File" is a generic term to indicate a file housing previously processed MSP data by beneficiary. The "MSP Control File" must contain all data elements required of MSPPRIM and MSPSEC but need not be limited solely to them;

o Resolve all error conditions and invalid MSP situations unveiled by MSPSEC. Refer to the Medicare Secondary Payment Technical Manual for a list of return codes; and

o If MSPSEC returns a code indicating a match with an existing record, allow the claim to continue through your system to payment. If a match does not occur, MSPSEC creates a new record automatically for the "MSP Control File." Writing the new record ensures that any future claims on that beneficiary will be flagged as having other insurance. Continue to process the claim.

3697.3 Payment Calculation for MSP Claims (MSPPAY)

A. Introduction.—MSPPAY accepts data from the user's system and performs the following:

- Computes the MSP payment, applicable deductibles and coinsurance amounts;
- Reduces benefit utilization days and amounts using the amount paid by the other payer;
- Computes the MSP savings amount depending upon the type of other payer and whether the claim is fully or partially paid; and
- Returns status codes along with the MSP payment computation and savings data to the calling module.

Once MSPPAY passes back information to your claims processing system, you can retrieve it in any format desired, e.g., savings reports, management tools, EOMB generation. The reports can be tailored to your specific needs.

B. Requisite MSPPAY Input Data Elements.—The calling program must send the following data elements to MSPPAY:

Field Name/Definition	Source
Test switch	User specified T = exhibit sending/returning Space = do not exhibit data
Type of bill - Code indicating the type of bill (inpatient, outpatient, etc.).	Positions 1-2 = Type of claim: Medicare A (PA), Home Health (HH), Outpatient (OP) Position 3 = frequency code: HCFA-1450. A zero indicates a fully paid claim.
Number of other payers	Determined by calling program as the number of other payers that have made primary payments
Other payer data - MSP Code and MSP Amount comprise Other Payer Data which can occur 10 times.	

Field Name/Definition	Source
MSP Code - Code identifying the other payer	HCFA-1450, items 46-49 (value codes 12-16 and 41-43)
MSP Amount - Amount paid by the other payer	HCFA-1450, items 46-49 (value amount)
Total covered charges - Total charges covered by Medicare.	Computed by the calling program
Blood deductible - Total cash blood deductible.	As determined in your system after query
Cash deductible - Medicare cash deductible.	As determined in your system after query
Regular coinsurance days 1st yr - Medicare coinsurance days charged in in the year of admission.	Computed by calling program
Regular coinsurance rate 1st yr - Medicare coinsurance rate charged in year of admission	Determined by calling program
Regular coinsurance amount 1st yr - Medicare coinsurance days charged in the year of admission.	As determined in your system after query
Regular coinsurance days and yr - Medicare coinsurance days charged in the year of discharge where the bill spans two calendar years.	Computed by calling program
Regular rate 2nd yr - Medicare coinsurance charged in the year of discharge where the bill spans two calendar years.	Determined by calling program
Regular coinsurance amount 2nd yr - Medicare coinsurance amount charged in the year of discharge where the bill spans two calendar years.	As determined in your system after query
Lifetime reserve coinsurance days 1st yr - Medicare lifetime reserve days charged in the year of admission.	Computed by the calling program

Field Name/Definition	Source
Lifetime reserve coinsurance rate 1st yr - Medicare lifetime reserve amount charged in the year of admission.	As determined in your system after query
Lifetime reserve coinsurance amount 1st yr - Medicare lifetime reserve days charged in the year of discharge where the bill spans two calendar years.	Computed by calling program
Lifetime reserve coinsurance rate 2nd yr - Medicare lifetime reserve rate charged in the year of discharge where the bill spans two calendar years.	Determined by calling program
Lifetime reserve coinsurance amount 2nd yr - Medicare lifetime reserve amount charged in the year of discharge where the bill spans two calendar years.	As determined in your system after query
Total coinsurance amount - Total coinsurance amount chargeable to the beneficiary.	Computed by the calling program
Full days - The inpatient Medicare days occurring in the first 60 days in a single spell of illness.	Computed by the calling program
Covered days	HCFA-1450, item 23
PPS indicator	Determined by the calling program
DRG amount - Total prospective payment amount including any other payment.	Computed by PRICER
Indirect teaching - Estimated adjustment for the indirect cost of medical education.	Computed by PRICER
Pass thru per diem - Payment for those items that are reimbursed on a reasonable costs basis.	Determined by calling program
Medicare reimbursement amount - Amount paid to the provider and patient by Medicare.	Computed by the calling program

Field Name/Definition	Source
Provider Payment Amount - Reimbursement made to the provider.	Computed by the calling program
Payment to Patient - Reimbursement paid to the patient.	Computed by the calling program.
Gramm-Rudman-Hollings Percent - A percentage used to reduce Medicare payment.	Determined by the calling program.
Charges Not Subject to Deductible and Coinsurance - Charges reimbursed at 100 percent.	Determined by the calling program.

C. Requisite MSPPAY Output Data Elements.—MSPPAY will return the following data to the calling program. Refer to §3697.3B for field definitions not reflected below.

Field Name/Definition	Source
Return code	Determined by MSPPAY and indicates the results of processing this secondary claim (see Return-Code Table C in the Medicare Secondary Payment Technical Manual)
Blood deductible	The source of all of the following is the calling program, possibly modified by MSPPAY.
Cash deductible	
Regular coinsurance days 1st day yr	
Regular coinsurance rate 1st day yr	
Regular coinsurance amount 1st yr	
Regular coinsurance days 2nd yr	
Regular coinsurance rate 2nd yr	
Regular coinsurance amount 2nd yr	
Lifetime reserve coinsurance days 1st yr	

Field Name/Definition	Source
Lifetime reserve coinsurance rate 1st yr	
Lifetime reserve coinsurance amount 1st yr	
Lifetime reserve coinsurance days 2nd yr	
Lifetime reserve coinsurance rate 2nd yr	
Lifetime reserve coinsurance amount 2nd yr	
Medicare A regular coinsurance days - Total Medicare coinsurance days chargeable to the beneficiary.	
Medicare A lifetime reserve coinsurance days - Total Medicare lifetime reserve days chargeable to the beneficiary.	
Medicare A coinsurance days - Total Medicare coinsurance and lifetime reserve days chargeable to the beneficiary.	
Total coinsurance amount	
Full days	
Utilized days - Days of care chargeable to Medicare.	
Cost report days - Days credited to provider's PS&R report as Medicare days.	
Medicare reimbursement amount	
Provider payment amount	
Payment to patient	
MSP blood deductible - Offset to the cash blood deductible due from the beneficiary.	
MSP cash deductible - Offset to the cash deductible due from the beneficiary.	
MSP total coinsurance amount - Offset to the coinsurance due from the beneficiary.	

best copy available

Field Name/Definition	Source
MSP covered days - Days covered by the primary payer.	
Medicare interim reimbursement - Medicare interim reimbursement without reduction of deductible and coinsurance.	
Savings MSP Code 12 - Amount saved by Medicare when EGHP has made a payment for a WA beneficiary.	
Savings MSP Code 13 - Amount saved by Medicare when EGHP has made a payment for an ESRD beneficiary.	
Savings MSP Code 14 - Amount saved by Medicare when another insurer has made payment in an auto, no-fault, or liability claim.	
Savings MSP Code 15 - Amount saved by Medicare when WC payment has been made.	
Savings MSP Code 16 - Amount saved by Medicare when PHS or other Federal agency made payment.	
Savings MSP Code 41 - Amount saved by Medicare when BL payment has been made by DOL.	
Savings MSP Code 42 - Amount saved by Medicare when payment has been made by VA.	
Savings MSP Code 43 - Amount saved by Medicare when LGHP has made a payment for a DIB beneficiary.	
Savings total - Total amount saved by Medicare when Medicare is the secondary payer and the primary payer has made a payment (for MSP value codes 12, 13, 14, 15, 16, 41, 42, and 43).	

MSP EGHP Payment Subject to Deductible and Coinsurance - Amount excluding "MSP cash deductible," "MSP blood deductible," and "MSP total coinsurance amount" paid by an EGHP or LGHP to be reflected on the PS&R report. This amount, when added to the "MSP cash deductible," "MSP blood deductible," and the "MSP total coinsurance amount," reflects the total primary payer amount. The primary payer amount designated to lab charges reimbursed at 100 percent is not reflected in this figure.

MSP Non-EGHP Payment Subject to Deductible and Coinsurance - Amount paid by a non-EGHP to be reflected on the PS&R report. The primary payer amount designated to lab charges reimbursed at 100 percent is not reflected in this figure.

D. Installation.—You have received the MSP software on tape along with the Medicare Secondary Payment Technical Manual documenting and describing installation and execution of the MSPPAY Module. The input data elements and output data elements required of MSPPAY are referenced in the Medicare Secondary Payment Technical Manual. You are responsible for installing, modifying, testing, and verifying the accuracy of MSPPAY module.

E. Processing Requirements.—The following processing requirements apply:

o Process all MSP inpatient hospital and SNF, HHA and all outpatient claims through MSPPAY to determine MSP payment amount, deductible, coinsurance and savings;

o Claims to be processed by MSPPAY must be in ready-to-pay status, e.g., the amount that Medicare would have paid as the primary payer, the type of MSP situation, the amount of other insurer payment, information regarding outstanding deductible and coinsurance must be available to MSPPAY;

o All data elements required by MSPPAY must be passed to it. Section 3697.3B lists these data elements. The Medicare Secondary Payment Technical Manual also contains more extensive information about them.

o You are responsible for resolving error conditions reflected as return codes. These return codes are detailed in Return Code Table C of the Medicare Secondary Payment Technical Manual.

3698. SERVICES RENDERED IN NONPARTICIPATING PROVIDERS

A. Services in Nonparticipating Domestic Hospital.—Payment may be made for certain Part A inpatient and Part B outpatient hospital services provided in a nonparticipating U.S. hospital where they are necessary to prevent the death or serious impairment of the health of the individual. Because of the threat to the life or health of the individual, the use of the most accessible hospital equipped to furnish such services is necessary. Items and services furnished in a domestic nonparticipating hospital may be reimbursed if the following apply:

- o The hospital meets the definition of an emergency hospital. (See §3698.2.)
- o The services meet the definition of emergency services. (See §3698.1.)
- o The hospital is substantially more accessible from the site of the emergency than is the nearest participating hospital. (See §3698.12.)

B. Beneficiary Services in Canada and Mexico.—Items and services furnished outside the United States are excluded from coverage except for the following Canadian and Mexican services:

- o Emergency inpatient hospital services where the emergency occurred:
  - — While the beneficiary was physically present in the U.S. (§3698.4(d)(1)).
  - — In Canada while the beneficiary was traveling without unreasonable delay by the most direct route, between Alaska and another State. (See §3698.4(d)(2).)
- o Emergency or nonemergency inpatient hospital services furnished in a Canadian or Mexican hospital closer to, or substantially more accessible from the beneficiary's U.S. residence than the nearest participating U.S. hospital which was adequately equipped to deal with and available to provide treatment of the illness or injury. (See §§3698.5 and 3698.13.)
- o Physician and ambulance services furnished in connection with, and during a period of, covered foreign hospitalization. Program payment may not be made for any other Part B Medical and Other Health Services, including outpatient services furnished outside the U.S. (See §3698.6.)
- o Christian Science services furnished under specified conditions in a Christian Science sanatorium. (See §3698.8.)

NOTE: The term "United States" means the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, Northern Mariana Islands, American Samoa and, for purposes of services rendered on a ship, the territorial waters adjoining the land areas of the U.S.

For Medicare purposes, services rendered aboard a ship in an American port or on the same day the ship arrived at, or departed from, that port are considered to have been rendered in American waters. Services not furnished in port or on the day of arrival or departure are considered to have been furnished outside the U.S. territorial waters.

3698.1 Establishing an Emergency.—Claims for emergency services must be accompanied by a physician's statement describing the nature of the emergency and stating that the services were necessary to prevent the death, or the serious impairment of, the beneficiary. A statement that an emergency existed is not sufficient. In addition, when inpatient services are involved, the statement must include the date when, in the physicians' judgment, the emergency ceased.

The finding of whether the patient's condition required emergency diagnosis or treatment is ordinarily based upon the physician's evaluation of the patient's condition immediately upon the beneficiary's arrival at the hospital.

However, the emergency nature of the situation may have been assessed by a physician who attended the patient where the incident resulting in hospitalization occurred (for example, a heart attack or an automobile accident). In these cases, the attending physician who ordered the hospitalization may substantiate the claim that emergency hospitalization was necessary.

Most emergencies are of relatively short duration so that only one bill is submitted. Generally, only one physician's statement is necessary. However, in the rare situation where an emergency continued over an extended period, subsequent requests for payment must be accompanied by a physician's statement containing sufficient information to indicate clearly that the emergency situation still existed. A statement that the emergency continued to exist is not acceptable.

Request additional information to support a finding that the services were emergency services from the physician, the hospital, and others (e.g., the police department at the scene of an accident).

Medical necessity can be documented by the physician on a HCFA-1771, Attending Physician's Statement and Documentation of Medicare Emergency (see §3699.5) or by the beneficiary's medical records.

3698.2 Qualifications of an Emergency Services Hospital.—An emergency services hospital is a nonparticipating hospital which meets the requirements of the law's definition of a "hospital" relating to full-time nursing services and licensure under State or applicable local law. (See §3010D and F.) (A Federal hospital need not be licensed under State or local licensing laws to meet this definition.) In addition, the hospital must be primarily engaged in providing, under the supervision of doctors of medicine or osteopathy, services of the type that §3010 describes in defining the term hospital.

It must not be primarily engaged in providing skilled nursing care and related services for patients who require medical or nursing care. (See requirement "a" of the definition of a SNF in §3020.) Psychiatric hospitals can qualify as emergency hospitals.

3698.3 Claims From Hospital-Leased Laboratories Not Meeting Conditions of Participation.—Services furnished by a laboratory that does not meet the hospital laboratory conditions of participation and is operated under a lease arrangement in a domestic emergency hospital are covered only if they are emergency inpatient services reimbursable under Part A.

A carrier may send you a claim from such a laboratory and identify it as an "Emergency Lead." Check your files to see if a claim for emergency services was filed and if so, determine whether the laboratory services were furnished during the period of emergency. If the emergency claim was forwarded to the appropriate intermediary for processing, enter the date received on the laboratory claim.

If no emergency claim was filed, or laboratory services were not furnished in the period covered by the emergency claim, develop the claim as a possible emergency. Include the laboratory claim with any subsequent claim.

If no emergency is alleged, record on the claim that no emergency existed and disallow it.

3698.4 Coverage Requirements for Emergency Hospital Services Furnished in Canada or Mexico.—The following requirements must be met for payment to be made for emergency services received by Medicare beneficiaries in Canadian or Mexican hospitals:

- The hospital furnishing must meet the definition of an emergency hospital. (See §3698.2.) It must be licensed under Canadian or Mexican law.
- The services meet the criteria of emergency services. (See §3698.14.)

Secure a statement from the beneficiary or representative that indicates:

- The point of entry into Canada from the U.S;
- The intended point of departure from Canada;
- The route traveled at the time of the emergency;
- An explanation of any apparent deviation from the intended route; and
- An explanation of any nonroutine stopover.
- The foreign hospital must be closer to or substantially more accessible from the site of the emergency than the nearest U.S. hospital which was adequately equipped and available to treat the illness or injury. (See §3698.13.)
- The conditions in either (1) or (2) below must be met.

1. Emergency Occurred in the U.S.—If the individual was physically present in the U.S. at the time the emergency occurred, the individual's reason for departure from the U.S. must have been specifically to obtain treatment at the foreign hospital. Services are not covered where the person's departure from the U.S. is part of a trip abroad and the Candian or Mexican hospital is more accessible simply because he was in the process of travel. For example, the airplane on which he was traveling could not readily return to permit the person's removal.

2. Emergency Occurred in Canada.—If the emergency occurred in Canada, the beneficiary must have been traveling without unreasonable delay by the most direct route, between Alaska and another State. Benefits are not payable if the emergency occurred while a beneficiary was vacationing. The requirement of travel without unreasonable delay by the most direct route will be considered met if the emergency occurred while the beneficiary was enroute betwen Alaska and another State by the shortest practicable route, or while making a necessary stopover in connection with such travel.

NOTE: An emergency occurring within the Canadian inland waterway between the States of Washington and Alaska is considered to have occurred in Canada.

Ordinarily, the "shortest practicable route" is the one that results in the least amount of travel in Canada, consistent with the mode of travel used between the point of entry into Canada and the intended point of departure. The amount of travel in the U.S., prior to entering Canada is not pertinent. A route involving greater travel within Canada may be considered the "shortest practicable route" if the additional travel resulted in a saving of time or was necessary because of such factors as road or weather conditions, the age, health, or physical condition of the traveler, the need to make suitable travel arrangements, or obtain acceptable accommodations.

However, the individual would be considered to have deviated from the "shortest practicable route" if the detour was unrelated to the purpose of reaching his destination (e.g., for the principal purpose of sightseeing or vacationing).

The term "necessary stopover" means a routine stopover for rest, food, or servicing of the vehicle, and a nonroutine stopover (even though of significant duration) caused by such factors as unsuitable road or weather conditions, the age, health, or physical condition of the traveler, the need to make suitable travel arrangements, or to obtain acceptable accommodations.

3698.5 Services Furnished in a Foreign Hospital Nearest to Beneficiary's U.S. Residence.--Coverage is provided for inpatient hospital services furnished in a Canadian/Mexican hospital which is closer to, or substantially more accessible from, the beneficiary's U.S. residence than the nearest available participating U.S. hospital which is adequately equipped to deal with the illness or injury, whether or not an emergency existed and without regard to where the illness or injury occurred.

"Residence" means the beneficiary's fixed and permanent home to which he intends to return whenever he is away or a dwelling where the beneficiary periodically spends some time (e.g., a summer home).

The Canadian or Mexican hospital must meet accreditation requirements equivalent to JCAH standards. The Canadian Council on Hospital Accreditation (CCHA) has equivalent requirements. Thus, Canadian hospitals accredited by the CCHA meet the qualifying requirements. In the case of Mexican hospitals, the determination is made by the Dallas or San Francisco RO, depending upon the hospital's location.

See §3698.12B for discussion of accessibility criteria.

Some claims for services furnished in a foreign hospital nearest to the beneficiary's U.S. residence will not be "emergency." In these nonemergency situations, it may be necessary to deny payment in whole or part, (even though it has been approved with regard to accessibility) because the services are not medically reasonable and necessary or involve custodial care (i.e., exclusions under §1862(a)(1) or (9)).

Where a denial is made in a nonemergency foreign claim for reasons other than accessibility (e.g., cosmetic surgery benefits exhausted), the usual beneficiary denial notice procedures in §3717 apply. However, in the case of denials under the medical necessity and custodial care exclusions, apply the waiver of liability considerations under §1879 before issuing the denial notice.

Examine claims involving medical necessity or custodial care denials to determine if there is any evidence that the beneficiary (or the person acting on behalf of the beneficiary) was aware that he/she did not require, or no longer required, a covered level of care. The foreign hospital, since it is not participating, is not under any obligation to furnish a written notice of noncoverage to a beneficiary in order to protect itself from being held liable under the §1879 waiver of liability provision. However, there may be instances where the medical records of the denied foreign claim show that the beneficiary was advised that he/she did not require, or no longer required, Medicare covered services, (e.g., written notice of noncoverage from the hospital's staff or a prior HCFA denial notice). It will probably be rare where a finding is made that the beneficiary had knowledge of noncoverage, so that, generally, payments are made under the waiver of liability provision. Use appropriate denial paragraphs in §§3722.5ff. for determinations involving the waiver of liability provision.

3698.6 Coverage of Physician and Ambulance Services Furnished Outside U.S.--Physician and ambulance services which meet the coverage requirements of the Act and which are furnished in connection with inpatient services meeting the requirements of §§3698.4 or 3698.5 are covered under Part B. When they are met, Part B payment is possible even though there may be no Part A payment because Part A benefits are exhausted or there is no Part A entitlement.

Where inpatient services in a Canadian or Mexican hospital are covered, make payment for:

- Physicians' services rendered to the beneficiary while an inpatient.
- Physicians' services rendered to the beneficiary outside the hospital on the day of admission as an inpatient, provided the services were for the same condition for which the beneficiary was hospitalized.
- Services of a Canadian ship's physician who furnished emergency services in Canadian waters on the day the beneficiary is admitted to a Canadian hospital for a covered emergency stay.

- Ambulance services, where necessary, for the trip to the hospital in conjunction with the beneficiary's admission. Return ambulance trips from a foreign hospital are not covered.

In cases involving foreign ambulance services, the general requirements in §3647 are applicable, subject to the following special rule: If the foreign hospitalization was covered as emergency services, the necessity and the destination requirements are met.

The definition of "physician," for purposes of coverage of services furnished outside the U.S., includes a foreign practitioner, provided the practitioner is legally licensed to practice in the country in which the services were rendered.

Only the beneficiary may file for Part B benefits; the assignment method may not be used. However, where the enrollee is deceased, the rule for settling Part B underpayments are applicable: reimbursement may be made to the foreign physician or ambulance company on the basis of an unpaid bill, provided the physician or ambulance company accepts the carrier's reasonable charge determination as the full charge.

The regular deductible and coinsurance requirements apply to physicians' and ambulance services.

3698.7 Claims for Services Furnished in Canada and Mexico to Qualified Railroad Retirement Beneficiaries.—

A. Canadian Claims.—Under the Railroad Retirement Act, payment is made to QRRBs by the RRB for covered hospital services furnished in Canadian hospitals as well as in the U.S. Physician and ambulance services are not covered by the Railroad Retirement Act; however, under an agreement between HCFA and RRB, if the QRRB claims payment for Part B services in connection with Canadian hospitalization, RRB processes the Part B claim. In such cases the RRB determines:

- Whether the requirements in §§3698B and 3698.6 are met in regard to the inpatient services; and
- Whether the physician and/or ambulance services were furnished in connection with the services.

If either is not met, RRB denies the claim and notifies the beneficiary. If met, it refers the claim to Travelers to determine if the coverage critieria for physician and/or ambulance services are met.

Forward all claims for services furnished QRRBs in Canada to:

Railroad Retirement Board
844 Rush Street
Chicago, IL 60611

If a QRRB is a resident of Canada, Medicare payments are reduced by the amount of payment made for the same services by a Canadian Provincial Health Insurance Plan.

B. Mexican Claims.--The RRB does not pay for health care services furnished in Mexico. Forward all claims for inpatient hospital services and/or related physician or ambulance services furnished in Mexico to QRRBs to either the Dallas or San Francisco RO (whichever services the hospital that provided the inpatient services).

3698.8 Nonemergency Part B Medical and Other Health Services.--

A. Coverage.--Nonemergency services may be paid for when furnished Medicare beneficiaries if the coverage requirements for the services are met, and if such services are not covered as Part A emergency inpatient services.

Program payment may be made for the following Part B medical and other health services furnished by a U.S. nonparticipating hospital on a nonemergency basis:

- Diagnostic x-ray tests, diagnostic laboratory tests and other diagnostic tests. (The hospital must meet the applicable conditions of participation for the services.)
- X-ray, radium, and radioative isotope therapy, including materials and services of technicians. (The hospital must meet the applicable conditions of participation for these services.)
- Services of residents and interns, nurses, therapists, etc., which are directly related to the provision of x-ray or laboratory or other diagnostic test, or the provisions of x-ray or radium therapy.
- Prosthetic devices (other than dental) which replace all or part of an internal body organ (including contiguous tissue) or replace all or part of the functions of a permanently inoperative or malfunctioning internal body organ, including replacement of such devices.
- Leg, arm, back, and neck braces, trusses and artificial legs, arms, and eyes, including replacement, if required, because of a change in the patient's physical condition.

B. Distinction Between Emergency and Nonemergency Medical and Other Health Services.--Emergency coverage, particularly Part B emergency outpatient coverage, is broader than the nonemergency Part B Medical and Other Health Services coverage provisions. When the emergency requirements are met, program payment may be made to an emergency hospital for the full range of outpatient hospital services. In addition to the nonemergency coverage list, emergency coverage includes hospital services (including drugs and biologicals--blood is a biological--which cannot be self-administered), "incident to physicians' services rendered to outpatients," and outpatient physical therapy and speech pathology. The latter two services are not covered under the nonemergency provisions. Payment for "incident to" services must be under the emergency rather than the nonemergency provisions.

Whether Part B payment is made under the emergency or nonemergency provisions, such payment may only be made for diagnostic laboratory tests furnished by an emergency hospital if the hospital meets the conditions of participation relating to hospital laboratories, and such payment may only be made for radiology services furnished by an emergency hospital if the hospital meets the conditions of participation relating to radiology departments. Part B payment may be made for diagnostic laboratory tests furnished by a nonparticipating hospital which is not an emergency hospital only if the hospital laboratory meets the conditions of coverage of independent laboratories and for radiology services furnished by such a hospital only if the hospital meets the conditions of participation relating to radiology departments.

C. Claims Processing.—The annotation "nonemergency-hospital accepts assignments" should be entered in Remarks by the hospital. If the patient filed, enter in Remarks "nonemergency patient filed." If it is determined that some or all of the services are not covered under the nonemergency provisions, return the claim to the hospital (if hospital-filed) or to the beneficiary (if patient-filed) to determine whether the services might be covered as emergency services.

3698.9 Canadian or Mexican Christian Science Services Claims.—

A. Coverage.—Payment may be made for otherwise covered Christian Science services furnished in a Canadian/Mexican Christian Science Sanatorium under the same requirements of §§3698B and 3698.6, provided that the foreign sanatorium is closer to or more accessible from the beneficiary's residence in the U.S., (or, if applicable, the site of the emergency) than the nearest U.S. Christian Science Sanatorium. This is true even where there is a closer or more accessible general hospital. For accreditation, it is sufficient that the Christian Science Sanatorium be certified by the First Church of Christ, Scientist, in Boston, MA.

B. Claims Processing.—Send claims for services in a Christian Science Sanatorium to Aetna Life and Casualty for accessbility and/or emergency determination and processing. (See §3699.3.) If these requirements are not met Aetna denies the claim.

3698.10 Elections to Bill for Services Rendered in Nonparticipating Hospitals.—

A. Nonparticipating U.S. Hospitals.—Nonparticipating U.S. hospitals meeting emergency requirements have the option to bill the program during a calendar year by filing an election with you. If an election is filed, the hospital submits claims for the following services furnished all Medicare beneficiaries throughout the year:

- Emergency inpatient services.
- Emergency outpatient services.

In addition, the hospital may not bill any beneficiary beyond deductibles, coinsurance, and noncovered services in that calendar year. It must also agree to refund any monies incorrectly collected. The hospital may not file an election for the calendar year if it has already charged any beneficiary for covered services furnished in that year.

If the hospital does not file a billing election, the beneficiary can file for those services. The beneficiary may request information from you or the provider as appropriate.

During November of each year, send a letter to nonparticipating domestic hospitals that elected to bill for the current year and wish to continue. (See Exhibit 1.) Also, during November of each year, send a letter to each domestic hospital giving it an opportunity to elect to bill Medicare. (See Exhibit 2.)

For hospitals that request, during the year, to bill the program, send the model letter in Exhibit 3.

B. Billing for Services Furnished Prior to Certification.—The following rules apply if a bill is received for services rendered before and after the provider certification (participation) date:

- Pay PPS hospitals the DRG, if the date of discharge is after the certification date.
- Pay other hospitals for services rendered after the certification date. However, include services before certification date on the cost report.

C. Canadian/Mexican Hospitals.—Canadian and Mexican hospitals may submit a statement to the appropriate intermediary stating that they will bill for all claims. If they do not, the beneficiary may claim the payment. When you are aware that a Canadian or Mexican hospital is willing to bill the program for all covered services, solicit the hospital's agreement to:

- Bill for all covered services for the calendar year (except for deductible and coinsurance amounts);
- Not to bill the beneficiary for any amounts other than for deductible and coinsurance and charges for noncovered services; and
- Refund to the beneficiary any monies incorrectly collected.

The hospital may not file an election for a calendar year if it has already charged any beneficiary for covered services furnished during that year.

3698.11 Submitting Claims.—The beneficiary or a hospital which has elected to bill the program submits emergency claims for payment to the appropriate intermediary for evaluation of accessibility or emergency factors.

NOTE: See §3699.3 Processing Claims - For designated intermediaries.

If you receive a claim from a U.S. hospital that has not filed an election to bill the program, contact the hospital to determine if it is qualified and wishes to elect to bill the program. If the hospital declines, deny the hospital's claim and secure a claim from the beneficiary.

Similarly, whenever you receive a beneficiary-filed claim, ascertain if the hospital has filed a billing election. If it has, deny the beneficiary's claim and contact the hospital to secure the claim.

3698.12 Processing Claims.—All claims are subject to development to determine whether the Medicare secondary payer provisions apply. (See §§3407ff., 3419, 3489, 3490, and 3491.) Follow procedures in §§3686ff.

A. Nonparticipating Hospitals.—The processing intermediary is responsible for making accessibility and medical emergency determinations for any physician and ambulance services.

1. Claims Subject to Technical Denials.—The following claims are subject to technical denial:

- Foreign nonemergency services claims if:
  - The residence requirement is not met. (See §3698.5.)
  - The hospital rendering the service does not meet JCAH or equivalent accreditation requirements set by a hospital approval program of the country in which the hospital is located.
  - The accessibility requirements are not met. (See §3698.5.)
- Canadian travel claims when the requirements in §3698.4 are not met.
- Emergency services claims in which the hospital rendering the service does not meet the definition of an emergency hospital.
- Claims for which the query response shows the beneficiary is not entitled to benefits.
- Any foreign claim when Part A benefits are exhausted and no Part B physician or ambulance claim is involved.

2. Either the Accessibility or Medical Emergency Requirements are Not Met.—Deny the claim, but retain the claim in case of appeal.

NOTE: Even though Part A or Part B emergency services furnished by nonparticipating U.S. hospitals are denied, Part B payment may be possible for Medical and Other Health Services specified in §3110. Retain the claim in case of appeal.

3. Emergency Services Partially Denied.—When the medical emergency is approved but not for the entire period, process and make payment for the covered period.

B. Canadian and Mexican Part B Physician and Ambulance Claims.—Attach any Part B claim for foreign physician and ambulance services to the corresponding Part A claim. If it is not attached:

- Associate the Part B claim with any corresponding Part A claim previously filed.
- Process the Part A claim, but hold the Part B claim until completing action on the Part A claim.

If you determine that the inpatient services were covered, send the physician and/or independent ambulance claim to the designated carrier for processing and payment. (See §3699.4.)

If the Part A claim is denied on the basis of accessibility of medical emergency, deny the Part B claim, and send a denial letter to the claimant. Retain copies in case of appeal.

NOTE: Even though Part A benefits are totally or partially exhausted, payment may be made by the carrier for physician and independent ambulance services rendered if all coverage requirements are met.

If a Part A claim was partially denied because the emergency terminated, make a decision on the claim and any provider-based ambulance claim. Send copies to the appropriate carrier for processing.

3698.13 Accessibility Criteria.—

A. Emergency Claims.—Use the same critieria in domestic and foreign emergency claims. This includes services in a foreign Christian Science Sanatorium (see §3698.8) and Canadian Travel claims. (See §3698.4.)

The regulations state that your determination must take into account such matters as relative distances of a participating hospital, road conditions. Consider whether the nature of the emergency required immediate transportation to the nearest available hospital (i.e., the nonparticipating hospital) or, without hazard to the patient, would have permitted the additional transportation time to take the patient to a more distant participating hospital in the same general area .

Do not consider in your determination such factors involving selection of a hospital which reflect the personal preferences of the individual or physician, (e.g., physician does not have staff privileges at the participating hospital) nearness to beneficiary's residence, presence of previous medical records at the nonparticipating hospital, cost, or type of accommodations available.

The following sections discuss documentation of the accessibility requirement and provide guidelines for making a determination where the participating hospital is:

- Closer to the site of the emergency than is the admitting nonparticipating hospital;
- Fifteen or fewer miles farther from the site of the emergency than is the nonparticipating hospital; or
- Sixteen or more miles farther from the site of the emergency than is the admitting nonparticipating hospital.

In urban and suburban areas, where both participating and nonparticipating hospitals are similarly available, it is presumed, in the absence of clear and convincing evidence to the contrary, that the services could have been provided in the participating hospital.

1. Participating Hospital Closer to Site of Emergency.—If there is an adequately equipped participating hospital with available beds closer to the site of the emergency than the nonparticipating hospital, accessibility is not met. Deny the claim unless extenuating circumstances were present that necessitated admission to the nonparticipating hospital, e.g., because of road or traffic conditions additional travel time would have been needed to get to the participating hospital.

2. Participating Hospital 15 or Fewer Miles Farther From the Location of the Emergency Than the Admitting Nonparticipating Hospital.—In this situation the accessibility is provisionally not met. Review the claim to determine if the nature of the emergency required the immediate transportation to the nonparticipating hospital. If the review indicates that the nature of the emergency would have allowed the additional transportation time needed to take the patient to the participating hospital without undue hazard, the accessibility requirement is not met. Deny the claim.

3. Participating Hospital More than 15 Miles Farther From the Location of the Emergency Than the Admitting Nonparticipating Hospital.—In this situation the accessibility requirement is deemed met.

B. Foreign Nonemergency Claims.—Apply the following presumptions to the relative accessibility of the nearest participating U.S. and foreign hospitals.

1. Admitting Foreign Hospital is Closer to the Beneficiary's Residence Than the Nearest Participating U.S. Hospital.—The accessibility requirement is met.

2. Admitting Foreign Hospital is Farther from the Beneficiary's Residence Than the Nearest Participating U.S. Hospital.—The accessibility requirement is not met unless evidence establishes the practical necessity for the beneficiary's admission to the foreign hospital. This requirement is met if the use of a closer participating U.S. hospital was impractical, e.g., nonavailability of beds, needed equipment or personnel, or transportation not available.

In determining whether a foreign hospital is more accessible than a participating hospital do not consider the personal preference of the beneficiary, physician, or others in the selection of a hospital, the type of accommodations available, or the nonavailability of staff privileges to the attending physician.

C. Documenting Accessibility for Emergency Claims.—Use form HCFA-2628, Foreign HI Claim or Emergency Services Accessbility Documentation and Determination to document the accessibility in emergency claims. (See §3699.6.) This form can be obtained from:

Office of Program Operations
Division of Provider Procedures
6325 Security Boulevard
1-H-3 Meadows East Building
Baltimore, MD 21207

Check the "met" block for claims that fall in the category described in §3698.12(3), or that are described in §3698.12(2) and there are special circumstances of a nature not requiring medical judgment (e.g., Part I, Section C, Items 1, 2, and 5: bed unavailability, lack of transportation).

Check the "not met" block for claims that fall in the category described in §3698.12(1) and there are no special circumstances.

Check the "not met-medical factors" for claims that fall in the category described in §3698.12(1) and there are special circumstances requiring medical judgment (i.e., Part I, Section C, Items 4 and 6 unusual medical circumstances or nonavailability of needed equipment or personnel in the participating hospital).

3698.14 Medical Necessity.—

A. Emergency Services.—Reimbursement for emergency inpatient hospital services is permitted only for those periods during which the patient's state of injury or disease is such that a health or life-endangering emergency existed and continued to exist, requiring immediate care which could only be provided in a hospital. The allegation that an emergency existed must be substantiated by sufficient medical information from the physician or hospital. If the physician's statement does not provide it, or is not supplemented by adequate clinical corroboration of this allegation, it does not constitute sufficient evidence.

Death of the patient does not necessarily establish the existence of a medical emergency, since in some chronic, terminal illnesses, time is available to plan admission to a participating hospital. The lack of adequate care at home or lack of transportation to a participating hospital does not constitute a reason for emergency hospital admission, without an immediate threat to the life and health of the patient. Since the existence of medical necessity for emergency services is based upon the physician's assessment of the patient prior to admission, serious medical conditions developing after a nonemergency admission are not "emergencies" under the emergency services provisions of the Act.

The emergency ceases when it becomes safe, from a medical standpoint, to move the individual to a participating hospital, another institution, or to discharge him.

B. Criteria.—Since the decision that a medical emergency existed can be a matter of subjective medical judgment involving the entire gamut of disease and accident situations, it is impossible to provide arbitrary guidelines.

1. Diagnosis is Considered "Usually an Emergency".—An emergency condition is an unanticipated deterioration of a beneficiary's health which requires the immediate provision of inpatient hospital services because the patient's chances of survival, or regaining prior health status, depends upon the speed with which medical or surgical procedures are, or can be, applied. While many diagnoses (e.g., myocardial infarction, acute appendicitis) are normally considered emergencies, check medical documentation for internal consistencies (e.g, signs and symptoms upon admission, notations concerning changes in a preexisting condition, results of diagnostic tests).

EXAMPLE: If the diagnosis is given as "coronary," the physician's statement is "coronary," without further explanatory remarks, and the statement of services rendered gives no indication that an electrocardiogram was taken, or that the patient required intensive care, etc., further information is required. On the other hand, if the diagnosis is one which ordinarily indicates a medical and/or surgical emergency, and the treatment, diagnostic procedures, and period of hospitalization are consistent with the diagnosis, further documentation may be unnecessary. An example is: admitting diagnosis—appendicitis; discharge diagnosis—appendicitis; surgical procedures—appendectomy; period of inpatient stay—7 days.

2. Patient Dies During Hospitalization.—If you determine that an emergency did exist at the time of admission and the patient subsequently expires, allow the claim for emergency services if the period of coverage is reasonable. However, death of the patient is not *prima facie* evidence that an emergency existed; e.g., death can occur as a result of elective surgery or in the case of a chronically ill patient who has a long terminal hospitalization. Deny such claims.

3. Patient's Physician Does Not Have Staff Privileges at a Participating Hospital.—The fact that the beneficiary's attending physician does not have staff privileges at a participating hospital has no bearing on the emergency services determination. If the lack of staff privileges in an accessible participating hospital is the governing factor in the decision to admit the beneficiary to an "emergency hospital," deny the claim irrespective of the seriousness of the medical situation.

4. Beneficiary Chooses to be Admitted to a Nonparticipating Hospital.—Deny the claim if the beneficiary chooses to be admitted to a nonparticipating hospital as a personal preference (e.g., participating hospital is on the other side of town) when a bed for the required service is available in an accessible, participating, hospital.

5. Beneficiary Cannot be Cared for Adequately at Home.—The patient who cannot be cared for adequately at home does not necessarily require emergency services. Deny the claim in the absence of an injury, the appearance of a disease or disorder, or an acute change in a pre-existing disease state which poses an immediate threat to the life or health of the individual and which necessitates the use of the most accessible hospital equipped to furnish emergency services.

6. Lack of Suitable Transportation to a Participating Hospital.—Lack of transportation to a participating hospital does not, in and of itself, constitute a reason for emergency services. The availability of suitable transportation can only be considered when the beneficiary's medical condition contra-indicates taking the time to arrange transportation to a participating hospital. However, deny the claim if there is no immediate threat to the life or health of the individual, and time could have been taken to arrange transportation to a participating hospital.

7. "Emergency Condition" Develops Subsequent to a Nonemergency Admission to a Nonparticipating Hospital.—Program payment cannot be made for emergency services furnished by nonparticipating hospitals when the emergency condition arises *after* a nonemergency admission. An example: treatment of postoperative complications following an elective surgical procedure or treatment of a myocardial infarction which occurred during a hospitalization for an elective surgical procedure. The existence of medical necessity for emergency services is based upon the physician's initial assessment of the apparent condition of the patient at the time of his arrival at the hospital, i.e., prior to admission.

8. Additional "Emergency Condition" Develops Subsequent to an Emergency Admission to a Nonparticipating Hospital.—If the patient enters a nonparticipating hospital under an emergency situation and subsequently has other injuries, diseases or disorders, or acute changes in preexisting disease conditions, related or unrelated to the condition for which he entered the hospital, which pose an immediate threat to his life or health, emergency services coverage continues. Emergency services coverage ends when it becomes safe from a medical standpoint to move the patient to an available bed in a participating institution or to discharge him, whichever occurs first.

3698.15 Documenting Medical Necessity.—

A. Physician's Supporting Statement.—Claims for emergency services by a nonparticipating hospital generally are accompanied by an Attending Physician's Statement and Documentation of Medicare Emergency, Form HCFA-1771. This form describes the nature of the emergency, furnishing relevant clinical information about the patient, and certifying that the services rendered were required as emergency services. However, a copy of the patient's hospital records may be submitted instead. It should include history, physical, and admission notes, the medical record admission sheet, nurses' notes, doctors' orders, discharge summary, and all progress notes. A statement that an emergency existed, or the listing of diagnoses, without supporting information, is not sufficient. In addition, the statement must include the date in the physician's judgment, the emergency ceased. The statement concerning emergency services is made by the physician who attended the patient at the hospital. Only in exceptional situations, with appropriate justification, may another physician having full knowledge of the case, make the certification.

B. Beneficiary's Statement in Canadian Travel Claims.—In Canadian travel claims, consider the beneficiary's statement in making a determination regarding medical necessity for emergency services; i.e., whether an emergency occurred while a beneficiary was traveling between Alaska and another State by the most direct route without unreasonable delay. (See §3698.4.)

3698.16 Time Limitation on Claims.—The time limit on requests and claims for payment for emergency hospital services and hospital services outside the U.S., for physician and ambulance services furnished in connection with foreign hospitalization, and for nonemergency services furnished by a domestic nonpaticipating hospital, are set forth in §§3310 and 3312.

A. Beneficiary Denial Notices.—Send denial notices to the hospital and/or beneficiary, as appropriate, whenever a domestic emergency or foreign claim is fully or partially denied. (See §3725.)

B. Termination of Emergency Services.—No payment can be made for inpatient or outpatient emergency services rendered after a reasonable period of medical care in relation to the emergency condition in question. Some services may be covered in a domestic nonparticipating hospital as Part B Medical and Other Health Services. (See §3110.) If, based upon all information the total period claimed for emergency services coverage does not exceed the time required for a reasonable period of emergency medical care, the entire inpatient stay is covered. The fact that a medical record or other information states that the patient showed definite improvement several days prior to discharge is not necessarily an indication that emergency services ceased as of that date.

The concept of a reasonable period of emergency medical care is most easily applied when relatively short-term medical care is followed by the patient's progressive improvement. There are situations or conditions in which the determination of the end of covered emergency services may be more difficult because the patient's impairment is prolonged, there is no progressive improvement, or the patient's course may be progressively downhill, even though the condition is not critical. The stroke patient may be in this category. In such cases the need for emergency medical care usually ceases before the need for medical care in an institutional setting (i.e., hospital or SNF) ceases. Thus, the reasonable period of emergency care does not include the entire hospital stay if the stay were prolonged beyond the point when major diagnostic evaluation and treatment were carried out.

Make the determination based upon all the information available. As a general rule, if the period claimed for emergency services exceeds by more than 3 to 5 days the date on which the record definitely indicates that there was substantial improvement in the patient's condition so that he possibly could have been moved to a participating facility or discharged without damage to his health, deny the period beyond the 3 to 5 days. If the total period claimed for emergency services exceeds by no more than 3 to 5 days the date on which the record indicates substantial improvement in the patient's condition, allow the entire period.

The rule is intended to screen out short stay emergency hospitalization cases in which the patient was either discharged or transferred to a participating provider within a reasonable time after the medical record definitely indicated substantial improvement in the patient's condition.

The reasonable period of emergency care is that period required to provide relief of acute symptoms or for initial management of the condition while arrangements are made for definitive treatment. Two examples of this category: (1) prostatic hypertrophy which results in acute urinary retention; and (2) mental illness with suicidal and/or homicidal tendencies. In acute urinary retention, the reasonable period of emergency medical care includes the period required for catheterization and stabilization of the patient. The patient could then be transferred to a participating hospital for surgery or other required treatment. For the suicidal or homicidal patient a reasonable period of emergency medical care includes the time required for initial management of the case while arrangements are made for transfer (by commitment or otherwise) to a participating hospital. A period of 24 to 48 hours of emergency care is usually sufficient in both cases.

3698.17 Appeals.—

A. Reconsiderations.—Where a request is received, conduct the reconsideration and notify the claimant of the decision. Follow guidelines in SS3782ff. Review the initial determination of the claim, including all documentation, in accordance with the guidelines in S3780.

Prepare the necessary beneficiary notification and retain the file for 6 months after the month of the final determination. Any decision on an initial emergency claim or a reconsideration constitutes a final determination.

NOTE: The RRB conducts reconsideratons for hospital services under the Railroad Retirement Act for services rendered in Canada.

B. Review.—(Part B Appeals).—Where a request for review of an initial determination is received, the review is conducted and the determination sent by the intermediary or the carrier, whichever made the initial determination.

C. Appeal of Reconsideration or Review Determination.—All Part B hearing requests on claims for physician and independent ambulance services furnished in Canada or Mexico are within the jurisidiction of a HO of the carrier regardless of who made the review determination. However, a hearing request on an intermediary determination is normally in connection with the Part A claim and considered and processed as such. If the enrollee had a Part A hearing and then requests a hearing on the same issue for the Part B claim, forward all pertinent information regarding the initial and reconsideration determinations and the hearing request to the carrier. Notify the beneficiary of the transfer.

3699. REIMBURSEMENT FOR SERVICES RECEIVED IN NONPARTICIPATING PROVIDERS

3699.1 Reimbursement for Services of Nonparticipating Domestic Hospitals.—The HCFA-1450 must be used.

A. Hospital Filed Claims

1. Inpatient Services.—The reimbursement rate for hospital filed inpatient claims is the lower of: 90 percent of the hospital's average inpatient per diem cost for all patients, or 85 percent of the hospital's regular charge for the services rendered. Determine the hospital's average per diem cost from the most recent calculation of the average per diem cost by a non-Governmental third-party payer.

Adjust the cost of the services by any applicable deductible and coinsurance amounts for which the beneficiary is responsible.

2. Outpatient Services.—Obtain the amount reimbursed by Medicare for hospital-filed emergency outpatient claims as follows:

Eighty-five percent of the total covered charges is the estimated cost figure. Subtract the applicable Part B deductible. Apply the 80 percent reimbursement rate to the remainder.

Obtain the patient's coinsurance amount by subtracting the deductible from the total charges and applying the 20 percent coinsurance rate to the remainder.

3. Part B Medical and Other Health Services.—Part B Medical and Other Health Services, including provider-based ambulance services whether provider or beneficiary filed, may be covered and reimbursed on a "nonemergency" basis. To calculate the amount reimbursed by Medicare, subtract the Part B deductible from the total covered charges and apply the 80 percent reimbursement rate.

4. Special Letters for Partially or Totally Denied (Hospital-Filed) Claims for Emergency Inpatient Services.—The patient receives a HCFA-1533 from HCFA covering the emergency payment of a partially denied claim. Prepare a letter using the model denial letter A or B, as appropriate, in Exhibits 4 or 5 and a Part B provider explanation of benefits. Show your address on these letters.

B. Beneficiary Filed Claims

1. Emergency Inpatient Claims.—The reimbursement computation follows:

- o Subtract any noncovered accommodation charge from the total accommodation charges. Subtract the amount of the inpatient deductible or coinsurance met on this bill. Multiply any remainder by 60 percent.
- o Subtract the total noncovered ancillary charge from the total ancillary charge. Subtract any inpatient deductible or coinsurance that may be remaining. Multiply the remainder by 80 percent.

- Add the benefit amounts obtained.

If the hospital is an all-inclusive rate hospital, subtract the noncovered charges from the covered charges, apply any deductible and coinsurance, and multiply the remainder by 66 2/3 percent.

EXAMPLE: The total charge in an all-inclusive rate hospital is $966.46, the deductible is $492. The remainder of $474.46 is figured at 66 2/3 percent reimbursement, or a benefit amount of $316.32.

2. Emergency Outpatient Services.--To calculate the amount reimbursed by Medicare, subtract the Part B deductible from the total covered charges and apply the 80 percent reimbursement rate.

3. Part B Medical and Other Health Services.--Part B Medical and Health Services furnished by nonparticipating providers, including provider-based ambulance services, may be covered and reimbursed on a "nonemergency" basis.

To calculate the amount reimbursed by Medicare, subtract the Part B deductible from the total covered charges and apply an 80 percent reimbursement rate.

4. Special Letters for Patient-Filed Claims for Emergency Inpatient Services.--For emergency admissions to nonparticipating hospitals where direct payment is made to the patient, send to the beneficiary one of the letters described below, as appropriate.

The letter explains the Part A payments made and/or the Part B payments made for ancillary services not covered by Part A. (See §3110.) This letter also explains the beneficiary's right of appeal.

Retain a duplicate of all notices sent for documentation in any appeals process. Enter the date the notice is released on both copies of all notices.

Sample paragraphs:

- Enclosed is a check for $ _____, which is the amount Medicare can pay for the inpatient hospital services you received from (date of admission) to (date of discharge) in (hospital).

- Medicare is able to pay 60 percent of the charges for your room and board plus 80 percent of the charges for all other covered services during the period (date emergency began) to (date payment ended).

- Medicare is able to pay 60 percent of the charges for your room and board, 80 percent of the charges for other separately identified charges, and 66 2/3 percent of the other charges which were not separately identified on the hospital bill.

- Medicare does not pay (the first $ ____ of charges) (the first three pints of blood) ($ ____ a day after the 60th day) in a benefit period. (Select one or more, if applicable.)

If lifetime reserve days are used, all $ ___ a day from ________ to _________.

- If you believe your Medicare hospital insurance should have covered all or more, of your expenses, you may get in touch with us at the address shown on this letter.
- If you believe that the determination is not correct, you may request a reconsideration for hospital insurance (or a review for medical insurance). You may make the request by mail to the address shown on this letter. If you come in person, please bring this notice with you.
- This check includes a medical insurance payment for 80 percent of the charges for certain nonroutine hospital services which you received from _______ through _______. These services are listed on the enclosed form.
- If a hospital bill is not itemized, Medicare can pay 66 2/3 percent of the total covered charges. Payment is being made at this rate for charges from (date emergency began) to (date payment ended).
- We are enclosing a check for $ ______. This is your payment under medical insurance for 80 percent of the charges for the services which you received from (admission date) through (discharge date) while in (name of hospital). These services are listed on the enclosed form.

When payment cannot be made under hospital insurance, medical insurance covers some, but not all, of the hospital services. Room and board and certain other services are not covered by medical insurance.

3699.2 Reimbursement for Services of Canadian/Mexican Hospital.—

A. Hospital Filed Claim.—A Canadian or Mexican hospital that elects to bill the Medicare program receives 100 percent of its customary charges, subject to applicable deductible and coinsurance amounts. The hospital establishes its customary charges for the services by submitting an itemized bill with each claim. This eliminates the need for it to file a cost report.

Regardles of the billing form used, you must:

- Recode the bill using revenue codes for the HCFA-1450.
- Prepare a UNIBILL.

The Canadian or Mexican hospital must file a statement of election for each calendar year to receive direct payment from Medicare for all claims filed that year.

Payment to the hospital is subject to the official exchange rate on the date the patient is discharged.

B. Beneficiary Filed Claim.—**Follow §3699.1B for inpatient hospital services.**

To calculate the amount reimbursed by Medicare for Part B Provider-Based Ambulance Claims, subtract the unmet Part B deductible from the total covered charges and apply the 80 percent reimbursement rate.

Payment to the beneficiary is subject to the official exchange rate on the date of discharge.

3699.3. Designated Intermediaries.—Claims for services provided in Mexican or Canadian hospitals are processed by the designated fiscal intermediary. Forward these claims and any subsequent appeals directly to the designated intermediary.

Canada

New Brunswick Newfoundland Nova Scotia Quebec Prince Edward Island	Associated Hospital Services 110 Free Street Portland, ME 04010

San Francisco Region - Occidental Life Insurance Company of California, Los Angeles, California

Submit other claims to your servicing carriers.

DEPARTMENT OF HEALTH AND HUMAN SERVICES
HEALTH CARE FINANCING ADMINISTRATION

FORM APPROVED
OMB NO. 0938-0023

ATTENDING PHYSICIAN'S STATEMENT AND DOCUMENTATION OF MEDICARE EMERGENCY

SECTION A

1. PATIENT'S NAME	2. HI CLAIM NUMBER

SECTION B *(To be completed by attending physician)*

IMPORTANT: Please supply all information requested in order that the reviewing physician may promptly process the claim. A copy of the patient's chart including a minimum of admission history and physical, admission nurse's notes, all physician's orders, progress notes, and discharge summary may be submitted in addition to or in lieu of this form if it covers all information requested below.

1. Date and approximate hour when emergency occurred which resulted in hospital admission..

MO	DAY	YR.	APPROXIMATE HOUR	
			A.M.	P.M.

2. When and where was the patient first seen by you or another physician in connection with the emergency PRIOR TO ADMISSION TO THE HOSPITAL?

MONTH	DAY	YEAR	APPROXIMATE HOUR		
			A.M.	P.M.	☐ Home ☐ Physician's Office ☐ Emergency Room ☐ Accident Site Other: *(Specify)*

3. Date and hour of admission	Admitting diagnosis(es):

4. Emergency services are defined in the Medicare program for purposes of payment as inpatient and outpatient hospital services which are necessary to prevent the death or serious impairment of the health of the individual and which, because of the threat to the life or health of the individual, necessitate the use of the most accessible hospital available which is equipped to furnish such services

In your opinion was this an emergency as defined under Medicare? ☐ Yes ☐ No

5. List special equipment or special personnel available at the admitting hospital if such special equipment or personnel was a factor in necessitating admission there rather than to a hospital which participates in the Medicare program.

6. Indicate specific signs and symptoms of the patient at the time of initial examination which will help to justify this case as a Medicare emergency. *(If the patient was admitted because of a change in a chronic condition or a condition which existed for several days prior to admission, please indicate the ACUTE changes):*

6.a. Other findings on hospital admission:

☐ Ambulatory ☐ Conscious ☐ Unconscious
☐ Non-ambulatory ☐ Semi-conscious ☐ Pain – Yes ☐ No Location of Pain ______

Temperature	Blood Pressure	Pulse /min.	Respirations /min.

Pertinent laboratory findings at that time:

7. List specific emergency services and care including surgery and other procedures (i.e., cystoscopy, bronchoscopy, X-rays, etc.) provided during the hospital admission.

EMERGENCY SERVICE (Do not list elective procedures or surgery)	DATE(S)	RATIONALE OR REASON FOR SERVICE

Blood transfusion ☐ Yes ☐ No

[illegible] HCFA-1771 [illegible]

8. List the clinical and laboratory findings, complications, or need for special services which justified the patients remaining on "emergency case" for the entire period claimed and which precluded an earlier transfer to a participating hospital, or discharge.

FINDINGS, COMPLICATIONS, OR SERVICES	DATE

	MONTH	DAY	YEAR
9. Give the earliest date on which it was permissible, from a medical standpoint, to either transfer the patient to a participating hospital or extended care facility, or to discharge the patient.			

10. Discharge diagnosis(es) *(Show only diagnosis(es) that were related to the alleged emergency)*

10a. Other contributing conditions:

11. Please include (or attach) any additional information which you believe may be helpful in reaching a decision on this case.

SIGNATURE	☐ M.D. ☐ D.O.	DATE
ADDRESS		PHONE NUMBER

FOREIGN HI CLAIM OR EMERGENCY SERVICES ACCESSIBILITY DOCUMENTATION AND DETERMINATION

1. PATIENT'S NAME	2. HI CLAIM NUMBER
3. PATIENT'S RESIDENCE ADDRESS	
4. ADMITTING HOSPITAL'S NAME AND ADDRESS	5. Hospital's Emergency Number (Domestic only)

PART I — ACCESSIBILITY DOCUMENTATION—COMPLETE ALL SECTIONS

SECTION A - Location of Beneficiary When Emergency Occurred (Answer 1-2 for Domestic, 3-6 for foreign hospital)

Beneficiary was considered to require emergency services when 1. ☐ Emergency was "Self-evident" (e.g. sudden change in state of consciousness, sudden onset of severe pain or bleeding, etc.) 2. ☐ The physician, by seeing beneficiary or by telephone contact, first decided emergency services were required.	**Address and/or Site of Checked Location**

3. Distance from Beneficiary's Resident to admitting hospital	4. Name and address of nearest paticipating U.S. hospital to beneficiary's residence	5. Distance of Participating Hospital from Beneficiary's Residence

6. Check either a or b

a. ☐ The foreign hospital is not more than 15 miles farther from the beneficiary's residence than the nearest participating U.S. hospital

b. ☐ The foreign hospital is more than 15 miles farther from the beneficiary's residence than the nearest participating U.S. hospital

SECTION B - Alternative Hospitals (Answer either 1 or 2; always answer 3)—Domestic Emergency Claims Only

1. ☐ Participating hospital 15 or fewer miles farther from the location of the emergency than is the admitting non-participating hospital (as determined in Section A) — *(Answer a, b and c.)*

A. Distance to Admitting Hospital from Location of Emergency	b. Distance to Participating Hospital Closer to Location of Emergency	C. Name and Address of Participating Hospital Closest to Location of Emergency

2. ☐ Participating hospital more than 15 miles farther from the location of the emergency than is the admitting non-participating hospital (as determined in Section A) *(If checked omit Section C.)*

3. List the participating hospital closest to the admitting hospital:

A. Name and Address	b. Distance Between Two Hospitals

SECTION C-Special Circumstances (Domestic Claims—Do NOT complete this section if Section B, Item 2 is checked)(Foreign Claims—Include an explanation in "Remarks" or an attachment for each item checked.)

1 ☐ Bed unavailable in nearest participating hospital

2 ☐ Nearest participating hospital would not accept patient

3 ☐ Geographic difficulties

4 ☐ Needed equipment or personnel unavailable in nearest participating hospital

5 ☐ Other factors

6 ☐ Unusual medical circumstances indicated, e.g., shock loss of blood, etc. (domestic claims only)

Dear ________________:

Your election to bill the Medicare program for emergency services furnished to Medicare beneficiaries will expire on December 31. Payment for emergency services can be made to a nonparticipating hospital only if the hospital elects to receive reimbursement from Medicare for all emergency services furnished to Medicare beneficiaries in a calendar year.

If you elect to bill the program, please return to us in the enclosed self-addressed envelope a statement signed by an authorized official of your hospital stating that you elect to claim payment under the Medicare program. An election to bill cannot be withdrawn during the year. If a statement is not received by December 31, we will assume that you do not wish to continue to bill the program at this time. However, you still retain the right to elect to bill the program at any time during the coming year if, when you make your election, you have not yet charged any Medicare beneficiary in that year for emergency hospital services rendered to him.

Hospitals electing to bill the program for emergency services may obtain information on reimbursement by contacting the intermediary serving nonparticipating hospitals in your State. If a hospital does not elect to bill, the beneficiary may apply for reimbursement by submitting an itemized bill.

Please contact us if you need any further information. In addition, if at any time you decide to request full participation as a provider of hospital services under the Medicare program, please contact your Medicare intermediary for complete particulars.

Sincerely yours,

Exhibit 2 - Model Letter to Nonparticipating Hospital That Did Not Elect to Bill For Current Year

DEPARTMENT OF HEALTH AND HUMAN SERVICES
HEALTH CARE FINANCING ADMINISTRATION

Dear ____________________:

Under the Medicare program, hospital benefits ordinarily can be paid only for care furnished to patients of hospitals that are participating in the program. However, the program can also pay for hospital services furnished to a beneficiary who is admitted to a nonparticipating hospital in an emergency. To receive payments for emergency services, a nonparticipating hospital must meet certain conditions specified in the law. We have determined that your hospital meets these conditions.

Payment for emergency services can be made to a nonparticipating hospital only if the hospital elects to receive reimbursement from Medicare for all emergency services furnished to Medicare beneficiaries in a calendar year. Although your hospital did not elect to bill the program for the current calendar year, you may wish to bill for the coming year. If you so choose, please have an authorized official of your hospital sign a statement to this effect and return in the enclosed self-addressed envelope. Retain a copy for your records. An election to bill cannot be withdrawn during the year.

If we have not received a statement from you by December 31, we will assume that you do not wish to bill the program at this time. However, you still retain the right to elect to bill the program at any time during the coming year if, when you make your election, you have not yet charged any Medicare beneficiary in that year for emergency hospital services rendered to him.

Hospitals electing to bill the program for emergency services may obtain information on reimbursement by contacting us. If a hospital does not elect to bill, the beneficiary may apply for reimbursement by submitting an itemized bill.

If at any time you decide to request full participation as a provider of hospital services under the Medicare program, please contact your Medicare intermediary for complete particulars.

Sincerely yours,

Exhibit 3 - Model Letter to Nonparticipating Hospital That Requests During the Year to Bill the Program

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Dear ____________________:

This refers to your inquiry concerning payment for emergency hospital services rendered to a Medicare beneficiary in a hospital which is not participating in the Medicare program. Under the Medicare program, hospital benefits ordinarily can be paid only for care furnished to patients of hospitals that are participating in the program. However, the program can also pay for hospital services furnished to a beneficiary who is admitted to a nonparticipating hospital in an emergency. To receive payments for emergency services, a nonparticipating hospital must meet certain conditions specified in the law. We have determined that your hospital meets these conditions.

Payment for emergency services can be made to a participating hospital only if the hospital elects to receive reimbursement from Medicare for all emergency services furnished to Medicare beneficiaries in a calendar year. Your hospital may now choose to bill the program for all emergency services furnished to Medicare beneficiaries during the current calendar year, if you have not yet charged any Medicare beneficiary this year for emergency hospital services rendered to him.

If you so choose, please have an authorized official of your hospital sign a statement to this effect and return in the enclosed self-addressed envelope. Retain a copy for your records. An election to bill cannot be withdrawn during the year.

Hospitals electing to bill the program for emergency services may obtain information on reimbursement by contacting us. If a hospital does not elect to bill, the beneficiary may apply for reimbursement by submitting an itemized bill.

If at any time you decide to request full participation as a provider of hospital services under the Medicare program, please contact your Medicare intermediary for complete particulars.

Sincerely yours,

MODEL DENIAL NOTICE A

Exhibit 4 - (Full Denial - Hospital-Filed or Beneficiary-Filed Emergency Claim)

(INTERMEDIARY'S NAME AND ADDRESS)

Date:______________________

DETERMINATION ON EMERGENCY HOSPITAL SERVICES

Beneficiary: ______________________ Claim Number: _______________

We are sorry but payment cannot be made for your stay from ______ through ______ at (hospital). This is because the (hospital) does not participate in the Medicare program and it has been determined that your treatment there does not qualify as emergency care.

Under the law, payment for services received in a nonparticipating hospital can only be made if you go, or are brought to, the hospital to receive emergency care. Emergency care under Medicare is defined as:

a. Care which is necessary to prevent the death or serious impairment of the health of the individual and

b. which, because of threat to the life or health of the individual, requires the use of the nearest hospital (in miles or travel time) which has a bed available and is equipped to handle the emergency.

The medical facts of your hospital admission and stay have been carefully reviewed. Based upon this review, we have found that, although it was necessary for you to be hospitalized, a medical emergency did not exist. There would have been time for you to have been admitted to a hospital participating in Medicare.

If you have questions about this notice, or if you believe the determination is not correct, you may request a reconsideration for hospital insurance. You must file your request within 6 months from the date of this notice. You may make the request through us.

EMERGENCY AND FOREIGN HOSPITAL SERVICES

MODEL DENIAL NOTICE B

Exhibit 5 - (Partial Denial - Hospital-Filed or Beneficiary-Filed Emergency Claim)

(INTERMEDIARY NAME AND ADDRESS)

Date: ____________________

DETERMINATION ON EMERGENCY HOSPITAL SERVICES

Beneficiary: ____________________ Claim Number: ____________

This refers to your request for reimbursement under Medicare for the services received while a patient at (hospital), from ______ through ______.

Payment can be made under the hospital insurance part of medicare only for the costs of your hospitalization from ________ to ________.

The (hospital) does not participate in the Medicare program. Under the law, payment for services received in a nonparticipating hospital can only be made if you go, or are brought to, the hospital to receive emergency care. Emergency care under Medicare is defined as:

a. care which is necessary to prevent the death or serious impairment of the health of the individual and

b. which, because of threat to life or health of the individual, requires the use of the nearest hospital (in miles or travel time) which has a bed available and is equipped to handle the emergency.

Payment for emergency services stops when the emergency ends and it is permissible, from a medical standpoint, either to transfer the patient to a participating hospital or to discharge him.

The medical facts of your hospital admission and stay have been carefully reviewed. Based upon this review, we have found that an emergency condition existed when you were admitted. However, the medical information indicates that this emergency condition ended on ______. At that time your condition had improved to the extent that you could have been transferred to a hospital participating in the Medicare program.

If you have questions about this notice, or you believe the determination is not correct, you may request a reconsideration. You must file your request within 6 months from the date of this notice. You may make the request through us.

ADDENDUM A - PROVIDER ELECTRONIC BILLING FILE AND RECORD FORMATS

	Section	Page
Recommended Physical File Specifications - Magnetic Tape	1	A-2
File Specifications - Media Other Than Magnetic Tape	2	A-3
File Logic Flowchart	3	A-4
File Logic Specifications	4	A-5
Key to Records	5	A-6
Record Layouts	6	A-7

1. Recommended Physical File Specifications - Magnetic Tape.—Tape Characteristics -9 Track, 8 1/2" to 10 1/2" reels with silver mylar reflector (standard reels) with write ring removed.

Parity - Odd

Recording Density - 1600 bytes per inch.

Recording Code - Extended Binary Coded Decimal.

File Label - None. The tape must have an end of file mark. The first data record on the file will identify the submitter and the receiver, and will serve the function of a file label.

Physical Record Length - 192 characters.

Block Size: 1920 characters; i.e., a blocking factor of 10.

Unfilled Final Block - Fill with spaces.

The external label on the reel must appear as follows:

From ___a___ To ___b___
Reel Number ___c___ Claim Types ___d___
Billing Date ___e___
f. ☐ Medicare ☐ Medicaid ☐ Other
Recording Density 1600 BPI

(a) Identification of submitter
(b) Identification of intended recipient
(c) Unique number by which tape is identified in submitter's tape library
(d) Types of claims on the tape; e.g., inpatient hospital, inpatient SNF, outpatient hospital, etc.
(e) Date tape created (MMDDYY)
(f) Check one: Medicare, Medicaid, or Other

2. File Specifications - Media Other Than Magnetic Tape.—

File Label - None

Physical Record Length - 192 characters

External Label - Same as magnetic tape, a thru f

Other specifications will be agreed upon between provider and intermediary with the concurrence of the appropriate Regional Administrator.

3. File Logic - Flowchart.—

4. Record Specifications.—The logical claim record is made up of a series of 192 character physical records. The physical records for each claim are divided into logical subsets as follows:

Subset 1 - Patient Data - Record Codes 20-29
Subset 2 - Third Party Data - Record Codes 30-39
Subset 3 - Claim Data - Record Codes 40-49
Subset 4 - Inpatient Accommodations Data - Record Codes 50-59
Subset 5 - Ancillary Services Data - Record Codes 60-69
Subset 6 - Medical Data - Record Codes 70-79
Subset 7 - Physician Data - Record Codes 80-89

A. The record layouts that follow will provide the following data:

1. Record Name: The name of this data record.
2. Record Type: Code indicating the type of record.
3. Record Size: Physical length of record. Constant 192.
4. Field Number
5. Field Name
6. Picture: this will be the COBOL picture. Pic X will be initialized to blanks, and Pic 9 will be initialized to zeroes. All money fields and date fields will be Pic 9. All code fields that have a legitimate value of zero will be Pic X. This will make it possible to detect whether the field has been omitted.
7. Field Specification: This simply indicates how the data field is justified. L = Left justification, and R = Right justification.
8. Position
   From = Leftmost position in the record (high order).
   Thru = Rightmost position in the record (low order).

5. Key to Records.

Tape Control	99

6. Record Layouts

RECORD TYPE 01 - PROCESSOR DATA

- Must be first record on tape
- Must be followed by RT 10.

NOTE:

1) Tapes will be formatted so that this is a data record, not a conventional label. From a system standpoint this will be a 'labelless' tape.

2) The processor data record will be the first record on each reel.

3) This record indicates, in fields 5 thru 7, the class of and identification of the organization designated to receive this tape or transmission. If the code in field 5 is a "Z," the file contains records for multiple primary payers. In this case, the employer identification number (EIN), also known as the tax identification number (TIN), identifies the organization designated to receive this tape or transmission. Otherwise, the code in field five designates the types of primary payer, field 6 contains the receiver/primary payer identification (NAIC number for commercials, Blue Cross number for PLANS, as indicated by each State agency for Medicaid, as assigned by CHAMPUS where applicable, etc.). For commercial insurers, Field 7 contains the specific office within the insurance carrier designated to receive this tape or transmission. For Blue Cross plans this field will be used as designated by the Plan receiving the file.

4) It is recommended that billers and intermediaries establish a protocol limiting a file to a single reel of tape, single disk, cassette, etc. In the event a file exceeds that limit, the reel, disk, etc. must end in a batch control (record type 95).

RECORD TYPE 21 - Non-insured Employment Information

- Must follow RT 20.
- May be followed by RT 21-2N or 30.
- This record contains employment information pertaining to individuals not claiming insurance but who may have some insurance coverage through their employer from which the patient may be eligible for benefits.
- There are four different individuals to whom this may apply: the patient, the patient's spouse, the patient's father, and the patient's mother. If more than two of these individuals are involved in this claim, a second record type 21 is to be used to submit the relevant employment data for the third, and if applicable, the fourth party involved. The sequence number (field 2) of the second Type 21 record would be shown as "2".

RECORD TYPES 30-3N - Third Party Payer

One third party payer record packet (record types 30-3N) will appear in the bill record for each payer involved in the bill. Each third party payer packet must contain a record type 30. However, each record type 30 may or may not have an associated record type 31, etc. depending on the specific third party payer data required by the particular payer.

Example: Medicare is primary, and the secondary payer requires the insured's address:

	Record Type Code	Sequence Number
Medicare	30	01
Secondary Payer	30	02
	31	02

Note that the sequence number of the type 31 record for the secondary payer matches the sequence number of the secondary payer's type 30 record, serving as a matching criterion for the specific third party payer record packet.

RECORD TYPE 40 - 4N - CLAIM

Generally, a claim contains a single type 40 record. However, if the single record is not sufficient to contain all iterations of a particular coding structure, e.g. more than 6 value codes are required, additional iterations of record type 40 could be submitted to convey the additional codes.

For Record Type 40, sequence numbers 02 or higher, all fields except the field or fields required to convey the additional code or codes that could not be contained on the sequence 01 record would be initialized to zeroes or blanks as appropriate, with the exception of the Patient Control Number and the Record Type fields.

RECORD TYPE 50 - ACCOMMODATION

May be preceded by RT 40 - 4n or 50 - 5n.

May be followed by RT 50 - 5n, 60 or 70.

Accommodations should be entered in the sequence in which they occur (date sequence).

The sequence number for record type 50 can go from 01 to 99, each such physical record containing five accommodations, thus making provision for reporting up to 495 accommodations on a single claim.

ACCOMMODATION REVENUE CODES: 100 THRU 22X

RECORD TYPE 70 - 7N - MEDICAL

May be preceded by RT 50, 60, or 61.

May be followed by RT 7N, 80 or 90.

NOTE: ICD-9-CM CODING IS REQUIRED FOR ALL BILL TYPES. THE ICD-9-CM DIAGNOSIS CODES HAVE BEEN ASSIGNED A COBOL PICTURE OF X. THE ACTUAL CODE WILL BE FORMATTED IN ONE OF FOUR GENERAL WAYS:

1 999.99 MAY INCLUDE ZERO TO TWO DECIMAL PLACES.
2 V99.99 MAY INCLUDE ZERO TO TWO DECIMAL PLACES.
3 E999.9 MAY INCLUDE ZERO TO ONE DECIMAL PLACE.
4 M9999 INCLUDES NO DECIMAL PLACES.

TO DETERMINE THE LOCATION OF THE DECIMAL POSITION AND THE POTENTIAL NUMBER OF DECIMAL POSITIONS IT IS NECESSARY ONLY TO EXAMINE THE HIGH ORDER (LEFTMOST) POSITION IN THE FIELD.

RECORD TYPES 71-73 - HOME HEALTH DATA ELEMENTS FOR MEDICAL REVIEW OF HOME HEALTH CLAIMS

Must be preceded by RT 70

May be followed by RT 74, 7N, 80 or 90

RECORD TYPE 71 - PLAN OF TREATMENT AND PATIENT INFORMATION (FORMS HCFA-485/486)
RECORD TYPE 72 - SPECIFIC SERVICES AND TREATMENTS (FORM HCFA-486)
RECORD TYPE 73 - PLAN OF TREATMENT/MEDICAL UPDATE NARRATIVE (FORMS HCFA-485/486)

For use by HHAs to submit data from the forms HCFA-485 and 486. Data is required with the initial home health bill and with subsequent bills closest to the recertification dates. Record Types 71, 72 and 73 must be present. However, when submitting data from the HCFA-486 only (i.e., on interim claims) complete only the following fields on Record Type 71: Fields 1-6, 24-26 and 28-31. Zeros are present in numeric fields and blanks in alphanumeric fields which do not contain data.

The HHA should retain signed copies of the forms HCFA-485 and 486 in your files. The Provider Representative Certification must be submitted with the initial batch of claims containing the HCFA-485 and HCFA-486 data elements. Subsequent certifications are to be submitted in accordance with §499.1.

Record Type 74, Patient Information.—This record is used to give patient information when the agency submits HCFA-485/486 data separately from billing records. HCFA-485/486 data (i.e., Record Types 71-73) submitted separately must be preceeded by Record Type 10 -"Provider." Enter in Field 2 - Type of Batch "3M blank" to identify that the batch contains only HCFA-485/486 data.

The agency must receive permission from you prior to submitting separate data. You should advise the agency how to submit these batches.

Record Type 73 - Plan of Treatment/Medical Update Narrative

This record(s) contains narrative information from the forms "Home Health Certification and Plan of Treatment" and "Medical Update and Patient Information." This record is used to provide information requested on the HCFA-485 and 486 forms and to elaborate on any item on the forms. The agency should not provide narrative instead of completing fields on Record Types 71 and 72. A separate 73 Record for each item is completed. As many 73 records as necessary are used. A sequence number is incremented by one for each record present (i.e., 01-99). Listed below are items which may require a narrative record. An "R" is reflected for data which is always required.

Data Element	Data ID Number	Required Element

ADDENDUM B - ALPHABETIC LISTING OF DATA ELEMENTS:

Data Element	Definition	Record	Field
Accident Hour	The hour when the accident occurred that necessitated medical treatment	20	12
* Accommodations Revenue Code	UB-82 revenue center code for the accommodation provided. Includes codes 10X through 21X.	50 Four additional iterations in related locations for record 50, fields 11 - 14.	4
* Accommodations Days	A numeric count of accommodations days in accordance with payer instructions. Includes UB-82 revenue codes 10X through 21X.	50 Four additional iterations in related locations for record 50, fields 11 -14.	7
* Accommodations Non-covered Charges	Accommodations charges pertaining to the related UB-82 accommodations revenue code that are covered by the primary payer as determined by the provider.	50 Four additional iterations in related locations for record 50, fields 11 -14.	9
Accommodations Non-covered Charges for the Batch	Sum of charges recorded in related field in record type 90, field 14	95	9
* Accommodations Rate	Per diem rate for related UB-82 accommodations revenue code.	50 Four additional iterations in related locations for record 50, fields 11 - 14.	6
* Accommodations Total Charges	Total charges for the related revenue code.	50	8
Accommodations Total Charges for the Batch	Total accommodation charges for this batch	95	8

* Complete for Medicare

Data Element	Definition	Record	Field
* Admission Date	The date the patient was admitted to the provider for inpatient care, outpatient service or start of care. For an admission notice for hospice care enter the effective date of election of hospice benefits.	20	18
Admission Hour	The hour during which the patient was admitted for inpatient or outpatient care.	20	19
Ancillary Date of Service	The date the associated ancillary service as identified by the UB-82 revenue center code was delivered.	60 Four additional iterations in related locations for record 60, fields 12 - 154.	6
Ancillary Non-Covered Charges	Charges pertaining to the related UB-82 ancillary revenue center code that the primary payer will not cover.	60 Four additional iterations in related locations for record 60, fields 12 - 15.	9
Ancillary Non-Covered Charges for the Batch	Sum of charges recorded in related field, record type 90, field 16.	95	11
*Ancillary Revenue Code	UB-82 revenue center code for the ancillary services provided. Includes codes 22X through 99X.	60 Four additional iterations in related locations for record 60, fields 12 - 15.	4
* Ancillary Total Charges	Total charges pertaining to the related UB-82 ancillary revenue center code. (And date, if applicable.)	60	8
Ancillary Total Charges for the Batch	Total ancillary charges for this batch	95	10

* Complete for Medicare

Data Element	Definition	Record	Field
* Ancillary Units of Service	A quantitative measure of services rendered by UB-82 revenue center category to or for the patient to include such items as number of miles, pints of blood, number of renal dialysis treatments, etc.	60 Four additional iterations in related locations for record 60, fields 12 - 15.	7
Assignment of Benefits Certification Indicator	A code showing whether the provider has a signed form authorizing the third party payer to pay the provider. Y=Benefits assigned N=Benefits not assigned	30	16
Attending Physician Name	Name of the licensed physician who would normally be expected to certify and recertify the medical necessity of the services rendered and/or who has primary responsibility for the patient's medical care and treatment	80	8
* Attending Physician Number	Number assigned to identify physician named in Record 80, field 8	80	4
* Batch Number	Number assigned by the provider sequentially from 01 to nn to each batch of bills of a given type.	10	3
* Blood-Deductible Pints	The number of unreplaced pints of whole blood or units of packed red cells furnished for which the patient is responsible.	40	13
* Blood-Furnished Pints	Total number of pints of whole blood or units of packed red cells furnished to the patient.	40	10
* Blood-Replaced Pints	The total number of pints of whole blood or units of packed red cells furnished to the patient that have been replaced by or on behalf of the patient.	40	11
* Blood-Unreplaced Pints	The number of pints of whole blood or units of packed red cells furnished to the patient that have not been replaced by or on behalf of the patient.	40	12
Blue Cross/Blue Shield Provider Number	The number assigned to the provider by Blue Cross.	10	10

* Complete for Medicare

Data Element	Definition	Record	Field
* Certificate/ Social Security Number/Health Insurance Claim/ Identification Number	Insured's unique identification number assigned by the payer organization. Medicare: Enter the patient's Medicare HIC number as on the Health Insurance Card, Certificate of Award, Utilization Notice, Temporary Eligibility Notice, Hospital Transfer Form, or as reported by the Social Security Office.	30	7
* Co-Insurance	That amount assumed by the hospital to be applied toward the patient's coinsurance amount involving the indicated payer.	30	24
* Coinsurance Days	The inpatient Medicare days occurring after the 60th day and before the 91st day in a single spell of illness.	30	21
* Condition Codes	A code(s) used to identify conditions relating to this bill that may affect payer processing (Addendum C).	40	27-31
* Covered Days	The number of days covered by the primary payer, as qualified by the payer organization.	30	19
* Deductible	That amount assumed by the hospital to be applied to the patient's deductible amount involving the indicated payer.	30	23
Discharge Hour	Hour that the patient was discharged from inpatient care. (Addendum C)	20	23
* Employee ID Number	The identification number assigned by the employer to the insured identified in record 30, fields 11 - 13 as qualified by the payer organization, or as applicable, to the individual indicated by the employment info. code in record 21, field 10, or field 18.	21 31	9&17 14
* Employer Location	The specific location for the employer of the individual identified in record 30.	21 21 31	5-8 13-16 10-13

* Complete for Medicare

Data Element	Definition	Record	Field
* Employer Name	The name of the employer that might or does provide health care coverage for the individual identified in record 30.	21 21 31	4 12 9
* Employment Information Data	A code that indicates whether the employment information given in the related area applies to the patient, the patient's spouse, the patient's mother, or the patient's father. (See Addendum C)	21 21	10 18
Employment Status Code	A code used to define the employment status of the individual identified by the "Employment Information Data" code, or by name in record 30. (See Addendum C).	21 21 30	11 19 18
Estimated Amount Due	The amount estimated by the hospital to be due from the indicated payer. (Estimated responsibility less prior payments.)	30	25
Estimated Responsibility	The amount estimated by the hospital to be paid by the indicated payer.	30	26
Federal Tax Number	The number assigned to the provider by the federal government for tax reports purposes. Also known as a tax identification number (TIN) or employer identification number (EIN).	10 95	4 2
Insurance Group Number	The identification number, control number, or code assigned by the carrier or administrator to identify the group under which the individual is covered.	30	9
* Insured Address	Insured's current mailing address.	31	4 - 8
	Address Line 1	31	4
	Address Line 2	31	5
	City	31	6
	State	31	7
	Zip	31	8
Insured Group Name	Name of the group or plan through which the insurance is provided to the insured.	30	10
Insured's Name	Name of the individual in whose name the insurance is carried.	30	11-13
	Last Name	30	11
	First Name	30	12
	Middle Initial	30	13

* Complete for Medicare

Data Element	Definition	Record	Field
* Insured's Sex	A code indicating the sex of the insured. M=Male F=Female U=Unknown	30	14
* Lifetime Reserve Days	Under Medicare, each beneficiary has a lifetime reserve of 60 additional days of inpatient hospital services after using 90 days of inpatient hospital services during a spell of illness.	30	22
* Medicaid Provider Number	The number assigned to the provider by Medicaid.	10	8
* Medical Record Number	Number assigned to patient by hospital or other provider to assist in retrieval of medical records	20	25
* Medicare Provider Number	The number assigned to the provider by Medicare.	10	6
* Multiple Provider Billing Tape Indicator	A code indicating whether bills for more than one provider are contained on this tape submission, according to the following coding scheme. 1=Single Provider 2=Multiple Providers	01	3
Non-Covered Charges - Accommodations	Total of accommodation charges not covered by primary payer for this bill as reflected in record type 50, field 9 and subsequent accommodation packets in record type 50.	90	14
* Non-Covered Charges - Ancillaries	Total of "Ancillary Charges-Noncovered" for this bill as reflected in record type 60, field 9.	90	16
* Non-Covered Days	Days of care not covered by the primary payer.	30	20
* Number of Claims	A count of the number of record type 20 entries for this provider batch. (record type 10 to record type 95)	95	6
* Number of Batches Billed this Tape.	A count of the number of batches billed on this tape or transmission.	99	5

* Complete for Medicare

Data Element	Definition	Record	Field
* Number of Grace Days	Following the date of the PSRO/UR denial determination, this is the number of days determined by the PSRO/UR to be necessary to arrange for the patient's post discharge care.	40	8
* Occurrence Code	A code defining a significant event relating to this bill that may affect payer processing. (See Addendum C).	40	14, 16 18, 20 22
	Occurrence Code 1	40	14
	Occurrence Code 2	40	16
	Occurrence Code 3	40	18
	Occurrence Code 4	40	20
	Occurrence Code 5	40	22
* Occurrence Date	Date associated with the Occurrence Code in the preceding field.	40	15, 17 19, 21 23
	Occurrence Date 1	40	15
	Occurrence Date 2	40	17
	Occurrence Date 3	40	19
	Occurrence Date 4	40	21
	Occurrence Date 5	40	23
* Occurrence Span Code - 1	A code that identifies an event that relates to the payment of the claim. (See Addendum C)	40	24
* Occurrence Span Date - 1	The dates related to the Occurrence Span Code shown in the preceding field.	40	25&26
Operating Physician Name	Name used by the provider to identify the operating physician in the provider records.	80	9
* Operating Physician Number	Number used by the provider to identify the operating physician in the provider records.	80	5
* Other Diagnosis Codes	The ICD-9-CM diagnoses codes corresponding to additional conditions that co-exist at the time of admission, or develop subsequently, and which have an effect on the treatment received or the length of stay.	70	5-8
Other Physician ID NAME/NUMBER	The name and/or number of the licensed physician other than the attending physician as defined by the payer organization.	80	6,7, 10&11

* Complete for Medicare

Data Element	Definition	Record	Field
* Other Procedure Codes	The codes identifying the procedures, other than the principal procedure, performed during the billing period covered by this bill.	70	12, 15
* Other Procedure Dates	Date that the procedure indicated by the related code (preceding field) was performed	70	14, 17
* Patient Address	The address of the patient as qualified by the payer organization.	20	13-17
	Line 1		13
	Line 2		14
	City		15
	State (P.O. Code)		16
	Zip		17
* Patient Birthdate	The date of birth of the patient. Includes 4 pos. Year. (MMDDYYYY).	20	9
* Patient Control Number	Patient's unique alpha-numeric number assigned by the provider to facilitate retrieval of individual case records and posting of payment.	20-90	3
* Patient Has Paid	Amount patient has paid to the provider towards this bill.	20	24
Patient Marital Status	The marital status of the patient at date of admission, outpatient service, or start of care. (See Addendum C).	20	12
* Patient Name	Last name, first name, and middle initial of the patient.	20	4 - 6
	Last name	20	4
	First name	20	5
	Middle Initial	20	6
* Patient's Relationship to Insured	A code indicating the relationship of the patient to the identified insured. (See Addendum C).	30	17
* Patient Sex	The sex of the patient as recorded at date of admission, outpatient service, or start of care. M=Male F=Female U=Unknown	20	7

* Complete for Medicare

Data Element	Definition	Record	Field
* Patient Status	A code indicating patient status as of the statement covers thru date. (See Addendum C).	20	22
* Physical Record Count (Excluding Screen)	The total number of physical records submitted for this bill, including all record types 20 through 8n, and excluding record type 90.	90	4
* Payer Identification	Number identifying each payer organization from which the provider might expect some payment for the bill. (See Addendum C).	30	5
* Payer Name	Name identifying each payer organization from which the provider might expect some payment for the bill.	30	8
Payer Sub-identification	The identification of the specific office within the insurance carrier designated as responsible for this claim.	30	6
* Primary Payer Code	Identifies reason another payer is primary to Medicare. (See Addendum C).	30	28
* Principal and Other Diagnoses Descriptions	Narrative description of the principal diagnosis (i.e., the condition established after study to be chiefly responsible for causing the hospitalization or use of hospital services) and other diagnoses. ICD-9-CM terminology should be used.	70	19
* Principal Diagnosis Code	The ICD-9-CM diagnosis codes describing the principal diagnosis (i.e., the condition established after study to be chiefly responsible for causing this hospitalization).	70	4
* Principal Procedure Code	The code that identifies the principal procedure performed during the period covered by this bill.	70	9
* Principal Procedure Date	The date on which the principal procedure described on the bill was performed.	70	11

* Complete for Medicare

best copy available

Data Element	Definition	Record	Field
* Principal and Other Procedures Descriptions	A narrative description of the principal procedure (i.e., the procedure that was performed for definitive treatment rather than the one performed for diagnostic or exploratory purposes or the procedure most related to the principal diagnosis) and other procedures. The principal procedure is to be shown first.	70	20
* Prior Payments - Payer and Patients	The amount the hospital has received toward payment of this bill prior to the billing date by the indicated payer.	30	27
Procedure Code	Procedure code reported in type 61 record to identify physician services so that reimbursement can be made as though the service had been provided in the physician's office.	61	4
Procedure Coding Method Used	An indicator that identifies the coding method used for procedure coding on the bill. (See Addendum C).	10	18
* Processing date ("Date Bill Submitted" on HCFA-1450).	Date the submitter prepares the file.	01	8
* Provider Address	Complete mailing address to which the provider wishes payment sent.	10	14-17
	Street address or box number	10	14
	City	10	15
	State (P.O. abbreviations)	10	16
	Zip	10	17
* Provider Name	Name of the provider submitting this batch of bills.	10	13
Provider Telephone Number	Telephone number, including area code, at which the provider wishes to be contacted for claims development.	10	12
* PSRO/PRO Approval Indicator	An indicator describing the determination arrived at by the PRO or PSRO.	40	5

* Complete for Medicare

Data Element	Definition	Record	Field
* PSRO/PRO Approved Stay Dates	The first and last days that were approved where not all of the stay has been approved by the PRO or PSRO.	40	6 - 7
* Receiver Identification	Number identifying to the provider the organization designated to receive this file. (See Addendum C).	01 95 99	6 3 3
Receiver Sub-Identification	The identification of the specific location within the receiver organization designated to receive the tape or transmission.	01 95 99	7 4 4
* Receiver Type Code	A code indicating the class of organization designated to receive this tape or transmission. (See Addendum C).	01	5
* Record Type nn Count	A count of record types 20-2n through 80-8n, fields 5 through 11 of this record. These fields should crossfoot to the total in field 4 of this record.	90	5 -11
* Reel Sequence Number	Sequence number from 01 to nn assigned to each reel in this file of records.	01	15
Reel Serial Number	Inventory number of the reel.	01	16
* Remarks	Notations relating specific state and local needs providing additional information necessary to adjudicate the claim or otherwise fulfill state reporting requirements.	90	17
* Release of Information Certification Indicator	A code indicating whether the provider has on file a signed statement permitting the payer to release data to other organizations in order to adjudicate the claim. (See Addendum C).	30	15

* Complete for Medicare

Data Element	Definition	Record	Field
* Sequence Number	Sequential number from 01 to nn assigned to individual records within the same specific record type code to indicate the sequence of the physical record within the record type. Records 20-2n, 40-4n, 70-7n and 80-8n will never have a sequence number greater than 01. The sequence number for record types 30 and 31 are used as matching criteria to determine which type 30 and type 31 records are associated, like sequence numbers indicating the records are associated.	30-3n 50-5n 60-6n	2 2 2
* Source of Admission	A code indicating the source of this admission. (See Addendum C).	20	11
* Source of Payment Code	A code indicating source of payment associated with this payer record. (See Addendum C).	30	4
* Special Program Indicator	A code indicating that the services included on this bill are related to a special program. (See Addendum C).	31	16
* Statement Covers Period	The beginning and ending service dates of the period covered by this bill.	20	20-21
* Submitter Address	Mailing address of the submitter of this file. Address City State Zip	01	10-13 10 11 12 13
* Submitter EIN	Federally assigned Employer Identification Number (EIN) of tape submitter. EIN is also referred to as Tax Identification Number (TIN).	1 99	2 2

* Complete for Medicare

Data Element	Definition	Record	Field
* Submitter Name	Name of provider, third party billing service, or other organization to which the receiver/processor should direct inquiries regarding this transmittal.	01	9
Submitter Telephone Number	Telephone number, including area code, at which the submitter wishes to be contacted for claim development.	01	14
* Total Days/Visits	Inpatient bills: the sum of all days reported in accommodation packets in record type 50. Outpatient and home health bills: the sum of all visits recorded as "units of service" for this bill record in record type 60, field 7.	90	12
	Sum of days/visits recorded in record type 90, field 12.	95	7
* Treatment Authorization Code	A number or other indicator that designates that the treatment covered by this bill has been authorized by the payer.	40	9
* Total Charges - Accommodations	Total accommodation charges for this bill	90	13
Total Charges - Ancillaries	Total ancillary charges for this bill	90	15
* Type of Admission	A code indicating the priority of this admission. (See Addendum C).	20	10

* Complete for Medicare

Data Element	Definition	Record	Field
* Type of Batch	A code indicating the types of bills that occur in this batch; i.e. between a provider record (record type 10), and a provider batch control (record type 95). (See Addendum C).	10 95	2 5
* Type of Bill	A code indicating the specific type of bill (inpatient, outpatient, adjustments, voids, etc.) (See Addendum C).	40	4
* Value Amount	Amount of money related to the associated value code. (See Addendum C for Value Codes).	40	32, 34, 36, 38 40, 42 44&46
* Value Code	A code that identifies data of a monetary nature that is necessary for processing this claim as qualified by the payer organization. (See Addendum C).	40	33, 35 37, 39 41, 43 45&47
* Version Code	A code that indicates the version of the National Specifications submitted on this reel, disk, etc. 001 = UB-82 data set as finally approved 08/17/82.	01	19

* Complete for Medicare

Data Element: Accident Hour

Definition: The hour when the accident occurred that necessitated medical treatment.

00 - 23;
Midnight (12:00-12:59) = 00
01:00-01:59 AM = 01
Noon (12:00-12:59) = 12
01:00-01:59 PM = 13
11:00-11:59 PM = 23
99 = UNKNOWN

Data Element: Admission Hour

Definition: The hour during which the patient was admitted for inpatient or outpatient care.

00 - 23;
Midnight (12:00-12:59) = 00
01:00-01:59 AM = 01
Noon (12:00-12:59) = 12
01:00-01:59 PM = 13
11:00-11:59 PM = 23
99 = UNKNOWN

Data Element: Condition Codes

Data Definition: A Code(s) used to identify conditions relating to this bill that may affect payer processing.

Code Structure:

Code	Code Title	Definition
INSURANCE CODES		
01	Military Service Related	Medical condition incurred during military service.
02	Condition is Employment Related	Patient alleges that medical condition is due to environment/events resulting from employment.
03	Patient Covered by Insurance not Reflected Here	Indicates that patient/patient representative has stated that coverage may exist beyond that reflected on this bill.
04	HMO Enrollee	Medicare beneficiary is enrolled in an HMO.
05	Lien has been filed	Provider has filed legal claim for recovery of funds potentially due a patient as a result of legal action initiated by or on behalf of the patient.
06	ESRD Patient in first year of entitlement covered by employer group health insurance	Code indicates Medicare may be a secondary insurer if the patient is also covered by employer group health insurance during his first year of end stage renal disease entitlement.
07	Treatment of non-terminal condition for hospice patient.	The patient is a hospice enrollee, but the provider is not treating his terminal condition and is therefore requesting Medicare reimbursement.
08-16		Reserved for National assignment.
SPECIAL CONDITIONS		
17	Patient is Over 100 years old	Indicates that the patient is over 100 years old at date of admission or outpatient services. Not used for electronic billing.
18	Maiden Name Retained	A dependent spouse entitled to benefits who does not use her husband's last name.

19	Child Retains Mother's Name	A patient who is a dependent child entitled to CHAMPUS or CHAMPVA benefits that does not have his father's last name.
20-30		Reserved for national assignment

STUDENT STATUS (Required when patient is a dependent child over 18 years old)

Note: Use only one of the following codes - lowest code value number takes precedence.

31	Patient is student (full time - day)	Patient declares that he or she is enrolled as a full time day student.
32	Patient is student (Cooperative/work study program)	Self Explanatory
33	Patient is student (full time - night)	Patient declares that he or she is enrolled as a full time night student.
34	Patient is student (part time)	Patient declares that he or she is enrolled as a part time student.
35		Reserved for National Assignment.

ACCOMMODATIONS

36	General care patient in a special unit	Patient temporarily placed in special care unit bed because no general care beds available.
37	Ward Accommodation-Patient's Request	Patient assigned to ward accommodations at patient's request.
38	Semi-Private Room Not Available	Indicates that either private or ward accommodations assigned because semi-private accommodations were not available.
39	Private Room Medically Necessary	Patient needs a private room for medical requirements.
40	Same Day Transfer	Patient transferred to another facility before midnight on the day of admission.
40-45		Reserved for National Assignment

CHAMPUS INFORMATION

46	Non-Availability Statement on File	A nonavailability statement must be be on file for each CHAMPUS claim for non emergency inpatient care when the CHAMPUS beneficiary resides within the catchment area (usually a 40 mile radius) of a Uniform Services Hospital.
47		Reserved for CHAMPUS
48-59		Reserved for National Assignment.

PROSPECTIVE PAYMENT

60	Day Outlier	A hospital being paid under a prospective payment system is reporting this stay as a day outlier
61	Cost Outlier	A hospital being paid under a prospective payment system is requesting additional payment for this stay as a cost outlier
62	Payer Code	PROVIDERS DO NOT REPORT THIS. FOR PAYER INTERNAL USE ONLY. Indicates the claim was paid under a DRG.
63-70		Reserved for National Assignment

RENAL DIALYSIS SETTING

71	Full Care In Unit	Billing is for a patient who received staff assisted dialysis services in a hospital or renal dialysis facility.
72	Self Care in Unit	Billing is for a patient who managed his own dialysis services without staff assistance in a hospital or renal dialysis facility.
73	Self Care Training	Billing is for special dialysis services where a patient and his helper (if necessary) were learning to perform dialysis.
74	Home	Billing is for a patient who received dialysis services at home but where code 75 below does not apply.
75	Home - 100 Percent Reimbursement	Billing is for a patient who received dialysis services at home, using a dialysis machine that was purchased by Medicare under the 100 percent program.

76	Back-up Facility	Billing is for a patient who received dialysis services in a back-up facility.
77-79		Reserved for National Assignment.
80-99		Reserved for State Assignment.

Data Element: Discharge hour

Definition: Hour that the patient was discharged from inpatient care:

00 - 23;
Midnight (12:00-12:59) = 00
01:00-01:59 AM = 01
Noon (12:00-12:59) = 12
01:00-01:59 PM = 13
11:00-11:59 PM = 23
99 = UNKNOWN

Data Element: Employment Information Data.

Definition: A code that indicates whether the employment information given in the related areas applies to an insured, the patient or the patient's spouse.

Code Structure:
P - Patient Employment Information.
S - Spouse Employment Information.
F - Father's Employment Information.
M - Mother's Employment Information.

Data Element: Employment Status Code.

Definition: A code used to define the employment status of the individual identified by the "Employment Information Data" code.

Code	Code Title	Definition
1	Employed full time	Individual states that he or she is employed full time.
2	Employed part time	Individual states that he or she is employed part time.
3	Not employed	Individual states that he or she is not employed full time or part time.
4	Self Employed	Self-explanatory.
5	Retired	Self-explanatory.
6	On Active Military Duty	Self-explanatory.
7-8		Reserved for National assignment.
9	Unknown	Individual's employment status is unknown.

Data Element: Occurrence code.

Definition: A code defining a significant event relating to this bill that may affect payer processing.

ACCIDENT RELATED CODES

01	Auto Accident	Code indicating the date of an auto accident.
02	Auto Accident/ No Fault Insurance Involved	Code indicating the date of an accident where state has applicable no fault liability laws. (i.e., legal basis for settlement without admission or proof of guilt).
03	Accident/Tort Liability	Code indicating the date of an accident resulting from a third party's action that may involve a civil court process in an attempt to require payment by the third party, other than no fault liability. This date could also be the date of an event for which a third party makes a nonjudical admission of liability. Medicare would become secondary payer in this case.
04	Accident/Employment Related	Code indicating the date of an accident allegedly relating to the patient's employment.
05	Other Accident	Code indicating the date of an accident not described by the above codes.
06	Crime Victim	Code indicating the date on which a medical condition resulted from alleged criminal action committed by one or more parties.
07-09		Reserved for National Assignment.

MEDICAL CONDITION CODES

10	Last Menstrual Period	Code indicating the date of the last menstrual period; ONLY applies when patient is being treated for maternity-related condition.
11	Onset of Symptoms/Illness	Date the patient first became aware of symptoms/illness.
12-19		Reserved for National Assignment.

INSURANCE RELATED CODES

20	Guarantee of Payment Began	Code indicating the date on which the provider began claiming Medicare payment under the guarantee of payment provision. (HIM 10, 402.1, Item 21).
21	UR/PSRO Notice Received	Code indicating the date of receipt by the hospital of the UR Committee's (PSRO or other responsible group's) finding that an admission or further stay was not medically necessary (HIM 10, 402.1, Item 22).
22	Active Care Ended	Code indicating the date on which a covered level of care ended in a general hospital, or date on which active care ended in a psychiatric or tuberculosis hospital. (HIM 10, 402.1, Item 23). Code not required where PSRO/UR approval is completed.
23	Benefits Exhausted	Code indicating the last date for which benefits are being claimed by the provider (HIM 10, 402.1, Item 24).
24	Date Insurance Denied	Code indicating the date the denial of coverage was received by the hospital from the insurer.
25	Date Benefits Terminated By Primary Payer	The date on which coverage (including Worker's Compensation benefits or no-fault coverage) is no longer available to the patient.
26	Date SNF Bed Available	Code indicating the date on which a SNF bed became available to hospital inpatient who requires only SNF level care. (HIM 10, 405C).
27	Date Home Health Plan Established	Code indicating the date a home health plan of treatment was established (THIS CODE IS ONLY TO BE USED BY HOME HEALTH PROVIDERS), (HIM 11, 402, ITEM 13).
28-39		Reserved for National Assignment.

SERVICE RELATED CODES

40	Scheduled Date of Admission	The date on which a patient will be admitted as an inpatient to the hospital. (This code may only be used on an outpatient claim.)
41	Date of First Test for Pre-Admission Testing	The date on which the first outpatient diagnostic test was performed as part of a PAT program. This code may only be used if a date of admission was scheduled prior to the administration of the test(s).
42	Date of Discharge	To be used when "Through" date in "Statement Covers Period" is not the actual discharge date and the frequency code in the "Type of Bill" code is that of a final bill. For final bill for hospice care, enter the date the Medicare beneficiary terminated his election of hospice care.
43 -49		Reserved for National Assignment.
50-69		Reserved for State Assignment.
70-99		See Occurrence Span Codes. If this code is encountered in an Occurrence Code field, the date following is the "From Date" of the date span, the next Occurrence Code field must be blank, and the next date field is the "Through Date" of the date span.

Data Element: Occurrence Span Code-1.

Data Definition: A code that identifies an event that relates to the payment of the claim.

Code Structure

70	Qualifying Stay Dates (Medicare)	The from/thru date of at least a 3-day hospital stay that qualifies the patient for Medicare payment of SNF services billed. Code can be used only by SNF for billing. (HIM 10, 310.1, Item 11).
71	Prior Stay Dates	The from/thru dates given by the patient of any hospital, SNF, or nursing home stay that ended within 60 days of this hospital or SNF admission. (HIM 10, 310.1, Item 12).
72	First/Last Visit	The from/through dates of outpatient services. For use on outpatient bills only where the entire billing record is not represented by the actual from/through service dates shown in the "Statement Covers Period".
73	Benefit Eligibility Period	The inclusive dates during which CHAMPUS medical benefits are available to a sponsor's beneficiary as shown on the beneficiary's ID card.
74	Noncovered Level of Care	The from/through dates of a period at a noncovered level of care in an otherwise covered stay.
75	SNF Level of Care	The from/through dates of a period of SNF level of care during an inpatient hospital stay. Used to show PSRO/PRO approval of patient's remaining in hospital because SNF bed not available. Code is not applicable to Swing Bed cases. For hospitals under prospective payment, this code is needed in day outlier cases only.
76-79		Reserved for National Assignment.
80-99		Reserved for State Assignment.

Data Element: Patient Marital Status.

Definition: The marital status of the patient at date of admission, outpatient service, or start of care:

S - Single
M - Married
X - Legally Separated
D - Divorced
W - Widowed
U - Unknown

Data Element: Patient's Relationship to Insured.

Definition: A code indicating the relationship of the patient to the identified insured:

01	Patient Is Insured	Self - explanatory
02	Spouse	Self - explanatory
03	Natural Child/ Insured has financial responsibility	Self - explanatory
04	Natural Child/ Insured does not have financial responsibility	Self - explanatory
05	Step Child	Self - explanatory
06	Foster Child	Self - explanatory
07	Ward of the Court	Patient is ward of insured as a result of a court order.
08	Employee	Patient is employed by the insured.
09	Unknown	Patient's relationship to the insured is unknown.
10	Handicapped dependent	Dependent child whose coverage extends beyond normal termination age limits as result of laws or agreements extending coverage.
11	Organ donor	Code is used in cases where bill is submitted for care given to organ donor where such care is paid by the receiving patient's insurance coverage.
12	Cadaver donor	Code is used where bill is submitted for procedures performed on cadaver donor where such procedures are paid by the receiving patient's insurance coverage.
13	Grandchild	Self - explanatory
14	Niece/Nephew	Self - explanatory
15	Injured Plaintiff	Patient is claiming insurance as a result of injury covered by insured.
16	Sponsored dependent	Individual not normally covered by insurance coverage but coverage has been specially arranged to include relationships such as grandparent or former spouse that would require further investigation by the payer.
17	Minor Dependent of a Minor Dependent	Patient is a minor, and the dependent of a minor that is in turn, a dependent but not the child of the insured.
18	Parent	Self explanatory
19	Grandparent	Self explanatory
20 -99		Reserved for National Assignment

Data Element: Patient status.

Definition: A code indicating patient status as of statement covers thru date:

Codes:

01	Discharged to home or self care (routine discharge)
02	Discharged/transferred to another short-term general hospital
03	Discharged/transferred to skilled nursing facility (SNF)
04	Discharged/transferred to an intermediate care facility (ICF)
05	Discharged/transferred to another type of institution
06	Discharged/transferred to home under care of organized home health service organization
07	Left against medical advice
08 -09	Reserved for National Assignment
10 -19	Discharge to be defined at State level, if necessary
20	Expired - (or did not recover - Christian Science Patient)
21 -29	Expired to be defined at State level, if necessary
30	Still patient
31 -39	Still patient to be defined at State level, if necessary
40	Expired at home
41	Expired in a hospital, SNF, or ICF
42	Expired - place unknown
43 -99	Reserved for National Assignment

Data Element: Payer Identification.

Definition: Number identifying each payer organization from which the provider might expect some reimbursement for the bill.

Blue Cross - The Blue Cross number (oonnn)
Commerical Insurers - NAIC assigned number (nnnnn)
Medicaid - State Agency assigned number
Medicare - One or two above, depending on intermediary
CHAMPUS - NAIC number

Data Element: Primary Payer Code.

Definition: Identifies reason another payer is primary to Medicare.

Codes:

Z	Medicare is Primary
A	Working Aged Bene/Spouse with EGHP
B	ESRD Bene in 12 month period with EGHP
C	Any conditional payment situation
D	Automobile No-Fault or any liability insurance
E	Workers' Compensation
F	PHS, Other Federal Agency
G	Disabled Bene under age 65 with LGHP
H	BL
I	VA

Data Element: Procedure Coding Method Used.

Definition: An indicator that identifies the coding method used for procedure coding on the bill.

1 -3 - Reserved for State and Local Assignment
4 - CPT-4
5 - HCPCS (HCFA Common Procedure Coding System)
6 -8 - Reserved for National Assignment
9 - ICD-9-CM

Data Element: PRO/UR Approval Indicator.

Definition: An indicator describing the determination arrived at by the PRO.

Code 1	Approved as Billed	Code indicates claim has been reviewed by the PRO and has been fully approved including any day or cost outlier.
2	Automatic Approval (Focused Review)	Code does not apply to Medicare claims.
3	Partial Approval	Code indicates the bill has been reviewed by the PRO and that some portion (days or services) has been denied. The From/Through dates of the approved portion of the stay, excluding grace days, and any period at a noncovered level of care (code "77" in Item 33), are shown in Items 88 and 89.
4	Admission Denied	Code indicates patient's need for inpatient services was reviewed and the PRO found that none of the stay was medically necessary.
5	Post-payment Review Applicable	Code indicates that any medical review will be completed after the claim is paid. The bill may be day outlier, cost outlier, part of the sample review, reviewed for other reasons, or may not be reviewed.
6	Preadmission/ Preprocedure	code indicates that the PRO authorized this admission/procedure, but has not reviewed the services provided.

Data Element: Receiver Identification

Definition: Number identifying to the provider the organization designated to receive this file. Receivers accepting tapes on behalf of more than one third party payer are to be identified by their tax

Data Element: Receiver Type

Definition: A code indicating the class of organization designated to receive this tape or transmittion.

A - Self pay
B - Workers Compensation
C - Medicare
D - Medicaid
E - Other Federal program
F - Insurance company
G - Blue Cross
H - CHAMPUS
I - Other - local coding table applies
Z - Multiple principal
Sources of payment 1/

Data Element: Release of Information Certification Indicator

Definition: A code indicating whether the provider has on file a signed statement permitting the provider to release data to other organizations in order to adjudicate the claim.

Codes:

Y-Yes	The hospital has signed written authority to release medical/billing information for purposes of claiming insurance benefits.
R-Restricted or Modified Release	The hospital has limited or restricted authority to release some medical/billing information for purposes of claiming insurance benefits.
N-No Release	The hospital does not have permission to release any medical/billing information.

Data Element: Revenue Code

Definition: A Code which identifies a specific accommodation, ancillary service or billing calculation.

Code Structure:

Major Category

PAYER AND RELATED INFORMATION (codes 001 - 099).

N.B.: THESE CODES SHOULD BE REPORTED IN RECORD TYPE 60, BUT THE AMOUNTS ASSOCIATED WITH THEM SHOULD NOT BE INCLUDED IN CONTROL TOTALS MAINTAINED IN RECORD TYPES 90 THRU 9N.

Rationale: To group items by payer and to assign similar items the same number.

001 Total Charge

01X
to
06X Reserved for National Assignment

07X
to
09X Reserved for State Use

ACCOMMODATION REVENUE CODES (10X - 21X)

10X All Inclusive Rate

Flat fee charge incurred on either a daily basis or total stay basis for services rendered. Charge may cover room and board plus ancillary services or room and board only.

	Subcategory	Standard Abbreviations
0	All-Inclusive Room and Board Plus Ancillary	ALL INCL R&B/ANC
1	All-Inclusive Room and Board	ALL INCL R&B

11X Room & Board - Private Medical or General

Routine service charges for single bed rooms.

Rationale: Most third party payers require that private rooms be separately identified.

Subcategory	Standard Abbreviation
0 - General Classification	ROOM-BOARD/PVT
1 - Medical/Surgical/Gyn	MED-SUR-GY/PVT
2 - OB	OB/PVT
3 - Pediatric	PEDS/PVT
4 - Psychiatric	PSYCH/PVT
5 - Hospice	HOSPICE/PVT
6 - Detoxification	DETOX/PVT
7 - Oncology	ONCOLOGY/PVT
9 - Other	OTHER/PVT

12X Room & Board - Semi-private Two Bed (Medical or General)

Routine service charges incurred for accommodations with two beds.

Rationale: Most third party payers require that semi-private rooms be identified.

Room and Board - Semi-Private

Subcategory	Standard Abbreviation
0 - General Classification	ROOM-BOARD/SEMI
1 - Medical/Surgical/Gyn	MED-SUR-GY/2BED
2 - OB	OB/2BED
3 - Pediatric	PEDS/2BED
4 - Psychiatric	PSYCH/2BED
5 - Hospice	HOSPICE/2BED
6 - Detoxification	DETOX/2BED
7 - Oncology	ONCOLOGY/2BED
9 - Other	OTHER/2BED

13X **Semi-Private - Three and Four Beds**

Routine service charges incurred for accommodations with three and four beds.

Subcategory	Standard Abbreviation
0 - General Classification	ROOM-BOARD/3&4 BED
1 - Medical/Surgical/Gyn	MED-SUR-GY/3&4 BED
2 - OB	OB/3&4BED
3 - Pediatric	PEDS/3&4BED
4 - Psychiatric	PSYCH/3&4BED
5 - Hospice	HOSPICE/3&4BED
6 - Detoxification	DETOX/3&4BED
7 - Oncology	ONCOLOGY/3&4BED
9 - Other	OTHER/3&4BED

14X **Private (Deluxe)**

Deluxe rooms are accommodations with amenities substantially in excess of those provided to other patients.

Subcategory	Standard Abbreviation
0 - General Classification	ROOM-BOARD/PVT/DLX
1 - Medical/Surgical/Gyn	MED-SUR-GY/DLX
2 - OB	OB/DLX
3 - Pediatric	PEDS/DLX
4 - Psychiatric	PSYCH/DLX
5 - Hospice	HOSPICE/DLX
6 - Detoxification	DETOX/DLX
7 - Oncology	ONCOLOGY/DLX
9 - Other	OTHER/DLX

15X **Room & Board Ward (Medical or General)**

Routine service charge for accommodations with five or more beds.

Rationale: Most third party payers require ward accommodations to be identified.

Subcategory	Standard Abbreviation
0 - General Classification	ROOM-BOARD/WARD
1 - Medical/Surgical/Gyn	MED-SUR-GY/WARD
2 - OB	OB/WARD
3 - Pediatric	PEDS/WARD
4 - Psychiatric	PSYCH/WARD
5 - Hospice	HOSPICE/WARD
6 - Detoxification	DETOX/WARD
7 - Oncology	ONCOLOGY/WARD
9 - Other	OTHER/WARD

16X **Other Room & Board**

Any routine service charges for accommodations that cannot be included in the more specific revenue center codes.

Rationale: Provides the ability to identify services as required by payers or individual institutions.

Sterile environment is a room and board charge to be used by hospitals that are currently separating this charge for billing.

Subcategory	Standard Abbreviation
0 - General Classification	R&B
4 - Sterile Environment	R&B/STERILE
7 - Self Care	R&B/SELF
9 - Other	R&B/Other

17X **Nursery**

Charges for nursing care to newborn and premature infants in nurseries.

Rationale: Provides a breakdown of various levels of nursery care. Tertiary care is a level of care between premature and regular nursery care.

Subcategory	Standard Abbreviation
0 - General Classification	NURSERY
1 - Newborn	NURSERY/NEWBORN
2 - Premature	NURSERY/PREMIE
5 - NeoNatal ICU	NURSERY/ICU
9 - Other	NURSERY/OTHER

18X **Leave of Absence**

Charges (including zero charges) for holding a room while the patient is temporarily away from the provider.

NOTE: Charges are billable for codes 2 - 5

Subcategory	Standard Abbreviation
0 - General Classification	LEAVE OF ABSENCE OR LOA
2 - Patient Convenience - charges billable	LOA/PT CONV CHGS BILLABLE
3 - Theraputic Leave	LOA/THERAP
4 - ICF Mentally Retarded - any reason	LOA/ICF/MR
5 - Nursing Home (Hospitalization)	LOA/NURS HOME
9 - Other Leave of Absence	LOA/OTHER

19X Not Assigned

20X Intensive Care

Routine service charge for medical or surgical care provided to patients who require a more intensive level of care than is rendered in the general medical or surgical unit.

Rationale: Most third party payers require that charges for this service are to be identified.

Subcategory	Standard Abbreviation
0 - General Classification	INTENSIVE CARE or (ICU)
1 - Surgical	ICU/SURGICAL
2 - Medical	ICU/MEDICAL
3 - Pediatric	ICU/PEDS
4 - Psychiatric	ICU/PSTAY
6 - Post ICU	POST ICU
7 - Burn Care	ICU/BURN CARE
8 - Trauma	ICU/TRAMA
9 - Other Intensive Care	ICU/OTHER

21X Coronary Care

Routine service charge for medical care provided to patients with coronary illness who require a more intensive level of care than is rendered in the general medical care unit.

Rationale: If a discrete unit exists for rendering such services, the hospital or third party may wish to identify the service.

Subcategory	Standard Abbreviation
0 - General Classification	CORONARY CARE or (CCU)
1 - Myocardial Infarction	CCU/MYO INFARC
2 - Pulmonary Care	CCU/PULMONARY
3 - Heart Transplant	CCU/TRANSPLANT
4 - Post-CCU	POST CCU
9 - Other Coronary Care	CCU/OTHER

ANCILLARY REVENUE CODES (22X - 99X)

22X **Special Charges**

Charges incurred during an inpatient stay or on a daily basis for certain services.

Rationale: Some hospitals prefer to identify the components of services rendered in greater detail and thus break out charges for items that normally would be considered part of routine services.

Subcategory	Standard Abbreviation
0 - General Classification	SPECIAL CHARGES
1 - Admission Charge	ADMIT CHARGE
2 - Technical Support Charge	TECH SUPPT CHG
3 - U.R. Service Charge	UR CHARGE
4 - Late Discharge, medically necessary	LATE DISCH/MED NEC
9 - Other Special Charges	OTHER SPEC CHG

23X **Incremental Nursing Charge Rate**

Charge for nursing service assessed in addition to room and board.

Subcategory	Standard Abbreviation
0 - General Classification	NURSING INCREM
1 - Nursery	NUR INCR/NURSERY
2 - OB	NUR INCR/OB
3 - ICU (includes transitional care)	NUR INCR/ICU
4 - CCU (includes transitional care)	NUR INCR/CCU
5 - Hospice	NUR INCR/HOSPICE
9 - Other	NUR INCR/OTHER

24X **All Inclusive Ancillary**

A flat rate charge incurred on either a daily basis or total stay basis for ancillary services only.

Rationale: Hospitals that bill in this manner may wish to segregate these charges.

Subcategory	Standard Abbreviation
0 - General Classification	ALL INCL ANCIL
9 - Other Inclusive Ancillary	ALL INCL ANCIL/OTHER

25X Pharmacy

Charges for medication produced, manufactured, packaged, controlled, assayed, dispensed and distributed under the direction of licensed pharmacist.

Rationale: Additional breakdowns are provided for items that individual hospitals may wish to identify because of internal or third party payer requirements.

Subcategory	Standard Abbreviation
0 - General Classification	PHARMACY
1 - Generic Drugs	DRUGS/GENERIC
2 - Nongeneric drugs	DRUGS/NONGENERIC
3 - Take Home Drugs	DRUGS/TAKEHOME
4 - Less Than Effective Drugs	DRUGS/LESS
6 - Experimental Drugs	DRUGS/EXPERIMT
7 - Non-prescription	DRUGS/NONPSCRPT
8 - IV Solutions	IV SOLUTIONS
9 - Other Pharmacy	DRUGS/OTHER

26X IV Therapy

Administration of intravenous solution by specially trained personnel to individuals requiring such treatment. This code should be used only when a discrete service unit exists.

Subcategory	Standard Abbreviation
0 - General Classification	IV THERAPY
1 - Infusion Pump	IV THER/INFSN PUMP
9 - Other IV Therapy	IV THERAPY/OTHER

27X **Medical/Surgical Supplies**

Charges for supply items required for patient care.

Rationale: Additional breakdowns are provided for items that hospitals may wish to identify because of internal or third party payer requirements.

Subcategory	Standard Abbreviation
0 - General Classification	MED-SUR SUPPLIES
1 - Nonsterile Supply	NONSTER SUPPLY
2 - Sterile Supply	STERILE SUPPLY
3 - Take Home Supplies	TAKEHOME SUPPLY
4 - Prosthetic Devices	PROSTHETIC DEV
5 - Pace maker	PACE MAKER
6 - Intraocular Lens	INTR OC LENS
7 - Oxygen-Take Home	02/TAKEHOME
8 - Other Implants	SUPPLY/IMPLANTS
9 - Other Devices	SUPPLY/OTHER

28X **Oncology**

Charges for the treatment of tumors and related diseases.

Subcategory	Standard Abbreviation
0 - General Classification	ONCOLOGY
9 - Other Oncology	ONCOLOGY/OTHER

29X **Durable Medical Equipment (Other Than Renal)**

Charge for medical equipment that can withstand repeated use (excluding renal equipment).

Rationale: Medicare requires a separate revenue center for billing.

Subcategory	Standard Abbreviation
0 - General Classification	MED EQUIP/DURAB
1 - Rental	MED EQUIP/RENT
2 - Purchase of new DME	MED EQUIP/NEW
3 - Purchase of used DME	MED EQUIP/USED
9 - Other Equipment	MED EQUIP/OTHER

30X **Laboratory**

Charges for the performance of diagnostic and routine clinical laboratory tests.

Rationale: A breakdown of the major areas in the laboratory is provided in order to meet hospital needs or third party billing requirements.

Subcategory	Standard Abbreviation
0 - General Classification	LABORATORY or (LAB)
1 - Chemistry	LAB/CHEMISTRY
2 - Immunology	LAB/IMMUNOLOGY
3 - Renal Patient (Home)	LAB/RENAL HOME
4 - Nonroutine Dialysis	LAB/NR DIALYSIS
5 - Hematology	LAB/HEMOTOLOGY
6 - Bacteriology & Microbiology	LAB/BACT-MICRO
7 - Urology	LAB/UROLOGY
9 - Other Laboratory	LAB/OTHER

31X **Laboratory Pathological**

Charges for diagnostic and routine laboratory tests on tissues and culture.

Rationale: A breakdown of the major areas that hospitals may wish to identify is provided.

Subcategory	Standard Abbreviation
0 - General Classification	PATHOLOGY LAB or (PATH LAB)
1 - Cytology	PATHOL/CYTOLOGY
2 - Histology	PATHOL/HYSTOL
4 - Biopsy	PATHOL/BIOPSY
9 - Other	PATHOL/OTHER

32X Radiology - Diagnostic

Charges for diagnostic radiology services provided for the examination and care of patients. Includes: taking, processing, examining and interpreting radiographs and fluorographs.

Rationale: A breakdown is provided of the major areas and procedures that individual hospitals or third party payers may wish to identify.

Subcategory	Standard Abbreviation
0 - General Classification	DX X-RAY
1 - Angiocardiography	DX X-RAY/ANGIO
2 - Arthrography	DX X-RAY/ARTH
3 - Arteriography	DX X-RAY/ARTER
4 - Chest X-Ray	DX X-RAY/CHEST
9 - Other	DX X-RAY/OTHER

33X Radiology - Therapeutic

Charges for therapeutic radiology services and chemotherapy are required for care and treatment of patients. Includes therapy by injection or ingestion of radioactive substances.

Rationale: A breakdown is provided of the major areas that hospitals or third parties may wish to identify. Chemotherapy - IV was added at the request of Ohio.

Subcategory	Standard Abbreviation
0 - General Classification	RX X-RAY
1 - Chemotherapy - Injected	CHEMOTHER/INJ
2 - Chemotherapy - Oral	CHEMOTHER/ORAL
3 - Radiation Therapy	RADIATION RX
5 - Chemotherapy - IV	CHEMOTHERP-IV
9 - Other	RX X-RAY/OTHER

34X Nuclear Medicine

Charges for procedures and tests performed by a radioisotope laboratory utilizing radioactive materials as required for diagnosis and treatment of patients.

Rationale: A breakdown is provided in case hospitals desire or are required to identify the type of service rendered.

Subcategory	Standard Abbreviation
0 - General Classification	NUCLEAR MEDICINE or (NUC MED)
1 - Diagnostic	NUC MED/DX
2 - Therapeutic	NUC MED/RX
9 - Other	NUC MED/OTHER

35X CT Scan

Charges for computed tomographic scans of the head and other parts of the body.

Rationale: Due to coverage limitations some third party payers require that the specific test be identified.

Subcategory	Standard Abbreviation
0 - General Classification	CT SCAN
1 - Head Scan	CT SCAN/HEAD
2 - Body Scan	CT SCAN/BODY
9 - Other CT Scans	CT SCAN/OTHER

36X Operating Room Services

Charges for services provided to patients by specially trained nursing personnel who provide assistance to physicians in the performance of surgical and related procedures during and immediately following surgery.

Rationale: Permits identification of particular services.

Subcategory	Standard Abbreviation
0 - General Classification	OR SERVICES
1 - Minor Surgery	OR/MINOR
2 - Organ Transplant-other than kidney	OR/ORGAN TRANS
7 - Kidney Transplant	OR/KIDNEY TRANS
9 - Other Operating Room Services	OR/OTHER

37X Anesthesia

Charges for anesthesia services in the hospital.

Rationale: Provides additional identification of services. In particular, acupuncture was identified because it is not covered by some payers, including Medicare.

Subcategory	Standard Abbreviation
0 - General Classification	ANESTHESIA
4 - Acupuncture	ANESTHE/ACUPUNC
9 - Other Anesthesia	ANESTHE/OTHER

38X Blood

Rationale: Charges for blood must be separately identified for private payer purposes.

Subcategory	Standard Abbreviation
0 - General Classification	BLOOD
1 - Packed Red Cells	BLOOD/PKD RED
2 - Whole Blood	BLOOD/WHOLE
3 - Plasma	BLOOD/PLASMA
4 - Platelets	BLOOD/PALTELETES
5 - Leucocytes	BLOOD/LEUCOCYTES
6 - Other Components	BLOOD/COMPONENTS
7 - Other Derivatives (Cryopricipatates)	BLOOD/DERIVATIVES
9 - Other Blood	BLOOD/OTHER

39X Blood Storage and Processing

Charges for the storage and processing of whole blood.

Subcategory	Standard Abbreviation
0 - General Classification	BLOOD/STOR-PROC
1 - Blood Administration	BLOOD/ADMIN.
9 - Other Blood Storage & Processing	BLOOD/OTHER STOR

40X Other Imaging Services

Subcategory	Standard Abbreviation
0 - General Classification	IMAGE SERVICE
1 - Mammography	MAMMOGRAPHY
2 - Ultrasound	ULTRASOUND
9 - Other Imaging Services	OTHER IMAG SVS

41X Respiratory Services

Charges for administration of oxygen and certain potent drugs through inhalation or positive pressure and other forms of rehabilitative therapy through measurement of inhaled and exhaled gases and analysis of blood and evaluation of the patient's ability to exchange oxygen and other gases.

Rationale: Permits identification of particular services.

Subcategory	Standard Abbreviation
0 - General Classification	RESPIRATORY SVC
2 - Inhalation Services	INHALATION SVC
3 - Hyperbaric Oxygen Therapy	HYPERBARIC 02
9 - Other Respiratory Services	OTHER RESPIR SVS

42X Physical Therapy

Charges for therapeutic exercises, massage and utilization of effective properties of light, heat, cold, water, electricity, and assistive devices for diagnosis and rehabilitation of patients who have neuromuscular, orthopedic and other disabilities.

Rationale: Permits identification of particular services.

Subcategory	Standard Abbreviation
0 - General Classification	PHYSICAL THERP
1 - Visit Charge	PHYS THERP/VISIT
2 - Hourly Charge	PHYS THERP/HOUR
3 - Group Rate	PHYS THERP/GROUP
4 - Evaluation or Re-evaluation	PHYS THERP/EVAL
9 - Other Physical Therapy	OTHER PHYS THERP

43X Occupational Therapy

Charges for teaching manual skills and independence in personal care to stimulate mental and emotional activity on the part of patients.

Subcategory	Standard Abbreviation
0 - General Classification	OCCUPATION THER
1 - Visit Charge	OCCUP THERP/VISIT
2 - Hourly Charge	OCCUP THERP/HOUR
3 - Group Rate	OCCUP THERP/GROUP
4 - Evaluation or Re-evaluation	OCCUP THERP/EVAL
9 - Other Occupational Therapy (may include restorative therapy)	OTHER OCCUP THER

44X Speech-Language Pathology

Charges for services provided to persons with impaired functional communications skills.

Subcategory	Standard Abbreviation
0 - General Classification	SPEECH PATHOL
1 - Visit Charge	SPEECH PATH/VISIT
2 - Hourly Charge	SPEECH PATH/HOUR
3 - Group Rate	SPEECH PATH/GROUP
4 - Evaluation or Re-evaluation	SPEECH PATH/EVAL
9 - Other Speech-Language Pathology	OTHER SPEECH PAT

45X Emergency Room

Charges for emergency treatment to those ill and injured persons who require immediate unscheduled medical or surgical care.

Rationale: Permits identification of particular items for payers

Subcategory	Standard Abbreviation
0 - General Classification	EMERG ROOM
9 - Other Emergency Room	OTHER EMER ROOM

NOTE: Observation or hold beds are not reported under this code. They are reported under revenue code 760 "Treatment or Observation Room."

46X Pulmonary Function

Charges for tests that measure inhaled and exhaled gases and analysis of blood and for tests that evaluate the patient's ability to exchange oxygen and other gases.

Rationale: Permits identification of this service if it exists in the hospital.

Subcategory	Standard Abbreviation
0 - General Classification	PULMONARY FUNC
9 - Other Pulmonary Function	OTHER PULMON FUNC

47X Audiology

Charges for the detection and management of communication handicaps centering in whole or in part on the hearing function.

Rationale: Permits identification of particular services.

Subcategory	Standard Abbreviation
0 - General Classification	AUDIOLOGY
1 - Diagnostic	AUDIOLOGY/DX
2 - Treatment	AUDIOLOGY/RX
9 - Other Audiology	OTHER AUDIOL

48X Cardiology

Charges for cardiac procedures rendered in a separate unit within the hospital. Such procedures include, but are not limited to: heart catheterization, coronary angiography, Swan-Ganz catheterization, and exercise stress test.

Rationale: This category was established to reflect a growing trend to incorporate these charges in a separate unit.

Subcategory	Standard Abbreviation
0 - General Classification	CARDIOLOGY
1 - Cardiac Cath Lab	CARDIAC CATH LAB
2 - Stress Test	STRESS TEST
9 - Other Cardiology	OTHER CARDIOL

49X Ambulatory Surgical Care

Charges for ambulatory surgery which are not covered by any other category.

Subcategory	Standard Abbreviation
0 - General Classification	AMBUL SURG
9 - Other Ambulatory Surgical Care	OTHER AMBL SURG

NOTE: Observation or hold beds are not reported under this code. They are reported under revenue code 760 "Treatment or Observation Room."

50X Outpatient Services

Outpatient charges (other than those for scheduled Preadmission Testing) for services rendered to an outpatient who is admitted as an inpatient before midnight of the day following the date of services. These charges are incorporated on the inpatient bill of Medicare patients.

Subcateogry	Standard Abbreviation
0 - General Classification	OUTPATIENT SVS
9 - Other Outpatient Services	OUTPATIENT/OTHER

51X Clinic

Clinic (nonemergency/scheduled outpatient visit) charges for providing diagnostic, preventive, curative, rehabilitative, and education services on a scheduled basis to ambulatory patients.

Rationale: Provides a breakdown of some clinics that hospitals or third party payers may require.

Subcategory	Standard Abbreviation
0 - General Classification	CLINIC
1 - Chronic Pain Center	CHRONIC PAIN CL
2 - Dental Clinic	DENTAL CLINIC
9 - Other Clinic	OTHER CLINIC

52X Free-Standing Clinic

Rationale: Provides a breakdown of some clinics that hospitals or third party payers may require.

Subcategory	Standard Abbreviation
0 - General Classification	FREESTAND CLINIC
1 - Rural Health-Clinic	RURAL/CLINIC
2 - Rural Health-Home	RURAL/HOME
3 - Family Practice	FAMILY PRACTICE
9 - Other Freestanding Clinic	OTHER FR/STD CLINIC

53X Osteopathic Services

Charges for a structural evaluation of the cranium, entire cervical, dorsal and lumbar spine by a doctor of osteopathy.

Rationale: There is a service unique to osteopathic hospitals and cannot be accommodated in any of the existing codes.

Subcategory	Standard Abbreviations
0 - General Classification	OSTEOPATH SVS
1 - Osteopathic Therapy	OSTEOPATH RX
9 - Other Osteopathic Services	OTHER OSTEOPATH

54X Ambulance

Charges for ambulance service, usually on an unscheduled basis to the ill and injured who require immediate medical attention.

Rationale: Provides subcategories that third party payers or hospitals may wish to recognize. Heart mobile is a specially designed ambulance transport for cardiac patients.

Subcategory	Standard Abbreviation
0 - General Classification	AMBULANCE
1 - Supplies	AMBUL/SUPPLY
2 - Medical Transport	AMBUL/MED TRANS
3 - Heart Mobile	AMBUL/HEARTMOBL
4 - Oxygen	AMBUL/0XY
5 - Air Ambulance	AIR AMBULANCE
6 - Neo-natal ambulance	AMBUL/NEO-NATAL
9 - Other Ambulance	OTHER AMBULANCE

55X Skilled Nursing

Charges for nursing services that must be provided under the direct supervision of a licensed nurse to assure the safety of the patient and to achieve the medically desired result. This code may be used for nursing home services or a service charge for home health billing.

Subcategory	Standard Abbreviation
0 - General Classification	SKILLED NURSING
1 - Visit Charge	SKILLED NURS/VISIT
2 - Hourly Charge	SKILLED NURS/HOUR
9 - Other Skilled Nursing	SKILLED NURS/OTHER

56X Medical Social Services

Charges for services such as counseling patients, interviewing patients, and interpreting problems of social situation rendered to patients on any basis.

Rationale: Necessary for Medicare home health billing requirements. May be used at other times as required by hospital.

Subcategory	Standard Abbreviation
0 - General Classification	MED SOCIAL SVS
1 - Visit Charge	MED SOC SERV/VISIT
2 - Hourly Charge	MED SOC SERV/HOUR
9 - Other Med. Soc. Services	MED SOC SERV/OTHER

57X Home Health Aide (Home Health)

Charges made by a HHA for personnel that are primarily responsible for the personal care of the patient.

Rationale: Necessary for Medicare home health billing requirements.

Subcategory	Standard Abbreviation
0 - General Classification	AIDE/HOME HEALTH
1 - Visit Charge	AIDE/HOME HLTH/VISIT
2 - Hourly Charge	AIDE/HOME HLTH/HOUR
9 - Other Home Health Aide	AIDE/HOME HLTH/OTHER

58X Other Visits (Home Health)

Charges by a HHA for visits other than physical therapy, occupational therapy or speech therapy, which must be specifically identified.

Rationale: Necessary for Medicare home health billing requirements.

Subcategory	Standard Abbreviation
0 - General Classification	VISIT/HOME HEALTH
1 - Visit Charge	VISIT/HOME HLTH/VISIT
2 - Hourly Charge	VISIT/HOME HLTH/HOUR
9 - Other Home Health Visits	VISIT/HOME HLTH/OTHER

59X Units of Service (Home Health)

Revenue code used by a HHA that bills on the basis of units of service.

Rationale: Necessary for Medicare home health billing requirements.

Subcategory	Standard Abbreviation
0 - General Classification	UNIT/HOME HEALTH
9 - Home Health Other Units	UNIT/HOME HLTH/OTHER

60X Not Assigned (May be reserved for other Clinics)

61X MRI

Charges for Magnetic Resonance Imaging of the brain and other parts of the body.

Rationale: Due to coverage limitations some third party payers require that the specific test be identified.

Subcategory	Standard Abbreviation
0 - General Classification	MRI
1 - Brain (including Brainstem)	MRI - BRAIN
2 - Spinal Cord (including Spine)	MRI - SPINE
9 - Other MRI	MRI - OTHER

62X Not Assigned

63X Not Assigned

64X Not Assigned

65X Hospice Services

Charges for hospice care services for a terminally ill patient if he elects these services in lieu of other services for the terminal condition.

Rationale: The level of hospice care provided for each day during a hospice election period determines the amount of Medicare payment for that day.

Subcategory	Standard Abbreviation
0 - General Classification	HOSPICE
1 - Routine Home Care	HOSPICE/RTN HOME
2 - Continuous Home Care - 1/2	HOSPICE/CTNS HOME
5 - Inpatient Care	HOSPICE/IP RESPITE
6 - General Inpatient Care (Non-Respite)	HOSPICE/IP NON RESPITE
7 - Physician Services	HOSPICE/PHYSICIAN
9 - Other Hospice	HOSPICE/OTHER

66X Not Assigned

67X Not Assigned

68X Not Assigned

69X Not Assigned

70X Cast Room

Charges for services related to the application, maintenance and removal of casts.

Rationale: Permits identification of this service if necessary.

71X Recovery Room

Rationale: Permits identification of particular services if necessary.

Subcategory	Standard Abbreviation
0 - General Classification	RECOVERY ROOM
9 - Other Recovery Room	OTHER RECOV RM

72X Labor Room/Delivery

Charges for labor and delivery room services provided by specially trained nursing personnel to patients, including prenatal care during labor, assistance during delivery, postnatal care in the recovery room, and minor gynecologic procedures if they are performed in the delivery suite.

Rationale: Provides a breakdown of items that may require further clarification. Infant circumcision is included because it is not covered by all third party payers.

Subcategory	Standard Abbreviation
0 - General Classification	DELIVROOM/LABOR
1 - Labor	LABOR
2 - Delivery	DELIVERY ROOM
3 - Circumcision	CIRCUMCISION
4 - Birthing Center	BIRTHING CENTER
9 - Other Labor Room/Delivery	OTHER/DELIV-LABOR

73X EKG/ECG (Electrocardiogram)

Charges for operation of specialized equipment to record electromotive variations in actions of the heart muscle on an electrocardiograph for diagnosis of heart ailments.

Subcategory	Standard Abbreviation
0 - General Classification	EKG/ECG
1 - Holter Monitor	HOLTER MONT
2 - Telemetry (includes fetal monitoring)	TELEMETRY
9 - Other EKG/ECG	OTHER EKG-ECG

74X EEG (Electroencephalogram)

Charges for operation of specialized equipment to measure impulse frequencies and differences in electrical potential in various areas of the brain to obtain data for use in diagnosing brain disorders.

Subcateogry	Standard Abbreviation
0 - General Classification	EEG
9 - Other EEG	OTHER EEG

75X Gastro-Intestinal Services

Procedure room charges for endoscopic procedures not performed in an operating room.

Subcategory	Standard Abbreviation
0 - General Classification	GASTR-INTS SVS
9 - Other Gastro-Intestinal	OTHER GASTRO-INTS

76X Treatment or Observation Room

Charges for minor procedures performed in the observation room or other room.

Subcategory	Standard Abbreviation
0 - General Classification	TREATMENT ROOM
9 - Other Treatment Room	OTHER TREATMENT RM

77X Not Assigned

78X Not Assigned

79X Lithotripsy

Charges for the use of lithotripsy in the treatment of kidney stones.

Subcategory	Standard Abberviation
0 - General Classification	LITHOTRIPSY
9 - Other Lithotripsy	LITHOTRIPSY/OTHER

80X Inpatient Renal Dialysis

A waste removal process, performed in an inpatient setting, that uses an artifical kidney when the body's own kidneys have failed. The waste may be removed directly from the blood (hemodialysis) or indirectly from the blood by flushing a special solution between the abdominal covering and the tissue (peritoneal dialysis).

Rationale: Specific identification required for billing purposes.

Subcategory	Standard Abbreviation
0 - General Classification	RENAL DIALYSIS
1 - Inpatient Hemodialysis	DIALY/INPT
2 - Inpatient Peritoneal (Non-CAPD)	DIALY/INPT/PER
3 - Inpatient Continuous Ambulatory Peritoneal Dialysis (CAPD)	DIALY/INPT/CAPD

Subcategory	Standard Abbreviation
0 - General Classification	RENAL DIALYSIS
1 - Inpatient Hemodialysis	DIALY/INPT
2 - Inpatient Peritoneal (Non-CAPD)	DIALY/INPT/PER
3 - Inpatient Continuous Ambulatory Peritoneal Dialysis (CAPD)	DIALY/INPT/CAPD
4 - Inpatient Continuous Cycling Peritoneal Dialysis (CCPD)	DIALY/INPT/CCPD
9 - Other Inpatient Dialysis	DIALY/INPT/OTHER

81X Organ Acquisition

The acquisition of a kidney, heart, or liver for use in transplantation.

Rationale: Living donor is a living person from whom a kidney, heart, or liver is obtained for transplantation. Cadaver is an individual who has been pronounced dead according to medical and legal criteria, from whom a kidney or heart is obtained for transplantation.

Medicare requires detailed revenue coding; therefore, codes for this series may not be summed at the zero level.

Subcategory	Standard Abbreviation
0 - General Classification	KIDNEY ACQUISIT
1 - Living Donor - Kidney	KIDNEY/LIVE
2 - Cadaver Donor - Kidney	KIDNEY/CADAVER
3 - Unknown Donor - Kidney	KIDNEY/UNKNOWN
4 - Other Kidney Acquisition	KIDNEY/OTHER
5 - Cadaver Donor - Heart	HEART/CADAVER
6 - Other Heart Acquisition	HEART/OTHER
7 - Donor - Liver	LIVER ACQUISIT
9 - Other Organ Acquisition	ORGAN/OTHER

82X Hemodialysis - Outpatient or Home Dialysis

A waste removal process, performed in an outpatient or home setting, necessary when the body's own kidneys have failed. Waste is removed directly from the blood.

Rationale: Detailed revenue coding is required; therefore, services may not be summed at the zero level.

Subcategory	Standard Abbreviation
0 - General Classification	HEMO/OP OR HOME
1 - Hemodialysis/Composite or other rate	HEMO/COMPOSITE
2 - Home Supplies	HEMO/HOME/SUPPL
3 - Home Equipment	HEMO/HOME/EQUIP
4 - Maintenance/100%	HEMO/HOME/100%
5 - Support Services	HEMO/HOME/SUPSERV
9 - Other Hemodialysis Outpatient	HEMO/HOME/OTHER

83X **Peritoneal dialysis - Outpatient or Home**

A waste removal process, performed in an outpatient or home setting, necessary when the body's own kidneys have failed. Waste is removed indirectly by flushing a special solution between the abdominal covering and the tissue.

Subcategory	Standard Abbreviation
0 - General Classification	PERITONEAL/OP OR HOME
1 - Peritoneal/Composite or other rate	PERTNL/COMPOSITE
2 - Home Supplies	PERTNL/HOME/SUPPL
3 - Home Equipment	PERTNL/HOME/EQUIP
4 - Maintenance/100%	PERTNL/HOME/100%
5 - Support Services	PERTNL/HOME/SUPSERV
9 - Other Peritoneal Dialysis	PERTNL/HOME/OTHER

84X **Continuous Ambulatory Peritoneal Dialysis (CAPD) - Outpatient**

A continuous dialysis process, performed in an outpatient or home setting, which uses the patient's peritoneal membrane as a dialyzer.

Subcategory	Standard Abbreviation
0 - General Classification	CAPD/OP OR HOME
1 - CAPD/Composite or other rate	CAPD/COMPOSITE
2 - Home Supplies	CAPD/HOME/SUPPL
3 - Home Equipment	CAPD/HOME/EQUIP
4 - Maintenance/100%	CAPD/HOME/100%
5 - Support Services	CAPD/HOME/SUPSERV
9 - Other CAPD Dialysis	CAPD/HOME/OTHER

85X **Continuous Cycling Peritoneal Dialysis (CCPD) - Outpatient**

A continuous dialysis process, performed in an outpatient or home setting, which uses the patient's peritoneal membrane as a dialyzer.

Subcategory	Standard Abbreviation
0 - General Classification	CCPD/OP OR HOME
1 - CCPD/Composite or other rate	CCPD/COMPOSITE
2 - Home Supplies	CCPD/HOME/SUPPL
3 - Home Equipment	CCPD/HOME/EQUIP
4 - Maintenance/100%	CCPD/HOME/100%
5 - Support Services	CCPD/HOME/SUPSERV
9 - Other CCPD Dialysis	CCPD/HOME/OTHER

86X **Reserved for Dialysis (National Assignment)**

87X **Reserved for Dialysis (State Assignment)**

88X Miscellaneous Dialysis

Charges for dialysis services not identified elsewhere.

Rationale: Ultrafiltration is the process of removing excess fluid from the blood of dialysis patients by using a dialysis machine but without the dialysate solution. The designation is only used when the procedure is not performed as part of a normal dialysis session.

Subcategory	Standard Abbreviations
0 - General Classification	DIALY/MISC
1 - Ultrafiltration	DIALY/ULTRAFILT
9 - Misc. Dialysis Other	DIALY/MISC/OTHER

89X Other Donor Bank

Charges for the acquisition, storage and preservation of all human organs (excluding kidneys).

Rationale: Provides a breakdown identifying the specific organ category.

Subcategory	Standard Abbreviation
0 - General Classification	DONOR BANK
1 - Bone	DONOR BANK/BONE
2 - Organ (other than kidney)	DONOR BANK/ORGN
3 - Skin	DONOR BANK/SKIN
9 - Other Donor Bank	OTHER DONOR BANK

90X Psychiatric/Psychological Treatments

Subcategory	Standard Abbreviation
0 - General Classification	PSTAY TREATMENT
1 - Electroshock Treatment	ELECTRO SHOCK
2 - Milieu Therapy	MILIEU THERAPY
3 - Play Therapy	PLAY THERAPY
9 - Other	OTHER PSTAY RX

91X Psychiatric/Psychological Services

Charges for providing nursing care and employee, professional services for emotionally disturbed patients, including patients admitted for diagnosis and those admitted for treatment.

Rationale: Provides additional identification of services as necessary.

Subcategory	Standard Abbreviation
0 - General Classification	PSTAY SERVICES
1 - Rehabilitation	PSTAY/REHAB
2 - Day Care	PSTAY/DAYCARE
3 - Night Care	PSTAY/NIGHTCARE
4 - Individual Therapy	PSTAY/INDIV RX
5 - Group Therapy	PSTAY/GROUP RX
6 - Family Therapy	PSTAY/FAMILY RX
7 - Bio Feedback	PSTAY/BIOFEED
8 - Testing	PSTAY/TESTING
9 - Other	PSTAY/OTHER

92X Other Diagnostic Services

Charges for other diagnostic services not otherwise categorized.

Subcategory	Standard Abbreviations
0 - General Classification	OTHER DX SVS
1 - Peripheral Vascular Lab	PERI VASCUL LAB
2 - Electromyelogram	EMG
3 - Pap Smear	PAP SMEAR
4 - Allergy test	ALLERGY TEST
5 - Pregnancy test	PREG TEST
9 - Other Diagnostic Service	ADDITIONAL DX SVS

93X Not Assigned

94X Other Therapeutic Services

Charges for other therapeutic services not otherwise categorized.

Subcategory	Standard Abbreviations
0 - General Classification	OTHER RX SVS
1 - Recreational Therapy	RECREATION RX
2 - Education/Training (includes diabetes related dietary therapy)	EDUC/TRAINING
3 - Cardiac Rehabilitation	CARDIAC REHAB
4 - Drug Rehabilitation	DRUG REHAB
5 - Alcohol Rehabilitation	ALCOHOL REHAB
6 - Air Fluidized Support Beds	AIR FLUID BEDS
9 - Other Therapeutic Services	ADDITIONAL RX SVS

95X Not Assigned

96X Professional Fees

Charges for medical professionals that the hospitals or third party payers require to be separately identified on the billing form. Services that were not identified separately prior to uniform billing implementation should not be separately identified on the uniform bill.

Subcategory	Standard Abbreviations
0 - General Classification	PRO FEE
1 - Psychiatric	PRO FEE/PSTAY
2 - Opthalmology	PRO FEE/EYE
3 - Anesthesiologist (MD)	PRO FEE/ANES MD
4 - Anesthetist (CRNA)	PRO FEE/ANES CRNA
9 - Other Professional Fees	OTHER PRO FEE

97X Professionals Fees (cont.)

Subcategory	Standard Abbreviations
1 - Laboratory	PRO FEE/LAB
2 - Radiology - Diagnostic	PRO FEE/RAD/DX
3 - Radiology - Therapeutic	PRO FEE/RAD/RX
4 - Radiology - Nuclear Medicine	PRO FEE/NUC MED
5 - Operating Room	PRO FEE/OR
6 - Respiratory Therapy	PRO FEE/RESPIR
7 - Physical Therapy	PRO FEE/PHYSI
8 - Occupational Therapy	PRO FEE/OCUPA
9 - Speech Pathology	PRO FEE/SPEECH

98X Professional Fees (cont.)

Subcategory	Standard Abbreviations
1 - Emergency Room	PRO FEE/ER
2 - Outpatient Services	PRO FEE/OUTPT
3 - Clinic	PRO FEE/CLINIC
4 - Medical Social Services	PRO FEE/SOC SVC
5 - EKG	PRO FEE/EKG
6 - EEG	PRO FEE/EEG
7 - Hospital Visit	PRO FEE/HOS VIS
8 - Consultation	PRO FEE/CONSULT
9 - Private Duty Nurse	FEE/PVT NURSE

99X Patient Convenience Items

Charges for items that are generally considered by the third party payers to be strictly convenience items and, as such, are not covered.

Rationale: Permits identification of particular services as necessary.

Subcategory	Standard Abbreviation
0 - General Classification	PT CONVENIENCE
1 - Cafeteria/Guest Tray	CAFETERIA
2 - Private Linen Service	LINEN
3 - Telephone/Telegraph	TELEPHONE
4 - TV/Radio	TV/RADIO
5 - Nonpatient Room Rentals	NONPT ROOM RENT
6 - Late Discharge Charge	LATE DISCHARGE
7 - Admission Kits	ADMIT KITS
8 - Beauty Shop/Barber	BARBER/BEAUTY
9 - Other Patient Convenience Items	PT CONVENCE/OTH

Data Element: Source of admission

Definition: A code indicating the source of this admission.

Code:

1 - Physician Referral	The patient was admitted to this facility upon the recommendation of his or her personal physician.
2 - Clinic Referral	The patient was admitted to this facility upon the recommendation of this facility's clinic physician.
3 - HMO Referral	The patient was admitted to this facility upon the recommendation of a health maintenance organization physician.
4 - Transfer from a Hospital	The patient was admitted to this facility as a transfer from an acute care facility where he or she was an inpatient.
5 - Transfer from a Skilled Nursing Facility	The patient was admitted to this facility as a transfer from a skilled nursing facility where he or she was an inpatient.
6 - Transfer from Another Health Care Facility	The patient was admitted to this facility as a transfer from a health care facility other than an acute care facility or a skilled nursing facility.
7 - Emergency Room	The patient was admitted to this facility upon the recommendation of this facility's emergency room physician.
8 - Court/Law Enforcement	The patient was admitted to this facility upon the direction of a court of law, or upon the request of a law enforcement agency representative.
9 - Information Not Available	The means by which the patient was admitted to this hospital is not known.

Code Structure (Newborn):

1 - Normal Delivery	A baby delivered without complications.
2 - Premature Delivery	A baby delivered with time and/or weight factors qualifying it for premature status.
3 - Sick baby	A baby delivered with medical complications, other than those relating to premature status.
4 - Extra Mural Birth	A newborn born in a non-sterile environment.
5 -8	Reserved for national assignment
9 -	Information Not Available

Data Element: Source of Payment

Definition: A code indicating source of payment associated with this payer record.

A - Self pay
B - Workers Compensation
C - Medicare
D - Medicaid
E - Other Federal Programs
F - Insurance company
G - Blue Cross
H - CHAMPUS
I - Other - local coding table applies

Data Element: Special Program Indicator

Definition: A code indicating that the services included on this bill are related to a special program.

Code Structure

01	EPSDT/CHAP	Early and Periodic Screening, Diagnosis and Treatment.
02	Physically Handicapped Children's Program	Services provided under this program receive special funding through Title 8 of the Social Security Act or the CHAMPUS Program for the Handicapped.
03	Special Federal Funding	This code has been designed for uniform use by state uniform billing committees.
04	Family Planning	This code has been designed for uniform use by state uniform billing committees.
05	Disability	This code has been designed for uniform use by state uniform billing committees.
06	PPV/Medicare 100% payment	This code identifies that pneumococcal pneumonia vaccine (PPV) services given should be reimbursed under a special Medicare program provision.
07	Induced abortion - danger to life	Abortion was performed to avoid danger to woman's life.
08	Induced abortion Victim rape/incest	Self explanatory.
09-79		Reserved for National Assignment.
80-99		Reserved for State Assignment.

Data Element:	Type of Admission
Definition:	A Code indicating the priority of this admission.

1 = Emergency	The patient requires immediate medical intervention as a result of severe, life threatening or potentially disabling conditions. Generally, the patient is admitted through the emergency room.
2 = Urgent	The patient requires immediate attention for the care and treatment of a physical or mental disorder. Generally the patient is admitted to the first available and suitable accommodation.
3 = Elective	The patient's condition permits adequate time to schedule the availability of a suitable accommodation.
4 = Newborn	Necessitates the use of special Source of Admission codes.
5-8	Reserved for National Assignment
9	Information Not Available

Data Element: Type of batch

Definition: A code indicating the type of bill that occurs in this batch; i.e., between a provider record (record type 10) and a batch control (record type 95). The "Type of Batch" code is exactly the same as the "Type of Bill" code shown on the following page.

Data Element: Type of Bill

Definition: A code indicating the specific type of bill (inpatient, outpatient, adjustments, voids, etc.)

Code Structure

Type of Facility - 1st Digit

Hospital	1
Skilled Nursing	2
Home Health	3
Christian Science (Hospital)	4
Christian Science (Extended Care)	5
Intermediate Care	6
Clinic	7
Special Facility	8
Reserved for National Use	9

Bill Classification (Except Clinics and Special Facilities) - 2nd Digit

Inpatient (Including Part A)	1
Inpatient (Part B only)	2
Outpatient	3
Other (for Medicare Part B use only)	4
Intermediate Care - Level I	5
Intermediate Care - Level II	6
Intermediate Care - Level III	7
Swing Beds	8
Reserved for National Assignment	9

Bill Classification (Clinics) 2nd digit		Bill Classification - Special Facilities - 2nd digit
Rural Health	1	Hospice (non-hospital based)
Free Standing Renal Dialysis Center	2	Hospice (hospital based)
Free Standing	3	Ambulatory Surgical Center
CORF	4	Free Standing Birthing Center
Reserved for National Use	5-8	Reserved for National Use
Other	9	Other

Frequency - 3rd Digit

Non-Payment/Zero claim	0
Admit thru Discharge Claim	1
Interim - First claim	2
Interim - Continuing claim	3
Interim - Last claim	4
Late Charge(s) Only Claim	5
Adjustment of prior claim	6
Replacement of prior claim	7
Void/cancel of prior claim	8
Reserve for National Assignment	9

Data Element: Value Code

Data Definition: A code that identifies data of a monetary nature that is necessary for processing this claim as qualified by the payer organization.

Code Structure

01	Most Common Semi-Private Rate	To provide for the recording of hospital's most common semi-private rate.
02	Hospital has no Semi-Private Rooms	Entering this code requires $0.00 amount.
05	Professional Component included in Charges and also billed separate to Carrier.	For use on Medicare bills and Medicaid bills if State specifies the need for this information.
06	Medicare Blood Deductible	Total cash blood deductible, if appropriate.
07	Medicare Cash Deductible	Medicare cash deductible to be used only if 06 is used and there is a cash deductible.
08	Medicare Life Time Reserve Amount in the first calendar year.	Medicare life time reserve amount charged in the year of admission.
09	Medicare Coinsurance Amount in the First Calendar Year.	Medicare co-insurance amount charged in the year of admission.
10	Medicare Life Time Reserve Amount in the second calendar year.	Medicare life time reserve amount charged in the year of discharge where the bil spans two calendar years.
11	Medicare Coinsurance Amount in the second Calendar Year.	Medicare co-insurance amount charged in the year of discharge where the bil spans two calendar years.
12	Working Aged Beneficiary/ Spouse with Employer Group Health Plan	Amount shown is that portion of a payment from a higher priority employer group health insurance made on behalf of an aged beneficiary that the provider is applying to Medicare covered services on this bill. (Hospital Manual, SS 471-472). If six zeroes are entered, the provider is claiming conditional Medicare payment.

12	ESRD Beneficiary in the 12 month coordination period with EGHP	Amount shown is that portion of a payment from a higher priority EGHP made on behalf of an ESRD beneficiary that the provider is applying to Medicare covered services on this bill. If six zeroes are entered, the provider is claiming conditional Medicare payment.
14	Automobile, No Fault or any Liability Insurance	Amount shown is that portion of a payment from a higher priority automobile, no fault or liability insurance made on behalf of a Medicare beneficiary that the provider is applying to Medicare covered services on this bill. If six zeroes are entered, the provider is claiming conditional Medicare payment.
15	WC	Amount shown is that portion of a payment from a higher priority WC made in behalf of a Medicare beneficiary that the provider is applying to Medicare covered services on this bill. If six zeroes are entered, the provider is claiming conditional Medicare payment.
16	PHS or Other Federal Agency	Amount shown is that portion of a payment from a higher priority PHS or other Federal agency made in behalf of a Medicare beneficiary that the provider is applying to Medicare covered services on this bill.
17	Outlier Amount	PROVIDERS DO NOT REPORT THIS. FOR PAYER INTERNAL USE ONLY. Indicates the amount of day or cost outlier payment to be made.
18	Disproportionate Share Amount	PROVIDERS DO NOT REPORT THIS. FOR PAYER INTERNAL USE ONLY. Indicates the amount of the disproportionate share payment to be made.
19	Indirect Medical Education Amount	PROVIDERS DO NOT REPORT THIS. FOR PAYER INTERNAL USE ONLY. Indicates the amount of the indirect medical education payment to be made.
20		Reserved for National Assignment.
31	Patient Liability Amount	Indicates the amount shown is that which was approved by you or the PRO to charge the beneficiary for noncovered accommodations, diagnostic procedures, or treatments.

41	BL	Amount shown is that portion of a payment from a higher priority BL made on behalf of a Medicare beneficiary that the provider is applying to Medicare covered services on this bill. If six zeros are entered, the provider is claiming conditional Medicare payment.
42	VA	Amount shown is that portion of a payment from a higher priority VA made on behalf of a Medicare beneficiary that the provider is applying to Medicare covered services on this bill.
43	Disabled Beneficiary Under Age 65 with LGHP	Amount shown is that portion of a payment from a higher priority LGHP made on behalf of a Medicare beneficiary that the provider is applying to Medicare covered services on this bill.
70	Interest Amount	PROVIDERS DO NOT REPORT THIS. FOR PAYER INTERNAL USE ONLY. Code indicates the amount of interest applied to this bill.
71	Funding of ESRD Networks	PROVIDERS DO NOT REPORT THIS. FOR PAYER INTERNAL USE ONLY. Code indicates the amount the Medicare payment was reduced to help fund the ESRD networks.
72-79		Reserved for National Assignment.

MEDICAID SPECIFIC CODES

21	Catastrophic	Medicaid-eligibility requirements to be determined at State level.
22	Surplus	Medicaid-eligibility requirements to be determined at State level.
23	Recurring Monthly Income	Medicaid-eligibility requirements to be determined at State level.
24	Medicaid Rate Code	Medicaid-eligibility requirements to be determined at state level.
25-29		Reserved for National Assignment - Medicaid.
30	Preadmission Testing	Reflects charges for preadmission outpatient diagnostic services for a patient in preparation for a previously scheduled admission.
31-79		Reserved for National Assignment.
80-99		Reserved for State and Local Assignment.

Record Type 71 - Plan of Treatment and Patient Information - Data Definitions and Codes

Data Element	Definition	Field	Cross Reference HCFA-485/486
Data ID	Identifies submittal of 485 and 486 data or 486 data only 1 = 485 and 486 2 = 486 only	4	-----
SOC Date	Date covered home health services began.	5	485-2
Certification Period	From/To dates of period to be covered by this plan of treatment.	6-7	" 3
Date of Onset/Exacerbation of Principal Diagnosis	The date of onset or date of exacerbation of the diagnosis shown as principal in Record Type 70 or 74.	8	" 11
Surgical Procedure Code	The ICD-9-CM code describing the surgical procedure (if any) most relevant to the care being rendered.	9	" 12
Date of Surgical Procedure	The date the surgery (Field 9) was performed	10	" 12
Dates of Onset/Exacerbation	The date of onset or exacerbation of the secondary diagnoses shown in Record Type 70 or 74. The related dates are entered in the same order as the secondary diagnosis codes.	11-14	" 13
Functional Limitations	Codes describing the patient's functional limitations as assessed by the physician. "Other" is described in Record Type 73 (48617).	15	" 18A

Record Type 71 - Plan of Treatment and Patient Information - Data Definitions and Codes

Data Element	Definition	Field	Cross Reference HCFA-485/486
	1= Amputation 2= Bowel/Bladder (Incontinence) 3= Contracture 4= Hearing 5= Paralysis 6= Endurance 7= Ambulation 8= Speech 9= Legally Blind A= Dyspnea with Minimal Exertion B= Other		
Activities Permitted	Codes describing the activities permitted by the physician or for which physician's orders are present. "Other" is described in Record Type 73 (48617). 1= Complete Bedrest 2= Bedrest BRP 3= Up as Tolerated 4= Transfer Bed/Chair 5= Exercises Prescribed 6= Partial Weight Bearing 7= Independent at Home 8= Crutches 9= Cane A= Wheelchair B= Walker C= No Restrictions D= Other	16	485-18B
Mental Status	Codes describing the patient's mental condition "Other" is described in Record Type 73 (48616). 1 = Oriented 2 = Comatose 3 = Forgetful 4 = Depressed	17	485-19

Record Type 71 - Plan of Treatment and Patient Information - Data Definitions and Codes

Data Element	Definition	Field	Cross Reference HCFA-485/486
	5 = Disoriented 6 = Lethargic 7 = Agitated 8 = Other		
Prognosis	Code indicating physician's prognosis for patient. 1 = Poor 2 = Guarded 3 = Fair 4 = Good 5 = Excellent	18	485-20
Verbal Start of Care Date MMDDYY	The date the agency received the verbal orders from the physician, if this is prior to the date care started.	19	485-23
(Attending) Physician's Name o Last Name o First Name o Initial	The name of the attending physician who established the plan of treatment. (This should be the physician who certifies and recertifies the medical necessity of the home health visits and/or services.	20-22	485-24
Physician's ZIP Code	The nine-digit ZIP code from the address field on the HCFA-485.	23	485-24
Medicare Covered	The following applicable codes: Y = Covered N = Noncovered	24	486-8
Date Physician Last Saw Patient	Date if (known) that patient was last seen by physician.	25	486-9

Record Type 71 - Plan of Treatment and Patient Information - Data Definitions and Codes

Data Element	Definition	Field	Cross Reference HCFA-485/486
Date Agency Last Contacted Physician	Date of agency's most recent physician contact. Purpose stated in Record Type 73 (48616).	26	486-10
Patient Receiving Care in 1861 J1 Facility	Y = Yes N = No D = Do not know	27	486-11
Cert/Recert/Mod	One of following applicable codes: C = Certification R = Recertification M = Modified	28	486-12
Dates of Last Inpatient Stay	From/To dates of most recent inpatient stay.	29-30	486-14
Type of Facility	Coding indicating type of facility from which patient was most recently discharged. A = Acute S = SNF I = ICF R = Rehabilitation Facility O = Other	31	486-15

Record Type 72 - Specific Services and Treatments - Data Definitions and Codes

Data Element	Definition	Field	Cross Reference HCFA-485/486
Discipline	Code indicating discipline(s) ordered by physician. SN = Skilled Nursing PT = Physical Therapy ST = Speech Therapy OT = Occupational Therapy MS = Medical Social Worker AI = Home Health Aide	5	486-13
Visits (This Bill) Rel. to Prior Certification	Total visits on this bill rendered prior to recertification "To" date.	6	486-13
Frequency of Visits	Code indicating frequency of visits during the period covered by the plan of treatment. Code is 3 positions. Position 1 is a numeric expression of number of times. Positions 2-3 are an alpha expression of period of time. Enter the frequency codes in the order being rendered. n = 1-9 xx = da = day wk = week mo = month q = every n days bb = for PRN visits	7	486-13
Duration of Visits	Code indicating length of time type visits will be rendered at the frequency shown. The code is 3 positions and is always numeric except for PRN ORDERS. nnn = 001-999 xxx = PRN	7	486-13

Record Type 72 - Specific Services and Treatments - Data Definitions and Codes

Data Element	Definition	Field	Cross Reference HCFA-485/486
	The period of time for the duration is, with the exceptions below, always the same as the period of time in the frequency. Exceptions: q (every) frequency is always a duration of nnn days. bb (blank) frequency is always PRN duration. Examples: Daily visits times 10 days 1 da 10 One visit every 2 months 1 qb 60 Two visits PRN 2 bb PRN		
Treatment Codes	Codes describing the treatment ordered by the physician. Show in ascending order. Valid codes are: A01-A30 = Skilled Nursing B01-B15 = Physical Therapy C01-C09 = Speech Therapy D01-D11 = Occupational Therapy E01-E06 = Medical Social Services F01-F15 = Home Health Aide One or more codes must be present for each discipline (e.g., SN, PT, etc.).	8	486-13
Total Visits Projected This Cert.	Total Covered visits to be rendered by each discipline during the period covered by the plan of treatment. Include PRN visits.	9	486-13

Record Type 73 - Medical Update and Patient Information - Data Definitions and Codes

Data Element	Definition	Field	Cross Reference
Medications	The physician's orders for all medications (dose, frequency, route of administration). The letter "N" will be used after New Medications, letter C for "Changed" orders. Show none if no medication are ordered.		485-10
Durable Medical Equipment (DME) and Medical Supplies	The DME ordered by the physician. All nonroutine supplies which are required to carry out the physician's orders.		485-14
Safety Measures	The physician's instructions for safety measures.		485-15
Nutritional Requirements	Physician's order for diet. This includes therapeutic diet and/or any specific dietary requirements and fluid restrictions.		485-16
Allergies	Patient's allergies, e.g., medications, foods, adhesive tape, iodine, etc.		485-17
Orders for Disciplines and Treatments	Specific physician orders.		485-21
Goals/Rehabilitation Potential/Discharge Plans	Succinct description of information provided by physician.		485-22

Record Type 73 - Medical Update and Patient Information - Data Definitions and Codes

Data Element	Definition	Field	Cross Reference
Updated Information	New orders, clinical facts, discipline summaries.		486-16
Functional Limitations/ Reason Homebound	Expansion of functional limitations and description of the reason homebound. "Other" is described where indicated for functional limitations and/or activities permitted.		486-17
Supplementary Plan	Description of services on a supplemental plan of treatment.		486-18
Unusual Home/Social Environment	Description of home/social environment which would further justify need for services or homebound condition.		486-19
Types and Reasons Patient Not at Home	Number of times agency made a visit and patient was absent from home and reason for absence if known.		486-20
Medical/Nonmedical Reasons Patient Leaves Home	Reasons patient leaves home and frequency of occurrence. Record will also indicate if patient does not leave home.		486-21

Record Type 74 - Patient Information - Data Definitions and Codes

This record is used only to submit the HCFA-485/486 data without an accompanying bill record (UB-82). The fields in this record are those obtained from the record types comprising the bill when the HCFA-485/486 and UB-82 are submitted together.

Data Element	Definition	Field	Cross Reference
HICN	Patient's HICN number.	5	485-1
Medical Record Number	Number used to access patient's medical record.	6	485-4
Patient Name Last Name First Name Initial	Patient's name.	9	485-6
Date of Birth	Patient's date of birth	10	485-8
Sex	M - (Male) F - (Female)	11	485-9
Principal Diagnosis	The 5 position ICD-9-CM code for the diagnosis most related to the current plan of treatment.	12	485-11
Secondary Diagnosis	Up to four secondary diagnoses codes pertinent to the case. Use ICD-9-CM codes.	13-16	485-13

Out-of-Scope Procedures F-2
Noncovered Procedures F-4
Development Needed F-6
Covered Ambulatory Surgical Procedures F-12

Out-of-Scope Procedures

HCPCS Code*	Description
10040	Acne surgery (e.g., marsuplialization, opening or removal of multiple milia, comedones, cysts, pustules).
16000	Initial treatment, first degree burn, when no more than local treatment is required.
31725	Catheter aspiration (separate procedure); tracheobronchial with fiberscope, bedside.
36000	Introduction of needle or intracatheter, vein; unilateral.
36001	Introduction of needle or intracatheter, vein; bilateral.
36400	Venipuncture, under age 3 years; femoral, jugular, or sagittal sinus.
36405	Venipuncture, under age 3 years; scalp vein.
36406	Venipuncture, under age 3 years; other vein.
36410	Venipuncture, child over age 3 years or adult, necessitating physician's skill (separate procedure), for diagnostic or therapeutic purposes. Not to be used for routine venipuncture.
36415	Routine venipuncture for collection of specimen(s).
36600	Arterial puncture, withdrawal of blood for diagnosis.
46900	Destructional lesion(s), anus (e.g, condyloma, papilloma, molluscum contagiosum, herpetic vesicle), simple; chemical.
51000	Aspiration of bladder by needle.
53670	Catheterization; simple.

*Copyright of the American Medical Association

53675	Catheterization; complicated (may include difficult removal of balloon catheter).
57150	Irrigation and/or application of medicament for treatment of bacterial, parasitic, or fungoid disease.
58102	Office endometrial curettage.
58300	Insertion of intrauterine device (IUD).
58301	Removal of intrauterine device (IUD).
59050	Initiation and/or supervision of internal fetal monitoring during labor by consultant.
59400	Total obstetric care (all-inclusive, "global" care) includes antepartum care, vaginal delivery (with or without episiotomy, and/or forceps or breech delivery) and postpartum care.
59420	Antepartum care only (separate procedure).
59430	Postpartum care only (separte procedure).
69090	Ear piercing.

NOTE: Out-of-scope procedures also includes the following HCPCS codes:

- 00100 - 01999
- 70010 - 99199

Noncovered Procedures

HCPCS Code*	Description
15775	Punch graft for hair transplant 1-15 puch grafts.
15776	Punch graft to hair transplant more than 15 punch grafts.
44131	Enteroenterostomy, anastomosis of intestine; intestinal bypass for morbid obesity.
47135	Liver transplant, with or without recipient hepatectomy.
48160	Pancreatectomy, total; with transplantation.
55250	Vasectomy, unilateral or bilateral (separate procedure), including postoperative semen examination(s).
55450	Ligtion (percutaneous) of vas deferens, unilateral or bilateral (separate procedure).
55970	Intersex surgery; male to female.
55980	Intersex surgery; female to male.
57170	Diaphragm fitting with instructions.
58300	Insertion of intrauterine device (IUD).
58301	Removal of intrauterin device (IUD).
58600	Ligation or tsansection of fallopian tube(s), abdominal or vaginal approach, unilateral or bilateral.
58606	Ligation or transection of fallopian tube(s), abdominal or vagional approach, postpartum, unilateral or bilateral, during same hospitalization (separte procedure).
58611	Ligation or transection of fallopian tube(s) when done at the time of cesarean section of intra-abdominal surgery (not a separate procedure).

*Copyright of the American Medical Association

58615	Occlusion of fallopian tube(s) by device (e.g., band, clip, falope ring).
58982	Laparoscopy for visulaization of pelvice viscera; with fulguration of oviducts (with or withut transection).
58983	Laproscopy for visulaization of pelvic viscera; with fulguration of oviducts (with or without transection).
65760	Keratomileusis.
65765	Keratophakia.
65767	Epikeratophakia.
69090	Ear piercing.

Development Needed

HCPCS Code*	Description
11920	Tattooing, intradermal introduction of insoluble opaque pigments to correct color defects of skin; 6.0 SQ CM or less.
11921	Tattooing, intradermal introduction of insoluble opaque pigments to correct color defects of skin; 6.1 to 20.0 SQ CM.
11922	Tattooing, intradermal introduction of insoluble opaque pigments to correct defects of skin; each additional 20.0 SQ CM.
11950	Subcutaneous injection of "filling" material (e.g., silicone); 1 CC or less.
11951	Subcutaneous injection of "filling" material (e.g., silicone); 1.1 to 5 CC.
11952	Subcutaneous injection of "filling" material (e.g., silicone); 5.1 to 10 CC.
11954	Subcutaneous injection of "filling" material (e.g., silicone); over 10 CC.
15780	Abrasion of skin for removal of scres, tattoos, or keratoses; total face.
15781	Abrasion of skin for removal of scars, tattoos, or keratoses; less than total face (cheeks, perioral ara, chin, nose or forehand).
15782	Abrasion of skin for removal of scars, tattoos, or keratoses; regional, other than face.
15786	Abrasion; single lesion (e.g., keratosis, scar).
15787	Abrasion; each additional fur lesions or less.
15790	Sperficcial checmical peel (chemex foliation); total face.
15791	Superficial checmical peel (chemex foliatio); regional, face, hand, or elsewhere.

*Copyright of the American Medical Association

15810	Salabrasion; 20 SQ CM or less.
15811	Salabrasion; over 20 SQ CM.
15819	Cervicoplasty
15820	Blepharoplasty, lower eyelid.
15821	Blepharoplasty, lower eyelid; with extensive herinated fat pad.
15822	Blepharoplasty, upper eyelid.
15823	Blepharoplasty, upper eyelid; with excessive skin weighting down lid.
15824	Khytidectomy; forehead.
15825	Rhytidectomy; neck with platysmal tightening (platysmal flap, "P-Flap").
15826	Rhytidectomy; glabellar frown lines.
15828	Rhytidectomy; cheek, chin, and neck.
15829	Rhytidectomy; subcutaneous muscoloaponeuotic system (SMAS) flap.
15831	Excision, excessive skin and subcutaneous tissue (including lipectomy); abdomen (abdominoplasty).
15832	Excision, excessive skin and subcutaneous tissue (including lipectomy); thigh.
15833	Excision, excessive skin and subcutaneous tissue (including lipectomy); leg.
15834	Excision, excessive skin and subcutaneous tissue (including lipectomy); hip.
15835	Excision, excessive skin and subcutaneous tissue (including lipectomy); buttock.
15836	Excision, excessive skin and subcutaneous tissue (including lipectomy); arm.
15837	Excision, excessive skin and subcutaneous tissue (including

	lipectomy); forearm or hand.
15838	Exicision, excessive skin and subcutaneous tissue (including lipectomy); submental fat pad.
15839	Excision, excessive skin and subcutaneous tissue (including lipectomy); other area.
17380	Electrolysis epilation, each 1/2/ hour.
19316	Mastopexy.
19318	Reduction mannaplasty.
19324	Mannaplasty, augmentation; without prosthetic implant.
19325	Mammaplasty, augmentation with prosthetic implant.
19328	Removal of intact mannary implant.
19330	Removal of implant material.
19342	Delayed insertion of breast prosthesis following mastopexy, mastectomy or in reconstruction.
19350	Nipple/areola reconstruction.
19360	Breast reconstruction with muscle or myocutaneous flap.
19364	Breast reconstruction with free flap.
19366	Breast reconstruction with other technique.
19370	Open periprosthetic capsulotomy, breast.
19371	Periprosthetic capsulectomy, breast.
19380	Revision of reconstructed breast.
30400	Rhinoplasty, primary; lateral and alar cartilages and/or elevation of nasal tip.
30410	Rhinoplasty, primary; complete, external parts including bondy pyramid, lateral and alar cartilages, and/or elevation of.

30420	Rhinoplasty, primary; inncluding major septal repair.
30430	Rhiooplasty, secondary; minor revision (small amount of nasal tip work).
30435	Rhinoplasty, secondary; intermediate revision (bony work with osteotomies).
30450	Rhinoplasty, secondary; major revision (nasal tip work and osteotomies).
33945	Heart transplant, with or without recipient cardiectomy.
41820	Gingivectomy, excision gingiva, each quadrant.
41821	Operculectomy, excision pericoronal tissues.
41822	Excision of fibrous tuperosities.
41823	Excision of osseous tuberosities.
41825	Excision of lesion or tumor (except listed above); without repair.
41826	Excision of lesion or tumor (except listed above); with simple repair.
41827	Excision of lesion or tumor (except listed above); with simple repair.
41828	Excision of hyperplastic alveolar mucosa, each sextant or quadrant (specify).
41830	Alveolectomy, including curettage of osteitis or sequestrectomy.
41850	Destruction of lesion (except excision), dentoalveolar structures.
43844	Gastric bypass for morbid obesity.
43845	Gastric stapling for morbid obesity.
43846	Gastric bypass with roux-en-y gastroenterostomy for morbid obesity.
54660	Insertion of testicular prosthesis (separate procedure); unilateral.

54661	Insertion of testicular prosthesis (separate procedure); bilateral.
58700	Salpingectomy, complete or partial, unilateral or bilateral (separate procedure).
58720	Salpingo-oophorectomy, complete or partial, unilatral or bilateral (separate procedure).
59200	Insertion of hygroscoic cervical dilator (e.g., laminaria) (separate procedure).
59840	Legal (therapeutic) abortion, by dilation and curettage, and/or extraction.
59841	Legal (therapeutic) aboration, by dilation and evacuation.
59850	Legal (therapeutic) abortion, by one or more intra-amniotic injections (amniocentesis-injections) (including hospital admission and visits, delivery of fetus and secundines).
59851	Legal (therapeutic) abortion, by one or more intra-amniotic injections (amniocentesis-injections) (including hospital admission and vists, delivery of fetus and secundines).
59852	Legal (therapeutic) abortion, by one or more intra-amniotic injections (amniocentesis-injections) (including hospital admission and visits, delivery of fetus and secundines).
67901	Repair of blepharoptosis; frontalis muscle technique with suture.
67902	Repair of blepharoptosis; frontalis muscle technique with fascial sling (includes obtaining facia).
67903	Repair of blepharoptosis; (tarso) levator resection, interal approach.
67904	Repair of blepharoptosis; (tarso) levator resection, external approach.

67906	Repair of blepharoptosis; superior rectus technique with fascial sling (includes obtaining fascia).
67907	Repair of blepharoptosis; superior rectus tendon transplant.
67908	Repair of blepharoptosis; conjunctivo-tarso-levator esection (fasanella-servat type).
67909	Reduction of overcorrection of ptosis.
67911	Correctiono of lid retraction.
69300	Otoplasty protruding ear, with or without size reduction; unilateral.
69301	Otoplasty protroding ear, with or without size reduction; bilateral.

List of Covered Surgical Procedures*

NOTE: Procedure codes preceded by an asterisk indicate that the procedure has been covered since August 5, 1982.

Procedure codes without an asterisk indicate additions to the list of surgical procedures which are covered effective May 21, 1987. The covered procedures, listed by body system and payment, together with applicable CPT-4 codes, are as follows:

INTEGUMENTARY SYSTEM

SKIN, SUBCUTANEOUS AND AREOLAR TISSUES

INCISION

10141 2 Incision and drainage of hematoma; complicated

EXCISION DEBRIDEMENT

11042 1 Debridement; skin, and subcutaneous tissue
11043 1 Debridement; skin, subcutaneous tissue, and muscle
11044 1 Debridement; skin, subcutaneous tissue, muscle, and bone

EXCISION-BENIGN LESIONS

*	11200	1	Excision, skin tags, multiple fibrocutaneous tags, any area; up to 15
*	11201	1	Each additional ten lesions
*	11401	1	Excision, benign lesion, except skin tag (unless listed elsewhere), trunk, or legs; lesion diameter 0.6 to 1.0 cm
*	11402	1	Excision, benign lesion, except skin tag (unless listed elsewhere), trunk, arms or legs; lesion diameter 1.1 to 2.0 cm
*	11403	1	Excision, benign lesion, except skin tag (unless listed elsewhere), trunk, arms or legs; lesion diameter 2.1 to 3.0 cm
*	11404	1	Excision, benign lesion, except skin tag (unless listed elsewhere), trunk, arms or legs; lesion diameter 3.1 to 4.0 cm
*	11406	1	Excision, benign lesion, except skin tag (unless listed elsewhere), trunk, arms or legs; lesion diameter over 4.0 cm
*	11421	1	Excision, benign lesion, except skin tag (unless listed elsewhere), scalp, neck, hands, feet, genitalia; lesion diameter 0.6 to 1.0 cm
*	11422	1	Excision, benign lesion, except skin tag (unless listed elsewhere), scalp, neck, hands, feet, genitalia; lesion diameter 1.1 to 2.0 cm
*	11423	1	Excision, benign lesion, except skin tag (unless listed elsewhere), scalp, neck, hands, feet, genitalia; lesion diameter 2.1 to 3.0 cm
*	11424	1	Excision, benign lesion, except skin tag (unless listed elsewhere), scalp, neck, hands, feet, genitalia; lesion diameter 3.1 to 4.0 cm
*	11426	1	Excision, benign lesion, except skin tag (unless listed elsewhere), scalp, neck, hands, feet, genitalia; lesion diameter over 4.0 cm
*	11441	1	Excision, other benign lesion (unless listed elsewhere), face, ears, eyelids, nose, lips, mucous membrane; lesion diameter 0.6 to 1.0 cm

*Copyright of the American Medical Association

*	11442	1	Excision, other benign lesion (unless listed elsewhere), face, ears, eyelids, nose, lips, mucous membrane; lesion diameter 1.1 to 2.0 cm
*	11443	1	Excision, other benign lesion (unless listed elsewhere), face, ears, eyelids, nose, lips, mucous membrane; lesion diameter 2.1 to 3.0 cm
*	11444	1	Excision, other benign lesion (unless listed elsewhere), face, ears, eyelids, nose, lips, mucous membrane; lesion diameter 3.1 to 4.0 cm
*	11446	1	Excision, other benign lesion (unless listed elsewhere), face, ears, eyelids, nose, lips, mucous membrane; lesion diameter over 4.0 cm
	11471	2	Excision of skin and subcutaneous tissue for hidradenitis, perianal, perineal, or umbilical; with other closure

EXCISION-MALIGNANT LESIONS

*	11600	1	Excision, malignant lesion, trunk, arms, or legs; lesion diameter 0.5 cm or less
*	11601	1	Excision, malignant lesion, trunk, arms, or legs; lesion diameter 0.6 to 1.0 cm
*	11602	1	Excision, malignant lesion, trunk, arms, or legs; lesion diameter 1.1 to 2.0 cm
*	11603	1	Excision, malignant lesion, trunk, arms, or legs; lesion diameter 2.1 to 3.0 cm
*	11604	1	Excision, malignant lesion, trunk, arms, or legs; lesion diameter 3.1 to 4.0 cm
*	11606	2	Excision, malignant lesion, trunk, arms, or legs; lesion diameter over 4.0 cm
*	11620	1	Excision, malignant lesion, scalp, neck, hands, feet, genitalia; lesion diameter 0.5 cm or less
*	11621	1	Excision, malignant lesion, scalp, neck, hands, feet, genitalia; lesion diameter 0.6 to 1.0 cm
*	11622	1	Excision, malignant lesion, scalp, neck, hands, feet, genitalia; lesion diameter 1.1 to 2.0 cm
*	11623	1	Excision, malignant lesion, scalp, neck, hands, feet, genitalia; lesion diameter 2.1 to 3.0 cm
*	11624	1	Excision, malignant lesion, scalp, neck, hands, feet, genitalia; lesion diameter 3.1 to 4.0 cm
*	11626	2	Excision, malignant lesion, scalp, neck, hands, feet, genitalia; lesion diameter over 4.0 cm
*	11640	1	Excision, malignant lesion, face, ears, eyelids, nose, lips; lesion diameter 0.5 cm or less
*	11641	1	Excision, malignant lesion, face, ears, eyelids, nose, lips; lesion diameter 0.6 to 1.0 cm
*	11642	1	Excision, malignant lesion, face, ears, eyelids, nose, lips; lesion diameter 1.1 to 2.0 cm
*	11643	1	Excision, malignant lesion, face, ears, eyelids, nose, lips; lesion diameter 2.1 to 3.0 cm

*	11644	1	Excision, malignant lesion, face, ears, eyelids, nose, lips; lesion diameter 3.1 to 4.0 cm
*	11646	2	Excision, malignant lesion, face, ears, eyelids, nose, lips; lesion diameter over 4.0 cm

NAILS

*	11750	1	Excision of nail and nail matrix, partial or complete, (e.g., ingrown or deformed nail) for permanent removal

MISCELLANEOUS

*	11770	3	Excision of pilonidal cyst or sinus; simple
*	11771	3	Excision of pilonidal cyst or sinus; extensive
	11772	3	Excision of pilonidal cyst or sinus; complicated

REPAIR-SIMPLE

12006	2	Simple repair of superficial wounds of scalp, neck, axillae, external genitalia, trunk and/or extremities (including hands and feet); 20.1 cm to 30.0 cm
12007	2	Simple Repair of superficial wounds of scalp, neck, axillae, external genitalia, trunk and/or extremities (including hands and feet); over 30.0 cm
12017	2	Simple repair of superficial wounds of face, ears, eyelids, nose, lips and/or mucous membranes; 20.1 cm to 30.0 cm
12018	2	Simple repair of superficial wounds of face, ears, eyelids, nose, lips and/or mucous membranes; over 30.0 cm

REPAIR-INTERMEDIATE

12036	2	Layer closure of wounds of scalp, axillae, trunk and/or extremities (excluding hands and feet); 20.1 cm to 30.0 cm
12037	2	Layer closure of wounds of scalp, axillae, trunk and/or extremities (excluding hands and feet); over 30.0 cm
12046	2	Layer closure of wounds of neck, hands, feet and/or external genitalia; 20.1 cm to 30.0 cm
12047	2	Layer closure of wounds of neck, hands, feet and/or external genitalia; over 30.0 cm
12056	2	Layer closure of wounds of face, ears, eyelids, nose, lips and/or mucous membranes; 20.1 cm to 30.0 cm
12057	2	Layer closure of wounds of face, ears, eyelids, nose, lips and/or mucous membranes; over 30.0 cm

REPAIR-COMPLEX

13101	1	Repair, complex, trunk; 2.6 cm to 7.5 cm
13121	1	Repair, complex, scalp, arms, and/or legs; 2.6 cm to 7.5 cm
13132	2	Repair, complex, forehead, cheeks, chin, mouth, neck, axillae, genitalia, hands and/or feet; 2.6 cm to 7.5 cm
13152	3	Repair, complex, eyelids, nose, ears, and/or lips; 2.6 cm to 7.5 cm
13300	3	Repair, unusual, complicated, over 7.5 cm, any area

ADJACENT TISSUE TRANSFER OR REARRANGEMENT

14001	3	Adjacent tissue transfer or rearrangement, trunk; defect 10.1 sq cm to 30.0 sq cm
14020	3	Adjacent tissue transfer or rearrangement, scalp, arms and/or legs; defect 10 sq cm or less
14021	3	Adjacent tissue transfer or rearrangement, scalp, arms and/or legs; defect 10.1 sq cm to 30.0 sq cm
14041	3	Adjacent tissue transfer or rearrangement, forehead, cheeks, chin, mouth, neck, axillae, genitalia, hands and/or feet; defect 10.1 sq cm to 30.0 sq cm
14060	3	Adjacent tissue transfer or rearrangement, eyelids, nose, ears and/or lips; defect 10 sq cm or less
14061	3	Adjacent tissue transfer or rearrangement, eyelids, nose, ears and/or lips; defect 10.1 sq cm to 30.0 sq cm
14300	3	Adjacent tissue transfer or rearrangement, more than 30 sq cm, unusual or complicated, any area
14350	3	Filleted finger or toe flap, including preparation of recipient site

FREE SKIN GRAFTS

* 15000	3	Excisional preparation or creation of recipient site by excision of essentially intact skin (including subcutaneous tissues), scar, or other lesion prior to repair with free skin graft (list as spearate service in addition to skin graft)
* 15050	3	Pinch graft, single or multiple, to cover small ulcer, tip of digit, or minimal open area (except on face), up to defect size 2 cm diameter
* 15100	3	Split graft, trunk, scalp, arms, legs, hands, and/or feet (except multiple digits); 100 sq cm or less, or each one percent of body area of infants and children (except 15050)
* 15101	3	Split graft, trunk, scalp, arms, legs, hands, and/or feet (except multiple digits); each additional 100 sq cm, or each one percent body area of infants and children, or part thereof
15200	3	Full thickness graft, free, including direct closure of donor site, trunk; 20 sq cm or less
15201	3	Full thickness graft, free, including direct closure of donor site, trunk; each additional 20 sq cm
15220	3	Full thickness graft, free, including direct closure of donor site, scalp, arms, and/or legs; 20 sq cm or less
15221	3	Full thickness graft, free, including direct closure of donor site, scalp, arms, and/or legs; each additional 20 sq cm
15240	3	Full thickness graft, free, including direct closure of donor site, forehead, cheeks, chin, mouth, neck, axillae, genitalia, hands and/or feet; 20 sq cm or less
15241	3	Full thickness graft, free, including direct closure of donor site, forehead, cheeks, chin, mouth, neck, axillae, genitalia, hands and/or feet; each additional 20 sq cm

15260	3	Full thickness graft, free, including direct closure of donor site, nose, ears, eyelids, and/or lips; 20 sq cm or less
15261	3	Full thickness graft, free, including direct closure of donor site, nose, ears, eyelids, and/or lips; each additional 20 sq cm
15350	3	Application of allograft (homograft), skin
15410	3	Free transplantation of skin flap by microsurgical technique, including microvascular anastomosis; 100 sq cm or less
15412	3	Free transplantation of skin flap by microsurgical technique, including microvascular anastomosis; between 101 and 160 sq cm
15414	3	Free transplantation of skin flap by microsurgical technique, including microvascular anastomosis; between 161 and 230 sq cm
15416	3	Free transplantation of skin flap by microsurgical technique, including microvascular anastomosis; over 230 sq cm

REPAIR

PEDICLE FLAPS (SKIN AND DEEP TISSUES)

15500	4	Formation of tube pedicle without transfer, or major "delay" of large flap without transfer; on trunk
15505	4	Formation of tube pedicle without transfer, or major "delay" of large flap without transfer; on scalp, arms, or legs
15510	4	Formation of tube pedicle without transfer, or major "delay" of large flap without transfer; on forehead, cheeks, chin, mouth, neck, axillae genitalia, hands, or feet
15515	4	Formation of tube pedicle without transfer, or major "delay" of large flap without transfer; on eyelids, nose, ears, or lips
15540	4	Primary attachment of open or tubed pedicle flap to recipient site requiring minimal preparation; to trunk
15545	4	Primary attachment of open or tubed pedicle flap to recipient site requiring minimal preparation; to scalp, arms, or legs
15550	4	Primary attachment of open or tubed pedicle flap to recipient site requiring minimal preparation; to forehead, cheeks, chin, mouth, neck, axillae, genitalia, or hands, feet
15555	4	Primary attachment of open or tubed pedicle flap to recipient site requiring minimal preparation; to eyelids, nose, ears, or lips
15580	4	Primary attachment of open or tubed pedicle flap to recipient site requiring minimal preparation; cross finger pedicle flap, including free graft to donor site
15600	4	Intermediate "delay" of any flap, primary "delay" of small flap, or sectioning pedicle of tubed or direct flap; at trunk
15610	4	Intermediate "delay" of any flap, primary "delay" of small flap, or sectioning pedicle of tubed or direct flap; at scalp, arms, or legs
15620	4	Intermediate "delay" of any flap, primary "delay" of small flap, or sectioning pedicle of tubed or direct flap; at forehead, cheeks, chin, neck, axillae, genitalia, hands (except 15625), or feet
15625	4	Intermediate "delay" of any flap, primary "delay" of small flap, or sectioning pedicle of tubed or direct flap; section pedicle of cross finger flap

15630	4	Intermediate "delay" of any flap, primary "delay" of small flap, or sectioning pedicle of tubed or direct flap; at eyelids, nose, ears. or lips
15650	4	Transfer, intermediate, of any pedicle flap (e.g., abdomen to wrist, Walking tube), any location
15700	4	Excision of lesion and/or excisional preparation of recipient site and attachment of direct or tubed pedicle flap; trunk
15710	4	Excision of lesion and/or excisional preparation of recipient site and attachment of direct or tubed pedicle flap; scalp, arms, or legs
15720	4	Excision of lesion and/or excisional preparation of recipient site and attachment of direct or tubed pedicle flap; forehead, cheeks, chin, mouth, neck, axillae, genitalia, hands, or feet
15730	4	Excision of lesion and/or excisional preparation of recipient site and attachment of direct or tubed pedicle flap; eyelids, nose, ears, or lips

OTHER GRAFTS

15740	3	Graft; island pedicle flap
15745	4	Graft; myocutaneous flap
15750	4	Graft; neurovascular pedicle flap
15755	4	Graft; free flap (microvascular transfer)
15760	3	Graft; composite (full thickness of external ear or nasal ala), including primary closure, donor area
15770	3	Graft; derma-fat-fascia

MISCELLANEOUS PROCEDURES

15840	4	Graft for facial nerve paralysis; free fascia graft (including obtaining fascia)
15841	4	Graft for facial nerve paralysis; free muscle graft (including obtaining graft)
15842	4	Graft for facial nerve paralysis; free muscle graft by microsurgical technique
15845	4	Graft for facial nerve paralysis; regional muscle transfer

PRESSURE ULCERS (DECUBITUS ULCERS)

15920	3	Excision, coccygeal pressure ulcer, with coccygectomy; with primary suture
15922	3	Excision, coccygeal pressure ulcer, with coccygectomy; with local or regional skin flap closure
15931	3	Excision, sacral pressure ulcer, with primary suture;
15933	3	Excision, sacral pressure ulcer, with primary suture; with ostectomy
15941	3	Excision, ischial pressure ulcer, with primary suture; with ostectomy (ischiectomy)
15944	3	Excision, ischial pressure ulcer, with local or regional skin flap closure
15945	3	Excision, ischial pressure ulcer, with local or regional skin flap closure; with ostectomy
15946	3	Excision, ischial pressure ulcer, with ostectomy, with muscle flap or myocutaneous flap closure

15950	3	Excision, trochanteric pressure ulcer, with primary suture
15951	3	Excision, trochanteric pressure ulcer, with primary suture; with ostectomy
15952	3	Excision, trochanteric pressure ulcer, with local rotation skin flap closure
15953	3	Excision, trochanteric pressure ulcer, with local rotation skin flap closure; with ostectomy
15954	3	Excision, trochanteric pressure ulcer, with bipedicle flap closure
15955	3	Excision, trochanteric pressure ulcer, with bipedicle flap closure; with ostectomy
15956	3	Excision, trochanteric pressure ulcer, with muscle or myocutaneous flap closure
15958	3	Excision, trochanteric pressure ulcer, with muscle or myocutaneous flap closure; with ostectomy
15960	3	Excision, heel pressure ulcer, with primary suture
15961	3	Excision, heel pressure ulcer, with primary suture; with ostectomy
15964	3	Excision, heel pressure ulcer, with skin flap closure
15965	3	Excision, heel pressure ulcer, with skin flap closure; with ostectomy
15966	3	Excision, heel pressure ulcer, with other flap closure
15967	3	Excision, heel pressure ulcer, with other flap closure; with ostectomy
15970	3	Excision, leg pressure ulcer, with primary suture
15971	3	Excision, leg pressure ulcer, with ostectomy
15972	3	Excision, leg pressure ulcer, with local skin flap(s)
15973	3	Excision, leg pressure ulcer, with local skin flap(s); with ostectomy
15974	3	Excision, leg pressure ulcer, with muscle or myocutaneous flap closure
15975	3	Excision, leg pressure ulcer, with muscle or myocutaneous flap closure; with ostectomy
15980	3	Excision, knee pressure ulcer, with local skin flap closure
15981	3	Excision, knee pressure ulcer, with local skin flap closure; with ostectomy
15982	3	Excision, knee pressure ulcer, with other flap closure
15983	3	Excision, knee pressure ulcer, with other flap closure; with ostectomy

BURNS, LOCAL TREATMENT

16015	1	Dressing and/or debridement, initial or subsequent; under anesthesia, medium or large, or with major debridement

BREAST

INCISION

19020	1	Mastotomy with exploration or drainage of abscess, deep

EXCISION

* 19101	3	Biopsy of breast; incisional
* 19120	3	Excision of cyst, fibroadenoma, or other benign or malignant tumor, aberrant breast tissue, duct lesion or nipple lesion (except 19140), male or female, one or more lesions

* 19140	4	Mastectomy for gynecomastia through circumareolar or other incision
19160	4	Mastectomy, partial
19180	4	Mastectomy, simple, complete
19182	4	Mastectomy, subcutaneous

MUSCULOSKELETAL SYSTEM

GENERAL

INCISION

20005	1	Incision of soft tissue abscess (e.g., secondary to osteomyelitis); deep or complicated

EXCISION

20205	1	Biopsy, muscle; deep
20225	3	Biopsy, bone, trocar or needle; deep (vertebral body, femur)
20240	2	Biopsy, excisional; superficial (e.g., ilium, sternum, spinous process, ribs, trochanter of femur)
20245	3	Biopsy, excisional, deep (e.g., humerus, ischium, femur)
20250	4	Biopsy, vertebral body, open; thoracic
20251	4	Biopsy, vertebral body, open; lumbar or cervical

INTRODUCTION OR REMOVAL

20525	2	Removal of foreign body in muscle; deep or complicated
20650	2	Insertion of wire or pin with application of skeletal traction, including removal (separate procedure)
20660	2	Application of tongs or caliper, including removal (separate procedure)
20661	2	Application of halo; including removal cranial
20662	2	Application of halo; pelvic
20663	2	Application of halo; femoral
20665	2	Removal of tongs or halo applied by another physician
20680	3	Removal of implant; deep (e.g., buried wire, pin, screw, metal band, nail, rod or plate)

GRAFTS (OR IMPLANTS)

20900	3	Bone graft, any donor area; minor or small (e.g., dowel or button)
20902	4	Bone graft, any donor area; major or large
20912	4	Cartilage graft; nasal septum
20920	4	Fascia lata graft; by stripper
20922	4	Fascia lata graft; by incision and area exposure, complex or sheet
20926	4	Tissue grafts, other (e.g., paratenon, fat, dermis, etc.)

MISCELLANEOUS

20955	4	Bone graft with microvascular anastomosis; fibula
20960	4	Bone graft with microvascular anastomosis; rib
20962	4	Bone graft with microvascular anastomosis; other bone graft (specify)
20969	4	Free osteocutaneous flap with microvascular anastomosis; other than iliac crest, rib, metatarsal, or great toe

	20970	4	Free osteocutaneous flap with microvascular anastomosis; iliac crest
	20971	4	Free osteocutaneous flap with microvascular anastomosis; rib
	20972	4	Free osteocutaneous flap with microvascular anastomosis; metatarsal
	20973	4	Free osteocutaneous flap with microvascular anastomosis; great toe with web space
	20975	2	Electrical stimulation to aid bone healing; invasive (operative)

HEAD

INCISION

	21010	3	Arthrotomy, temporomandibular joint; unilateral
	21011	3	Arthrotomy, temporomandibular joint; bilateral

GENERAL

EXCISION

	21034	4	Excision of malignant tumor of facial bone other than mandible
*	21040	3	Excision of benign cyst or tumor of mandible; simple
	21044	4	Excision of malignant tumor of mandible
	21050	4	Arthrectomy, temporomandibular joint; unilateral
	21060	4	Meniscectomy, temporomandibular joint; unilateral
	21061	4	Meniscectomy, temporomandibular joint; bilateral

INTRODUCTION OR REMOVAL

	21100	4	Application of halo type appliance for maxillofacial fixation, includes removal (separate procedure)

FRACTURE AND/OR DISLOCATION

*	21310	1	Treatment of closed or open nasal fracture without manipulation
*	21315	1	Manipulative treatment, nasal bone fracture; without stabilization
	21320	1	Manipulative treatment, nasal bone fracture; with stabilization
	21325	3	Open treatment of nasal fracture; uncomplicated
	21330	4	Open treatment of nasal fracture; complicated, with internal and/or external skeletal fixation
	21335	4	Open treatment of nasal fracture; with concomitant open treatment of fractured septum
	21338	4	Open treatment of nasoethmoid fracture; without external fixation
	21340	4	Treatment of closed or open nasoethmoid complex fracture, with splint, wire or headcap fixation, including repair of canthal ligaments and/or the nasolacrimal apparatus
*	21355	2	Manipulative treatment of closed or open fracture of malar area, including zygomatic arch and malar tripod, towel clip technique
*	21360	2	Open treatment of closed or open depressed malar fracture, including zygomatic arch and malar tripod
	21365	4	Open treatment of closed or open complicated, (e.g, multiple fractures), of malar area, including zygomatic arch and malar tripod, with internal skeletal fixation and multiple surgical approaches
	21450	4	Treatment of closed or open mandibular fracture; without manipulation

21451	4	Treatment of closed or open mandibular fracture; with manipulation, may include external fixation
21452	4	Treatment of open mandibular fracture; without manipulation
21453	4	Treatment of open mandibular fracture; with manipulation
21480	2	Uncomplicated treatment of temporomandibular dislocation, initial or subsequent
21485	3	Complicated manipulative treatment of temporomandibular dislocation, initial or subsequent
21490	4	Open treatment of temporomandibular dislocation
21494	3	Treatment of closed or open hyoid fracture; with manipulation
21495	4	Open treatment of closed or open hyoid fracture

NECK (SOFT TISSUES) AND THORAX

INCISION

21501	1	Incision and drainage, deep abscess or hematoma
21502	3	Incision and drainage, deep abscess or hematoma; with partial rib ostectomy
21510	3	Incision, deep, with opening of bone cortex (e.g., for osteomyelitis or bone abscess)
21555	1	Excision benign tumor; subcutaneous

EXCISION

21556	2	Excision, benign tumor; deep, subfascial, intramuscular
21600	3	Excision of rib, partial
21610	3	Costotransversectomy (separate procedure)

ABDOMEN

EXCISION

22900	2	Excision, abdominal wall tumor, subfascial (e.g., desmoid)

SHOULDER

INCISION

23000	3	Removal of subdeltoid (or intratendinous) calcareous deposits
23020	3	Capsular contracture release (Sever type procedure) for Erb's palsy
23030	1	Incision and drainage; deep abscess or hematoma
23035	2	Incision, deep, with opening of cortex (e.g., for osteomyelitis or bone abscess)
23040	4	Arthrotomy, glenohumeral joint, for infection, with exploration, drainage or removal of foreign body
23044	4	Arthrotomy with exploration, drainage or removal of foreign body, acromioclavicular, sternoclavicular joint

EXCISION

23066	1	Biopsy, soft tissues; deep
23076	1	Excision, benign tumor; deep, subfascial or intramuscular
23100	4	Arthrotomy for biopsy, glenohumeral joint

	23101	4	Arthrotomy for biopsy or for excision of torn cartilage, acromioclavicular, sternoclavicular joint
	23130	4	Acromionectomy, partial or total
	23140	4	Excision or curettage of bone cyst or benign tumor of clavicle or scapula
	23150	4	Excision or curettage of bone cyst or benign tumor of proximal humerus
*	23170	2	Sequestrectomy (e.g. for osteomyelitis or bone abscess), clavicle;
*	23172	2	Sequestrectomy (e.g. for osteomyelitis or bone abscess),scapula;
*	23174	2	Sequestrectomy (e.g. for osteomyelitis or bone abscess), humeral head to surgical neck;
	23180	3	Partial excision (craterization, saucerization, or diaphysectomy) of bone (e.g., for osteomyelitis), clavicle
	23182	3	Partial excision (craterization, saucerization, or diaphysectomy) of bone (e.g., for osteomyelitis), scapula
	23184	3	Partial excision (craterization, saucerization, or diaphysectomy) of bone (e.g., for osteomyelitis), proximal humerus
	23190	3	Ostectomy of scapula, partial (e.g., superior medial angle)
	23195	3	Resection humeral head

INTRODUCTION OR REMOVAL

23331	2	Removal of foreign body; deep (e.g., Neer prosthesis removal)

REPAIR, REVISION OR RECONSTRUCTION

23405	3	Tenomyotomy; single
23406	3	Tenomyotomy; multiple through same incision

FRACTURE AND/OR DISLOCATION

23505	2	Treatment of closed clavicular fracture; with manipulation
23515	4	Open treatment of closed or open clavicular fracture, with or without internal or external skeletal fixation
23605	2	Treatment of closed humeral (surgical or anatomical neck) fracture; with manipulation
23610	4	Treatment of open humeral (surgical or anatomical neck) fracture, with uncomplicated soft tissue closure
23625	2	Treatment of closed greater tuberosity fracture; with manipulation
23630	4	Open treatment of closed or open greater tuberosity fracture, with or without internal or external skeletal fixation
23655	1	Treatment of closed shoulder dislocation, with manipulation; requiring anesthesia
23658	4	Treatment of open shoulder dislocation, with uncomplicated soft tissue closure
23660	4	Open treatment of closed or open shoulder dislocation
23665	2	Treatment of closed shoulder dislocation, with fracture of greater tuberosity, with manipulation
23670	4	Open treatment of closed or open shoulder dislocation, with fracture of greater tuberosity
23675	2	Treatment of closed shoulder dislocation, with surgical or anatomical neck fracture, with manipulation

23680	4	Open treatment of closed or open shoulder dislocation, with surgical or anatomical neck fracture

MANIPULATION

23700	2	Manipulation under anesthesia, including application of fixation apparatus (dislocation excluded)

HUMERUS (UPPER ARM) AND ELBOW

INCISION

23930	1	Incision and drainage; deep abscess or hematoma
23935	2	Incision, deep, with opening of (e.g., cortex for osteomyelitis or bone abscess)
24000	2	Arthrotomy, elbow, for infection, with exploration, drainage or removal of foreign body

EXCISION

24075	2	Excision, benign tumor; subcutaneous
24076	2	Excision, benign tumor; deep, subfascial or intramuscular
24100	4	Arthrotomy, elbow; for synovial biopsy only
24101	4	Arthrotomy, elbow; with joint exploration, with or without biopsy, with or without removal of foreign body
* 24105	3	Excision, olecranon bursa
24110	3	Excision, or curettage of bone cyst or benign tumor, humerus
24115	4	Excision or curettage of bone cyst or benign tumor, humerus; with primary autogenous graft (includes obtaining graft)
24116	4	Excision or curettage of bone cyst or benign tumor, humerus; with homogenous or other nonautogenous graft
24120	3	Excision or curettage of bone cyst or benign tumor of head or neck of radius or olecranon process
24125	4	Excision or curettage of bone cyst or benign tumor of head or neck of radius or olecranon process; with primary autogenous graft (includes obtaining graft)
24126	4	Excision or curettage of bone cyst or benign tumor of head or neck of radius or olecranon process; with homogenous or other nonautogenous graft
24130	3	Excision, radial head
* 24134	2	Sequestrectomy (e.g. for osteomyelitis or bone abscess), shaft or distal humerus;
* 24136	2	Sequestrectomy (e.g. for osteomyelitis or bone abscess), radial head or neck;
* 24138	2	Sequestrectomy (e.g. for osteomyelitis or bone abscess), olecranon process;

	24140	2	Partial excision (craterization, saucerization or diaphysectomy) of bone (e.g., for osteomyelitis), humerus
	24145	2	Partial excision (craterization, saucerization or diaphysectomy) of bone (e.g., for osteomyelitis), radial head or neck
	24147	2	Partial excision (craterization, saucerization or diaphysectomy) of bone (e.g., for osteomyelitis), olecranon process;
	24155	4	Resection of elbow joint (arthrectomy)

INTRODUCTION OR REMOVAL

	24160	2	Implant removal; elbow joint
	24164	2	Implant removal; radial head
	24201	1	Removal of foreign body; deep

REPAIR REVISION AND RECONSTRUCTION

	24301	3	Muscle or tendon transfer, any type, single (excluding 24320-24331)
	24310	3	Tenotomy, open, elbow to shoulder, single, each
*	24320	4	Tenoplasty, with muscle transfer, with or without free graft, elbow to shoulder, single (Seddon-Brookes type procedure)
	24330	4	Flexor-plasty, elbow, (e.g., Steindler type advancement)
	24331	4	Flexor-plasty, elbow, (e.g., Steindler type advancement); with extensor advancement
	24340	4	Tenodesis for rupture of biceps tendon at elbow
	24342	4	Reinsertion of ruptured biceps tendon, distal, with or without tendon graft (includes obtaining graft)
*	24350	4	Fasciotomy, lateral or medial (e.g., "tennis elbow" or epicondylitis)
*	24351	4	Fasciotomy, lateral or medial (e.g., "tennis elbow" or epicondylitis); with extensor origin detachment
*	24352	4	Fasciotomy, lateral or medial (e.g., "tennis elbow" or epicondylitis); with annular ligament resection
*	24354	4	Fasciotomy, lateral or medial (e.g., "tennis elbow" or epicondylitis); with stripping
	24356	4	Fasciotomy, lateral or medial (e.g., "tennis elbow" or epicondylitis); with partial ostectomy
	24420	4	Osteoplasty, humerus (e.g., shortening or lengthening)(excluding 64876)
	24470	4	Hemiepiphyseal arrest (e.g., for cubitus varus or valgus, distal humerus)
	24495	3	Decompression fasciotomy, forearm, with brachial artery exploration

FRACTURE AND/OR DISLOCATION

	24505	1	Treatment of closed humeral shaft fracture; with manipulation
	24506	2	Treatment of closed humeral shaft fracture; percutaneous insertion of pin or rod
	24510	3	Treatment of open humeral shaft fracture, with uncomplicated soft tissue closure
	24515	4	Open treatment of closed or open humeral shaft fracture, with or without internal or external skeletal fixation
	24530	1	Treatment of closed supracondylar or transcondylar fracture, without manipulation

24531	2	Treatment of closed supracondylar or transcondylar fracture, without manipulation; with traction (pin or skin)
24535	1	Treatment of closed supracondylar or transcondylar fracture, with manipulation
24536	2	Treatment of closed supracondylar or transcondylar fracture, with manipulation; with traction (pin or skin)
24538	2	Treatment of closed supracondylar or transcondylar fracture, with manipulation; with percutaneous skeletal fixation
24540	4	Treatment of open supracondylar or transcondylar fracture, with uncomplicated soft tissue closure
24542	4	Treatment of open supracondylar or transcondylar fracture, with uncomplicated soft tissue closure; with traction (pin or skin)
24545	4	Open treatment of closed or open supracondylar or transcondylar fracture, with or without internal or external skeletal fixation
24565	1	Treatment of closed epicondylar fracture, medial or lateral; with manipulation
24570	3	Treatment of open epicondylar fracture, medial or lateral, with uncomplicated soft tissue closure
24575	4	Open treatment of closed or open epicondylar fracture, medial or lateral, with or without internal or external skeletal fixation
24577	1	Treatment of closed condylar fracture, medial or lateral; with manipulation
24578	3	Treatment of open condylar fracture, medial or lateral, with uncomplicated soft tissue closure
24579	4	Open treatment of closed or open condylar fracture, medial or lateral, with or without internal or external skeletal fixation
24580	1	Treatment of closed comminuted elbow fracture (fracture distal humerus and/or proximal ulna and/or proximal radius), treatment with traction, (pin or skin); without manipulation
24581	1	Treatment of closed comminuted elbow fracture (fracture distal and/or proximal ulna and/or proximal radius), treatment with traction, (pin or skin); with manipulation
24140	2	Partial excision (craterization, saucerization or diaphysectomy) of bone (e.g., for osteomyelitis), humerus
24145	2	Partial excision (craterization, saucerization or diaphysectomy) of bone (e.g., for osteomyelitis), radial head or neck
24147	2	Partial excision (craterization, saucerization or diaphysectomy) of bone (e.g., for osteomyelitis), olecranon process;
24155	4	Resection of elbow joint (arthrectomy)

INTRODUCTION OR REMOVAL

24160	2	Implant removal; elbow joint
24164	2	Implant removal; radial head
24201	1	Removal of foreign body; deep

REPAIR REVISION AND RECONSTRUCTION

	24301	3	Muscle or tendon transfer, any type, single (excluding 24320-24331)
	24310	3	Tenotomy, open, elbow to shoulder, single, each
*	24320	4	Tenoplasty, with muscle transfer, with or without free graft, elbow to shoulder, single (Seddon-Brookes type procedure)
	24330	4	Flexor-plasty, elbow, (e.g., Steindler type advancement)
	24331	4	Flexor-plasty, elbow, (e.g., Steindler type advancement); with extensor advancement
	24340	4	Tenodesis for rupture of biceps tendon at elbow
	24342	4	Reinsertion of ruptured biceps tendon, distal, with or without tendon graft (includes obtaining graft)
*	24350	4	Fasciotomy, lateral or medial (e.g., "tennis elbow" or epicondylitis)
*	24351	4	Fasciotomy, lateral or medial (e.g., "tennis elbow" or epicondylitis); with extensor origin detachment
*	24352	4	Fasciotomy, lateral or medial (e.g., "tennis elbow" or epicondylitis); with annular ligament resection
*	24354	4	Fasciotomy, lateral or medial (e.g., "tennis elbow" or epicondylitis); with stripping
	24356	4	Fasciotomy, lateral or medial (e.g., "tennis elbow" or epicondylitis); with partial ostectomy
	24420	4	Osteoplasty, humerus (e.g., shortening or lengthening)(excluding 64876)
	24470	4	Hemiepiphyseal arrest (e.g., for cubitus varus or valgus, distal humerus)
	24495	3	Decompression fasciotomy, forearm, with brachial artery exploration

FRACTURE AND/OR DISLOCATION

24505	1	Treatment of closed humeral shaft fracture; with manipulation
24506	2	Treatment of closed humeral shaft fracture; percutaneous insertion of pin or rod
24510	3	Treatment of open humeral shaft fracture, with uncomplicated soft tissue closure
24515	4	Open treatment of closed or open humeral shaft fracture, with or without internal or external skeletal fixation
24530	1	Treatment of closed supracondylar or transcondylar fracture, without manipulation
24531	2	Treatment of closed supracondylar or transcondylar fracture, without with traction (pin or skin)
24535	1	Treatment of closed supracondylar or transcondylar fracture, with manipulation
24536	2	Treatment of closed supracondylar or transcondylar fracture, with manipulation; with traction (pin or skin)
24538	2	Treatment of closed supracondylar or transcondylar fracture, with manipulation; with percutaneous skeletal fixation
24540	4	Treatment of open supracondylar or transcondylar fracture, with uncomplicated soft tissue closure

24542	4	Treatment of open supracondylar or transcondylar fracture, with uncomplicated soft tissue closure; with traction (pin or skin)
24545	4	Open treatment of closed or open supracondylar or transcondylar fracture, with or without internal or external skeletal fixation
24565	1	Treatment of closed epicondylar fracture, medial or lateral; with manipulation
24570	3	Treatment of open epicondylar fracture, medial or lateral, with uncomplicated soft tissue closure
24575	4	Open treatment of closed or open epicondylar fracture, medial or lateral, with or without internal or external skeletal fixation
24577	1	Treatment of closed condylar fracture, medial or lateral; with manipulation
24578	3	Treatment of open condylar fracture, medial or lateral, with uncomplicated soft tissue closure
24579	4	Open treatment of closed or open condylar fracture, medial or lateral, with or without internal or external skeletal fixation
24580	1	Treatment of closed comminuted elbow fracture (fracture distal humerus and/or proximal ulna and/or proximal radius), treatment with traction, (pin or skin); without manipulation
24581	1	Treatment of closed comminuted elbow fracture (fracture distal humerus and/or proximal ulna and/or proximal radius), treatment with traction, (pin or skin); with manipulation
24583	4	Treatment of open comminuted elbow fracture (fracture distal humerus and/or proximal ulna and/or proximal radius), with uncomplicated soft tissue closure
24585	4	Open treatment of closed or open comminuted elbow fracture (fracture distal humerus and/or proximal ulna/radius), with or without internal or external skeletal fixation
24586	4	Open treatment of closed or open comminuted elbow fracture (fracture distal humerus and/or proximal ulna/radius), with or without internal or external skeletal fixation; with elbow resection
24605	1	Treatment of closed elbow dislocation; requiring anesthesia
24610	3	Treatment of open elbow dislocation, with uncomplicated soft tissue closure
24615	3	Open treatment of closed or open elbow dislocation
24620	2	Treatment of closed Monteggia type of fracture dislocation at elbow (fracture proximal end of ulna with dislocation of radial head)
24625	4	Treatment of open Monteggia type of fracture dislocation at elbow (fracture proximal end of ulna with dislocation of radial head), with uncomplicated soft tissue closure
24635	4	Open treatment of closed or open Monteggia type of fracture dislocation at elbow (fracture proximal end of ulna with dislocation of radial head), with or without internal or external skeletal fixation
24655	1	Treatment of closed radial head or neck fracture; with manipulation with complicated soft tissue closure

24665	4	Open treatment of closed or open radial head or neck fracture, with or without internal fixation or radial head excision
24666	4	Open treatment of closed or open radial head or neck fracture, with or without internal fixation or radial head excision; with implant
24675	1	Treatment of closed ulnar fracture, proximal end (olecranon process); with manipulation
24680	3	Treatment of open ulnar fracture, proximal end (olecranon process), with uncomplicated soft tissue closure
24685	4	Open treatment of closed or open ulnar fracture proximal end (olecranon process), with or without internal or external skeletal fixation

FOREARM AND WRIST

INCISION

* 25000	2	Tendon sheath incision; at radial styloid for deQuervain's disease
25005	2	Tendon sheath incision; at wrist for other stenosing tenosynovitis
* 25020	4	Decompression fasciotomy, flexor and/or extensor compartment
* 25023	4	Decompression fasciotomy, flexor and/or extensor compartment; with debridement of nonviable muscle and/or nerve
25028	1	Incision and drainage, deep abscess or hematoma
25035	2	Incision, deep, with opening of cortex (e.g., for osteomyelitis or bone abscess)
25040	2	Arthrotomy, radiocarpal or mediocarpal joint, for infection, with exploration, drainage, or removal of loose or foreign body

EXCISION

25066	1	Biopsy, soft tissues; deep
25076	1	Excision, benign tumor, deep, subfascial or intramuscular
25085	3	Capsulotomy, wrist (e.g., for contracture)
25100	2	Arthrotomy, wrist joint; for biopsy
25101	3	Arthrotomy, wrist joint; with joint exploration, with or without biopsy, with or without removal of foreign body
25107	3	Arthrotomy distal radioulnar joint for repair of triangular cartilage complex
25110	3	Excision, lesion of tendon sheath
* 25111	3	Excision of ganglion, wrist (dorsal or volar); primary
* 25112	3	Excision of ganglion, wrist (dorsal or volar); recurrent
25120	3	Excision or curettage of bone cyst or benign tumor of radius or ulna (excluding head or neck of radius and olecranon process)
25125	4	Excision or curettage of bone cyst or benign tumor of radius or ulna (excluding head or neck of radius and olecranon process); with primary autogenous graft (includes obtaining graft)
25126	4	Excision or curettage of bone cyst or benign tumor of radius or ulna (excluding head or neck of radius and olecranon process); with homogenous or other nonautogenous graft

25130	3	Excision or curettage of bone cyst or benign tumor of carpal bones
25135	3	Excision or curettage of bone cyst or benign tumor of carpal bones; with primary autogenous graft (includes obtaining graft)
25136	4	Excision or curettage of bone cyst or benign tumor of carpal bones; with homogenous or other nonautogenous graft
25145	2	Sequestrectomy (e.g. for osteomyelitis or bone abscess);
25150	2	Partial excision (craterization, saucerization or diaphysectomy) of bone (e.g., for osteomyelitis); ulna
25151	2	Partial excision (craterization, saucerization or diaphysectomy) of bone (e.g., for osteomyelitis); radius
25210	3	Carpectomy; one bone
25215	3	Carpectomy; all bones of proximal row
25230	3	Radial styloidectomy (separate procedure)
25240	3	Excision distal ulna (Darrach type procedure)
25248	2	Exploration for removal of deep foreign body

REPAIR, REVISION OR RECONSTRUCTION

*	25260	3	Repair, tendon or muscle, flexor; primary, single, each tendon or muscle
*	25263	3	Repair, tendon or muscle, flexor; secondary, single, each tendon or muscle
*	25265	4	Repair tendon or muscle, flexor; secondary, with free graft (includes obtaining graft), each tendon or muscle
*	25270	3	Repair, tendon or muscle, extensor; primary, single, each tendon or muscle
*	25272	3	Repair, tendon or muscle, extensor; secondary, single, each tendon or muscle
	25274	4	Repair, tendon or muscle, extensor, secondary, with tendon graft (includes obtaining graft), each tendon
	25280	3	Lengthening or shortening of flexor or extensor tendon, single, each tendon
	25290	3	Tenotomy, open, single, flexor or extensor tendon, each tendon
	25295	3	Tenolysis, single flexor or extensor tendon, each tendon
	25300	3	Tenodesis at wrist; flexors of fingers
	25301	3	Tenodesis at wrist; extensors of fingers
*	25310	4	Tendon transplantation or transfer, flexor or extensor, single; each tendon
*	25312	4	Tendon transplantation or transfer, flexor or extensor, single; with tendon graft(s) (includes obtaining graft), each tendon
	25315	3	Flexor origin slide for cerebral palsy
	25316	3	Flexor origin slide for cerebral palsy; with tendon(s) transfer
	25317	3	Flexor origin slide for Volkmann contracture
	25318	3	Flexor origin slide for Volkmann contracture; with tendon(s) transfer

25320	4	Capsulorrhaphy or reconstruction, capsulectomy, wrist (includes synovectomy, resection of capsule, tendon insertions)
25390	4	Osteoplasty radius OR ulna; shortening
25391	4	Osteoplasty, radius OR ulna; lengthening with autogenous bone graft
25392	4	Osteoplasty, radius AND ulna; shortening (excluding 64876)
25393	4	Osteoplasty, radius AND ulna; lengthening with autogenous bone graft
25450	4	Epiphyseal arrest by epiphysiodesis or stapling; distal radius OR ulna
25455	4	Epiphyseal arrest by epiphysiodesis or stapling; distal radius AND ulna

FRACTURE AND/OR DISLOCATION

25505	1	Treatment of closed radial shaft fracture; with manipulation
25510	3	Treatment of open radial shaft fracture, with uncomplicated soft tissue closure
25515	4	Open treatment of closed or open radial shaft fracture, with or without internal or external skeletal fixation
25535	1	Treatment of closed ulnar shaft fracture; with manipulation
25540	3	Treatment of open ulnar shaft fracture, with uncomplicated soft tissue closure
25545	4	Open treatment of closed or open ulnar shaft fracture, with or without internal or external skeletal fixation
25565	1	Treatment of closed radial and ulnar shaft fractures; with manipulation
25570	3	Treatment of open radial and ulnar shaft fractures, with uncomplicated soft tissue closure
25575	4	Open treatment of closed or open radial and ulnar shaft fractures, with or without internal or external skeletal fixation
25605	1	Treatment of closed distal radial fracture (e.g., Colles or Smith type) or epiphyseal separation, with or without fracture of ulnar styloid; with manipulation
25610	2	Treatment of closed, complex, distal radial fracture (e.g., Colles or Smith type) or epiphyseal separation, with or without fracture of ulnar styloid, requiring manipulation; without external skeletal fixation or percutaneous pinning
25611	2	Treatment of closed, complex, distal radial fracture (e.g., Colles or Smith type) or epiphyseal separation, with or without fracture of ulnar styloid, requiring manipulation; percutaneous pinning or pins and plaster technique
25615	3	Treatment of open distal radial fracture (e.g., Colles or Smith type) or epiphyseal separation, with or without fracture of ulnar styloid, with uncomplicated soft tissue closure
25620	4	Open treatment of closed or open distal radial fracture (e.g., Colles or Smith type) or epiphyseal separation, with or without fracture of ulnar styloid, with or without internal or external skeletal fixation
25626	3	Treatment of open carpal scaphoid (navicular) fracture, with uncomplicated soft tissue closure
25628	4	Open treatment of closed or open carpal scaphoid (navicular) fracture, with or without skeletal fixation

25635	1	Treatment of closed carpal bone fracture (excluding carpal scaphoid (navicular)); with manipulation, each bone
25640	4	Treatment of open carpal bone fracture (excluding carpal scaphoid (navicular)), with uncomplicated soft tissue closure, each bone
25645	4	Open treatment of closed or open carpal bone fracture (excluding carpal scaphoid (navicular)), each bone
25660	1	Treatment of closed radiocarpal or intercarpal dislocation, one or more bones, with manipulation
25665	3	Treatment of open radiocarpal or intercarpal dislocation, one or more bones, with uncomplicated soft tissue closure
25670	4	Open treatment of closed or open radiocarpal or intercarpal dislocation, one or more bones
25675	1	Treatment of closed distal radioulnar dislocation with manipulation
25676	3	Open treatment of closed or open distal radioulnar dislocation, acute or chronic
25680	1	Treatment of closed trans-scaphoperilunar type of fracture dislocation, with manipulation
25685	3	Open treatment of closed or open trans-scaphoperilunar type of fracture dislocation
25690	1	Treatment of lunate dislocation, with manipulation
25695	3	Open treatment of lunate dislocation

HANDS AND FINGERS

INCISION

	26011	1	Drainage of finger abscess; complicated (e.g., felon, etc)
	26020	1	Drainage of tendon sheath, one digit and/or palm
	26025	1	Drainage of palmar bursa; single, ulnar or radial
	26030	1	Drainage of palmar bursa; multiple or complicated
	26034	2	Incision, deep, with opening of cortex (e.g., for osteomyelitis or bone abscess)
	26035	2	Decompression fingers and/or hand, injection injury (e.g., grease gun, etc.)
*	26040	4	Fasciotomy, palmar, for Dupuytren's contracture; closed (subcutaneous)
*	26045	4	Faciotomy, palmar, for Dupuytren's contracture; open, partial
*	26055	1	Tendon sheath incision for trigger finger
*	26060	1	Tenotomy, subcutaneous, single, each digit
	26070	2	Arthrotomy, for infection, with exploration, drainage or removal of loose or foreign body; carpometacarpal joint
	26075	2	Arthrotomy with exploration, drainage or removal of loose or foreign body; metacarpophalangeal joint
	26080	2	Arthrotomy with exploration, drainage or removal of loose or foreign body; interphalangeal joint, each

EXCISION

26100	3	Arthrotomy for synovial biopsy; carpometacarpal joint
26105	3	Arthrotomy for synovial biopsy; metacarpophalangeal joint

	26110	3	Arthrotomy for synovial biopsy; interphalangeal joint, each
	26115	3	Excision of benign tumor; subcutaneous
	26116	3	Excision of benign tumor; deep, subfascial, intramuscular
*	26120	4	Fasciectomy, palmar, simple, for Dupuytren's contracture; partial excision
*	26122	4	Fasciectomy, palmar, simple, for Dupuytren's contracture; up to one-half palmar fascia, with single digit involvement, with or without Z-plasty or other local tissue rearrangement
	26124	4	Fasciectomy, palmar, complicated, requiring skin grafting (includes obtaining graft); with single digit involvement
	26126	4	Fasciectomy, palmar, complicated, requiring skin grafting (includes obtaining graft); each additional digit
*	26128	4	Fasciectomy, palmar, complicated, requiring skin grafting (includes obtaining graft); each finger joint release
	26135	4	Synovectomy, metacarpophalangeal joint including intrinsic release and extensor hood reconstruction, each digit
*	26140	4	Synovectomy, proximal interphalangeal joint, including extensor reconstruction, each interphalangeal joint
*	26145	4	Synovectomy tendon sheath, radical (tenosynovectomy), flexor, palm or finger, single, each digit
	26160	3	Excision of lesion of tendon sheath or capsule (e.g., cyst or ganglion)
	26170	3	Excision of tendon, palm, flexor, single (separate procedure), each
	26180	3	Excision of tendon, finger, flexor (separate procedure)
	26200	3	Excision or curettage of bone cyst or benign tumor of metacarpal
	26205	3	Excision or curettage of bone cyst or benign tumor of metacarpal; with autogenous graft (includes obtaining graft)
	26210	3	Excision or curettage of bone cyst or benign tumor of proximal, middle or distal phalanx
	26215	3	Excision or curettage of bone cyst or benign tumor of proximal, middle or distal phalanx; with autogenous graft (includes obtaining graft)
	26230	3	Partial excision (craterization, saucerization, or diaphysectomy) of bone (e.g., for osteomyelitis); metacarpal
	26235	3	Partial excision (craterization, saucerization, or diaphysectomy) of bone (e.g., for osteomyelitis); proximal or middle phalanx
	26250	4	Radical resection (ostectomy) for tumor, metacarpal
	26255	4	Radical resection (ostectomy) for tumor, metacarpal; with autogenous graft (includes obtaining graft)
	26261	4	Radical resection (ostectomy) for tumor, proximal or middle phalanx; with autogenous graft (includes obtaining graft)

REPAIR, REVISION OR RECONSTRUCTION

*	26350	3	Flexor tendon repair or advancement, single, not in "no man's land"; primary or secondary without free graft, each tendon
*	26352	4	Flexor tendon repair or advancement, single, not in "no man's land"; secondary with free graft (includes obtaining graft), each tendon
*	26356	3	Flexor tendon repair or advancement, single, in "no man's land"; primary, each tendon

*	26358	4	Flexor tendon repair or advancement, single, in "no man's land"; secondary with free graft (includes obtaining graft), each tendon
*	26370	3	Profundus tendon repair or advancement, with intact sublimis; primary
*	26372	4	Profundus tendon repair or advancement, with intact sublimis; secondary with free graft (includes obtaining graft)
*	26373	3	Profundus tendon repair or advancement, with intact sublimis; secondary without free graft
*	26390	3	Flexor tendon excision, implantation of plastic tube or rod for delayed tendon graft
*	26392	4	Removal of tube or rod and insertion of tendon graft (includes obtaining graft)
*	26410	3	Extensor tendon repair, dorsum of hand, single, primary or secondary; without free graft, each tendon
*	26412	4	Extensor tendon repair, dorsum of hand, single, primary or secondary; with free graft (includes obtaining graft), each tendon
*	26418	3	Extensor tendon repair, dorsum of finger, single, primary or secondary; without free graft, each tendon
*	26420	4	Extensor tendon repair, dorsum of finger, single, primary or secondary; with free graft (includes obtaining graft), each tendon
*	26426	4	Extensor tendon repair, central slip repair, secondary (boutonniere deformity); using local tissues
*	26428	4	Extensor tendon repair, central slip repair, secondary (boutonniere deformity); with free graft (includes obtaining graft)
*	26432	4	Extensor tendon repair, distal insertion ("mallet finger"), closed, splinting with or without percutaneous pinning
*	26433	3	Extensor tendon repair, open, primary or secondary repair; without graft
*	26434	4	Extensor tendon repair, open, primary or secondary repair; with free graft (includes obtaining graft)
	26440	3	Tenolysis, simple, flexor tendon; palm OR finger, single, each tendon
	26442	3	Tenolysis, simple, flexor tendon; palm AND finger, each tendon
	26445	3	Tenolysis, extensor tendon, dorsum of hand or finger; each tendon
	26449	4	Tenolysis, complex, extensor tendon, dorsum of hand or finger, including hand and forearm
*	26450	1	Tenotomy, flexor, single, palm, open, each
*	26455	1	Tenotomy, flexor, single finger, open, each
*	26460	1	Tenotomy, extensor, hand or finger, single, open, each
	26471	2	Tenodesis; for proximal interphalangeal joint stabilization
	26474	2	Tenodesis; for distal joint stabilization
	26476	3	Tendon lengthening, extensor, single, each
	26477	3	Tendon shortening, extensor, single, each
*	26480	4	Tendon transfer or transplant, carpometacarpal area
*	26483	4	Tendon transfer or transplant, carpometacarpal area
*	26485	4	Tendon transfer or transplant, palmar, single, each tendon; without free tendon graft

*	26489	4	Tendon transfer or transplant, palmar, single, each tendon; with free tendon graft (includes obtaining graft), each tendon
	26490	4	Opponens plasty; sublimis tendon transfer type
	26492	4	Opponens plasty; tendon transfer with graft (includes obtaining graft)
	26494	4	Opponens plasty; hypothenar muscle transfer
	26496	4	Opponens plasty; other methods
	26497	4	Tendon transfer to restore intrinsic function; ring and small finger
	26498	4	Tendon transfer to restore intrinsic function; all four fingers
	26499	4	Correction claw finger; other methods
	26500	4	Tendon pulley reconstruction; with local tissues (separate procedure)
	26502	4	Tendon pulley reconstruction; with tendon or fascial graft (includes obtaining graft) (separate procedure)
	26508	4	Thenar muscle release for thumb contracture
	26510	4	Cross intrinsic transfer
	26516	2	Capsulodesis for M-P joint stabilization; single digit
	26517	2	Capsulodesis for M-P joint stabilization; two digits
	26518	3	Capsulodesis for M-P joint stabilization; three or four digits
*	26520	3	Capsulectomy for contracture; metacarpophalangeal joint, single, each
*	26525	3	Capsulectomy for contracture; interphalangeal joint, single, each
*	26530	4	Arthroplasty, metacarpophalangeal joint; single, each
*	26531	4	Arthroplasty, metacarpophalangeal joint; with prosthetic implant, single, each
*	26535	4	Arthroplasty interphalangeal joint; single, each
*	26536	4	Arthroplasty interphalangeal joint; with prosthetic implant, single, each
*	26540	4	Primary repair of collateral ligament, metacarpophalangeal joint
*	26541	4	Reconstruction, collateral ligament, metacarpophalangeal joint; with tendon or fascial graft (includes obtaining graft)
	26542	4	Primary repair of collateral ligament, metacarpophalangeal joint; with local tissue
*	26545	4	Reconstruction, collateral ligament, interphalangeal joint, single, including graft, each joint
	26552	4	Reconstruction thumb with toe
	26555	4	Positional change of other finger
	26557	4	Toe to finger transfer; first stage
	26558	4	Toe to finger transfer; each delay
	26559	4	Toe to finger transfer; second stage
*	26567	4	Osteotomy for correction of deformity; phalanx
	26568	4	Osteoplasty for lengthening of metacarpal or phalanx
	26570	4	Bone graft, (includes obtaining graft); metacarpal
	26574	4	Bone graft, (includes obtaining graft); phalanx

FRACTURES AND/OR DISLOCATIONS

26605	1	Treatment of closed metacarpal fracture, single; with manipulation, each bone
26607	2	Treatment of closed metacarpal fracture, single, with manipulation, with skeletal fixation, each bone

26610	2	Treatment of open metacarpal fracture, single, with uncomplicated soft tissue closure, each bone
26645	1	Treatment of closed carpometacarpal fracture dislocation, thumb (Bennett fracture), with manipulation
26650	2	Treatment of closed carpometacarpal fracture dislocation, thumb (Bennett fracture), with manipulation; with skeletal fixation
26655	3	Treatment of open carpometacarpal fracture dislocation, thumb (Bennett fracture), with uncomplicated soft tissue closure
26660	3	Treatment of open carpometacarpal fracture dislocation, thumb (Bennett fracture), with uncomplicated soft tissue closure; with skeletal fixation
26665	3	Open treatment of closed or open carpometacarpal fracture dislocation, thumb (Bennett fracture), with or without internal or external skeletal fixation
26675	1	Treatment of closed carpometacarpal dislocation, other than Bennett fracture, single, with manipulation; requiring anesthesia
26676	2	Treatment of closed carpometacarpal dislocation, other than Bennett fracture, single, with manipulation; with percutaneous pinning
26680	2	Treatment of open carpometacarpal dislocation, other than Bennett fracture,single, with uncomplicated soft closure
26685	3	Open treatment of closed or open carpometacarpal dislocation, other than Bennett fracture; single, with or without internal or external skeletal fixation
26686	3	Open treatment of closed or open carpometacarpal dislocation, other than Bennett fracture; complex, multiple or delayed reduction
26705	1	Treatment of closed metacarpophalangeal dislocation, single, with manipulation; requiring anesthesia
26706	2	Treatment of closed metacarpalphalangeal dislocation, single, with manipulation; with percutaneous pinning
26710	2	Treatment of open metacarpophalangeal dislocation, single, with uncomplicated soft tissue closure
26715	3	Open treatment of closed or open metacarpophalangeal dislocation, single, with or without internal or external skeletal fixation
26727	2	Treatment of unstable phalangeal shaft fracture, proximal or middle phalanx, finger or thumb, with manipulation, requiring traction or fixation, each
26730	2	Treatment of open phalangeal shaft fracture, proximal or middle phalanx, finger or thumb, with uncomplicated soft tissue closure, each
26735	3	Open treatment of closed or open phalangeal shaft fracture, proximal or middle phalanx, finger or thumb, with or without internal or external skeletal fixation, each
26744	2	Treatment of open articular fracture, involving metacarpophalangeal or proximal interphalangeal joint; with uncomplicated soft tissue closure, each
26746	3	Open treatment of closed or open articular fracture, involving metacarpophalangeal or proximal interphalangeal joint, each

26765	3	Open treatment of closed or open distal phalangeal fracture, finger or thumb, each
26780	2	Treatment of open interphalangeal joint dislocation, single, with uncomplicated soft tissue closure
26785	3	Open treatment of closed or open interphalangeal joint dislocation, single

ARTHRODESIS

* 26820	4	Fusion in opposition, thumb, with autogenous graft (includes obtaining graft)
* 26841	4	Arthrodesis, carpometacarpal joint, thumb, with or without internal fixation
* 26842	4	Arthrodesis, carpometacarpal joint, thumb, with or without internal fixation; with autogenous graft (includes obtaining graft)
* 26843	4	Arthrodesis, carpometacarpal joint, digits, other than thumb
* 26844	4	Arthrodesis, carpometacarpal joint, digits, other than thumb; with autogenous graft (includes obtaining graft)
* 26860	4	Arthrodesis, interphalangeal joint, with or without internal fixation
* 26861	4	Arthrodesis, interphalangeal joint, with or without internal fixation; each additional interphalangeal joint
* 26862	4	Arthrodesis, interphalangeal joint, with or without internal fixation; with autogenous graft (includes obtaining graft)
* 26863	4	Arthrodesis, interphalangeal joint, with or without internal fixation; with autogenous graft (includes obtaining graft), each additional joint

AMPUTATION

* 26910	2	Amputation, metacarpal, with finger or thumb (ray amputation), single, with or without interosseus transfer
* 26951	2	Amputation, finger or thumb, primary or secondary, any joint or phalanx, single, including neurectomies; with direct closure
* 26952	4	Amputation, finger or thumb, primary or secondary, any joint or phalanx, single, including neurectomies; with local advancement flaps (V-Y, hood)

PELVIS AND HIP JOINT

INCISION

26990	2	Incision and drainage; deep abscess or hematoma
26991	2	Incision and drainage; infected bursa
26992	2	Incision, deep, with opening of bone cortex (e.g., for osteomyelitis or bone abscess)
27000	3	Tenotomy, adductor, subcutaneous, closed (separate procedure)
27001	4	Tenotomy, adductor, subcutaneous, open; unilateral
27002	4	Tenotomy, adductor, subcutaneous, open; bilateral
27003	4	Tenotomy, adductor, subcutaneous, open, with obturator neurectomy; unilateral
27004	4	Tenotomy, adductor, subcutaneous, open, with obturator neurectomy; bilateral

27030	4	Arthrotomy, hip, for infection, with drainage
27033	4	Arthrotomy, hip, for exploration or removal of loose or foreign body
27035	4	Hip joint denervation, intrapelvic or extrapelvic intra-articular branches of sciatic, femoral or obturator nerves

EXCISION

27040	4	Biopsy, soft tissues; superficial
27041	4	Biopsy, soft tissues; deep
27047	4	Excision, benign tumor; subcutaneous
27048	4	Excision, benign tumor; deep, subfascial, intramuscular
27052	4	Arthrotomy for biopsy; hip joint
27065	4	Excision of bone cyst or benign tumor; superficial (wing of ilium, symphysis pubis, or greater trochanter of femur) with or without autogenous bone graft
27066	4	Excision of bone cyst or benign tumor; deep, with or without bone graft
27080	4	Coccygectomy, primary

INTRODUCTION AND/OR REMOVAL

27087	2	Removal of foreign body; deep
27095	1	Injection procedure for hip arthrography; with anesthesia

FRACTURES AND/OR DISLOCATIONS

27201	4	Treatment of open coccygeal fracture
27202	4	Open treatment of closed or open coccygeal fracture

MANIPULATION

27275	2	Manipulation, hip joint, requiring general anesthesia

FEMUR (THIGH REGION) AND KNEE JOINT

INCISION

	27301	2	Incision and drainage of deep abscess, infected bursa, or hematoma
	27303	2	Incision, deep, with opening of bone cortex (e.g., for osteomyelitis or bone abscess)
*	27305	4	Fasciotomy, iliotibial (tenotomy), open
*	27306	1	Tenotomy, subcutaneous, closed, adductor or hamstring, (separate procedure); single
*	27307	1	Tenotomy, subcutaneous, closed, adductor or hamstring, (separate procedure); multiple
	27310	4	Arthrotomy, knee, for infection, with exploration, drainage or removal of foreign body
*	27315	4	Neurectomy, hamstring muscle
*	27320	4	Neurectomy, popliteal (gastrocnemius)

EXCISION

27324	2	Biopsy, soft tissues; deep
27327	1	Excision, benign tumor; subcutaneous

27328	2	Excision, benign tumor; deep, subfascial, or intramuscular
27330	4	Arthrotomy, knee; for synovial biopsy only
27345	4	Excision of synovial cyst of popliteal space (Baker's cyst)
27350	4	Patellectomy or hemipatellectomy
27355	4	Excision or curettage of bone cyst or benign tumor of femur
27360	4	Partial excision (craterization, saucerization or diaphysectomy) of bone, (e.g., for osteomyelitis), femur, proximal tibia and/or fibula

INTRODUCTION AND/OR REMOVAL

27372	3	Removal foreign body, deep

REPAIR, REVISION OR RECONSTRUCTION

27390	4	Tenotomy, open, hamstring, knee to hip; single
27391	4	Tenotomy, open, hamstring, knee to hip; multiple, one leg
27392	4	Tenotomy, open, hamstring, knee to hip; multiple, bilateral
27393	4	Lengthening of hamstring, tendon; single
27394	4	Lengthening of hamstring, tendon; multiple, one leg
27395	4	Lengthening of hamstring, tendon; multiple, bilateral
27396	4	Transplant, hamstring tendon to patella; single
27397	4	Transplant, hamstring tendon to patella; multiple
27400	4	Tendon or muscle transfer, hamstrings to femur (Eggers type procedure)
27420	4	Reconstruction for recurrent dislocating patella; (Hauser type procedure)
27422	4	Reconstruction for recurrent dislocating patella; with extensor realignment and/or muscle advancement or release (Campbell, Goldwaite, etc., type procedure)
27424	4	Reconstruction for recurrent dislocating patella; with patellectomy
27425	4	Lateral retinacular release (any method)
27430	4	Quadriceps plasty (Bennett or Thompson type)
27435	4	Capsulotomy, knee, posterior capsular release

FRACTURES AND/OR DISLOCATIONS

27522	3	Treatment of open pateller fracture, with uncomplicated soft tissue closure
27524	4	Open treatment of closed or open patellar fracture, with repair and/or excision

EXCISION

27532	1	Treatment of closed tibial fracture, proximal (plateau); with manipulation

FRACTURES AND/OR DISLOCATIONS

27534	3	Treatment of open tibial fracture, proximal (plateau), with uncomplicated soft tissue closure

EXCISION

27552	1	Treatment of closed knee dislocation; requiring anesthesia
27562	1	Treatment of closed patellar dislocation; requiring anesthesia

FRACTURES AND/OR DISLOCATIONS

	27564	4	Treatment of open patellar dislocation, with uncomplicated soft tissue closure
	27566	4	Open treatment of closed or open patellar dislocation, with or without partial or total patellectomy

MANIPULATION

	27570	2	Manipulation of knee joint under general anesthesia (includes application of traction or other fixation devices)

LEG (TIBIA AND FIBULA) AND ANKLE JOINT

INCISION

	27603	2	Incision and drainage; deep abscess or hematoma
*	27605	1	Tenotomy, Achilles tendon, subcutaneous (separate procedure); local anesthesia
*	27606	1	Tenotomy, Achilles tendon, subcutaneous (separate procedure); general anesthesia
	27607	2	Incision, deep, with opening of bone cortex (e.g., for osteomyelitis or bone abscess)
	27610	2	Arthrotomy, ankle, with exploration, drainage or removal of loose or foreign body
	27612	4	Arthrotomy, ankle, posterior capsular release, with or without Achilles tendon lengthening

EXCISION

	27620	3	Arthrotomy, ankle, for biopsy
	27630	3	Excision of lesion of tendon sheath or capsule (e.g., cyst or ganglion)
	27635	3	Excision or curettage of bone cyst or benign tumor, tibia or fibula
	27637	4	Excision or curettage of bone cyst, or benign tumor, tibia or fibula; with primary autogenous graft (includes obtaining graft)
	27638	4	Excision or curettage of bone cyst, or benign tumor, tibia or fibula; with primary homogenous graft
	27640	4	Partial excision (craterization, saucerization, or diaphysectomy) of bone, (e.g., for osteomyelitis); tibia
	27641	4	Partial excision (craterization, saucerization, or diaphysectomy) of bone, (e.g., for osteomyelitis); fibula

REPAIR, REVISION OR RECONSTRUCTION

*	27650	3	Repair, primary, open or percutaneous, ruptured Achilles tendon
*	27652	4	Repair, primary, open or percutaneous, ruptured Achilles tendon; with graft (includes obtaining graft)
*	27654	4	Suture, secondary, ruptured Achilles tendon, with or without graft
*	27656	3	Repair, fascial defect of leg
*	27658	3	Repair or suture of flexor tendon of leg; primary, without free graft, single, each

*	27659	4	Repair or suture of flexor tendon of leg; secondary with or without free graft, single tendon, each
*	27664	3	Repair or suture of extensor tendon of leg; primary, without free graft, single, each
*	27665	4	Repair or suture of extensor tendon of leg; secondary with or without free graft, single tendon, each
*	27675	3	Repair for dislocating peroneal tendons; without fibular osteotomy
*	27676	4	Repair for dislocated peroneal tendons; with fibular osteotomy
	27680	3	Tenolysis, including tibia, fibula and ankle flexor; single
	27681	4	Tenolysis, including tibia, fibula and ankle flexor; multiple (through same incision), each
	27685	3	Lengthening or shortening of tendon; single (separate procedure)
	27686	4	Lengthening or shortening of tendon; multiple (through same incision), each
	27690	4	Transfer or transplant of single tendon (with muscle redirection or rerouting); superficial (e.g., anterior tibial extensors into midfoot)
	27691	4	Transfer or transplant of single tendon (with muscle redirection or rerouting); anterior tibial or posterior tibial through interosseous space
	27692	4	Transfer or transplant of single tendon (with muscle redirection or rerouting); each additional tendon

FRACTURES AND/OR DISLOCATIONS

27756	4	Open treatment of closed or open tibial shaft fracture, with internal skeletal fixation; simple
27758	4	Open treatment of closed or open tibial shaft fracture, with internal or external skeletal fixation; complicated
27764	3	Treatment of open distal tibial fracture (medial malleolus), with uncomplicated soft tissue closure
27766	3	Open treatment of closed or open distal tibial fracture (medial malleolus), with fixation
27781	1	Treatment of closed proximal fibula or shaft fracture; with manipulation
27782	3	Treatment of open proximal fibula or shaft fracture, with uncomplicated soft tissue closure
27784	4	Open treatment of closed or open proximal fibula or shaft fracture, with or without internal or external skeletal fixation
27790	3	Treatment of open distal fibular fracture (lateral malleolus), with uncomplicated soft tissue closure
27792	4	Open treatment of closed or open distal fibular fracture (lateral malleolus), with fixation
27802	1	Treatment of closed tibia and fibula fractures, shafts; with manipulation
27804	3	Treatment of open tibia and fibula fractures, shafts, with uncomplicated soft tissue closure (e.g., "pins above and below")

	27842	1	Treatment of ankle dislocation; requiring anesthesia
	27844	3	Treatment of open ankle dislocation, with uncomplicated soft tissue closure
	27846	4	Open treatment of closed or open ankle dislocation
	27848	4	Open treatment of closed or open ankle dislocation; with fixation

MANIPULATION

	27860	1	Manipulation of ankle under general anesthesia (includes application of traction or other fixation apparatus)

FOOT

INCISION

	28002	2	Deep infection, below fascia, requiring deep dissection, with or without tendon sheath involvement; single bursal space, specify
	28003	2	Deep infection, below fascia, requiring deep dissection, with or without tendon sheath involvement; multiple areas
	28005	2	Incision, deep, with opening of bone cortex (e.g., for osteomyelitis or bone abscess)
*	28008	4	Fasciotomy, plantar and/or toe, subcutaneous
*	28010	1	Tenotomy, subcutaneous, toe; single
*	28011	1	Tenotomy, subcutaneous, toe; multiple
*	28030	4	Neurectomy of intrinsic musculature of foot
	28035	4	Tarsal tunnel release (posterior tibial nerve decompression)

EXCISION

	28045	2	Excision, benign tumor; deep, subfascial, intramuscular
	28050	3	Arthrotomy for synovial biopsy; intertarsal or tarsometatarsal joint
	28062	4	Fasciectomy, excision of plantar fascia; radical (separate procedure)
*	28072	4	Synovectomy; metatarsophalangeal joint, each
*	28080	3	Excision of Morton neuroma, single, each
*	28086	4	Synovectomy, tendon sheath; flexor
*	28088	4	Synovectomy, tendon sheath; extensor
*	28090	4	Excision of lesion of tendon or fibrous sheath or capsule (including synovectomy) cyst or ganglion); foot
*	28092	4	Excision of lesion of tendon or fibrous sheath or capsule (including synovectomy) (cyst or ganglion); toes
	28102	4	Excision or curettage of bone cyst or benign tumor, talus or calcaneus; with iliac or other autogenous bone graft (includes obtaining graft)
	28103	4	Excision or curettage of bone cyst or benign tumor, talus or calcaneus, with homogenous bone graft
	28107	3	Excision or curettage of bone cyst or benign tumor, tarsal or metatarsal bones, except talus or calcaneus; with homogenous bone graft
*	28110	3	Ostectomy, partial excision, fifth metatarsal head (bunionette) (separate procedure)
*	28111	3	Ostectomy; complete excision; first metatarsal head
*	28112	3	Ostectomy; complete excision other metatarsal head (second, third, or fourth)

*	28113	3	Ostectomy; complete excision fifth metatarsal head
*	28114	3	Ostectomy; complete excision all metatarsal heads, with proximal phalangectomy, excluding first metatarsal (Clayton type procedure)
	28118	3	Ostectomy, calcaneus; partial
	28120	3	Partial excision (craterization, saucerization, sequestrectomy, or diaphysectomy) of bone (e.g., for osteomyelitis), talus or calcaneus
	28122	3	Partial excision (craterization, saucerization, or diaphysectomy) of bone (e.g., for osteomyelitis), tarsal or metatarsal bone, except talus or calcaneus
	28140	3	Metatarsectomy
	28171	3	Radical resection for tumor; tarsal (except talus or calcaneus)
	28173	3	Radical resection for tumor; metatarsal
	28175	3	Radical resection for tumor; phalanx

INTRODUCTION AND/OR REMOVAL

	28193	2	Remove foreign body; complicated

REPAIR, REVISION OR RECONSTRUCTION

*	28200	3	Repair or suture of tendon, foot, flexor, single; primary or secondary, without free graft, each tendon
*	28202	4	Repair or suture of tendon, foot, flexor, single; secondary with free graft, each tendon (includes obtaining graft)
*	28208	3	Repair or suture of tendon, foot, extensor, single; primary or secondary, each tendon
*	28210	4	Repair or suture of tendon, foot, extensor, single; secondary with free graft, each tendon (includes obtaining graft)
*	28222	3	Tenolysis, flexor; multiple (through same incision)
*	28225	3	Tenolysis, extensor; single
*	28226	3	Tenolysis, extensor; multiple (through same incision),
*	28230	1	Tenotomy, open, flexor; foot, single or multiple (separate procedure)
*	28232	1	Tenotomy, open, flexor; toe, single (separate procedure)
*	28234	1	Tenotomy, open, extensor, foot or toe
*	28240	1	Tenotomy or release, abductor hallucis muscle
	28250	2	Division of plantar fascia and muscle ("Steindler stripping") (separate procedure)
	28260	3	Capsulotomy, midfoot; medial release only (separate procedure)
	28261	3	Capsulotomy, midfoot; with tendon lengthening
*	28264	3	Capsulotomy, midtarsal (Heyman type procedure)
*	28270	3	Capsulotomy for contracture; metatarsophalangeal joint, with or without tenorrhaphy, single, each joint (separate procedure)
*	28272	3	Capsulotomy for contracture; interphalangeal joint, single, each joint (separate procedure)
*	28285	4	Hammertoe operation; one toe (e.g., interphalangeal fusion, filleting, phalangectomy) (separate procedure)

*	28286	4	Hammertoe operation; for cock-up fifth toe with plastic skin closure, (Ruiz-Mora type procedure)
*	28290	4	Hallux valgus (bunion) correction, with or without sesamoidectomy; simple exostectomy (Silver type procedure)
*	28292	4	Hallux valgus (bunion) correction, with or without sesamoidectomy; Keller, McBride or Mayo type procedure
*	28293	4	Hallux valgus (bunion) correction, with or without sesamoidectomy; resection of joint with implant
*	28294	4	Hallux valgus (bunion) correction, with or without sesamoidectomy; with tendon transplants (Joplin type procedure)
	28296	4	Hallux valgus (bunion) correction, with or without sesamoidectomy; with metatarsal osteotomy (e.g., Mitchell, Chevron, or concentric type procedures)
	28297	4	Hallux valgus (bunion) correction, with or without sesamoidectomy; Lapidus type procedure
*	28298	4	Hallux valgus (bunion) correction with or without sesamoidectomy; by phalanx osteotomy
*	28299	4	Hallux valgus (bunion) correction with or without sesamoidectomy; by other methods (e.g., double osteotomy)
*	28306	4	Osteotomy, metatarsal, base or shaft, single, for shortening or angular correction; first metatarsal
*	28308	4	Osteotomy, metatarsal, base or shaft, single, for shortening or angular correction; other than first metatarsal
*	28310	4	Osteotomy for shortening, angular or rotational correction; proximal phalanx, first toe (separate procedure)
*	28312	4	Osteotomy for shortening, angular or rotational correction; other phalanges, any toe
	28315	3	Sesamoidectomy, first toe (separate procedure)
	28320	4	Repair of nonunion or malunion; tarsal bones (calcaneus, talus, etc)
	28322	4	Repair of nonunion or malunion; metatarsal, with or without bone graft (includes obtaining graft)

FRACTURE AND/OR DISLOCATION

28405	1	Treatment of closed calcaneal fracture; with manipulation including Cotton or Bohler type reductions
28406	2	Treatment of closed calcaneal fracture; with manipulation and skeletal fixation
28420	4	Open treatment of closed or open calcaneal fracture, with or without internal or external skeletal fixation; with primary iliac or other autogenous bone graft (includes obtaining graft)
28435	1	Treatment of closed talus fracture; with manipulation
28436	2	Treatment of closed talus fracture; with manipulation and percutaneous pinning
28465	4	Open treatment of closed or open tarsal bone fracture (except talus and calcaneus), with or without internal or external skeletal fixation, each

28485	4	Open treatment of closed or open metatarsal fracture, with or without internal or external skeletal fixation, each
28500	3	Treatment of open fracture great toe, phalanx or phalanges, with uncomplicated soft tissue closure
28505	3	Open treatment of closed or open fracture great toe, phalanx or phalanges, with or without internal or external skeletal fixation
28520	2	Treatment of open fracture, phalanx or phalanges, other than great toe, with uncomplicated soft tissue closure, each
28525	3	Open treatment of closed or open fracture, phalanx or phalanges, other than great toe, with or without internal or external skeletal fixation, each
28545	1	Treatment of closed tarsal bone dislocation; requiring anesthesia
28546	2	Treatment of closed tarsal bone dislocation, with percutaneous skeletal fixation
28555	4	Open treatment of closed or open tarsal bone dislocation, with or without internal or external skeletal fixation
28575	1	Treatment of closed talotarsal joint dislocation; requiring anesthesia
28585	4	Open treatment of closed or open talotarsal joint dislocation, with or without internal or external skeletal fixation
28605	1	Treatment of closed tarsometatarsal joint dislocation; requiring anesthesia
28606	2	Treatment of closed tarsometatarsal joint dislocation, with percutaneous skeletal fixation
28615	4	Open treatment of closed or open tarsometatarsal joint dislocation, with or without internal or external skeletal fixation
28645	4	Open treatment of closed or open metatarsophalangeal joint dislocation
28670	3	Treatment of open interphalangeal joint dislocation, with uncomplicated soft tissue closure
28675	4	Open treatment of closed or open interphalangeal joint dislocation

ARTHRODESIS

* 28750	4	Arthrodesis, great toe; metatarsophalangeal joint
* 28755	4	Arthrodesis, great toe; interphalangeal joint
* 28760	4	Arthrodesis, great toe, interphalangeal joint, with extensor hallucis longus transfer to first metatarsal neck (Jones type procedure)

AMPUTATION

* 28810	2	Amputation, metatarsal, with toe, single
* 28820	2	Amputation, toe; metatar sophalangeal joint
* 28825	2	Amputation, toe; interphalanged joint

ARTHROSCOPY

29870	4	Arthroscopy, knee, diagnostic, with or without synovial biopsy (separate procedure)
29874	4	Arthroscopy, knee, surgical; for removal of loose body or foreign body (e.g., osteochondritis dissecans fragmentation, chondral fragmentation)
29875	4	Arthroscopy, knee, surgical; synovectomy, limited (e.g., plica or shelf resection)

	29876	4	Synovectomy, major, two or more compartments (e.g., medial or lateral)
	29877	4	Debridement/shaving of articular cartilage (chondroplasty)
	29881	4	Arthroscopy, knee, surgical; with meniscectomy (medial or lateral including any meniscal shaving)
	29887	4	Drilling for intact osteochondritis dissecans lesion with internal fixation

RESPIRATORY SYSTEM

NOSE

EXCISION

*	30115	2	Excision, nasal polyp(s), extensive; unilateral
	30116	2	Excision, nasal polyp(s), extensive; bilateral
	30117	2	Excision, intranasal lesion; internal approach
	30118	2	Excision, intransal lesion; external approach (lateral rhinotomy)
	30125	3	Excision dermoid cyst, nose; complex, under bone or cartilage
*	30130	1	Excision turbinate, partial or complete
*	30140	4	Submucous resection turbinate, partial or complete
	30150	4	Rhinectomy; partial
	30160	4	Rhinectomy; total

REMOVAL FOREIGN BODY

	30310	1	Removal of foreign body, intranasal; requiring general anesthesia,
	30320	2	Removal foreign body; by lateral rhinotomy

REPAIR

	30400	4	Rhinoplasty, primary; lateral and alar cartilages and/or elevation of nasal tip
	30410	4	Rhinoplasty, primary; complete, external parts including bony pyramid, lateral and alar cartilages, and/or elevation of nasal tip
	30420	4	Rhinoplasty, primary; including major septal repair
	30430	4	Rhinoplasty, secondary; minor revision (small amount of nasal tip work)
	30435	4	Rhinoplasty, secondary; intermediate revision (bony work with osteotomies)
	30450	4	Rhinoplasty, secondary; major revision (nasal tip work and osteotomies)
	30520	4	Septoplasty or submucous resection, with or without cartilage scoring, contouring or replacement with graft
	30580	4	Repair fistula; oromaxillary (combine with 31030 if antrotomy is included)
	30600	4	Repair fistula; oronasal
*	30620	4	Reconstruction, functional, internal nose (septal or other intranasal dermatoplasty) (does not include obtaining graft)
*	30630	4	Repair nasal septal perforations

OTHER PROCEDURES

	30915	4	Ligation arteries; ethmoidal
	30920	4	Ligation arteries; internal maxillary artery, transantral

ACCESSORY SINUSES

INCISION

*	31020	2	Sinusotomy, maxillary (antrotomy); intranasal, unilateral
*	31021	2	Sinusotomy, maxillary (antrotomy); intranasal, bilateral
*	31030	2	Sinusotomy, maxillary (antrotomy); radical, unilateral (Caldwell-Luc) without removal of antrochoanal polyps
*	31031	2	Sinusotomy, maxillary (antrotomy); radical, bilateral (Caldwell-Luc) without removal of antrochoanal polyps
	31032	4	Sinusotomy, maxillary (antrotomy); radical unilateral (Caldwell-Luc) with removal antrochoanal polyps
	31033	4	Sinusotomy, maxillary (antrotomy); radical, bilateral (Caldwell-Luc) with removal antrochoanal polyps
	31070	2	Sinusotomy frontal; external, simple (trephine operation)

EXCISION

*	31200	3	Ethmoidectomy; intranasal, anterior
*	31201	3	Ethmoidectomy; intranasal, total
*	31205	3	Ethmoidectomy; extranasal, total

LARYNX

ENDOSCOPY

*	31505	1	Laryngoscopy, indirect (separate procedure); diagnostic
*	31510	1	Laryngoscopy, indirect (separate procedure); with biopsy
*	31511	1	Laryngoscopy, indirect (separate procedure); with removal of foreign body
*	31512	1	Laryngoscopy, indirect (separate procedure); with removal of lesion
	31513	2	Laryngoscopy, indirect (separate procedure); with vocal cord injection
*	31515	1	Laryngoscopy direct; for aspiration
*	31525	1	Laryngoscopy, direct; diagnostic, except newborn
*	31526	1	Laryngoscopy, indirect; diagnostic, with operating microscope
	31527	2	Laryngoscopy, direct; with insertion of obturator
*	31530	1	Laryngoscopy, direct, operative, with foreign body removal
*	31531	1	Laryngoscopy, direct, operative, with foreign body removal; with operating microscope
*	31535	1	Laryngoscopy, direct, operative, with biopsy
*	31536	1	Laryngoscopy, direct, operative, with biopsy; with operating microscope
*	31540	1	Laryngoscopy, direct, operative, with excision of tumor and/or stripping of vocal cords or epiglottis
*	31541	1	Laryngoscopy, direct, operative, with excision of tumor and/or stripping of vocal cords or epiglottis; with operating microscope
*	31560	1	Laryngoscopy, direct, operative, with arytenoidectomy
*	31561	1	Laryngoscopy, direct, operative, with arytenoidectomy; with operating microscope
*	31570	1	Laryngoscopy, direct, with injection into vocal cord(s), therapeutic

*	31571	1	Laryngoscopy, direct, with injection into vocal cord(s), therapeutic; with operating microscope
	31576	1	Laryngoscopy, flexible fiberscopic; with biopsy
	31577	1	Laryngoscopy, flexible fiberscopic; with removal of foreign body
	31578	1	Laryngoscopy, flexible fiberscopic; with removal of lesion

TRACHEA AND BRONCHI

INCISION

	31600	2	Tracheostomy, planned (separate procedure)
	31612	1	Tracheal puncture, percutaneous for aspiration of mucus (transtracheal aspiration)
	31613	2	Tracheostoma revision; simple, without flap rotation
	31614	2	Tracheostoma revision; complex, with flap rotation

ENDOSCOPY

	31615	1	Tracheobronchoscopy through established tracheostomy incision
	31622	1	Bronchoscopy; diagnostic, (flexible original), with or without cell washing or brushing
*	31625	1	Bronchoscopy; with biopsy
	31628	1	Bronchoscopy; with transbronchial lung biopsy, with or without fluoroscopic guidance
*	31630	1	Bronchoscopy; with tracheal or bronchial dilation or closed reduction of fracture
	31631	1	Bronchoscopy; with tracheal dilation and placement of tracheal stent
*	31635	1	Bronchoscopy; with removal of foreign body
*	31640	1	Bronchoscopy; with excision of tumor
	31641	1	Bronchoscopy; with destruction of tumor or relief of stenosis by any method other than excision (e.g., laser)
*	31645	1	Bronchoscopy; with therapeutic aspiration of tracheobronchial tree, initial (e.g., drainage of lung abscess)
	31646	1	Bronchoscopy; with therapeutic aspiration of tracheobronchial tree, subsequent
	31656	1	Bronchoscopy; with injection of contrast material for segmental bronchography (fiberscope only)
	31659	1	Bronchoscopy; with other bronchoscopic procedures

INTRODUCTION

	31700	1	Catheterization, transglottic (separate procedure)
	31708	1	Instillation of contrast material for laryngography or bronchography, without catheterization
	31710	1	Catheterization for bronchography, with or without instillation of contrast material
	31715	1	Transtracheal injection for bronchography
	31717	1	Catheterization with bronchial brush biopsy
	31719	1	Transtracheal (percutaneous) introduction of indwelling tube for therapy (tickle tube)

	31720	1	Catheter aspiration (separate procedure); nasotracheobronchial

CARDIOVASCULAR SYSTEM

REPAIR, LIGATION AND OTHER PROCEDURES

	37609	1	Ligation or biopsy, temporal artery
*	37700	4	Ligation and division of long saphenous vein at saphenofemoral junction, or distal interruptions, unilateral
*	37701	4	Ligation and division of long saphenous vein at saphenofemoral juncton, or distal interruptions, unilateral; bilateral
*	37720	4	Ligation and division and complete stripping of long or short saphenous veins; unilateral
*	37721	4	Ligation and division and complete stripping of long or short saphenous veins; bilateral
*	37730	4	Ligation and division and complete stripping of long and short saphenous veins; unilateral
*	37731	4	Ligation and division and complete stripping of long and short saphenous veins: bilateral
	37735	4	Ligation and division and complete stripping of long or short saphenous veins with radical excison of ulcer and skin graft and/or interruption of communicating veins of lower leg, with excision of deep fascia; unilateral
	37737	4	Ligation and division and complete stripping of long or short saphenous veins with radical excision of ulcer and skin graft and/or interruption of communicating veins of lower leg, with excision of deep facia; bilateral
	37760	4	Ligation and perforators, subfascial, radical (Linton Type), with or without skin graft
*	37780	4	Ligation and division of short saphenous vein at saphenopopliteal junction (separate procedure); unilateral
*	37781	4	bilateral. Ligation and division of short saphenous vein at saphenopopliteal junction (separate procedure)
	37785	3	Ligation, division and/or excision of secondary varicose veins (clusters) of leg; unilateral
	37787	3	Ligation, division and/or excision of secondary varicose veins (clusters) of leg; bilateral

HEMIC AND LYMPHATIC SYSTEM

LYMPH NODES AND LYMPHATIC CHANNELS

INCISION

	38305	1	Drainage of lymph node abscess or lymphadenitis; extensive
	38308	1	Lymphangiotomy or other operations on lymphatic channels

EXCISION

*	38500	2	Biopsy or excision of lymph node(s); superficial (separate procedure)
*	38510	2	Biopsy or excision of lymph node(s); deep, cervical node(s)

*	38520	2	Biopsy or excision of lymph node(s); deep cervical node(s) with excision scalene fat pad
	38530	3	Biopsy or excision of lymph node(s); internal mammary node(s) (separate procedure)
	38542	3	Dissection; deep jugular node(s)
	38550	3	Excision of cystic hygroma, axillary or cervical, without deep neurovascular dissection; simple
	38555	4	Excision of cystic hygroma, axillary or cervical, without deep neurovascular dissection; complex

RADICAL LYMPHADENECTOMY (RADICAL RESECTION OF LYMPH NODES)

38700	4	Suprahyoid lymphadenectomy; unilateral
38701	4	Suprahyoid lymphadenectomy; bilateral
38740	3	Axillary lymphadenectomy; superficial
38745	3	Axillary lymphadenectomy; complete
38760	3	Inguinofemoral lymphadenectomy, superficial, including Cloquet's node (separate procedure); unilateral
38761	3	Inguinofemoral lymphadenectomy, superficial, including Cloquet's node (separate procedure); bilateral

INTRODUCTION

38790	1	Injection procedure for lymphangiography; unilateral
38791	1	Injection procedure for lymphangiography; bilateral

DIGESTIVE SYSTEM

LIPS

EXCISION

*	40500	2	Vermilionectomy (lip shave), with mucosal advancement
*	40510	3	Excision of lip; transverse wedge excision with primary closure
*	40520	3	Excision lip; V-excision with primary direct linear closure
	40525	3	Excision lip; full thickness, reconstruction with local flap (Estlander or fan)
	40527	3	Excision lip; full thickness, reconstruction with cross lip flap (Abbe-Estlander)
	40530	3	Resection of lip, more than one-fourth, without reconstruction

REPAIR (CHEILOPLASTY)

40650	3	Repair lip, full thickness; vermilion only
40654	4	Repair lip, full thickness; over one half vertical height, or complex

VESTIBULE OF MOUTH

INCISION

40801	1	Drainage of abscess, cyst, hematoma, vestibule of mouth; complicated
40805	1	Removal of embedded foreign body; complicated

EXCISION, DESTRUCTION

40814	2	Excision of lesion of mucosa and submucosa; with complex repair
40816	2	Excision of lesion of mucosa and submucosa; complex with excision of underlying muscle
40818	2	Excision of mucosa as donor graft

REPAIR

40831	2	Closure of laceration; over 2.6 cm or complex
40840	2	Vestibuloplasty; anterior
40842	2	Vestibuloplasty; posterior, unilateral
40843	2	Vestibuloplasty; posterior, bilateral
40844	3	Vestibuloplasty; entire arch
40845	4	Vestibuloplasty; complex

TONGUE, FLOOR OF MOUTH

INCISION

* 41000	1	Intraoral incision and drainage of abscess, cyst, or hematoma of tongue or floor of mouth; lingual
* 41005	1	Intraoral incision and drainage of abcess, cyst, or hematoma of tongue or floor of mouth; sublingual, superficial

EXCISION

* 41100	1	Biopsy of tongue; anterior two-thirds
* 41105	1	Biopsy of tongue; posterior one-third
41114	2	Excision of lesion of tongue with closure; with local tongue flap
41115	1	Excision of lingual frenum (frenectomy)
41116	1	Excision lesion of floor of mouth
41120	3	Glossectomy; less than one-half tongue

REPAIR

41251	3	Repair laceration up to 2 cm; posterior one-third of tongue

DENTOALVEOLAR STRUCTURES

INCISION

41806	2	Removal embedded foreign body; from bone

EXCISION, DESTRUCTION

41826	2	Excision of lesion or tumor (except listed above); with simple repair
41827	3	Excision of lesion or tumor (except listed above); with complex repair

PALATE, UVULA

INCISION

* 42000	1	Drainage of abscess of palate, uvula

EXCISION, DESTRUCTION

42104	1	Excision, lesion of palate, uvula; without closure
42106	1	Excision, lesion of palate, uvula; with simple primary closure
42107	1	Excision, lesion of palate, uvula; with local flap closure
42120	2	Resection of palate or extensive resection of lesion
42140	2	Uvulectomy, excision of uvula

REPAIR

42182	1	Repair laceration of palate; over 2 cm or complex

SALIVARY GLAND AND DUCTS

INCISION

42305	1	Drainage of abscess; parotid, complicated
42320	1	Drainage of abscess; submaxillary external
42325	2	Fistulization of sublingual salivary cyst (ranula)
42335	2	Sialolithotomy; submandibular (submaxillary), complicated, intraoral
42340	2	Sialolithotomy; parotid, extraoral or complicated intraoral

EXCISION

42408	2	Excision of sublingual salivary cyst (ranula)
42410	4	Excision of parotid tumor or parotid gland; lateral lobe, without nerve dissection
42440	4	Excision of submandibular (submaxillary) gland
42450	4	Excision of sublingual gland

REPAIR

42500	3	Plastic repair of salivary duct, sialodochoplasty; primary or simple
42505	4	Plastic repair salivary duct, sialodochoplasty; secondary or complicated
42507	4	Parotid duct diversion, bilateral (Wilke type procedure)
42508	4	Parotid duct diversion, bilateral (Wilke type procedure); with excision of one submandibular gland
42509	4	Parotid duct diversion, bilateral (Wilke type procedure); with excision of both submandibular glands

OTHER PROCEDURES

42600	1	Closure salivary fistula
42665	1	Ligation salivary duct, intraoral

PHARYNX, ADENOIDS, AND TONSILS

INCISION

	42720	1	Incision and drainage abscess; retropharyngeal or parapharyngeal, intraoral approach
	42725	1	Incision and drainage abscess; retropharyngeal or parapharyngeal, external approach

EXCISION

	42806	2	Biopsy; nasopharynx, survey for unknown primary lesion
	42808	1	Excision of lesion of pharynx
*	42810	2	Excision branchial cleft cyst or vestige; confined to skin and subcutaneous tissues
*	42815	2	Excision branchial cleft cyst or vestige; extending beneath subcutaneous tissues
	42860	2	Excision of tonsil tags
	42870	2	Excision lingual tonsil (separate procedure)
	42880	2	Excision nasopharyngeal lesion (e.g., fibroma)

REPAIR

	42900	2	Suture pharynx for wound or injury
	42950	4	Pharyngoplasty (plastic or reconstructive operation on pharnyx)

OTHER PROCEDURES

	42955	2	Pharyngostomy (fistulization of pharynx, external for feeding)

ESOPHAGUS

ENDOSCOPY

*	43200	1	Esophagoscopy, rigid or flexible fiberoptic (specify); diagnostic procedure
*	43202	1	Esophagoscopy, rigid or flexible fiberoptic (specify); for biopsy and/or collection of specimen by brushing or washing
	43204	1	Esophagoscopy, rigid or flexible fiberoptic (specify); for injection sclerosis of esophageal varices
*	43215	1	Esophagoscopy, rigid or flexible fiberoptic (specify); for removal of foreign body
*	43217	1	Esophagoscopy, rigid or flexible fiberoptic (specify); for removal of polypoid lesion(s)
	43219	1	Esophagoscopy, rigid or flexible fiberoptic (specify); for insertion of plastic tube or stent
*	43220	1	Esophagoscopy, rigid or flexible fiberoptic (specify); for dilation, direct
	43226	1	Esophagoscopy, rigid or flexible fiberoptic (specify); for insertion of wire to guide dilation

43227	1	Esophagoscopy, rigid or flexible fiberoptic (specify); for control of hemorrhage (e.g., electrocoagulation, laser photocoagulation)
43228	1	Esophagoscopy, rigid or flexible fiberoptic (specify); for ablation of tumor or mucosal lesion
43235	1	Upper gastrointestinal endoscopy including esophagus, stomach, and either the duodenum and/or jejunum as appropriate; complex diagnostic
43239	1	Upper gastrointestinal endoscopy including esophagus, stomach, and either the duodenum and/or jejunum as appropriate; for biopsy and/or collection of specimen by brushing or washing
43247	1	Upper gastrointestinal endoscopy including esophagus, stomach, and either the duodenum and/or jejunum as appropriate; for removal of foreign body
43251	1	Upper gastrointestinal endoscopy including esophagus, stomach, and either the duodenum and/or jejunum as appropriate; for removal of polypoid lesion(s)
43255	1	Upper gastrointestinal endoscopy including esophagus, stomach, and either the duodenum and/or jejunum as appropriate; for control of hemorrhage (e.g., electrocoagulation, laser photocoagulation)
43258	1	Upper gastrointestinal endoscopy including esophagus, stomach, and either the duodenum and/or jejunum as appropriate; for ablation of tumor or mucosal lesion (e.g., electrocoagulation, with laser photocoagulation)
43260	2	Endoscopic retrograde cholangiopancreatography (ERCP), with or without specimen collection
43262	2	Endoscopic retrograde cholangiopancreatography (ERCP), with or without specimen collection; for sphincterotomy/papillotomy
43263	2	Endoscopic retrograde cholangiopancreatography (ERCP), with or without specimen collection; for pressure measurement of sphincter of Oddi
43264	2	Endoscopic retrograde cholangiopancreatography (ERCP), with or without specimen collection; for removal of stone(s) from biliary and/or pancreatic ducts

MANIPULATION

43450	1	Dilation of esophagus, by unguided sound or bougie single or multiple passes; initial session
43451	1	Dilation of esophagus, by unguided sound or bougie single or multiple passes; subsequent session
43453	1	Dilation of esophagus, over guide wire or string
43455	1	Dilation of esophagus, by balloon or Stark dilator
43456	1	Dilation of esophagus by balloon or Stark dilator; retrograde

INTESTINES (EXCEPT RECTUM)

ENTEROSTOMY-EXTERNAL FISTULIZATION OF INTESTINES (SEPARATE PROCEDURE)

* 44340	3	Revision of colostomy; simple (release of superficial scar)
44345	4	Revision of colostomy; complicated reconstruction in depth
44346	4	Revision of colostomy; with repair of paracolostomy Lernia

ENDOSCOPY, SMALL BOWEL AND STOMAL

44360	1	Small intestinal endoscopy, enteroscopy beyond second portion of duodenum; diagnostic
44361	1	Small intestinal endoscopy, enteroscopy beyond second portion of duodenum; for biopsy and/or collection of specimen by brushing or washing
44363	1	Small intestinal endoscopy, enteroscopy beyond second portion of duodenum; for removal of foreign body
44364	1	Small intestinal endoscopy, enteroscopy beyond second portion of duodenum; for removal of polypoid lesion(s)
44366	1	Small intestinal endoscopy, enteroscopy beyond second portion of duodenum; for control of hemorrhage (e.g., electrocoagulation, laser photocoagulation)
44369	1	Small intestinal endoscopy, enteroscopy beyond second portion of duodenum; for ablation of tumor or mucosal lesion (e.g., laser)
44380	1	Fiberoptic ileoscopy through stoma
44382	1	Fiberoptic ileoscopy through stoma; with biopsy and/or collection of specimen by brushing or washing
44388	1	Fiberoptic colonoscopy through colostomy
44389	1	Fiberoptic colonoscopy through colostomy; for biopsy and/or collection of specimen by brushing or washing
44390	1	Fiberoptic colonoscopy through colostomy; for removal of foreign body
44391	1	Fiberoptic colonoscopy through colostomy; for control of hemorrhage (e.g., electrocoagulation, laser photocoagulation)
44392	1	Fiberoptic colonoscopy through colostomy; for removal of polypoid lesion(s)

RECTUM

INCISION

45000	3	Transrectal drainage of pelvic abscess
45005	1	Incision and drainage of submucosal abscess, rectum
45020	2	Incision and drainage of deep supralevator, pelvirectal, or retrorectal abscess

EXCISION

45170	3	Excision of rectal tumor, simple, transanal approach

45180	3	Excision and/or electrodesiccation of malignant tumor of rectum, transanal approach; palliative
45181	3	Excision and/or electrodesiccation of malignant tumor of rectum, transanal approach; therapeutic

ENDOSCOPY

45355	1	Colonoscopy, with standard sigmoidoscope, transabdominal via colotomy, single or multiple
45360	1	Colonoscopy, fiberoptic, beyond 25 cm to splenic flexure; diagnostic procedure
45365	1	Colonoscopy, fiberoptic, beyond 25 cm to splenic flexure; for biopsy and/or collection of specimen by brushing or washing
45367	1	Colonoscopy, fiberoptic, beyond 25 cm to splenic flexure; for removal of foreign body
45368	1	Colonoscopy, fiberoptic, beyond 25 cm to splenic flexure; for control of hemorrhage (e.g., electrocoagulation, laser photocoagulation)
45370	1	Colonoscopy, fiberoptic, beyond 25 cm to splenic flexure; for removal of polypoid lesion(s)
45378	1	Colonoscopy, fiberoptic, beyond splenic flexure; diagnostic procedure
45379	1	Colonoscopy, fiberoptic, beyond splenic flexure; for removal of foreign body
45380	1	Colonoscopy, fiberoptic, beyond splenic flexure; for biopsy and/or collection of specimen by brushing or washing
45382	1	Colonoscopy, fiberoptic, beyond splenic flexure; for control of hemorrhage (e.g., electrocoagulation, laser photocoagulation)
45385	1	Colonoscopy, fiberoptic, beyond splenic flexure; for removal of polypoid lesion(s)

REPAIR

45500	4	Proctoplasty; for stenosis
45505	4	Proctoplasty; for prolapse of mucous membrane
45521	1	Perirectal injection of sclerosing solution for prolapse; hospital
45560	4	Repair of rectocele (separate procedure)

MANIPULATION

45900	1	Reduction of procidentia (separate procedure) under anesthesia
* 45910	1	Dilation of rectal structure (separate procedure) under anesthesia other than local
45915	1	Removal of fecal impaction or foreign body (separate procedure) under anesthesia

ANUS

INCISION

46000	2	Fistulotomy, subcutaneous
46040	2	Incision and drainage of ischiorectal and/or perirectal abscess (separate procedure)
46045	2	Incision and drainage of intramural, intramuscular or submucosal abscess, transanal, under anesthesia

*	46060	2	Incision and drainage of ischiorectal or intramural abscess, with fistulectomy, submuscular
	46080	2	Sphincterotomy, anal, division of sphincter (separate procedure)

EXCISION

	46200	2	Fissurectomy, with or without sphincterotomy
	46211	2	Cryptectomy; multiple (separate procedure)
*	46250	3	Hemorrhoidectomy, external, complete
*	46255	3	Hemorrhoidectomy internal and external, simple
*	46257	3	Hemorrhoidectomy internal and external, simple; with fissurectomy
*	46258	3	Hemorrhoidectomy internal and external, simple; with fistulectomy, with or without fissurectomy
	46260	2	Hemorrhoidectomy, internal and external, complex or extensive
	46261	2	Hemorrhoidectomy, internal and external, complex or extensive; with fissurectomy
*	46262	2	Hemorrhoidectomy, internal and external, complex or extensive; with fistulectomy, with or without fissurectomy
*	46270	2	Fistulectomy; subcutaneous
*	46275	2	Fistulectomy; submuscular
*	46280	2	Fistulectomy; complex or multiple
	46285	2	Fistulectomy; second stage

ANUS

INTRODUCTION

	46750	4	Sphincteroplasty, anal, for incontinence or prolapse; adult
	46753	4	Graft (Thiersch operation) for rectal incontinence and/or prolapse
	46754	4	Removal of Thiersch wire or suture
	46760	4	Sphincteroplasty, anal, for incontinence, adult, muscle transplant

DESTRUCTION

	46924	1	Destruction of lesion(s), anus (eg, condyloma, papilloma, molluscum contagiosum, herpetic vesicle), extensive, any method
	46937	2	Cryosurgery of rectal tumor; benign
	46938	2	Cryosurgery of rectal tumor; malignant

LIVER

INCISION

*	47000	2	Biopsy of liver, percutaneous needle

ABDOMEN, PERITONEUM, AND OMENTUM

INCISION

	49000	4	Exploratory laparotomy, exploratory celiotomy (separate procedure)

ENDOSCOPY

*	49300	4	Peritoneoscopy; without biopsy
*	49301	4	Peritoneoscopy; with biopsy
	49302	4	Peritoneoscopy with guided transhepatic cholangiography; without biopsy
	49303	4	Peritoneoscopy with guided transhepatic cholangiography; with biopsy

INTRODUCTION

	49400	1	Pneumoperitoneum; initial
	49401	1	Pneumoperitoneum; subsequent
	49420	1	Insertion of intraperitoneal cannula or catheter for drainage or dialysis; temporary
	49421	1	Insertion of intraperitoneal cannula or catheter for drainage or dialysis; permanent
	49425	1	Peritoneal-venous shunt (e.g., Le Veen shunt)
	49426	1	Revision of peritoneal-venous shunt

REPAIR

HERNIOPLASTY, HERNIORRHAPHY, HERNIOTOMY

*	49505	4	Repair inguinal hernia, age 5 or over
	49510	4	Repair inguinal hernia, age 5 or over; with orchiectomy, with or without implantation of prosthesis
*	49515	4	Repair inguinal hernia, age 5 or over; with excision of hydrocele or spermatocele
*	49520	4	Repair inguinal hernia, any age; recurrent
*	49525	4	Repair inguinal hernia, any age; sliding
	49540	4	Repair lumbar hernia
*	49550	4	Repair femoral hernia, groin incision
	49552	4	Repair femoral hernia, Henry approach
*	49555	4	Repair femoral hernia, recurrent, any approach
*	49560	4	Repair ventral (incisional) hernia (separate procedure)
*	49565	4	Repair ventral (incisional) hernia (separate procedure); recurrent
	49570	4	Repair epigastric hernia, properitoneal fat (separate procedure); simple
	49575	4	Repair epigastric hernia, properitoneal fat (separate procedure); complex
	49581	4	Repair umbilical hernia; age 5 or over
	49590	4	Repair spigelian hernia

URINARY SYSTEM

KIDNEY

INCISION

	50020	3	Drainage of perirenal or renal abscess (separate procedure)
	50040	4	Nephrostomy, nephrotomy with drainage

EXCISION

50200	1	Renal biopsy, percutaneous by trocar or needle
50205	4	Renal biopsy, percutaneous; by surgical exposure of kidney

INTRODUCTION

50390	1	Aspiration and/or injection of renal cyst or pelvis by needle, percutaneous
50392	1	Introduction of intracatheter or catheter into renal pelvis for drainage and/or injection, percutaneous
50393	1	Introduction of ureteral catheter or stent into ureter through renal pelvis for drainage and/or injection, percutaneous
50394	1	Injection procedure for pyelography (as nephrostogram, pyelostogram, antegrade pyeloureterograms) through nephrostomy or pyelostomy tube, or indwelling ureteral catheter (separate procedure)
50396	1	Manometric studies through nephrostomy or pyelostomy tube, or indwelling ureteral catheter
50398	1	Change of nephrostomy or pyelostomy tube

ENDOSCOPY

50553	1	Renal endoscopy through established nephrostomy or pyelostomy, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service; with ureteral catheterization
50559	1	Renal endoscopy through established nephrostomy or pyelostomy, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service; with insertion of radioactive substance with or without biopsy and/or fulguration
50561	1	Renal endoscopy through established nephrostomy or pyelostomy, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service; with removal of foreign body or calculus
50570	1	Renal endoscopy through nephrotomy or pyelotomy, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service
50572	1	Renal endoscopy through nephrotomy or pyelotomy, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service; with ureteral catheterization
50576	1	Renal endoscopy through nephrotomy or pyelotomy, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service; with fulguration, with or without biopsy
50578	1	Renal endoscopy through nephrotomy or pyelotomy, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service; with insertion of radioactive substance, with or without biopsy and/or fulguration
50580	1	Renal endoscopy through nephrotomy or pyelotomy, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service; with removal of foreign body or calculus

URETER

INTRODUCTION

50684	1	Injection procedure for ureterography or ureteropyelography through ureterostomy or indwelling ureteral catheter (separate procedure)
50690	1	Injection procedure for visualization of ilial conduit and/or ureteropyelography, exclusive of radiologic service (separate procedure)

ENDOSCOPY

50953	1	Ureteral endoscopy through established ureterostomy, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service; with ureteral catheterization
50955	1	Ureteral endoscopy through established ureterostomy, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service; with biopsy
50957	1	Ureteral endoscopy through established ureterostomy, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service; with fulguration, with or without biopsy
50959	1	Ureteral endoscopy through established ureterostomy, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service; with insertion of radioactive substance with or without biopsy and/or fulguration (not including provision of material)
50961	1	Ureteral endoscopy through established ureterostomy, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service; with removal of foreign body or calculus
50970	1	Ureteral endoscopy through ureterotomy, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service
50972	1	Ureteral endoscopy through ureterotomy, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service; with ureteral catheterization
50974	1	Ureteral endoscopy through ureterotomy, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service; with biopsy
50976	1	Ureteral endoscopy through ureterotomy, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service; with fulguration, with or without biopsy
50978	1	Ureteral endoscopy through ureterotomy, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service; with insertion of radioactive substance, with or without biopsy and/or fulguration (not including provision of materal)
50980	1	Ureteral endoscopy through ureterotomy, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service; with removal of foreign body or calculus

BLADDER

INCISION

51005	1	Aspiration of bladder; by trocar or intracatheter
51010	1	Aspiration of bladder; with insertion of suprapubic catheter

INTRODUCTION

51600	1	Injection procedure for cystography or voiding urethrocystography
51605	1	Injection procedure and placement of chain for contrast and/or chain urethrocystography
51610	1	Injection procedure for retrograde urethrocystography
51710	1	Change of cystostomy tube; complicated

BLADDER

REPAIR

51865	4	Cystorrhaphy, suture of bladder wound, injury or rupture; complicated
51900	4	Closure of vesicovaginal fistula, abdominal approach

URETER

ENDOCOPY-CYSTOSCOPY, URETHROSCOPY CYSTOURETHROSCOPY NOTES

* 52000	1	Cystourethroscopy; (separate procedure)
52005	1	Cystourethroscopy; with ureteral catheterization, with or without irrigation, instillation, or ureteropyelography, exclusive of radiologic service
52007	1	Cystourethroscopy; with ureteral catheterization and brush biopsy of ureter and/or renal pelvis
52010	1	Cystourethroscopy: with ejaculatory duct catheterization, with or without irrigation, instillation, or duct radiography, exclusive of radiologic service

BLADDER

TRANSURETHRAL SURGERY (URETHRA, AND BLADDER)

52204	3	Cystourethroscopy, with biopsy
52214	3	Cystourethroscopy, with fulguration (including cryosurgery or laser surgery) of trigone, bladder neck, prostatic fossa, urethra, or periurethral glands
52224	3	Cystourethroscopy, with fulguration (including cryosurgery or laser surgery) or treatment of MINOR (less than 0.5 cm) lesion(s), with or without biopsy
52234	3	Cystourethroscopy, with fulguration (including cryosurgery or laser surgery) and/or resection of; SMALL bladder tumor(s) (0.5 to 2.0 cm)
52235	3	Cystourethroscopy, with fulguration (including cryosurgery) and/or resection of; MEDIUM bladder tumor(s) (2.0 to 5.0 cm)
52240	3	Cystourethroscopy, with fulguration (including cryosurgery) and/or resection of; LARGE bladder tumor(s)
52250	3	Cystourethroscopy with insertion of radioactive substance, with or without biopsy or fulguration
52260	3	Cystourethroscopy, with dilation of bladder for interstitial cystitis; general or conduction (spinal) anesthesia
52270	3	Cystourethroscopy, with internal urethrotomy; female
52275	3	Cystourethroscopy, with internal urethrotomy; male

52276	3	Cystourethroscopy with direct vision internal urethrotomy
52277	3	Cystourethroscopy, with resection of external sphincter (sphincterotomy)
52281	3	Cystourethroscopy, with calibration and/or dilation of urethral stricture or stenosis, with or without meatotomy and injection procedure for cystography, male or female
52283	3	Cystourethroscopy, with steroid injection into stricture
52285	3	Cystourethroscopy for treatment of the female urethral syndrome with any or all of the following: urethral meatotomy, urethral dilation, internal urethrotomy, lysis of urethrovaginal septal fibrosis, lateral incisions of the bladder neck, and fulguration of polyp(s) of urethra, bladder neck, and/or trigone
52290	3	Cystourethroscopy; with ureteral meatotomy, unilateral or bilateral
52300	3	Cystourethroscopy; with resection or fulguration of ureterocele(s), unilateral or bilateral
52305	3	Cystourethroscopy; with incision or resection of orifice of bladder diverticulum, single or multiple
52310	4	Cystourethroscopy, with removal of foreign body calculus or ureteral stent from urethra or bladder; simple
52315	4	Cystourethroscopy, with removal of foreign body calculus or ureteral stent from urethra or bladder; complicated
52317	4	Litholapaxy: crushing of fragmentation or calculus by any means in bladder and removal of fragments, simple; small (less than 2.5 c.m.)
52318	4	Litholapaxy: crushing of fragmentation or calculus by any means in bladder and removal of fragments, simple; complicated or large (over 2.5 c.m.)
52320	4	Cystourethroscopy (including ureteral catheterization); with removal of ureteral calculus
52330	4	Cystourethroscopy (including ureteral catheterization); with manipulation, without removal of ureteral calculus
52332	4	Cystourethroscopy, with insertion of indwelling ureteral stent (e.g., Gibbons or double-J type)
52335	3	Cystourethroscopy, with ureteroscopy and/or pyeloscopy (includes dilation of the ureter by any method)

TRANSURETHERAL SURGERY (VESICAL NECK AND PROSTATE)

52340	3	Cystourethroscopy with incision, fulguration, or resection of bladder neck and/or posterior urethra (congenital valves, obstructive hypertrophic mucosal folds)
52500	3	Transurethral resection of bladder neck (separate procedure)

TRANSURETHRAL SURGERY(URETHA AND BLADDER)

52601	4	Transurethral resection of prostate, including control of postoperative bleeding, complete (vasectomy, meatotomy, cystourethroscopy, urethral calibration and/or dilation, and internal urethrotomy are included)

52606	4	Transurethral fulguration for postoperative bleeding occurring after the usual follow-up time
52612	4	Transurethral resection of prostate; first stage of two-stage resection (partial resection)
52614	4	Transurethral resection of prostate; second stage of two-stage resection (resection completed)
52620	4	Transurethral resection; of residual obstructive tissue after 90 days postoperative
52630	4	Transurethral resection; of regrowth of obstructive tissue longer than one year postoperative
52640	4	Transurethral resection; of postoperative bladder neck contracture
52650	4	Transurethral cryosurgical removal of prostate (postoperative irrigations and aspiration of sloughing tissue included)
52700	4	Transurethral drainage of prostatic abscess

URETHRA

INCISION

53000	2	Urethrotomy or urethrostomy, external (separate procedure); pendulous urethra
53010	2	Urethrotomy or urethrostomy, external (separate procedure); perineal urethra, external
53020	2	Meatotomy, cutting of meatus (separate procedure); except infant
53040	2	Drainage of deep periurethral abscess

EXCISION

53220	3	Excision or fulguration of carcinoma of urethra
53230	3	Excision of urethral diverticulum (separate procedure); female
53235	3	Excision of urethral diverticulum (separate procedure); male
53240	3	Marsupialization of urethral diverticulum, male or female
53265	3	Excision or fulguration; urethral caruncle
53275	3	Excision or fulguration; urethral prolapse

REPAIR

53400	4	Urethroplasty; first stage, for fistula, diverticulum, or stricture, e.g., Johannsen type
53405	4	Urethroplasty; second stage (formation of urethra), including urinary diversion
53410	4	Urethroplasty, one-stage reconstruction of male anterior urethra
53420	4	Urethroplasty, two-stage reconstruction or repair of prostatic or membranous urethra; first stage
53425	4	Urethroplasty, two-stage reconstruction or repair of prostatic or membranous urethra; second stage
53430	4	Urethroplasty, reconstruction of female urethra
53440	4	Operation for correction of male urinary incontinence, with or without introduction of prosthesis

53447	4	Removal, repair or replacement of inflatable sphincter including pump and/or reservoir and/or cuff
53449	4	Surgical correction of hydraulic abnormality of inflatable sphincter device
53450	4	Urethromeatoplasty, with mucosal advancement
53460	4	Urethromeatoplasty, with partial excision of distal urethral segment (Richardson type procedure)

SUTURE

53502	4	Urethrorrhaphy, suture of urethral wound or injury, female
53510	4	Urethrorrhaphy, suture of urethral wound or injury; perineal
53515	4	Urethrorrhaphy, suture of urethral wound or injury; prostatomembranous
53520	4	Closure of urethrostomy or urethrocutaneous fistula, male (separate procedure)

MANIPULATION

• 53600	1	Dilation of urethral stricture by passage of sound or urethral dilator male; initial
• 53601	1	Dilation of urethral stricture by passage of sound or urethral dilator, male; subsequent
• 53605	1	Dilation of urethral stricture of vesical neck by passage of sound or urethral dilator, male, general or conduction (spinal) anesthesia
• 53620	1	Dilation of urethral stricture by passage of filiform and follower, male; initial
• 53621	1	Dilation of urethral stricture by passage of filiform and follower, male; subsequent
• 53660	1	Dilation of female urethra including suppository and/or instillation; initial
• 53661	1	Dilation of female urethra including suppository and/or instillation; subsequent
• 53665	1	Dilation of female urethra, general or conduction (spinal) anesthesia

MALE GENITAL SYSTEM

PENIS

INCISION

54001	1	Slitting of prepuce, dorsal or lateral, (separate procedure); except newborn

EXCISION

54105	1	Biopsy of penis; deep structures
54110	3	Excision of penile plaque (Peyronie disease)
54115	3	Removal foreign body from deep penile tissue (e.g., plastic implant)
54120	3	Amputation of penis; partial
54125	4	Amputation of penis; complete
54152	2	Circumcision, clamp procedure; except newborn
54161	2	Circumcision, surgical excision other than clamp or dorsal slit; except newborn

INTRODUCTION

	54205	1	Injection procedure for Peyronie disease; with surgical exposure of plaque
	54220	1	Irrigation of corpora cavernosa for priapism
	54230	1	Injection procedure for corpora cavernosography

REPAIR

	54440	4	Plastic operation of penis for injury

TESTIS

EXCISION

	54505	1	Biopsy of testis, incisional (separate procedure; unilateral
	54506	1	bilateral
	54510	1	Excision of local lesion of testis
*	54520	2	Orchiectomy, simple (including subcapsular), with or without testicular prosthesis, scrotal or inguinal approach; unilateral
*	54521	2	Orchiectomy, simple (including subcapsular), with or without testicular prosthesis, scrotal or inguinal approach; bilateral
	54530	3	Orchiectomy, radical, for tumor; inguinal approach

REPAIR

	54670	2	Suture or repair of testicular injury
	54680	4	Transplantation of testis(es) to thigh (because of scrotal destruction)

EPIDIDYMIS

EXCISION

	54700	2	Incision and drainage of epididymis, testis and/or scrotal space (e.g., abscess or hematoma)
	54820	1	Exploration of epididymis, with or without biopsy
	54830	2	Excision of local lesion of epididymis
*	54840	3	Excision of spermatocele, with or without epididymectomy
	54860	3	Epididymectomy; unilateral
	54861	3	Epididymectomy; bilateral

REPAIR

	54900	3	Epididymovasostomy, anastomosis of epididymis to vas deferens; unilateral
	54901	3	Epididymovasostomy, anastomosis of epididymis to vas deferens; bilateral

TUNICA VAGINALIS

EXCISION

*	55040	3	Excision of hydrocele; unilateral
*	55041	3	Excision of hydrocele; bilateral

REPAIR

	55060	3	Repair of hydrocele (Bottle type)

INCISION

55120	1	Removal of foreign body in scrotum

SCROTUM

EXCISION

55150	3	Resection of scrotum

REPAIR

55175	3	Scrotoplasty; simple
55180	3	Scrotoplasty; complicated

VAS DEFERENS

REPAIR

55400	3	Vasovasostomy, vasovasorrhaphy; unilateral
55401	3	Vasovasostomy, vasovasorrhaphy; bilateral

SPERMATIC CORD

EXCISION

55500	3	Excision of hydrocele of spermatic cord, unilateral (separate procedure)
55520	3	Excision of lesion of spermatic cord (separate procedure)
* 55530	4	Excision of varicocele or ligation of spermatic veins for varicocele; (separate procedure)
55535	4	Excision of varicocele or ligation of spermatic veins for varicocele; abdominal approach
55540	4	Excision of varicocele or ligation of spermatic veins for varicocele; with hernia repair

SEMINAL VESICLES

INCISION

55605	1	Vesiculotomy; complicated

EXCISION

55650	4	Vesiculectomy, any approach; unilateral
55651	4	Vesiculectomy, any approach; bilateral
55680	4	Excision of Mullerian duct cyst

PROSTATE

INCISION

* 55700	1	Biopsy, prostate; needle or punch, single or multiple, any approach
* 55705	1	Biopsy, prostate; incisional any approach
55720	1	Prostatotomy, external drainage of prostatic abscess, any approach; simple

FEMALE GENITAL SYSTEM

VAGINA

PERINEUM

56000	2	Incision and drainage of perineal abscess (nonobstetrical)

VULVA AND INTROITUS

INCISION

56440	3	Marsupialization of Bartholin's gland cyst

DESTRUCTION

56515	3	Destruction of lesion(s), vulva; extensive, any method

EXCISION

56740	3	Excision of Bartholin's gland or cyst

VAGINA

INCISION

57020	1	Colpocentesis (separate procedure)

EXCISION

57105	3	Biopsy of vaginal mucosa; extensive, requiring suture (including cysts)
57130	3	Excision of vaginal septum

REPAIR

57268	4	Repair of enterocele, vaginal approach (separate procedure)

MANIPULATION

* 57400	1	Dilation of vagina under anesthesia
* 57410	1	Pelvic examination under anesthesia

ENDOSCOPY

* 57450	1	Culdoscopy, diagnostic

CERVIX UTERI

EXCISION

57520	2	Biopsy of cervix, circumferential (cone), with or without dilation and curettage, with or without Sturmdorff type repair

REPAIR

57720	3	Trachelorrhaphy, plastic repair of uterine cervix, vaginal approach

MANIPULATION

57820	2	Dilation and curettage of cervical stump

CORPUS UTERI

EXCISION

*	58120	3	Dilation and curettage, diagnostic and/or therapeutic (nonobstetrical)

OVARY

EXCISION

	58900	4	Biopsy of ovary, unilateral or bilateral (separate procedure)

ENDOSCOPY-LAPAROSCOPY

*	58980	4	Laparoscopy for visualization of pelvic viscera
*	58984	4	Laparoscopy for visualization of pelvic viscera; with fulguration of ovarian or peritoneal lesions
*	58985	4	Laparoscopy for visualization of pelvic viscera; with lysis of adhesions
*	58986	4	Laparoscopy for visualization of pelvic viscera; with biopsy (single or multiple)
*	58987	4	Laparoscopy for visualization of pelvic viscera; with aspiration (single or multiple)

ENDOCRINE SYSTEM

THYROID GLAND

EXCISION

	60200	3	Excision of cyst or adenoma of thyroid, or transection of isthmus
	60220	4	Total thyroid lobectomy, unilateral
	60225	4	Total thyroid lobectomy, unilateral; with contralateral subtotal lobectomy, including isthmus
*	60280	3	Excision of thyroglossal duct cyst or sinus

NERVOUS SYSTEM

SKULL, MENINGES, AND BRAIN

PUNCTURE FOR INJECTION, DRAINAGE OR ASPIRATION

	61020	1	Ventricular puncture through previous burr hole, fontanelle, suture, or implanted ventricular catheter/reservoir; without injection
	61026	1	Ventricular puncture through previous burr hole, fontanelle, suture, or implanted ventricular chatheter/reservoir; with injection of drug or other substance for diagnosis or treatment
	61050	1	Cisternal or lateral cervical puncture; without injection (separate procedure)
	61070	1	Puncture of shunt tubing or reservoir for aspiration or injection procedure

SPINE AND SPINAL CORD

PUNCTURE FOR INJECTION, DRAINAGE, OR ASPIRATION

62270	1	Spinal puncture, lumbar, diagnostic
62273	1	Injection, lumbar epidural, of blood or clot patch
62274	1	Injection of anesthetic substance, diagnostic or therapeutic; subarachnoid or subdural, simple
62276	1	Injection of anesthetic substance, diagnostic or therapeutic; subarachnoid or subdural, differential
62277	1	Injection of anesthetic substance, diagnostic or therapeutic; subarachnoid or subdural, continuous
62278	1	Injection of anesthetic substance, diagnostic or therapeutic; epidural or caudal, single
62279	1	Injection of anesthetic substance, diagnostic or therapeutic; epidural or caudal, continuous
62288	1	Injection of substance other than anesthetic, contrast, or neurolytic solutions; subarachnoid (separate procedure)
62289	1	Injection of substance other than anesthetic, contrast, or neurolytic solutions; epidural or caudal

EXTRACRANIAL NERVES, PERIPHERAL NERVES, AND AUTONOMIC NERVOUS SYSTEM

INTRODUCTION/INJECTION OF ANESTHETIC AGENT (NERVE BLOCK), DIAGNOSTIC OR THERAPEUTIC

SOMATIC NERVES

64408	1	Injection, anesthetic agent; vagus nerve
64410	1	Injection, anesthetic agent; phrenic nerve
64415	1	Injection, anesthetic agent; brachial plexus
64417	1	Injection, anesthetic agent; axillary nerve
64420	1	Injection, anesthetic agent; intercostal nerve, single
64421	1	Injection, anesthetic agent; intercostal nerves, multiple, regional block
64430	1	Injection, anesthetic agent; pudendal nerve
64442	1	Injection, anesthetic agent; paravertebral facet joint nerve, lumbar, single level
64443	1	Injection, anesthetic agent; paravertebral facet joint nerve, lumbar, each additional level

SYMPATHETIC NERVES

64510	2	Injection, anesthetic agent; stellate ganglion (cervical sympathetic)
64520	2	Injection, anesthetic agent; lumbar or thoracic (paravertebral sympathetic)
64530	2	Injection, anesthetic agent; celiac plexus, with or without radiologic monitoring

DESTRUCTION BY NEUROLYTIC AGENT (E.G., CHEMICAL, THERMAL, ELECTRICAL, RADIOFREQUENCY)

SOMATIC NERVES

	64600	2	Destruction by neurolytic agent, trigeminal nerve; supraorbital, infraorbital, mental, or inferior alveolar branch
	64605	2	Destruction by neurolytic agent, trigeminal nerve; second and third division branches at foramen ovale
	64610	2	Destruction by neurolytic agent, trigeminal nerve; second and third division branches at foramen ovale under radiologic monitoring
	64622	2	Destruction by neurolytic agent; paravertebral facet joint nerve, lumbar, single level
	64630	2	Destruction by neurolytic agent; pudendal nerve

EXPLORATION, NEUROLYSIS OR NERVE DECOMPRESSION (NEUROPLASTY)

*	64702	3	Neurolysis; digital, one or both, same digit
*	64704	3	Neurolysis; nerve of hand or foot
*	64708	3	Neurolysis, major peripheral nerve, arm or leg; other than specified
	64712	3	Neurolysis, major peripheral nerve, arm or leg; sciatic nerve
	64713	3	Neurolysis, major peripheral nerve, arm or leg; brachial plexus
	64714	3	Neurolysis, major peripheral nerve, arm or leg; lumbar plexus
*	64716	4	Neurolysis and/or transposition; cranial nerve (specify)
*	64718	4	Neurolysis and/or transposition; ulnar nerve at elbow
*	64719	4	Neurolysis and/or transposition; ulnar nerve at wrist
*	64721	3	Neurolysis and/or transposition; median nerve at carpal tunnel
	64722	3	Decompression; unspecified nerve(s) (specify)
	64726	3	Decompression; plantar digital nerve
	64727	4	Internal neurolysis by dissection, with or without microdissection (list separately in addition to code for primary neuroplasty)

TRANSECTION OR AVULSION OF NERVE

	64732	3	Transection or avulsion of; supraorbital nerve
	64734	3	Transection or avulsion of; infraorbital nerve
	64736	3	Transection or avulsion of; mental nerve
	64738	3	Transection or avulsion of; inferior alveolar nerve by osteotomy
	64740	3	Transection or avulsion of; lingual nerve
	64742	3	Transection or avulsion of; facial nerve, differential or complete
	64744	3	Transection or avulsion of; greater occipital nerve
	64772	3	Transection or avulsion of other spinal nerve, extradural

EXCISION-SOMATIC NERVES

	64774	3	Excision of neuroma; cutaneous nerve, surgically identifiable
	64776	3	Excision of neuroma; digital nerve, one or both, same digit
	64778	3	Excision of neuroma; digital nerve, each additional digit (list separately by this number)

*	64782	3	Excision of neuroma; hand or foot, except digital nerve
	64784	3	Excision of neuroma; major peripheral nerve, except sciatic
	64786	3	Excision of neuroma; sciatic nerve
	64787	3	Insertion of plastic cap on nerve end
	64788	3	Excision of neurofibroma or neurolemmoma; cutaneous nerve
	64790	3	Excision of neurofibroma or neurolemmoma; major peripheral nerve
	64795	3	Biopsy of nerve

EXCISION-SYMPATHETIC NERVES

64802	4	Sympathectomy, cervical; unilateral
64803	4	Sympathectomy, cervical; bilateral

NERVE REPAIR BY SUTURE (NEURORRHAPHY)

64830	4	Microdissection and/or microrepair of nerve (list separately in addition to code for nerve repair)
64831	4	Suture of digital nerve, hand or foot; one nerve
64832	4	Suture of digital nerve, hand or foot; each additional digital nerve
64834	4	Suture of one nerve, hand or foot; common sensory nerve
64835	4	Suture of one nerve, hand or foot; median motor thenar
64836	4	Suture of one nerve, hand or foot; ulnar motor
64837	4	Suture of each additional nerve, hand or foot
64840	4	Suture of posterior tibial nerve
64856	4	Suture of major peripheral nerve, arm or leg, except sciatic; including transposition
64857	4	Suture of major peripheral nerve, arm or leg, except sciatic; without transposition
64872	4	Suture of nerve; requiring secondary or delayed suture (list separately in addition to code for primary neurorrhaphy)
64874	4	Suture of nerve; requiring extensive proximal mobilization, or transposition of nerve (list separately in addition to code for nerve suture)
64876	4	Suture of nerve; requiring shortening of bone of extremity (list separately in addition to code for nerve suture)

NEURORRHAPHY WITH NERVE GRAFT

64890	4	Nerve graft (includes obtaining graft), single strand, hand or foot; up to 4 cm length
64891	4	Nerve graft (includes obtaining graft), single strand, hand or foot; more than 4 cm length
64892	4	Nerve graft (includes obtaining graft), single strand, arm or leg; up to 4 cm length
64893	4	Nerve graft (includes obtaining graft), single strand, arm or leg; more than 4 cm length
64895	4	Nerve graft (includes obtaining graft), multiple strands (cable), hand or foot; up to 4 cm length

	64896	4	Nerve graft (includes obtaining graft), multiple strands (cable), hand or foot; more than 4 cm length
	64897	4	Nerve graft (includes obtaining graft), multiple strands (cable), arm or leg; up to 4 cm length
	64898	4	Nerve graft (includes obtaining graft), multiple strands (cable), arm or leg; more than 4 cm length
	64901	4	Nerve graft, each additional nerve; single strand
	64902	4	Nerve graft, each additional nerve; multiple strands (cable)
	64905	4	Nerve pedicle transfer; first stage
	64907	4	Nerve pedicle transfer; second stage

EYE/OCULAR ADNEXA

EYEBALL

REMOVAL OF EYE

*	65091	4	Evisceration of ocular contents; without implant
*	65093	4	Evisceration of ocular contents; with implant
*	65101	4	Enucleation of eye; without implant
*	65103	4	Enucleation of eye; with implant, muscles not attached to implant
*	65105	4	Enucleation of eye; with implant, muscles attached to implant
	65110	4	Exenteration of orbit (does not include skin graft), removal of orbital contents; only

SECONDARY IMPLANT PROCEDURES

	65130	3	Insertion of ocular implant secondary; after evisceration, in scleral shell
	65135	3	Insertion of ocular implant secondary; after enucleation, muscles not attached to implant
	65140	3	Insertion of ocular implant secondary; after enucleation, muscles attached to implant
	65150	3	Reinsertion of ocular implant; with or without conjunctival graft
	65155	3	Reinsertion of ocular impant; with use of foreign material for reinforcement and/or attachment of muscles to implant
	65175	3	Removal of ocular implant

REMOVAL OF OCULAR FOREIGN BODY

*	65230	1	Removal of foreign body, intraocular; from anterior chamber, magnetic extraction
*	65235	1	Removal of foreign body, intraocular; from anterior chamber, nonmagnetic extraction
	65245	4	Removal of foreign body, intraocular; from lens (without extraction lens), nonmagnetic extraction
	65260	4	Removal of foreign body, intraocular; from posterior segment, magnetic extraction, anterior or posterior route
	65265	4	Removal of foreign body, intraocular; from posterior segment, nonmagnetic extraction

REPAIR OF LACERATION OF EYEBALL

65272	2	Repair of laceration; conjunctiva, by mobilization and rearrangement, without hospitalization
65280	4	Repair of laceration; cornea and/or sclera, perforating, not involving uveal tissue
65285	4	Repair of laceration; cornea and/or sclera, perforating, with reposition or resection of uveal tissue
65290	3	Repair of wound, extraocular muscle, tendon and/or Tenon's capsule

ANTERIOR SEGMENT - CORNEA

EXCISION

65400	1	Excision of lesion, cornea (keratectomy, lamellar, partial), except pterygium
65410	1	Biopsy of cornea
* 65420	1	Excision or transposition of pterygium; without graft
65426	1	Excision or transposition of pterygium; with graft

KERATOPLASTY

65710	4	Keratoplasty (corneal transplant), lamellar; autograft
65720	4	Keratoplasty (corneal transplant), lamellar; homograft, fresh
65725	4	Keratoplasty (corneal transplant), lamellar; homograft, preserved
65730	4	Keratoplasty (corneal transplant), penetrating (except in aphakia); autograft
65740	4	Keratoplasty (corneal transplant), penetrating (except in aphakia); homograft, fresh
65745	4	Keratoplasty (corneal transplant), penetrating (except in aphakia); homograft, preserved
65750	4	Keratoplasty (corneal transplant), penetrating, in aphakia

ANTERIOR SEGMENT-ANTERIOR CHAMBER

INCISION

65800	1	Paracentesis of anterior chamber of eye (separate procedure); with diagnostic aspiration of aqueous
65805	1	Paracentesis of anterior chamber of eye (separate procedure); with therapeutic release of aqueous
65810	4	Paracentesis of anterior chamber of eye (separate procedure); with removal of vitreous and/or discission of anterior hyaloid membrane, with or without air injection
65815	1	Paracentesis of anterior chamber of eye (separate procedure); with removal of blood, with or without irrigation and/or air injection

OTHER PROCEDURES

65865	1	Severing adhesions of anterior segment of eye, incisional technique (with or without injection of air or liquid) (separate procedure; goniosynechiae
65870	1	Severing adhesions of anterior segment of eye, incisional technique (with or without injection of air or liquid) (separate procedure); anterior synechiae, except goniosynechiae

65875	1	Severing adhesions of anterior segment of eye, incisional technique (with or without injection of air or liquid) (separate procedure); posterior synechiae
65880	1	Severing adhesions of anterior segment of eye, incisional technique (with or without injection of air or liquid) (separate procedure); corneovitreal adhesions
65900	4	Removal of epithelial downgrowth, anterior chamber eye
65920	4	Removal of implanted material, anterior segment eye
65930	4	Removal of blood clot, anterior segment eye
66020	1	Injection, anterior chamber (separate procedure); air or liquid
66030	1	Injection, anterior chamber (separate procedure); medication

ANTERIOR SEGMENT-ANTERIOR SCLERA

EXCISION

66130	4	Excision of lesion, sclera
66150	4	Fistulization of sclera for glaucoma; trephination with iridectomy
66155	4	Fistulization of sclera for glaucoma; thermocauterization with iridectomy
66160	4	Fistulization of sclera for glaucoma; sclerectomy with punch or scissors, with iridectomy
66165	4	Fistulization of sclera for glaucoma; iridencleisis or iridotasis
66170	4	Fistulization of sclera for glaucoma; trabeculectomy ab externo

REPAIR

66220	4	Repair of scleral staphyloma; without graft
66225	4	Repair of scleral staphyloma; with graft

REVISION OPERATION WOUND

66250	4	Revision or repair of operative wound of anterior segment, any type, early or late, major or minor procedure

ANTERIOR SEGMENT-IRIS, CILIARY BODY

IRIDOTOMY, IRIDECTOMY

	66500	1	Iridotomy by stab incision (separate procedure); except transfixion
	66505	1	Iridotomy by stab incision (separate procedure); with transfixion as for iris bombe
*	66600	4	Iridectomy, with corneoscleral or corneal section; for removal of lesion
	66605	3	Iridectomy with corneoscleral or corneal section; with cyclectomy
*	66625	4	Iridectomy, with corneoscleral or corneal section; peripheral for glaucoma (separate procedure)
*	66630	4	Iridectomy, with corneoscleral or corneal section; sector for glaucoma (separate procedure)
*	66635	4	Iridectomy, with corneoscleral or corneal section; "optical" (separate procedure)

REPAIR

	66680	4	Repair of iris, ciliary body (as for iridodialysis)
	66682	4	Suture of iris, ciliary body (separate procedure) with retrieval of suture through small incision (e.g., McCannel suture)

DESTRUCTION

	66700	1	Cyclodiathermy; initial
	66701	1	Cyclodiathermy; subsequent
	66720	1	Cyclocryotherapy; initial
	66721	3	Cyclocryotherapy; subsequent
	66741	3	Cyclodialysis; subsequent
	66762	3	Coreoplasty by photocoagulation (one or more sessions) (e.g., for improvement of vision)

ANTERIOR SEGMENT-LENS

INCISION

*	66800	1	Discission of lens capsule; incisional technique (needling of lens); initial
*	66801	1	Discission of lens capsule; incisional technique (needling of lens); subsequent
	66821	1	Discission of secondary membraneous cataract ("after cataract") and/or anterior hyaloid; laser surgery (one or more stages)

REMOVAL CATARACT

*	66830	4	Removal of secondary membranous cataract ("after cataract"), with corneoscleral section, with or without iridectomy (iridocapsulotomy, iridocapsulectomy)
*	66840	4	Removal of lens material; aspiration technique, one or more stages
*	66850	4	Removal of lens material; phacofragmentation technique (mechanical or ultrasonic, e.g., phacoemulsification), with aspiration
	66915	4	Expression of lens, linear, one or more stages
*	66920	4	Extraction of lens with or without iridectomy; intracapsular, with or without enzymes
*	66930	4	Extraction of lens with or without iridectomy; intracapsular, for dislocated lens
*	66940	4	Extraction of lens with or without iridectomy; extracapsular (other than 66840, 66850, 66915)
	66945	4	Extraction of lens with or without iridectomy; in presence of fistulization bleb and/or by temporal, inferior or inferotemporal route, intracapsular or extracapsular
*	66983	4	Intracapsular cataract extraction with insertion of intraocular lens prosthesis (one stage procedure)
	66984	4	Extracapsular cataract removal with insertion of intraocular lens prosthesis (one stage procedure), manual or phacoemulsification technique
*	66985	4	Insertion of intraocular lens subsequent to cataract removal (separate procedure)

POSTERIOR SEGMENT-VITREOUS

67005	4	Removal of vitreous, anterior approach (open sky technique or limbal incision); partial removal
67010	4	Removal of vitreous, anterior approach (open sky technique or limbal incision); subtotal removal with mechanical vitrectomy (such as VISC or Rotoextractor)
67015	2	Aspiration or release of vitreous, subretinal or choroidal fluid, pars plana approach (posterior sclerotomy)
67025	2	Injection of vitreous substitute, pars plana approach (separate procedure) excludes air or balanced salt solutions
67030	2	Discission of vitreous strands (without removal), pars plana approach
67036	4	Virectomy, mechanical, pars plana approach

POSTERIOR SEGMENT-RETINAL DETACHMENT

REPAIR

67101	4	Repair of retinal detachment, one or more sessions, same hospitalization, cryotherapy or diathermy, with or without drainage or subretinal fluid
67107	4	Repair of retinal detachment (one or more stages, same hospitalization); scleral buckling (such as lamella excision, imbrication or encircling procedure), with or without implant, may include procedures 67101-67105
67108	4	Repair of retinal detachment (one or more stages, same hospitalization); with vitrectomy, any method, with or without air tamponade, may include procedures 67101-67107 and/or removal of lens by same technique
67109	4	Repair of retinal detachment (one or more stages, same hospitalization); by technique other than 67101-67108
67120	4	Removal of implanted material, posterior segment, extraocular

POSTERIOR SEGMENT-OTHER PROCEDURES

DESTRUCTION-RETINA, CHOROID

67208	1	Destruction of localized lesion of retina (e.g., maculopathy, choroidopathy, small tumors), one or more sessions; cryotherapy, diathermy
67218	4	Destruction of localized lesion, retina or choroid (e.g., choroidopathy), one or more stages; radiation by implantation of source (includes removal of source)
67227	1	Destruction of extensive or progressive retinopathy (eg, diabetic retinopathy), one or more sessions; cryotherapy, diathermy

SCLERAL REPAIR

	67250	4	Scleral reinforcement (separate procedure); without graft
	67255	4	Scleral reinforcement (separate procedure); with graft
•	67311	4	Strabismus surgery on patient not previously operated on, any procedure, any muscle (may include minor displacement, e.g., for A or V pattern); one muscle
•	67312	4	Strabismus surgery on patient not previously operated on, any procedure, any muscle (may include minor displacement, e.g., for A or V pattern); two muscles, one or both eyes
•	67313	4	Strabismus surgery on patient not previously operated on, any procedure, any muscle (may include minor displacement, e.g., for A or V pattern); three or more muscles, and/or adjustable suture, one or both eyes

OCULAR ADNEXA-EXTRAOCULAR MUSCLES

67320	3	Transposition of extraocular muscle (e.g., for paretic muscle), one or more stages, one or more muscles, with displacement of plane of action more than 5mm
67331	3	Strabismus surgery on patient previously operated on; not involving reoperation of muscles
67332	3	Strabismus surgery on patient previously operated on; involving reoperation of muscles

OTHER PROCEDURES

67350	3	Biopsy of extraocular muscle

OCULAR ADNEXA-ORBIT

EXPLORATION, EXCISION

67400	4	Orbitotomy without bone flap (frontal approach); for exploration, with or without biopsy
67405	4	Orbitotomy without bone flap (frontal approach); with drainage only
67412	4	Orbitotomy without bone flap (frontal approach); with removal of lesion
		674134Orbitotomy without bone flap (frontal approach); with removal of foreign body
67415	1	Transconjunctival or aspirational biopsy

OTHER PROCEDURES

67550	4	Orbital implant (implant outside muscle cone); insertion
67560	4	Orbital implant (implant outside muscle cone); removal or revision

OCULAR ADNEXA-EYELIDS

INCISION

67715	1	Canthotomy (separate procedure)

EXCISION OR REMOVAL OF LESION INVOLVING MORE THAN SKIN (I.E., INVOLVING LID MARGIN, TARSUS, AND/OR PALPEBRAL CONJUNCTIVA)

*	67801	1	Excision of chalazion; multiple, same lid
*	67808	1	Excision of chalazion; under general anesthesia and/or requiring hospitalization, single or multiple
	67830	3	Correction of trichiasis; incision of lid margin
	67835	2	Correction of trichiasis; incision of lid margin, with free mucous membrane graft

TARSORRHAPHY

	67880	1	Construction of intermarginal adhesions, median tarsorrhaphy, or canthorrhaphy;
	67882	3	Construction of intermarginal adhesions, median tarsorrhaphy, or canthorrhaphy; with transposition of tarsal plate

REPAIR BLEPHAROPTOSIS, LID RETRACTION

	67901	1	Repair of blepharoptosis; frontalis muscle technique with suture
	67902	3	Repair of blepharoptosis; frontalis muscle technique with fascial sling (includes obtaining fascia)
	67903	3	Repair of blepharoptosis; (tarso)levator resection, internal approach
	67904	3	Repair of blepharoptosis; (tarso)levator resection, external approach
	67906	3	Repair of blepharoptosis; superior rectus technique with fascial sling (includes obtaining fascia)
	67907	3	Repair of blepharoptosis; superior rectus tendon transplant
	67908	1	Repair of blepharoptosis; conjunctivo-tarso-levator resection (Fasanella-Servat type)
	67909	1	Reduction of overcorrection of ptosis

REPAIR ECTROPION, ENTROPION

*	67914	3	Repair of ectropion; suture
*	67916	3	Repair of ectropion; blepharoplasty, excision tarsal wedge
*	67917	3	Repair of ectropion; blepharoplasty, extensive (e.g., Kuhnt-Szymanowski operation)
*	67921	3	Repair of entropion; suture
*	67923	3	Repair of entropion; blepharoplasty, excision tarsal wedge
*	67924	3	Repair of entropion; blepharoplasty, extensive (e.g., Wheeler operation)

RECONSTRUCTIVE SURGERY, BLEPHAROPLASTY INVOLVING MORE THAN SKIN (I.E., INVOLVING LID MARGIN, TARSUS, AND/OR PALPEBRAL CONJUNCTIVA)

	67935	2	Suture of recent wound, eyelid, involving lid margin, tarsus, and/or palpebral conjunctiva) direct closure; full thickness
*	67950	2	Canthoplasty (reconstruction of canthus)
	67961	3	Excision and repair of eyelid, involving lid margin, tarsus, conjunctiva, canthus, or full thickness, may include preparation for skin graft or pedicle flap with adjacent tissue transfer or rearrangement; up to one-fourth of lid margin

67966	3	Excision and repair of eyelid, involving lid margin, tarsus, conjunctiva, or full thickness, may include preparation for skin graft or pedicle flap with adjacent tissue transfer or rearrangement; over one-fourth of lid margin
67971	3	Reconstruction of eyelid, full thickness by transfer of tarsoconjunctival flap from opposing eyelid; up to two-thirds of eyelid, one stage or first stage
67973	3	Reconstruction of eyelid, full thickness by transfer of tarsoconjunctival flap from opposing eyelid; total eyelid, lower, one stage or first stage
67974	3	Reconstruction of eyelid, full thickness by transfer of tarsoconjunctival flap from opposing eyelid; total eyelid, upper, one stage or first stage
67975	3	Reconstruction of eyelid, full thickness by transfer of tarsoconjunctival flap from opposing eyelid; second stage

OCULAR ADNEXA-CONJUNCTIVA

EXCISION, DESTRUCTION

68130	1	Excision of lesion, conjunctiva; with adjacent sclera

CONJUNCTIVOPLASTY

68320	2	Conjunctivoplasty; with conjunctival graft or extensive rearrangement
68325	2	Conjunctivoplasty; with buccal mucous membrane graft (includes obtaining graft)
68326	2	Conjunctivoplasty, reconstruction cul-de-sac; with conjunctival graft or extensive rearrangement
68328	3	Conjunctivoplasty, reconstruction cul-de-sac; with buccal mucous membrane graft (includes obtaining graft)

OTHER PROCEDURES

68360	2	Conjunctival flap; bridge or partial (separate procedure)
68362	2	Conjunctival flap; total (such as Gunderson thin flap or purse string flap)

OCULAR ADNEXA-LACRIMAL SYSTEM

EXCISION

68500	3	Excision of lacrimal gland (dacryoadenectomy), except for tumor; total
68505	3	Excision of lacrimal gland (dacryoadenectomy), except for tumor; partial
68510	3	Biopsy of lacrimal gland
68520	3	Excision of lacrimal sac (dacryocystectomy)

EXCISION

68540	4	Excision of lacrimal gland tumor; frontal approach involving osteotomy.
68550	4	Excision of lacrimal gland tumor; frontal approach

REPAIR

*	68700	1	Plastic repair of canaliculi
	68720	3	Dacryocystorhinostomy (fistulization of lacrimal sac to nasal cavity)
	68745	3	Conjunctivorhinostomy (fistulization of conjunctiva to nasal cavity); without tube
	68750	3	Conjunctivorhinostomy (fistulization of conjunctiva to nasal cavity); with insertion of tube or stent

PROBING AND RELATED PROCEDURES

*	68830	1	Probing of nasolacrimal duct, with or without irrigation, unilateral or bilateral; with insertion of tube or stent (without general anesthesia)

AUDITORY SYSTEM

EXTERNAL EAR

EXCISION

69105	1	Biopsy external auditory canal
69110	2	Excision external ear; partial, simple repair
69120	3	Excision external ear; complete amputation
69140	2	Excision exostosis(es), external auditory canal
69145	2	Excision soft tissue lesion, external auditory canal
69150	4	Radical excision external auditory canal lesion; without neck dissection

MIDDLE EAR

INCISION

*	69420	1	Myringotomy including aspiration and/or eustachian tube inflation
	69440	3	Middle ear exploration through postauricular or ear canal incision
	69450	3	Tympanolysis, transcanal

EXCISION

*	69501	4	Transmastoid antrotomy ("simple" mastoidectomy)

REPAIR

*	69620	4	Myringoplasty (surgery confined to drumhead and donor area)
*	69631	4	Tympanoplasty without mastoidectomy (including canalplasty, atticotomy and/or middle ear surgery), initial or revision; without ossicular chain reconstruction
	69632	4	Tympanoplasty without mastoidectomy (including canalplasty, atticotomy and/or middle ear surgery), initial or revision; with ossicular chain reconstruction, e.g., postfenestration
	69633	4	Tympanoplasty without mastoidectomy (including canalplasty, atticotomy and/or middle ear surgery), initial or revision; with ossicular chain reconstruction and synthetic prosthesis (e.g., total ossicular replacement prosthesis, TORP)

	69635	4	Tympanoplasty with antrotomy or mastoidotomy (including canalplasty, atticotomy, middle ear surgery, and/or tympanic membrane repair); without ossicular chain reconstruction
	69636	4	Tympanoplasty with antrotomy or mastoidotomy (including canalplasty, atticotomy, middle ear surgery, and/or tympanic membrane repair); with ossicular chain reconstruction
	69637	4	Tympanoplasty with antrotomy or mastoidotomy (including canalplasty, atticotomy, middle ear surgery, and/or tympanic membrane repair); with ossicular chain reconstruction and synthetic prosthesis (e.g., total ossicular replacement prosthesis, TORP)
	69641	4	Tympanoplasty with mastoidectomy (including canalplasty, middle ear surgery, tympanic membrane repair); without ossicular chain reconstruction
	69642	4	Tympanoplasty with mastoidectomy (including canalplasty, middle ear surgery, tympanic membrane repair); with ossicular chain reconstruction
	69643	4	Tympanoplasty with mastoidectomy (including canalplasty, middle ear surgery, tympanic membrane repair); with intact or reconstructed wall, without ossicular chain reconstruction
	69644	4	Tympanoplasty with mastoidectomy (including canalplasty, middle ear surgery, tympanic membrane repair); with intact or reconstructed canal wall, with ossicular chain reconstruction
	69645	4	Tympanoplasty with mastoidectomy (including canalplasty, middle ear surgery, tympanic membrane repair); radical or complete, without ossicular chain reconstruction
	69646	4	Tympanoplasty with mastoidectomy (including canalplasty, middle ear surgery, tympanic membrane repair); radical or complete, with ossicular chain reconstruction
*	69650	4	Stapes mobilization
*	69660	4	Stapedectomy with reestablishment of ossicular continuity, with or without use of foreign material;
	69661	4	Stapedectomy with reestablishment of ossicular continuity, with or without use of foreign material; with footplate drill out
	69666	4	Repair oval window fistula
	69667	4	Repair round window fistula
	69670	4	Mastoid obliteration (separate procedure)
	69676	4	Tympanic neurectomy; unilateral
	69677	4	Tympanic neurectomy; bilateral

EXTERNAL EAR

OTHER PROCEDURES

69700	2	Closure postauricular fistula, mastoid (separate procedure)

MIDDLE EAR

OTHER PROCEDURES

69720	4	Decompression facial nerve, intratemporal; lateral to geniculate ganglion
69725	4	Decompression facial nerve, intratemporal; including medial to geniculate ganglion
69740	4	Suture facial nerve, intratemporal, with or without graft or decompression; lateral to geniculate ganglion
69745	4	Suture facial nerve, intratemporal, with or without graft or decompression; inlcuding medial to geniculate ganglion

PROCEDURES ALLOWED FOR FEMALES ONLY

00842	ANESTH, AMINOCENTESIS
00846	ANESTH, HYSTERECTOMY
00850	ANESTH, CESAREAN SECTION
00855	ANESTH, HYSTERECTOMY
00906	ANESTH, REMOVAL OF VULVA
00940	ANESTH, VAGINAL PROCEDURES
00942	ANESTH, SURGERY ON VAGINA
00944	ANESTH, VAGINAL HYSTERECTOMY
00946	ANESTH, VAGINAL DELIVERY
00948	ANESTH, REPAIR OF CERVIX
00950	ANESTH, VAGINAL ENDOSCOPY
00952	ANESTH, UTERINE ENDOSCOPY
46715	REPAIR OF ANOVAGINAL FISTULA
46716	REPAIR ON ANOVAGINAL FISTULA
50722	RELEASE OF URETER
51840	ATTACH BLADDER/URETHRA
51841	ATTACH BLADDER/URETHRA
51845	REPAIR BLADDER NECK
51900	REPAIR BLADDER/VAGINA LESION
51920	CLOSE BLADDER-UTERUS FISTULA
51925	HYSTERECTOMY/BLADDER REPAIR
52270	CYSTOSCOPY & REVISE URETHRA
53210	REMOVAL OF URETHRA
53230	REMOVAL OF URETHRA LESION
53430	RECONSTRUCTION OF URETHRA
53502	REPAIR OF URETHRA INJURY
53660	DILATION OF URETHRA
53661	DILATION OF URETHRA
53665	DILATION OF URETHRA
56000	DRAINAGE OF PERINEAL ABSCESS
56100	BIOPSY OF PERINEUM
56200	REPAIR OF PERINEUM
56400	DRAINAGE OF VULVA ABSCESS
56420	DRAINAGE OF VULVA ABSCESS
56440	SURGERY FOR VULVA LESION
56501	DESTRUCTION, VULVA LESION(S)
56515	DESTRUCTION, VULVA LESION(S)
56600	BIOPSY OF VULVA
56620	PARTIAL REMOVAL OF VULVA
56625	REMOVAL OF VULVA
56630	EXTENSIVE VULVA SURGERY
56635	EXTENSIVE VULVA SURGERY
56636	EXTENSIVE VULVA SURGERY
56640	EXTENSIVE VULVA SURGERY
56641	EXTENSIVE VULVA SURGERY
56680	REMOVAL OF CLITORIS
56685	EXTENSIVE CLITORIS SURGERY
56700	PARTIAL REMOVAL OF HYMEN
56710	REVISION OF HYMEN

	PAGE
Inexpensive or Routinely Purchased	H - 2
Items Requiring Frequent Maintenance	H - 8
Prosthetics and Orthotics	H - 9
Capped Rental	H - 48
Oxygen	H - 54
Need Prescription Before Delivery	H - 57

INEXPENSIVE OR ROUTINELY PURCHASED

E0100 (b)	CANE, INCLUDES CANES OF ALL MATERIALS, ADJUSTABLE OR FIXED, WITH TIP
E0105 (b)	CANE, QUAD OR THREE PRONG, INCLUDES CANES OF ALL MATERIALS, ADJUSTABLE OR FIXED, WITH TIPS
E0110 (b)	CRUTCHES, FOREARM, INCLUDES CRUTCHES OF VARIOUS MATERIALS, ADJUSTABLE OR FIXED, PAIR, COMPLETE WITH TIPS AND HANDGRIPS
E0111 (b)	CRUTCH FOREARM, INCLUDES CRUTCHES OF VARIOUS MATERIALS,
E0112 (i)	CRUTCHES UNDERARM, WOOD, ADJUSTABLE OR FIXED, PAIR, WITH PADS, TIPS AND HANDGRIPS
E0113 (i)	CRUTCH UNDERARM, WOOD, ADJUSTABLE OR FIXED, EACH, WITH PAD, TIP AND HANDGRIP
E0114 (i)	CRUTCHES UNDERARM, ALUMINUM, ADJUSTABLE OR FIXED, PAIR, WITH PADS, TIPS AND HANDGRIPS
E0116 (i)	CRUTCH UNDERARM, ALUMINUM, ADJUSTABLE OR FIXED, EACH, WITH PAD, TIP AND HANDGRIP
E0130 (i)	WALKER, RIGID (PICKUP), ADJUSTABLE OR FIXED HEIGHT
E0135 (i)	WALKER, FOLDING (PICKUP), ADJUSTABLE OR FIXED HEIGHT
E0141 (i)	WALKER WHEELED, WITHOUT SEAT
E0142 (i)	RIGID WALKER, WHEELED, WITH SEAT
E0143 (i)	FOLDING WALKER, WHEELED, WITHOUT SEAT
E0147 (r)	HEAVY DUTY, MULTIPLE BREAKING SYSTEM, VARIABLE WHEEL RESISTANCE WALKER
E0150 (b)	UNDERARM PAD, CRUTCH, REPLACEMENT, EACH
E0151 (b)	HANDGRIP, CANE, CRUTCH, OR WALKER REPLACEMENT, EACH
E0152 (b)	TIP, CANE OR CRUTCH WALKER REPLACEMENT, EACH
E0153 (i)	PLATFORM ATTACHMENT, FOREARM CRUTCH, EACH
E0154 (i)	PLATFORM ATTACHMENT, WALKER, EACH

INEXPENSIVE OR ROUTINELY PURCHASED

E0155 (b)	WHEEL ATTACHMENT, RIGID PICK-UP WALKER ATTACHMENTS
E0156 (b)	SEAT ATTACHMENT, WALKER
E0157 (i)	CRUTCH ATTACHMENT, WALKER, EACH
E0158 (b)	LEG EXTENSIONS FOR A WALKER
E0160 (i)	SITZ TYPE BATH, PORTABLE, FITS OVER COMMODE SEAT
E0161 (b)	SITZ TYPE BATH, PORTABLE, FITS OVER COMMODE SEAT, WITH FAUCET ATTACHMENTS
E0163 (i)	COMMODE CHAIR, STATIONARY, WITH FIXED ARMS
E0164 (i)	COMMODE CHAIR, MOBILE, WITH FIXED ARMS
E0167 (b)	PAIL OR PAN FOR USE WITH COMMODE CHAIR
E0184 (r)	FLOTATION MATTRESS, DRY
E0185 (i)	DECUBITUS CARE PAD, FLOTATION OR GEL PAD WITH FOAM LEVELING PAD (MATTRESS SIZE)
E0188 (b)	SYNTHETIC SHEEPSKIN PAD
E0189 (b)	LAMBSWOOL SHEEPSKIN PAD, ANY SIZE
E0195 (b)	REPLACEMENT PAID FOR USE WITH MEDICALLY NECESSARY ALTERNATING PRESSURE PAD OWNED BY THE PATIENT
E0200 (i)	HEAT LAMP, WITHOUT STAND (TABLE MODEL), INCLUDES BULB, OR INFRARED ELEMENT
E0205 (b)	HEAT LAMP, WITH STAND, INCLUDES BULB, OR INFRARED ELEMENT
E0210 (b)	ELECTRIC HEAT PAD, STANDARD
E0215 (b)	ELECTRIC HEAT PAD, MOIST
E0237 (r)	WATER CIRCULATING HEAT PAD WITH PUMP
E0238 (b)	NONELECTRIC HEAT PAD, MOIST
E0239 (b)	HYDROCOLLATOR UNIT, PORTABLE

INEXPENSIVE OR ROUTINELY PURCHASED

E0271 (r)	MATTRESS, INNERSPRING
E0275 (b)	BED PAN, STANDRAD, METAL, OR PLASTIC
E0276 (b)	BED PAN, FRACTURE, METAL OR PLASTIC
E0310 (I)	BED SIDE RAILS, FULL LENGTH
E0325 (b)	URINAL, MALE, ANY MATERIAL
E0326 (b)	URINAL, FEMALE, ANY MATERIAL
E0330 (b)	URINAL, MALE, DAY/NIGHT
E0560 (b)	HUMIDIFIER, DURABLE FOR SUPPLEMENTAL HUMIDIFICATION DURING IPPB TREATMENT OR OXYGEN DELIVERY, E.G., CASCADE JR.
E0605 (b)	VAPORIZER, ROOM TYPE
E0607 (r)	HOME BLOOD GLUCOSE MONITOR
E0609 (r)	BLOOD GLUCOSE MONITOR WITH SPECIAL FEATURES (EG., VOICE SYNTHESIZERS AUTOMATIC TIMERS, ECT.)
E0610 (i)	PACEMAKER MONITOR, SELF-CONTAINED, (CHECKS BATTERY DEPLETION, INCLUDED AUDIBLE AND VISIBLE CHECK SYSTEMS)
E0615 (i)	PACEMAKER MONITOR, SELF-CONTAINED, (CHECKS BATTERY DEPLETION, AND OTHER PACEMAKER COMPONENTS, INCLUDES DIGITAL/VISIBLE CHECK SYSTEMS)
E0620 (r)	SEAT LIFT CHAIR, MOTORIZED TO ASSIST PATIENT IN STANDING AND SITTING
E0621 (b)	SLING OR SEAT, PATIENT LIFT, CANVAS OR NYLON
E0650 (r)	PNEUMATIC COMPRESSOR, NONSEGMENTAL HOME MODEL, (LYMPHEDEMA PUMP)
E0651 (r)	PNEUMATIC COMPRESSOR, SEGMENTAL HOME MODEL, (LYMPHEDEMA PUMP) WITHOUT CALIBRATED GRADIENT PRESSURE
E0655 (i)	PNEUMATIC APPLIANCE FOR USE WITH PNEUMATIC COMPRESSOR, HALF ARM
E0660 (i)	PNEUMATIC APPLIANCE FOR USE WITH PNEUMATIC COMPRESSOR, FULL LEG

INEXPENSIVE OR ROUTINELY PURCHASED

E0665 (i)	PNEUMATIC APPLIANCE FOR USE WITH PNEUMATIC COMPRESSOR, FULL ARM
E0666 (r)	PNEUMATIC APPLIANCE FOR USE WITH PNEUMATIC COMPRESSOR, HALF LEG
E0667 (r)	PNEUMATIC APPLIANCE FOR USE WITH SEGMENTAL PNEUMATIC COMPRESSOR, LEG
E0690 (r)	ULTRAVIOLET CABINET, APPROPRIATE FOR HOME USE
E0747 (r)	OSTEOGENESIS STIMULATOR (NON-INVASIVE)
E0776 (I)	IV POLE
E0782 (b)	INFUSION PUMP, IMPLANTABLE
E0840 (i)	TRACTION FRAME, ATTACHED TO HEADBOARD, SIMPLE CERVICAL TRACTION
E0850 (i)	TRACTION STAND, FREE STANDING, SIMPLE CERVICAL TRACTION
E0860 (b)	TRACTION EQUIPMENT, OVERDOOR, CERVICAL
E0870 (i)	TRACTION FRAME, ATTACHED TO FOOTBOARD, SIMPLE EXTREMITY TRACTION, (E.G., BUCK'S)
E0880 (i)	TRACTION STAND, FREE STANDING, (E.G., BUCK'S'
E0890 (i)	TRACTION FRAME, ATTACHED TO FOOTBOARD, SIMPLE PELVIC TRACTION
E0900 (i)	TRACTION STAND, FREE STANDING, SIMPLE PELVIC TRACTION (E.G., BUCK'S)
E0942 (b)	CERVICAL HEAD HARNESS/HALTER
E0944 (b)	PELVIC BELT/HARNESS/BOOT
E0945 (b)	EXTREMITY BELT/HARNESS
E0947 (b)	FRACTURE FRAME, ATTACHMENTS FOR COMPLEX PELVIC TRACTION
E0948 (b)	FRACTURE FRAME, ATTACHMENTS FOR COMPLEX CERVICAL TRACTION

INEXPENSIVE OR ROUTINELY PURCHASED

E0953 (b)	PNEUMATIC TIRE, EACH
E0954 (b)	SEMI-PNEUMATIC CASTER, EACH
E0959 (i)	AMPUTEE ADAPTER (DEVICE USED TO COMPENSATE FOR TRANSFER OF WEIGHT DUE TO LOST LIMBS TO MAINTAIN PROPER BALANCE)
E0961 (b)	BRAKE EXTENSION, FOR WHEELCHAIR
E0962 (b)	1" CUSHION, FOR WHEELCHAIR
E0963 (b)	2" CUSHION, FOR WHEELCHAIR
E0964 (b)	3" CUSHION, FOR WHEELCHAIR
E0965 (b)	4" CUSHION, FOR WHEELCHAIR
E0966 (b)	HOOK ON HEAD REST EXTENSION
E0967 (b)	WHEELCHAIR HAND RIMS WITH 8 VERTICAL RUBBER TIPPED PROJECTIONS, PAIR
E0969 (i)	NARROWING DEVICE, WHEELCHAIR
E0970 (b)	NO. 2 FOOTPLATES, EXCEPT FOR ELEVATING LEG REST
E0971 (b)	ANTI-TIPPING DEVICE WHEELCHAIRS
E0972 (b)	TRANSFER BOARD, WHEELCHAIR
E0973 (b)	ADJUSTABLE HEIGHT DETACHABLE ARMS, DESK OR FULL LENGTH, WHEELCHAIR
E0975 (b)	REINFORCED SEAT UPHOLSTERY, WHEELCHAIR
E0976 (b)	REINFORCED BACK UPHOLSTERY, WHEELCHAIR
E0990 (b)	ELEVATING LEG REST, EACH
E0991 (b)	UPHOLSTERY SEAT
E0992 (b)	SOLID SEAT INSERT
E0993 (b)	BACK UPHOLSTERY
E0994 (b)	ARM REST, EACH

INEXPENSIVE OR ROUTINELY PURCHASED

E0995 (b)	CALF REST, EACH
E0996 (b)	TIRE, SOLID, EACH
E0997 (b)	CASTER WITH A FORK
E0998 (b)	CASTER WITHOUT FORK
E0999 (b)	PNEUMATIC TIRE WITH WHEEL
E1000 (b)	TIRE, PNEUMATIC CASTER
E1001 (b)	WHEEL, SINGLE
E1005 (b)	REPLACEMENT, BATTERIES FOR MEDICALLY NECESSARY ELECTRIC WHEELCHAIR OWNED BY THE PATIENT
E1065 (r)	POWER ATTACHMENT (TO CONVERT ANY WHEELCHAIR TO MOTORIZED WHEELCHAIR, E.G., SOLO)
E1066 (r)	BATTERY CHARGER
E1069 (b)	DEEP CYCLE BATTERY
E1226 (r)	FULL RECLINING BACK FOR CUSTOMIZED WHEELCHAIR
E1227 (r)	SPECIAL HEIGHT ARMS FOR WHEELCHAIR
E1230 (r)	POWER OPERATED VEHICLE (3WHEEL NONHIGHWAY) INDICATE BRAND NAME AND MODEL NUMBER
E1296 (r)	SPECIAL WHEELCHAIR SEAT HEIGHT FROM FLOOR
E1297 (r)	SPECIAL WHEELCHAIR SEAT DEPTH, BY UPHOLSTERY
E1298 (r)	SPECIAL WHEELCHAIR SEAT DEPTH AND/OR WIDTH, BY CONSTRUCTION
E1356 (b)	BREATHING CIRCUITS
E1372 (i)	IMMERSION EXTERNAL HEATER FOR NEBULIZER

i = INEXPENSIVE

r = ROUTINE

b = BOTH

ITEMS REQUIRING FREQUENT MAINTENANCE

E0450	VOLUME VENTILATOR
E0451	VOLUME VENTILATOR, PORTABLE
E0500	IPPB MACHINES WITH MANUAL VALVES EXTERNAL POWER SOURCE, INCLUDES CYCLINDER REGULATOR, BUILT-IN NEBULIZATION
E0505	IPPB MACHINES WITH MANUAL VALUES ELECTRICALLY DRIVEN WITH INTERNAL POWER SOURCE, BUILT-IN NEBULIZATION
E0510	IPPB MACHINES WITH AUTOMATIC VALVES, EXTERNAL POWER SOURCE INCLUDES CYLINDER REGULATOR, BUILT-IN NEBULIZATION
E0515	IPPB MACHINES WITH AUTOMATIC VALVES, ELECTRICALLY DRIVEN WITH INTERNAL COMPRESSOR, BUILT-IN NEBULIZATION
E0570	NEBULIZER, WITH COMPRESSOR E.G., DEVILBISS PULMO-AID
E0575	NEBULIZER, SELF-CONTAINED, ULTRASONIC
E0585	NEBULIZER, WITH COMPRESSOR AND HEATER
E0600	SUCTION PUMP, HOME MODEL, PORTABLE
E0601	NASAL CONTINUOUS AIRWAY PRESSURE (CPAP) DEVICE
E0674	IRON LUNG
E0935	PASSIVE MOTION EXERCISE DEVICE
E1375	NEBULIZER PORTABLE WITH SMALL COMPRESSOR, WITH LIMITED FLOW

PROSTHETICS AND ORTHOTICS

A4214	STERILE SALINE OR WATER, 30 CC VIAL
A4252	IRRIGATION KITS, NONSTERILE
A4341	INDWELLING CATHETER, FOLEY TYPE, TWO-WAY, TEFLON
A4342	INDWELLING CATHETER, FOLEY TYPE, TWO-WAY, LATEX
A4343	INDWELLING CATHETER, FOLEY TYPE, TWO-WAY, LATEX WITH TEFLON COATING
A4344	INDWELLING CATHETER, FOLEY TYPE, TWO-WAY, ALL SILICONE
A4345	INDWELLING CATHETER, FOLEY TYPE, TWO-WAY, SILICONE WITH ELASTOMER COATING
A4346	INDWELLING CATHETER, FOLEY TYPE, THREE WAY, LATEX OR TEFLON FOR CONTINUOUS IRRIGATION
A4347	EXTERNAL CATHETER, CONDOM TYPE
A4348	URINARY COLLECTION AND RETENTION SYSTEM, DRAINAGE BAG WITH TUBE
A4349	URINARY COLLECTION AND RETENTION SYSTEM, LEG BAG WITH TUBE
A4350	CATHETER CARE KIT
A4353	CATHETER INSERTION TRAY WITH CATHETER INCLUDING TUBING AND DRAINAGE BAG
A4354	CATHETER INSERTION TRAY WITHOUT CATHETER INCLUDING TUBING AND DRAINAGE BAG
A4355	3-WAY IRRIGATION SET FOR CATHETER EXTERNAL URINARY SUPPLIES
A4356	INCONTINENCE CLAMP
A4357	URINARY DRAINAGE BAG
A4358	URINARY LEG BAG
A4359	URINARY SUSPENSORY
A4360	COLOSTOMY SET

PROSTHETICS AND ORTHOTICS

A4361	OSTOMY FACE PLATE
A4362	OSTOMY SKIN BARRIER
A4363	OSTOMY LIQUID BARRIER
A4364	OSTOMY SKIN BOND OR CEMENT
A4365	OSTOMY BAG, DISPOSABLE/CLOSED
A4366	OSTOMY BAG, REUSEABLE OR DRAINABLE
A4367	OSTOMY BELT
A4368	STOMA WICKS
A4369	TAIL CLOSURES
A4370	OSTOMY SKIN BOND OR CEMENT, REMOVER
A4380	ILEOSTOMY SET
A4390	ILEAL BLADDER SET
A4400	IRRIGATION SET FOR IRRIGATION OF OSTOMY
A4402	OSTOMY LUBRICANT
A4404	OSTOMY RINGS
A4421	NOT OTHERWISE CLASSIFIED OSTOMY SUPPLIES
A4430	URETEROSTOMY SET
A4440	NOT OTHERWISE CLASSIFIED URETEROSTOMY SUPPLIES
E0720	TENS, TWO LEAD, LOCALIZED STIMULATION
E0730	TENS, FOUR LEAD, LARGER, AREA/MULTIPLE NERVE STIMULATION
E0740	REPLACEMENT BATTERIES FOR MEDICALLY NECESSARY TENS OWNED BY THE PATIENT
E1373	TRACHEOTOMY MASK OR COLLAR
L0100	CERVICAL, CRANIOSTENOSIS, HELMET MOLDED TO PATIENT MODEL
L0110	CERVICAL, CRANIOSTENOSIS, HELMET, NONMOLDED

PROSTHETICS AND ORTHOTICS

L0120	CERVICAL, FLEXIBLE, NONADJUSTABLE (FOAM COLLAR)
L0130	CERVICAL, FLEXIBLE, THERMOPLASTIC COLLAR, MOLDED TO PATIENT
L0140	CERVICAL, SEMI-RIGID, ADJUSTABLE (PLASTIC COLLAR)
L0150	CERVICAL, SEMI-RIGID, ADJUSTABLE MOLDED CHIN CUP (PLASTIC COLLAR WITH MANDIBULAR/OCCIPITAL PIECE)
L0160	CERVICAL, SEMI-RIGID, WIRE FRAME OCCIPITAL/MANDIBULAR SUPPORT
L0170	CERVICAL, COLLAR, MOLDED TO PATIENT MODEL
L0172	CERVICAL, COLLAR, SEMI-RIGID THERMOPLASTIC FOAM, TWO PIECE
L0174	CERVICAL, COLLAR, SEMI-RIGID, THERMOPLASTIC FOAM, TWO PIECE WITH THORACIC EXTENSION
L0180	CERVICAL, MULTIPLE POST COLLAR, OCCIPITAL/MANDIBULAR SUPPORTS, ADJUSTABLE
L0190	CERVICAL, MULTIPLE POST COLLAR, OCCIPITAL/MADNIBULAR SUPPORTS, ADJUSTABLE CERVICAL BARS (SOMI, GUILFORD, TAYLOR TYPES)
L0200	CERVICAL, MULTIPLE POST COLLAR, OCCIPITAL/MANDIBULAR SUPPORTS, ADJUSTABLE CERVICAL BARS AND THORACIC EXTENSION
L0210	THORACIC, RIB BELT, CUSTOM FITTED
L0220	THORACIC, RIB BELT, CUSTOM FABRICATED
L0300	THORACIC-LUMBAR-SACRAL-ORTHOSIS (TLSO), FLEXIBLE (DORSO-LUMBAR SURGICAL SUPPORT), CUSTOM FITTED
L0310	TLSO, FLEXIBLE, (DORSO-LUMBAR SURGICAL SUPPORT), CUSTOM FABRICATED
L0320	TLSO, ANTERIOR-POSTERIOR CONTROL (TAYLOR TYPE), WITH APRON FRONT
L0330	TLSO, ANTERIOR-POSTERIOR-LATERAL CONTROL (KNIGHT-TAYLOR TYPE) WITH APRON FRONT
L0340	TLSO, ANTERIOR-POSTERIOR-LATERAL-ROTARY CONTROL (ARNOLD, MAGNUSON, STEINDLER TYPES), WITH APRON FRONT

PROSTHETICS AND ORTHOTICS

L0350	TLSO, ANTERIOR-POSTERIOR-LATERAL-ROTARY CONTROL, FLEXION COMPRESSION JACKET, CUSTOM FITTED
L0360	TLSO, ANTERIOR-POSTERIOR-LATERAL-ROTARY CONTROL, FLEXION COMPRESSION JACKET MOLDED TO PATIENT MODEL
L0370	TLSO, ANTERIOR-POSTERIOR-LATERAL-ROTARY CONTROL, HYPEREXTENSION (JEWETT, LENNOX, BAKER, CASH TYPES)
L0380	TLSO, ANTERIOR-POSTERIOR-LATERAL-ROTARY CONTROL, WITH ANTERIOR EXTENSIONS
L0390	TLSO, ANTERIOR-POSTERIOR-LETERAL CONTROL (BODY JACKET) MOLDED TO PATIENT MODEL
L0400	TLSO, ANTERIOR-POSTERIOR-LATERAL CONTROL (BODY JACKET) MOLDED TO PATIENT MODEL, WITH INTERFACE MATERIAL
L0410	TLSO, ANTERIOR-POSTERIOR-LATERAL CONTROL (BODY JACKET), TWO PIECE CONSTRUCTION, MOLDED TO PATIENT MODEL
L0420	TLSO, ANTERIOR-POSTERIOR-LATERAL CONTROL (BODY JACKET), TWO PIECE CONSTRUCTION, MOLDED TO PATIENT MODEL, WITH INTERFACE MATERIAL
L0430	TLSO, ANTERIOR-POSTERIOR-LATERAL CONTROL (BODY JACKET), WITH INTERFACE MATERIAL CUSTOM FITTED
L0440	TLSO, ANTERIOR-POSTERIOR-LATERAL CONTROL (BODY JACKET), WITH OVERLAPPING FRONT SECTION, SPRING STEEL FRONT, CUSTOM FITTED
L0500	LUMBAR-SACRAL-ORTHOSIS (LSO), FLEXIBLE, (LUMBO-SACRAL SURGICAL SUPPORT), CUSTOM FITTED
L0510	LSO, FLEXIBLE (LUMBO-SACRAL SURGICAL SUPPORT), CUSTOM FABRICATED
L0515	LSO, FLEXIBLE, (LUMBO-SACRAL SURGICAL SUPPORT) ELASTIC TYPE, WITH RIGID POSTERIOR PANEL
	ANTERIOR-POSTERIOR-LATERAL CONTROL
L0520	LSO, ANTERIOR-POSTERIOR-LATERAL CONTROL (KNIGHT, WILCOX TYPES), WITH APRON FRONT

PROSTHETICS AND ORTHOTICS

L0530	LSO, ANTERIOR-POSTERIOR CONTROL (MACAUSLAND TYPE), WITH APRON FRONT
L0540	LSO, LUBMAR FLEXION (WILLIAMS FLEXION TYPE) ANTERIOR-POSTERIOR-LATERAL CONTROL (BODY JACKET)
L0550	LSO, ANTERIOR-POSTERIOR-LATERAL CONTROL (BODY JACKET), MOLDED TO PATIENT MODEL
L0560	LSO, ANTERIOR-POSTERIOR LATERAL CONTROL (BODY JACKET), MOLDED TO PATIENT MODEL, WITH INTERFACE MATERIAL
L0565	LSO, ANTERIOR-POSTERIOR-LATERAL CONTROL (BODY JACKET), CUSTOM FITTED
L0600	SACROILIAC, FLEXIBLE (SACROILIAC SURGICAL SUPPORT), CUSTOM FITTED
L0610	SACROILIAC, FLEXIBLE (SACROILIAC SURGICAL SUPPORT), CUSTOM FABRICATED
L0620	SACROILIAC, SEMI-RIGID (GOLDTHWAITE, OSGOOD TYPES), WITH APRON FRONT
L0700	CERVICAL-THORACIC-LUMBAR-SACRAL-ORTHOSES (CTLSO), ANTERIOR-POTERIOR-LATERAL CONTROL, MOLDED TO PATIENT MODEL, (MINERVA TYPE)
L0710	CTLSO, ANTERIOR-POSTERIOR-LATERAL-CONTROL, MOLDED TO PATIENT MODEL, WITH INTERFACE MATERIAL, (MINERVA TYPE)
L0810	HALO PROCEDURE, CERVICAL HALO INCORPORATED INTO JACKET VEST
L0820	HALO PROCEDURE, CERVICAL HOLO INCORPORATED INTO PLASTER BODY JACKET
L0830	HALO PROCEDURE, CERVICAL HALO INCORPORATED INTO MILWAUKEE TYPE ORTHOSIS
L0900	TORSO SUPPORT, PTOSIS SUPPORT, CUSTOM FITTED
L0910	TORSO SUPPORT, PTOSIS SUPPORT, CUSTOM FABRICATED
L0920	TORSO SUPPORT, PENDULOUS ABDOMEN SUPPORT, CUSTOM FITTED

PROSTHETICS AND ORTHOTICS

L0930	TORSO SUPPORT, PENDULOUS ABDOMEN SUPPORT, CUSTOM FABRICATED
L0940	TORSO SUPPORT, POST SURGICAL SUPPORT, CUSTOM FITTED
L0950	TORSO SUPPORT, POST SURGICAL SUPPORT, CUSTOM FABRICATED
L0960	TORSO SUPPORT, POST SURGICAL SUPPORT, PADS FOR POST SURGICAL SUPPORT
L0970	TLSO, CORSET FRONT
L0972	LSO, CORSET FRONT
L0974	TLSO, FULL CORSET
L0976	LSO, FULL CORSET
L0978	AXILLARY CRUTCH EXTENSION
L0980	PERONEAL STRAPS, PAIR
L0982	STOCKING SUPPORTER GRIPS, SET OF FOUR (4)
L1000	CERVICAL-THORACIC-LUMBAR-SACRAL ORTHOSIS (CTLSO) (MILWAUKEE), INCLUSIVE OF FURNISHING INITIAL ORTHOSIS, INCLUDING MODEL
L1010	ADDITION TO CERVICAL-THORACIC-LUMBAR-SACRAL ORTHOSIS (CTLSO) OR SCOLIOSIS ORTHOSIS, AXILLA SLING
L1020	ADDITION TO CTLSO OR SCOLIOSIS ORTHOSIS, KYPHOSIS PAD
L1025	ADDITION TO CTLSO OR SCOLIOSIS ORTHOSIS, KYPHOSIS PAD, FLOATING
L1030	ADDITION TO CTLSO OR SCOLIOSIS ORTHOSIS, LUMBAR BOLSTER PAD
L1040	ADDITION TO CTLSO OR SCOLIOSIS ORTHOSIS, LUMBAR OR LUMBAR RIB PAD
L1050	ADDITION TO CTLSO OR SCOLIOSIS ORTHOSIS, STERNAL PAD
L1060	ADDITION TO CTLSO OR SCOLIOSIS ORTHOSIS, THORACIC PAD
L1070	ADDITION TO CTLSO OR SCOLIOSIS ORTHOSIS, TRAPEZE SLING
L1080	ADDITION TO CTLSO OR SCOLIOSIS ORTHOSIS, OUTRIGGER
L1085	ADDITION TO CTLSO OR SCOLIOSIS ORTHOSIS, OUTRIGGER, BILATERAL WITH VERTICAL EXTENSIONS

PROSTHETICS AND ORTHOTICS

L1090	ADDITION TO CTLSO OR SCOLIOSIS ORTHOSIS, LUMBAR SLING
L1100	ADDITION TO CTLSO OR SCOLIOSIS ORTHOSIS, RING FLANGE, PLASTIC OR LEATHER
L1110	ADDITION TO CTLSO OR SCOLIOSIS ORTHOSIS, RING FLANGE, PLASTIC OR LEATHER, MOLDED TO PATIENT MODEL
L1120	ADDITION TO CTLSO, SCOLIOSIS ORTHOSIS, COVER FOR UPRIGHT, EACH
L1200	THORACIC-LUMBAR-SACRAL-ORTHOSIS (TLSO), INCLUSIVE OF FURNISHING INITIAL ORTHOSIS ONLY
L1210	ADDITION TO TLSO, (LOW PROFILE), LATERAL THORACIC EXTENSION AWAY DETACHABLE FOOT RESTS
L1220	ADDITION TO TLSO, (LOW PROFILE), ANTERIOR THORACIC EXTENSION
L1230	ADDITION TO TLSO, (LOW PROFILE), MILWAUKEE TYPE SUPERSTRUCTURE
L1240	ADDITION TO TLSO (LOW PROFILE), LUMBAR DEROTATION PAD
L1250	ADDITION TO TLSO (LOW PROFILE), ANTERIOR ASIS PAD
L1260	ADDITION TO TLSO (LOW PROFILE), ANTERIOR THORACIC DEROTATION PAD
L1270	ADDITION TO TLSO (LOW PROFILE), ABDOMINAL PAD
L1280	ADDITION TO TLSO (LOW PROFILE), RIB GUSSET (ELASTIC), EACH
L1290	ADDITION TO TLSO (LOW PROFILE), LATERAL TROCHANTERIC PAD
L1300	OTHER SCOLIOSIS PROCEDURE, BODY JACKET MOLDED TO PATIENT MODEL
L1310	OTHER SCOLIOSIS PROCEDURE, OST-OPERATIVE BODY JACKET
L1499	UNLISTED PROCEDURE FOR SPINAL ORTHOSIS
L1500	THORACIC-HIP-KNEE-ANKLE ORTHOSIS (THKAO), MOBILITY FRAME (NEWINGTON, PARAPODIUM TYPES)
L1510	THKAO, STANDING FRAME
L1520	THKAO, SWIVEL WALKER

PROSTHETICS AND ORTHOTICS

L1600	HIP ORTHOSIS (HO), ABDUCTION CONTROL OF HIP JOINTS, FLEXIBLE, FREJKA TYPE WITH COVER
L1610	HO, ABDUCTION CONTROL OF HIP JOINTS, FLEXIBLE, FREJKA COVER ONLY
L1620	HO, ABDUCTION CONTROL OF HIP JOINTS, FLEXIBLE, PAVLIK HARNESS
L1630	HO, ABDUCTION CONTROL OF HIP JOINTS, SEMI-FLEXIBLE (VON ROSEN TYPE)
L1640	HO, ABDUCTION CONTROL OF HIP JOINTS, STATIC, PELVIC BAND OR SPREADER BAR, THIGH CUFFS
L1650	HO, ABDUCTION CONTROL OF HIP JOINTS, STATIC, ADJUSTABLE, CUSTOM FITTED (ILFLED TYPE)
L1660	HO, ABDUCTION CONTROL OF HIP JOINTS, STATIC, PLASTIC, CUSTOM FITTED
L1670	HO, ABDUCTION CONTROL OF HIP JOINTS, DYNAMIC, ATTACHED TO SHOE (CRAIG TYPE)
L1680	HO, ABDUCTION CONTROL OF HIP JOINTS, DYNAMIC, PELVIC CONTROL, ADJUSTABLE HIP MOTION CONTROL, THIGH CUFFS (RANCHO HIP ACTION TYPE)
L1685	HO, ABDUCTION CONTROL OF HIP JOINTS, POST-OPERATIVE HIP ABDUCTION TYPE
L1700	LEGG PERTHES ORTHOSIS, TORONTO TYPE
L1710	LEGG PERTHES ORTHOSIS, NEWINGTON TYPE
L1720	LEGG PERTHES ORTHOSIS, TRILATERAL, (TACHDIJAN TYPE)
L1730	LEGG PERTHES ORTHOSIS, SCOTTISH RITE TYPE
L1750	LEGG PERTHES ORTHOSIS, LEGG PERTHES SLING (SAM BROWN TYPE)
L1755	LEGG PERTHES ORTHOSIS, PATTEN BOTTOM TYPE
L1800	KNEE ORTHOSIS (KO), ELASTIC WITH STAYS
L1810	KO, ELASTIC WITH JOINTS

PROSTHETICS AND ORTHOTICS

L1815	KO, ELASTIC WITH CONDYLAR PADS
L1820	KO, ELASTIC WITH CONDYLAR PADS AND JOINTS
L1825	KO, ELASTIC KNEE CAP
L1830	KO, IMMOBILIZER CANVAS LONGITUDINAL
L1840	KO, DEROTATION, MEDIAL-LATERAL, ANTERIOR CRUCIATE LIGAMENT, CUSTOM FABRICATED TO PATIENT MODEL
L1845	KO, DOUBLE UPRIGHT, THIGH AND CALF, WITH ADJUSTABLE FLEXION AND EXTENSION JOINT, MEDIAL-LATERAL AND ROTATION CONTROL, CUSTOM FITTED
L1846	KO, DOUBLE UPRIGHT, THIGH AND CALF, WITH ADJUSTABLE FLEXION AND EXTENSION JOINT, MEDIAL-LATERAL AND ROTATION CONTROL, MOLDED TO PATIENT MODEL
L1850	KO, SWEDISH TYPE
L1855	KO, MOLDED PLASTIC, THIGH AND CALF SECTIONS, WITH DOUBLE UPRIGHT KNEE JOINTS, MOLDED TO PATIENT MODEL
L1858	KO, MOLDED PLASTIC, POLYCENTRIC KNEE JOINTS, PNEUMATIC KNEE PADS (CTI)
L1860	KO, MODIFICATION OF SUPRACONDYLAR PROSTHETIC SOCKET, MOLDED TO PATIENT MODEL (SK)
L1870	KO, DOUBLE UPRIGHT, THIGH AND CALF LACERS, MOLDED TO PATIENT MODEL WITH KNEE JOINTS
L1880	KO, DOUBLE UPRIGHT, NONMOLDED THIGH AND CALF CUFFS/LACERS WITH KNEE JOINTS
L1900	ANKLE-FOOT ORTHOSIS (AFO), SPRING WIRE, DORSIFLEXION ASSIST CALF BAND
L1902	AFO, ANKLE GUANTLET, CUSTOM FITTED
L1904	AFO, MOLDED ANKLE GAUNTLET, MOLDED TO PATIENT MODEL
L1906	AFO, MULTILIGAMENTUS ANKLE SUPPORT
L1910	AFO, POSTERIOR, SINGLE BAR, CLASP ATTACHMENT TO SHOE COUNTER
L1920	AFO, SINGLE UPRIGHT WITH STATIC OR ADJUSTABLE STOP (PHELPS OR PERLSTEIN TYPE)

PROSTHETICS AND ORTHOTICS

L1930	AFO, CUSTOM FITTED, PLASTIC
L1940	AFO, MOLDED TO PATIENT MODEL, PLASTIC
L1950	AFO, SPIRAL, MOLDED TO PATIENT MODEL (IRM TYPE), PLASTIC
L1960	AFO, POSTERIOR SOLID ANKLE, MOLDED TO PATIENT MODEL, PLASTIC
L1970	AFO, PLASTIC MOLDED TO PATIENT MODEL, WITH ANKLE JOINT
L1980	AFO, SINGLE UPRIGHT FREE PLANTAR DORSIFLEXION, SOLID STIRRUP, CALF BAND/CUFF (SINGLE BAR "BK" ORTHOSIS)
L1990	AFO, DOUBLE UPRIGHT FREE PLANTAR DORSIFLEXION, SOLID STIRRUP, CALF BAND/CUFF (SINGLE BAR "BK" ORTHOSIS)
NOTE:	L2000, L2020, and L2036 ARE BASE PROCEDURES TO BE USED WITH ANY KNEE JOINT, L2010 and L2030 ARE TO BE USED ONLY WITH NO KNEE JOINT
L2000	KNEE-ANKLE-FOOT-ORTHOSES (KAFO), SINGLE STIRRUP, FREE KNEE, FREE ANGLE, SOLID STIRRUP, THIGH AND CALF BANDS/CUFFS (SINGLE BAR "AK" ORTHOSIS)
L2010	KAFO, SINGLE UPRIGHT, FREE ANGLE, SOLID STIRRUP, THIGH AND CALF BANDS/CUFFS (SINGLE BAR "AK" ORTHOSIS) WITHOUT KNEE JOINT
L2020	KAFO, DOUBLE UPRIGHT, FREE KNEE, FREE ANGLE, SOLID STIRRUP, THIGH AND CALF BANDS/CUFFS (DOBULE BAR "AK" ORTHOSIS)
L2030	KAFO, DOUBLE UPRIGHT, ANKLE, SOLID STIRRUP, THIGH AND CALF BANDS/CUFFS, (DOUBLE BAR "AK" ORTHOSIS), WITHOUT KNEE JOINT
L2036	KAFO, FULL PLASTIC, MOLDED TO PATIENT MODEL
L2040	HIP-KNEE-ANKLE-FOOT-ORTHOSIS (HKAFO) TORSION CONTROL, BILATERAL ROTATION STRAPS, PELVIC BAND/BELT
L2050	HKAFO TORSION CONTROL, BILATERAL TORISON CABLES, HIP JOINT, PELVIC BAND/BELT
L2060	HKAFO TORSION CONTROL, BILATERAL TORISON CABLES, BALL BEARING HIP JOINT, PELVIC BAND/BELT

BILL REVIEW

FOR INTERIM MANUAL INSTRUCTIONS

Section

Implementation of the Omnibus Budget Reconciliation Act of 1987 (P.L. 100-203) (IM-88-3)........................... IM 3600

New Part A Provisions under Catustrophic Insurance................ IM 3629

Planning for Implementing of HCPCS for Hospital Outpatient Radiology Services.. IM 3629

IM 3600 IMPLEMENTATION OF THE OMNIBUS BUDGET RECONCILIATION ACT OF 1987 (P.L. 100-203)

On December 22, 1987, the President signed into law the Omnibus Budget Reconciliation Act of 1987 (P.L. 100-203). It provides for a number of changes that affect Medicare coverage and reimbursement. This instruction describes the provisions that affect your bill processing operations and provides interim instructions until appropriate manual revisions are distributed.

1. Extension of Reductions Under Sequester Order (§4001).—The sequester order issued by the President for a 2.324 percent reduction (see Program Memorandum No. A-87-17) remains in effect through:

- o March 31, 1988 for Part A inpatient hospital services and all services rendered under Part B (hospital outpatient department Part B, SNF services, Part B home health, clinical diagnostic laboratory fee schedule, ESRD, CORF, etc.). Included are Part A payments for pass-through costs attributable to PPS hospitals.

- o December 31, 1987 for Part A home health, hospice, and SNF services.

Make appropriate changes in payment calculation for bills for these services.

2. Rate of Increase in Payment for Inpatient Hospital Services (§4002).—The law establishes separate standardized payment amounts for large urban areas, other urban areas and rural areas. For discharges occurring on or after April 1, 1988 and before October 1, 1988 the update percentages for Medicare payments are set at:

- o One point five (1.5) percent for hospitals in large urban areas. Large urban areas are urban areas with populations of more than 1,000,000 as determined by the Secretary of HHS on the basis of the most recent census population data. A listing of urban areas meeting this criteria is in your new Pricer program.

- o One point zero (1.0) percent for hospitals in other urban areas, and

- o Three point zero (3.0) percent for hospitals in rural areas.

- o The increase in the hospital specific portion of payment for sole community hospitals is:

  — Zero (0) percent for the first 51 days of the cost reporting period;
  — Two point seven (2.7) percent for the next 132 days; the remainder of the cost reporting period will be subject to the applicable percentage increase as described above.

- o The 25 percent national component of the Puerto Rico DRG - specific rate is the discharge - weighted average of the large urban, other urban, and rural DRG - specific rates.

o For PPS excluded hospitals, the update to the rate of increase limits is deemed to be 0 percent for the first 51 days of their cost reporting periods beginning during FY 1988. The rate of increase for the remainder of this period is 2.7 percent.

Regional floors for the PPS standardized amounts are established. It is equal to the higher of the national standardized amount, or the sum of 85 percent of the national standardized and 15 percent of the regional standardized amounts. They are effective for discharges occurring on or after April 1, 1988 and before September 30, 1990.

HCFA will include these changes in Pricer 7.2. You have no special action to take other than to install Pricer 7.2. (See Program Memoranda A-87-12 and A-87-17 for payments prior to April 1, 1988.)

3. Increase in Disproportionate Share Adjustments and Reduction in Indirect Medical Education Payments (§4003).—The indirect medical education adjustment is reduced to approximately 7.7 percent for each 0.1 in the ratio of interns and residents to beds.

This provision extends the DSH adjustment to include hospital discharges prior to October 1, 1990. The DSH adjustment for large urban hospitals meeting the State and local indigent care revenue test is increased to 25 percent. The maximum adjustment of 15 percent for qualifying urban hospitals with over 100 beds is eliminated. Review your provider specific data to determine whether providers now subject to the 15 percent limit are eligible for a higher DSH adjustment. Adjust the DSH field where appropriate. Eliminate the 15 percent limit in your edits for the provider specific file you send HCFA. (See §3850.2, Item 14.)

Effective date: Discharges occurring on or after October 1, 1988.

4. Rural Hospitals (§4005).—This provides the following changes affecting hospitals in rural areas:

Expansion of Swing-Bed Program - This allows rural hospitals with fewer than 100 beds to participate. Payment for extended care services furnished by hospitals with 50-99 beds is subject to additional conditions. First, if there is an available SNF bed in the geographic area, the extended care patient must be transferred within 5 week days (excluding weekends and holidays), unless the patient's physician certifies that the transfer is not medically appropriate. Second, payment is prohibited for days of Medicare covered extended care at the hospital during a cost reporting period which exceed 15 percent of the product of the number of days in the period and the average number of beds.

This provision will be handled through the cost settlement process. Advise hospitals that wish to be certified as swing-bed facilities under this provision to contact the RO. Additional instructions will be issued describing the requirements for notice by SNFs to hospitals of the availability of beds.

Effective Date: Agreements entered into after March 31, 1988.

Clarification of Sole Community Provider Status - Hospitals meeting the criteria for sole community hospital status may receive a payment adjustment without assuming the status of a sole community hospital. The volume adjustment provision is extended through cost reporting periods beginning before October 1, 1990. Additional payments to the hospital that qualify for a volume adjustment under this provision, but are not designated sole community hospitals, are capped at 5 million in FY 1988 and 10 million in FY 1989.

Hospitals must apply for this status in the same manner as hospitals with "sole community hospital" status.

Effective date: Cost reporting periods beginning on or after October 1, 1987.

Rural Referral Centers - This changes the bed size requirement for designation as a rural referral center from 500 to 275 beds. The other related requirements remain unchanged.

Effective Date: Discharges occurring on or after April 1, 1988.

5. Payments for Hospital Capital (§4006).—The reduction in capital payments for inpatient hospital services is increased according to the following schedule:

3.5 percent through 11/20/87
7 percent from 11/21/87 through 12/31/87
12 percent from 1/1/88 through 9/30/88
15 percent from 10/1/88 through 9/30/89

The Secretary of HHS must establish a PPS for capital related costs for PPS hospitals for hospital cost reporting periods beginning in FY 1992. This system must provide for payment on a per discharge basis with appropriate weighting for the type of discharge.

Effective Date: The increased FY 1988 reduction is applicable for discharges or portions of cost reporting periods occurring on or after January 1, 1988. Adjust your capital pass-through rate to reflect the new reduction percent. Also, see Item 1 of this instruction regarding the reduction for capital payments under the sequester order. Apply the capital reduction first.

6. Other Related Provisions (§4008).—The following are other provisions relating to inpatient hospital services.

Massachusetts Medicare Payment - This provides that Medicare payments may not be recouped, or otherwise reduced, from hospitals in the State of Massachusetts because of alleged Medicare overpayments. This is applicable to overpayments that occurred during the period of the Medicare statewide hospital reimbursement demonstration program conducted between October 1, 1982 and June 30, 1986.

Clarification of §1814(b) Waiver Authority - This modifies the criteria under which the Secretary may continue payment to hospitals under an alternative State hospital reimbursement system. These alternative reimbursement systems were established as demonstrations under §402 of the Social Security Admendments of 1967 or §222 of the Social Security Amendments of 1972. They may be continued until the Secretary determines that:

o A third party payer reimburses a hospital in that State on a basis other than the alternative system;

o The rate of increase in Part A costs per inpatient hospital admission is greater than the national rate of increase in such costs. In comparing the rate of increase in Medicare costs per admission for the alternative reimbursement system with the rate of increase for all hospitals, the comparison is made for the period from October 1, 1983 to the end of the most recent date for which annual data are available.

Effective Date: Enactment.

Hospital Outlier Payments - This increases payments for outlier cases classified in DRGs relating to burns by changing the percentage factor applied in determining outlier payments from 60 to 90 percent. Thus, burn cases which stay beyond the appropriate day outlier threshold will receive 90 percent of the applicable per diem for each outlier day. Cost outliers in burn DRGs will receive 90 percent of the cost of care above the cost outlier threshold. This reimbursement level applies to discharges occurring during the period April 1, 1988 through September 30, 1988 and FY 1989. This provision will be implemented in a manner to ensure that total payments under PPS are neither increased nor decreased because of this adjustment.

This provision will be included in Pricer 7.2 without the need for special action by intermediaries.

7. Miscellaneous Provisions (§4009).—This contains the following provisions relating to intermediary claims processing.

Waiver of Inpatient Limitation for Connecticut Hospice, Inc. - This permanently extends the waiver from the 20 percent/60 percent inpatient/home care day requirement for Connecticut Hospice, Inc.

Effective Date: Enactment.

Psychologists Services Furnished to Hospital Inpatients - This provides coverage under Part A for inpatient hospital services of clinical psychologists. It specifies that Medicare coverage for "other diagnostic or therapeutic items or services" furnished to hospital inpatients by "others under arrangements with them made by the hospital" includes the services of clinical psychologists. Hospitals are to report these services under revenue code 91x, psychiatric/psychological services. No additional action is required by you.

Effective Date: Services furnished on or after April 1, 1988

8. Payment for HMO Hospital Services (§4012).—Repeals the provision allowing intermediary payment of HMO/CMP hospital and SNF charges for TEFRA risk HMOs only. Also, hospitals and SNFs are required to accept as payment in full from HMO/CMPs the amount that would have been paid for the same services furnished to nonenrollees under Medicare reimbursement principles.

Effective for admission dates of April 1, 1988, HCFAs query reply R trailer messages will be modified to show the appropriate HMO status. There will be no more A status codes. There will be B status codes for:

- H2603 - Total Health Care - Kansas City, MO
- H5001 - Group Health Coop of Puget Sound - Seattle, WA

Continue to follow §3555 for determining payment jurisdiction. This will prevent the payment of TEFRA risk HMO/CMP inpatient or emergency/urgently needed claims with admission dates of April 1, 1988 or thereafter. Process these claims as described in §3654.1 as HMO paid bills and inform the providers to request payment from the HMO. Also, this provision does not release you from the requirements of processing HMO paid bills for TEFRA risk HMOs.

The Secretary is required to provide to HMO/CMPs Medicare DRG rates for payments and data on cost pass-through items for all inpatient services. HCFA expects to modify the "provider specific file" to obtain the data needed by HMOs to implement this provision, and will furnish data direct to HMOs. It is not anticipated that you will have any direct data exchange with HMO/CMPs.

Effective Date: Admissions occurring on or after April 1, 1988, or if later, the earliest date the Secretary can provide the required information in a machine readable form. HCFA anticipates notifying you in March 1988 of changes for the April/May/June provider file due in July 1988.

9. Requirement That Individual be Confined to Home (§4024).—This legislates existing policy on interpretation of an individual confined to home for purposes of receiving home health services. An individual is considered to be "confined to his home" if he or she meets the following criteria:

- Has a condition, due to an illness or injury that restricts his/her ability to leave home except with the assistance of another individual or the aid of a supportive device (such as cruches, a cane, a wheelchair, or walker); or

- If the individual has a condition such that leaving his/her home is medically contraindicated.

While the individual does not have to be bedridden to be considered "confined to his home," his/her condition should be such that there exists a normal inability to leave home. Moreover, leaving home requires a considerable and taxing effort by the individual. Any absences from home are infrequent, of relatively short duration, or are attributable to the need to receive medical treatment.

Effective Date: Items and services provided on or after January 1, 1988.

10. HHA Cost Limits (§4026).—This requires that in establishing HHA cost limits, the Secretary utilize a wage index based on audited wage data obtained from HHAs. These limits must be based on the most recent audited wage data available, which may be for cost reporting periods beginning no earlier that July 1, 1985.

Additional instructions will be provided.

Effective Date: Cost reporting periods beginning on or after July 1, 1988.

11. Payment Cycle Standards (§4031).—This establishes a minimum payment time of 10 days for claims received July 1, 1988 through September 30, 1988; and 14 days for claims received after September 30, 1988. All claims are to be paid or denied no later than 26 days from the date of their receipt, but no earlier than the applicable minimum time.

Separate instructions are now in process describing these requirements.

Effective Date: Claims received on or after July 1, 1988.

12. Denials and Reconsiderations of Claims for Home Health Services, Extended Care Services, and Post-Hospital Extended Care Services (§4032).—This provides that each Medicare contractor agreement must require that if a Medicare claim for home health services, extended care services, or post-hospital extended care services is denied, you must:

- Furnish the provider and the Medicare beneficiary a written explanation of the denial and of its statutory or regulatory basis.

- Promptly notify the Medicare beneficiary and the provider of the disposition of the reconsideration.

The provision also provides that the performance standards for contractors include an assessment of whether they were able to:

- Process 66 percent of reconsiderations within 60 days during FY 1989.

- Process 75 percent of reconsiderations within 60 days during subsequent years.

- Process 90 percent of reconsiderations within 90 days.

- They must also be assessed on the extent to which their determinations are reversed upon appeal.

HCFA has established a workgroup including representatives from RHHAs and appropriate CO components to develop recommendatios for the content of denial letters. We expect to issue related specifications in 60-90 days. In the interim, issue a written explanation to both the beneficiary and the provider. Sending the provider a copy of the letter to the beneficiary is acceptable. Coding on a provider remittance record is not acceptable.

Effective Date: The notification requirements apply with respect to claims received on or after January 1, 1988. However, it is not necessary to search denial files to provide additional notice on claims that you have processed. Your new performance criteria apply with respect to claims filed on or after October 1, 1988.

13. Application of Secondary Payer Provision to Governmental Entities (§4034).--This clarifies that the Medicare secondary payer provision relating to the disabled (§1862(b)4 of the Act) also applies to governmental entities. (See §3492 of Part 3.) The tax penalty imposed under §5000(d) of the Internal Revenue Code of 1986 does not apply to government entities.

Effective Date: January 1, 1987. The provision is effective as if it were included in the enactment of §9319(a) of the Omnibus Budget Reconciliation Act of 1986 (P.L. 99-509).

14. Publication and Notification of Policies (§4035).—Beginning June 1, 1988, you must make available to the public all interpretive materials, guidelines, and clarification of policies that relate to payment for SNF and HHA claims and DME. We will provide you with definitive instructions. In the interim, begin identifying and collecting in one location, all applicable internal guidelines and HCFA manuals, Program Memorandum and RO letters relating to payment of these benefits.

Effective Date: June 1, 1988

15. ESRD Amendment (§4036(a)).—This provides that providers and facilities must bill the EGHP first before billing Medicare when there is an indication of other insurance coverage. They no longer have the option of billing Medicare first.

Effective Date: Services and items furnished on and after January 21, 1988.

16. Miscellaneous and Technical Provisions (§4039).—This contains two provisions that affect your claims processing.

Recovery of Payment for Certain Pacemaker Devices - This requires that information reported to the registry include any amounts paid to providers under an express or implied warranty under contract or State law. In addition, the Secretary has the option of requiring, by regulation, that providers repay Medicare any amounts received under warranty for replaced pacemakers. The Secretary may deny payments to providers with respect to the implantation or replacement of pacemaker devices or leads if the provider fails to make required repayments.

You will be provided further instructions. No changes are appropriate until you receive them.

Effective Date: January 1, 1988.

17. Payments for DME, Prosthetic Devices, Orthotics, and Prosthetics (§4062).--This imposes new limitations on allowable charges and frequency of payments for DME, prosthetic devices, orthotics, and prosthetics. This section applies to all contractors, but for you, it applies only to DME furnished by a HHA as part of home health services.

Additional instructions will be issued.

Effective Date: January 1, 1989.

18. Clinical Diagnostic Laboratory Tests (§4064).—This provides the following related to Medicare payments for clinical diagnostic laboratory tests:

o Delays until April 1988 changes in fee schedules planned for January 1, 1988.

o Eliminates any CPI increases in 1988.

o Reduces the national limitation amount from 115 percent to 100 percent of the median fee established by Medicare carriers effective for services provided April 1, 1988.

o Reduces the fee schedule amounts payable for automated tests and tests previously subject to a limit based upon the lowest charge levels. (The carrier will furnish you affected HCPCS codes and their new applicable rates at least 30 days before the effective date.)

o Eliminates the 2 percent payment differential between the fee schedule for hospital outpatients and other services. The fee schedule will be based upon 60 percent of the prevailing charge. For sole community hospitals with qualified laboratories (as defined in §3628A) the fee schedule will be based on 62 percent of the prevailing charge.

Use the same determination you used for PPS purpose to determine whether a hospital qualifies as a sole community hospital. Sole community hospitals are indicated as codes 01 and 11 in your PPS Pricer file. (See §3656.3D, "Provider Type Field.")

Effective Date: April 1, 1988 for provisions related to clinical lab fee schedules and payment limits. The HCPCS update for 1988 is rescheduled for April 1, 1988. Carriers will provide fee schedules for new HCPCS codes by March 11, 1988.

19. Payments to Hospital Outpatient Departments for Radiology (§4066).—Provides for a limit to the aggregate payment for outpatient hospital radiology services (including diagnostic and therapeutic radiology, nuclear medicine, CAT scan procedures, magnetic resonance imaging services and diagnostic ultra-sound and other imaging procedures). The payment limit includes both noncapital and capital costs.

The limit is based upon a blended amount of the costs and the prevailing charges that would apply if the services had been performed in a physician's office in the same locality. The term "cost proportion" is defined as 65 percent for cost reporting periods beginning in FY 1989 and 50 percent for subsequent years. The term "charge proportion" is defined as 35 percent for cost reporting periods beginning FY 1989 and 50 percent in subsequent years.

The "blend amount" for radiology services is the sum of:

o The hospital's reasonable costs or customary charges for providing the radiologic services (net of deductible and coinsurance) times the cost proportion; and

o Sixty two (62) percent of 80 percent of the prevailing charges for participating physicians for the same services, times the charge proportion.

Beginning October 1, 1989, payment for other outpatient diagnostic procedures (excluding diagnostic radiology and diagnostic lab tests) are included under a similar aggregate limit. The limit for these additional procedures is based upon 42 percent of the prevailing charge or upon other appropriate percentage(s) if determined by the Secretary to be appropriate or by carriers (acting pursuant to guidelines issued by the Secretary). Such alternative percentage(s) would be based upon the technical component for the service as a percent of the total charge for the service.

You will be provided additional instructions.

Effective Date: This provision is effective for radiology services rendered on or after October 1, 1988 and other diagnostic procedures for services rendered on or after October 1, 1989.

20. Maximum Payment Per Visit For Independent RHCs (§4067).—Medicare reimburses independent RHCs (i.e., those that are not part of a hospital, SNF or HHA) based upon the clinic's reasonable cost incurred in furnishing RHC services to Medicare beneficiaries. Payments to clinics are based on an all-inclusive rate for each visit by a Medicare beneficiary for covered services. As a result of this provision, the payment limit for services provided on or after April 1, 1988 is established at $46 per visit. In subsequent years, the 1988 limit will be increased by the percentage increase in the Medicare economic index applicable to physicians' services furnished as of the first day of the year.

The Medicare economic index is set in accordance with §1842(b)(3) of the Act.

Since the statute requires that the payment limit apply to services provided as of a specific date, different payment limits may apply during one cost reporting period. Costs and visits that apply to different payment limits should be identified separately on the cost report, Worksheet 3, Part B, lines 1-5 of Form HCFA-222.

Effective date: Services provided on or after April 1, 1988.

21. Payment for Ambulatory Surgery At Eye, and Eye and Ear Speciality Hospitals (§4068).—This modifies §9343 of OBRA (1986) to provide for the application of a separate payment limitation for ASC covered outpatient surgery procedures in the case of a hospital that:

o Specializes in eye or eye and ear surgical procedures (as determined by the Secretary);

o Receives more than 30 percent of its total revenues from outpatient procedures; and

o Was an eye and ear speciality hospital or an eye hospital on October 1, 1987.

For a hospital meeting these requirements, the 75/25 blend of a hospital's reasonable costs and the ASC rate applies only to cost reporting periods beginning in FYs 1989 and 1990, reverting to a 50/50 blend for cost reporting periods beginning after October 1, 1990.

Additional instructions will be issued.

22. Coverage for Mental Health Services (§4070).—This increases the calendar year limitation on reimbursable expenses under Part B for the treatment of a mental, psychoneurotic or personality disorder from $312.50 for 1987 to $562.50 for 1988 and $1,375 for 1989. In 1988 the maximum Medicare payment is increased from $250 to $450. The maximum payment for 1989 and subsequent years is $1,100.

Incorporate the appropriate changes in your outpatient bill and query/reply processing systems. Do not submit any queries or bills for psychiatric services that exceed the $562.50 maximum until March 28, 1988. The query and bill processing systems will be modified to accept the higher psychiatric maximum on that date. For queries that have already been submitted prior to the March 28, 1988 implementation date, where the psychiatric limit remaining in the reply is less than the amount queried, submit a void query and pend the claim until March 28, 1988.

23. Clarification of Coverage of Drugs Used in Immunosuppressive Therapy (§4075).—This clarifies the current provision that coverage for outpatient immunosuppressive drugs under Part B includes all prescription drugs used in immunosuppressive therapy.

Effective Date: Drugs dispensed on or after December 22, 1987.

24. Psychologist Services in Clinics (§4077).--This includes clinical psychologist services in the definition of Medicare covered RHC services even when they are not provided under the supervision of a physician. It also authorizes coverage of, and direct payment for, psychologist's services furnished at a community mental health center.

Payments will be made for "qualified psychologist services" on the basis of a fee schedule to be established by the Secretary. The term "qualified psychologist services" is a service furnished by a mental health center, which the psychologist is legally authorized to perform under State law (or State regulations).

Additional instructions will be issued.

Effective Date: Services performed on or after July 1, 1988.

25. Provision of Offsite CORF Services (§4078).--Amends the requirement that a CORF must provide all services at the CORF site. CORFs can now provide occupational therapy, speech and physical therapy offsite. Additional implementing instructions will be issued.

26. Prompt Payment for CORF (§4085(d)).--This adds CORFs and rehabilitation agencies to the list of providers eligible to receive prompt pay interest for clean claims not paid within certain time limits. The Secretary is required to provide for amendments to contracts with you in order to implement the provision.

Instructions now in effect provide for paying interest for late payments to CORFs and rehabilitation agencies, therefore, no changes are anticipated.

Effective Date: Applies to claims received on or after December 22, 1987.

27. Limitation of Beneficiary Liability for PRO Denied Services (§4096).--

a. Indemnification.--For services furnished beginning January 1, 1988, the provider may not charge the beneficiary for deductible and/or coinsurance when services are denied and the provider is liable. In addition, when a review results in denial of a claim for which the provider is liable, do not charge any utilization, credit deductible, or update psychiatric services limit. Continue to recover the incorrect payment from the provider, using the changes in coding instructions described below. The denial notice from the PRO will inform the provider of its obligation to refund deductible and/or coinsurance amounts paid by the beneficiary. Handle any indemnification requests from beneficiaries (when the provider does not make appropriate refund to the beneficiary) using the procedure in §3446.

When you or the PRO deny the entire bill and payment has been made, submit the adjustment bill to HCFA and to the PRO as a code N nonpayment bill. If you have not made payment, and you deny the entire admission, submit the bill with a nonpayment code of N. If the beneficiary is liable for any of the days denied, identify these days with occurrance span code 76.

When you or the PRO deny a portion of the bill for which the provider is liable, identify such portion or portions with an occurrence span code 77 showing the span of dates for each portion denied. If you have sent the original bill to HCFA, submit an adjustment, inserting a P in the third position of the type of bill code if the PRO requested the adjustment, or an I if you initiated the adjustment. If you have not sent the bill to HCFA, do not charge utilization to the beneficiary for the provider liable portion and require the provider to refund any copayments related to the "provider liable" portion that it collected from the beneficiary.

For bills reflecting inpatient stays beginning before January 1, 1988 and ending after December 31, 1987, be sure that no utilization is charged and no copayments are collected from the beneficiary for any days denied after December 31, 1987 for which the provider is liable. Conversely, charge utilization and copayments for provider liable days that occur prior to January 1, 1988.

HCFA CO will implement the following consistency edit:

9905	H&S	This inpatient nonpayment bill spans 1987 calendar year end, and the utilization days exceed the number of year 1987 days in the stay, less any year 1987 days reported as patient liable days (occurrence span code 76). This is applicable to original inpatient bills and debit adjustment inpatient bills with a P or an I in the units position of the Type of Bill code.

Final nonpayment bills are identified by the presence of a valid nonpayment code in field 73 (inpatient hospital and SNF, including CS). Editing of final nonpayment bills is limited to the edits described by return codes 0401, 0701, 0702, 1501, 2101, 2102, 2201, 2202, 2203, 2303, 2401, 2502, 33X1, 33X2, 33X3, 33X4, 51X4, 51X5, 94G1, 94G2, 94G3, (except for nonpayment code "R"), 94G4 (nonpayment code "R" only), 9904, and 9905.

b. Notice to Beneficiary of PRO Review of Discharge.--When a hospital decides a beneficiary no longer requires inpatient hospital care, the case must be referred to the PRO for review if the attending physician disagrees. At the time of the referral, the hospital must provide notice of the referral for MR to the beneficiary.

Intermediaries have no special action relating to this provision.

Effective Date: Services provided on or after January 1, 1988.

IM 3622. DESCRIPTION OF PART A PROVISIONS

A. Inpatient Hospital.—

1. Prior Provision.—A benefit period begins with the first day (not included in a previous benefit period) on which the patient is furnished inpatient hospital or extended care services by a qualified provider in a month in which the patient is entitled to hospital insurance benefits. It ends with the close of the period of 60 consecutive days during which the patient is neither an inpatient of a hospital nor an SNF (§3025). For each benefit period, the beneficiary is responsible for a cash deductible, and coinsurance of 1/4 the deductible for the 61st through the 90th days. The beneficiary may elect up to 60 lifetime reserve days with a coinsurance of 1/2 the deductible.

2. New Provision.—

a. Inpatient Hospital Deductible.—The inpatient hospital deductible will apply only to a beneficiary's first period of hospitalization beginning in a calendar year.

However, if a beneficiary incurs a deductible during December of a calendar year, the beneficiary will not be required to pay a deductible for hospitalization beginning in January of the following year. Admission in February through December will require a deductible. This "carryover" provision is applicable to the December 1988 through January 1989 period as well as to subsequent December through January periods. The special provision in subsection F provides additional protection to the beneficiary against too frequent application of the inpatient hospital deductible during the transition from the old to the new provisions.

Under the new provisions, even if the customary charges for the hospital stay are less than the specified dollar amount of the inpatient hospital deductible for that year, they satisfy the deductible. The beneficiary does not have to make up the difference during a subsequent hospital stay, as he does under the present provisions.
(See chart, next page.)

An individual's period of hospitalization begins on the first day the individual is furnished inpatient hospital services and ends on the date of discharge from the hospital or death. A transfer from one hospital to another is not a discharge even if the transfer is considered a discharge under PPS, e.g., where the transfer is from a prospective payment hospital to a hospital not under PPS or an approved Statewide cost control system or demonstration. A leave of absence is not a discharge.

EXAMPLE: A patient is admitted to a hospital on 11/29/89 and transferred to another hospital on 1/15/90. He is discharged from the second hospital on 2/15/90. He incurs only one inpatient hospital deductible for the single period of hospitalization from 11/29/89 to 2/15/90.

In the case of a same-day admission and transfer, the inpatient hospital deductible for a period of hospitalization is imposed on the hospital to which the beneficiary is transferred. In the case of a transfer subsequent to the day of admission, the inpatient hospital deductible for the period of hospitalization is imposed on the transferring hospital. In all transfer cases, the deductible is limited to the lesser of the dollar amount of the deductible or the actual charges at the hospital on which the deductible is imposed. The charges at the other hospital will not be considered in this connection.

INPATIENT DEDUCTIBLE EXAMPLES

1st Admission Stay Dates	Deductible Incurred on Admission	2nd Admission Stay Dates	Deductible Due	3rd Admission Stay Dates	Deductible Due	Remarks
11/15/88 - 11/20/88	Yes	01/05/89 - 01/10/89	No	05/05/89 - 02/20/90	Yes	No deductible due for 2nd admission because 1988 spell continues. Deductible due for 3rd admission-spell broken. (Hold harmless provision.)
12/15/89 - 12/19/89	Yes	01/20/90 - 01/25/90	No	02/15/90 - 02/20/90	Yes	No deductible due on 2nd admission because deductible was paid in December and readmission was the following January. Deductible due on 3rd admission in February.
11/15/89 - 12/15/89	Yes	01/10/90 01/12/90	Yes	02/25/90 02/26/90	No	New calendar year deductible due on 2nd admission. None due on 3rd admission because only one deductible per calendar year.
12/15/89 - 01/15/90	Yes	02/03/90 02/08/90	Yes			Second admission must be in January for December-January rule to apply.

b. Elimination of Day Limitation on Inpatient Hospital Services.--The Medicare limits on payment for inpatient hospital care (90 days plus a lifetime reserve of 60 days) are eliminated. Medicare will pay for an unlimited number of hospital days for covered services.

The 190-day lifetime limit on inpatient psychiatric hospital services is retained, and the guarantee of payment provision remains applicable in connection with this limit, but only with this limit. In addition, the preentitlement psychiatric limit (§3104) is retained. However, for purposes of this limit, the concept of the benefit period has been replaced by the concept of 60 consecutive days in which the beneficiary does not receive inpatient mental health services, i.e., after 60 such consecutive days the preentitlement psychiatric limit will no longer apply. "Inpatient mental health services" include inpatient psychiatric hospital services, and inpatient hospital services for a beneficiary who is an inpatient of a non-psychiatric hospital primarily for diagnosis and treatment of mental illness.

c. Elimination of Coinsurance Amounts for Inpatient Hospital Services.--The current hospital inpatient coinsurance amounts for days 61 through 90 and coinsurance for the 60 lifetime reserve days are eliminated. No coinsurance amounts will apply to inpatient hospital services.

d. Elimination of "Spell of Illness".--The "spell of illness" concept is eliminated for determining the number of hospital and SNF days Medicare will cover, the hospital and SNF coinsurance days and the Part A blood deductible.

e. Adjustments in P ments of Inpatient Hospital Services.--When adjusting the Medicare hospital pay t amounts, the Secretary of Health and Human Services (HHS) is required to take account the reductions in beneficiary payments to hospitals because of the elimination of the day limitation. Any adjustments for PPS hospitals will be built into the appropriate Pricer update.

B. Inpatient SNF.--

1. Prior Provision.--The beneficiary is entitled to 20 days of full coverage followed by 80 coinsurance days. The coinsurance for each coinsurance day is equal to 1/8 of the inpatient hospital cash deductible, or the actual total SNF charge per day, whichever is less. The stay must be preceded by a qualifying inpatient hospital stay and a timely transfer of the SNF.

2. New Provision.--

a. Coinsurance on First Eight Days.--Beneficiaries are required to pay coinsurance amounts for the first 8 days of SNF services in a calendar year (on SNF bills spanning 2 calendar years, value codes 9 and 11, and the related coinsurance rates are required).

b. Coinsurance Equal to 20 Percent.--The coinsurance amounts per day equal 20 percent of the national average per diem Medicare reasonable cost for SNF services. The coinsurance amount for 1989 is $25.50 per day.

c. Cover 150 Days of Care.--The Medicare program will cover up to 150 days of skilled nursing care services in a calendar year. The level of care requirements remain the same.

d. Prior Hospitalization and Transfer Requirements.--The prior hospitalization, transfer, and other requirements for benefits (including the requirement that the extended care services must be for a condition for which the beneficiary was receiving inpatient hospital services or a condition which arose while he was in the SNF for treatment of a condition for which he was previously hospitalized) are eliminated for admissions that occur on or after January 1, 1989.

C. Christian Science Inpatient SNF.--

1. Prior Provision.--If the beneficiary elects to have his services in a Christian Science Sanatorium treated as post-hospital extended-care services, the beneficiary is entitled to a maximum of 30 days, each of which is subject to the same coinsurance amount that is applicable to regular SNF days after the 20th day. A beneficiary cannot use regular SNF days and Christian Science SNF days in the same benefit period.

2. New Provision.--If the beneficiary elects to have his services in a Christian Science Sanatorium treated as extended care services, the beneficiary is entitled up to 45 days per year, each of which is subject to the same coinsurance that is applicable to the first 8 days of regular SNF coverage (20 percent of the national average SNF per diem rate). A beneficiary cannot use regular SNF days and Christian Science SNF days in the same calendar year.

D. Hospice.--

1. Prior Provision.--Benefits are limited to 210 days. Hospices are required to provide care, but may not be paid for care after 210 days.

2. New Provision.--The Medicare program will extend the hospice benefit, and reimburse a hospice, beyond the current 210-day benefit period if the beneficiary's physician or hospice director recertifies that the beneficiary is still terminally ill. There is no day limit to the length of this subsequent extension period, although the current-law cap on hospice reimbursement is maintained.

E. Blood Deductible.--

1. Prior Provision.--The beneficiary is responsible for a three-pint blood deductible for each benefit period.

2. New Provision.--A Medicare beneficiary will be responsible for payment of a deductible equal to the expenses incurred for the first three pints of whole blood (or equivalent quantities of red blood cells) furnished during each calendar year. A provider may charge the beneficiary, or a third party, its customary charge for the blood (or units of packed red cells) or the blood deductible can be met by replacing the blood in

accordance with the regulations. The 3-pint Part A blood deductible for the year is reduced to the extent that the Part B blood deductible for that year has already been satisfied. Similarly, the 3-pint Part B deductible for the year is reduced to the extent that Part A blood for the year has been satisfied. Blood deductible pints count toward meeting both deductibles whether a charge is made for them or they are replaced. See subsection F for special blood deductible transitional provisions.

F. Transition Provisions.--The new provisions are generally effective January 1, 1989. However, there are special transition provisions as follows:

1. Inpatient Hospital.—In the case of a beneficiary who has a benefit period in effect on December 31, 1988, the new inpatient hospital deductible provisions do not apply, and no further inpatient hospital deductible will be charged during 1989 or 1990 while that benefit period continues. The first period of hospitalization that begins after the end of that benefit period, during 1989 or 1990, will be the first period of hospitalization in that year for imposing the inpatient hospital deductible for that year under the new provisions.

2. Part A Blood Deductible.—In the case of a beneficiary who has a benefit period in effect on December 31, 1988, a Part A blood deductible required for 1989 or 1990 under the new provisions will be reduced, to the extent that the Part A blood deductible was satisfied before 1989 in that benefit period, while that benefit period continues in effect. This reduction applies whether or not the Part A blood furnished in 1989 or 1990 is replaced. However, before this reduction is applied to the Part A blood furnished in 1989 or 1990, the Part A blood deductible for that year is first reduced to the extent that the Part B blood deductible has already been satisfied for that year. (See subsection E2.)

If the benefit period that began before 1989 ends in 1989 or 1990, any part of the reduced Part A blood deductible satisfied for the year based on Part A or Part B blood furnished during that year and during that benefit period will not have to be met again in that year after the benefit period ends. However, any reduction in the Part A blood deductible for that year based on Part A blood furnished before 1989 will not apply for that year after that benefit period ends and will not reduce the Part B blood deductible either during, or after the end of, that benefit period.

EXAMPLE 1: A beneficiary fully satisfies his 3-pint Part A blood deductible in a hospital stay in 1988, during a benefit period that begins in 1988 and ends in 1990. In 1989 and 1990, the beneficiary incurs Part A expenses for 1 and 3 pints of blood respectively. The 3 pints of pre-1989 blood which satisfied his deductible for the benefit period reduce his Part A blood deductible for 1989 to zero. Medicare pays for the 1 pint of Part A blood received in 1989. None of the 3 pints of pre-1989 blood are available to reduce his Part A blood deductible for 1990, so he is responsible for paying for, or replacing, the 3 pints of Part A blood he receives in 1990. (If no Part A blood expenses were incurred in 1989, the 3 pre-1989 pints would reduce the Part A blood deductible for 1990 to zero and Medicare would pay for 3 pints of Part A blood in 1990).

EXAMPLE 2: Same facts as in EXAMPLE 1 except that the beneficiary satisfies only 1 pint of the Part A blood deductible in 1988. In this case, the beneficiary's Part A blood deductible is reduced from 3 to 2 for 1989, remains 3 for 1990, and Medicare makes no payment for blood in either year. (If no Part A blood expenses were incurred in 1989, the 1 pre-1989 pint would reduce the Part A blood deductible for 1990 to 2 pints and Medicare would pay for 1 pint of Part A blood in 1990.)

EXAMPLE 3: A beneficiary fully satisfies the 3-pint Part A blood deductible in a hospital stay occurring in 1988, during a benefit period that begins in 1988 and ends in 1990. Early in 1989, the beneficiary incurs Part B expenses for 1 pint of blood, thus meeting 1 pint of the Part B blood deductible for 1989. Subsequently, the beneficiary incurs Part A expenses for 5 pints of blood during a hospital stay in 1989, for 3 pints of blood during a hospital stay in 1990 while the benefit period continues, and for 3 pints of blood during a hospital stay in 1990 after the end of the benefit period. Thereafter, during 1990, he incurs Part B expenses for three additional pints of blood. The Part A and Part B blood expenses incurred during 1989 and 1990 are reimbursable as follows:

The 1 pint applied toward the Part B blood deductible for 1989 reduces the Part A blood deductible for 1989 to 2 pints.

The pints of Part A blood received during 1988 (which met the Part A blood deductible for the benefit period which began in 1988):

reduce the remaining 2 pint Part A blood deductible for 1989 to zero.

reduce the 3-pint Part A blood deductible for 1990 to 2 pints while the benefit period continues. After the end of the benefit period, the Part A blood deductible for 1990 is restored to 3 pints (2 pints of which have been met based on blood previously furnished in 1990.)

The 2 pints of Part A blood furnished in 1990 during the benefit period and 1 of the 3 pints of Part A blood furnished in the hospital stay after the end of benefit period reduce the Part B blood deductible for 1990 to zero.

Thus, all Part A and Part B blood expenses for 1989 and 1990 are reimbursable except for 1 pint of Part B blood received in 1989 and 3 pints of Part A blood received in 1990 (2 during the first hospitalization, and 1 during the second hospitalization).

3. SNF.--Beginning on January 1, 1989, there is no spell of illness limitation for Part A SNF benefits, and Medicare covers up to 150 SNF days for a beneficiary per calendar year. The "post-hospital" coverage requirements are eliminated for SNF admissions that occur after 1988, but continue to apply with respect to SNF admissions that occurred before 1989. Part A payments may be made in connection with a SNF admission that occurred before 1989 only if the prior hospitalization, transfer, and other requirements for payment for post-hospital extended care services are met.

Use the following rules to establish whether the post-hospital requirements are to be applied:

a. Admission after 1988 (No post-hospital requirements).--For care furnished with respect to SNF admissions that occur after 1988, the post-hospital requirements for SNF coverage do not apply. An admission to a SNF takes place after 1988 when any of the following events occurs on or after January 1, 1989:

- Actual admission to the facility.
- Transfer from a noncertified to a certified part of the facility.
- The SNF's Medicare participation (or that of the distinct part in which the beneficiary is residing) becomes effective.
- Deemed admissions.--There are two situations in which a patient whose stay in a participating SNF bed continued from 1988 into 1989 is deemed to be admitted after 1988:
    - If a beneficiary did not require a covered level of SNF care at the end of 1988 but begins to require a covered level of care on or after January 1, 1989, he is deemed to be admitted at that point.
    - When a beneficiary who was admitted to a participating SNF bed before 1989, and thus was subject to the post-hospital requirements, ceases to need a covered level of care at some point after 1988, he is no longer considered to be a SNF patient at that time. If the beneficiary later begins to need a covered level of care again, at that point he will be deemed to be admitted to the SNF after 1988, and the post-hospital coverage requirements will no longer apply.

b. Admission before 1989 (Post-hospital requirements continue to apply).--SNF care provided on or after January 1, 1989 still must meet the post-hospital requirements if the admission occurred before 1989. In most cases, your current records will show whether the post-hospital requirements are met. The occurrence of a qualifying prior hospital stay and timely initial transfer to the SNF is a matter of record and must be verified, unless the assumption discussed below applies. (Establishing that a beneficiary was receiving Part A SNF coverage on a given date serves to verify that the prior hospital stay and timely transfer requirements were met as of that date.) However, it may not always be readily apparent whether the post-hospital requirements are met in connection with a SNF admission that occurred some distance in the past. For example, it may be difficult to determine if a covered level of care continued to be needed throughout a lengthy stay. In order to determine that a beneficiary continues to meet the post-hospital requirements when he had met them at some point in the past and has exhausted his 100 days of post-hospital extended care services during his current SNF stay (however long ago that stay may have begun), make the following assumption:

- If the beneficiary, during the 90 days preceding January 1, 1989, has received a covered level of care without an interruption of 30 consecutive days or more, assume that he still meets the post-hospital requirements as of January 1, 1989, in the absence of evidence to the contrary.

If a Medicare beneficiary's eligibility for SNF coverage after 1988 is dependent upon a new admission after 1988, the discharge from the prior stay and the new admission must be reflected on UNIBILLS.

G. Query/Reply.—For admissions after December 31, 1988, the following changes to HCFA query reply processing will apply.

- HCFA will no longer keep open items.

- HCFA will no longer return an amount of deductible to be met. The inpatient deductible is limited to the lesser of either the prevailing deductible dollar amount or the total charges for the first period of hospitalization in the calendar year. Only a met or not met indicator will be returned, since no additional deductible can be imposed in any subsequent hospitalization that year.

- It will no longer be necessary to query subsequent periods of hospice election. Query the first period only. HCFA will not terminate hospice benefits for a Medicare-entitled individual unless a termination (Type 7 hospice query) is received.

If HCFA receives a termination, you must send in the proper query to re-enroll the beneficiary in the hospice program. Subsequent hospice periods will be updated at HCFA based on utilization received on UNIBILL. Continue to obtain proper evidence of recertifications, including recertification to the new unlimited extension of benefits after the 30th day of the third hospice period. Continue to send changes in hospice and/or intermediary to HCFA.

- The following changes will be made to query reply disposition codes.

Disposition Code	Prior Condition	Change
01	Approval. The beneficiary has never used Part A services. This is an initial admission for this beneficiary.	This disposition code means that the beneficiary is entitled to Part A.

		Base payment on the content of the utilization fields in the reply.
02	Approval. Some prior Part A utilization. Last recorded date of discharge is within 60 days of this date of admission and there are no query-related open items on HCFA's records.	Since spell of illness concept is eliminated, eliminate code.
03	Acknowledgment. HCFA has processed a query code 2 (cancel) and deleted the admission.	Since it will no longer be necessary for HCFA to keep open items, eliminate code.
25	Qualified Approval. An admission date was received for this beneficiary prior to the current query, and the date of the current admission is 60 days or more after the last discharge date from a posted bill. According to HCFA's records, the current admission starts a new benefit period. The remaining Part A benefits given in the code 25 are always as of the last bill posted. There may be an earlier or later stay for which no bill has been accepted.	Since spell of illness is eliminated, eliminate code.
27	Qualified Approval. The admission date on the current query precedes the last recorded discharge date or the date on the last processed interim bill shown on HCFA's records. This reply shows the utilization remaining as of the date of last billing action. Determine if your admission falls within the current benefit period, a prior benefit period, or links two benefit periods. This may require a code 6 query (§3507.3) to obtain a Bill Retrieval Listing. (Bill History). Apply the utilization remaining within the applicable benefit period to your current admission.	Since it will no longer be necessary to link benefit periods, this code will not be needed. Eliminate.

41	Qualified Approval. Query-related benefit, including 60-day lifetime reserve for inpatient hospital stays, is exhausted. No benefits are available unless this stay begins a new spell of illness or home health services are involved.	Since beneficiaries will have unlimited hospital days, this code will never apply. Eliminate.
46	Qualified Approval. A reply with code 46 means that the individual had admission to a Christian Science SNF and the current admission is to a regular SNF, or he had a prior admission to a regular SNF and the current admission is to a Christian Science SNF, and both admissions may be in the same spell of illness. After an individual has received covered extended care services in a Christian Science sanatorium, he cannot, during the same spell of illness, receive covered extended care services in a regular SNF. Also, after he has received covered extended care services in a regular SNF, he cannot, during the same spell of illness, receive covered extended care services in a Christian Science sanatorium.	Spell of illness is eliminated. Beneficiaries cannot receive extended care services in a regular and a Christian Science SNF in the same calendar year. The definition of the disposition code will be changed to conform.
47	Reply to Duplicate Admission Query. HCFA replied based upon a prior query. There is only one admission on HCFA's records. Treat as any other approval. An "L" trailer code containing the original disposition code is furnished.	Since open items will no longer be kept, HCFA will not identify duplicate queries. Eliminate code.
49	Rejection. HCFA cannot delete the admission because there is no matching admission on the file and an interim bill has been posted. The data submitted are shown on the reply.	Since HCFA will no longer keep admissions, this code will be obsolete. Eliminate code.

Trailer Code G	Lifetime Reserve Benefit Days. This trailer is furnished when the number of lifetime reserve benefit days remaining are fewer than 60 as of the last recorded date of discharge or interim bill. It is given only when one or more lifetime reserve days have been used.	Since lifetime reserve days are eliminated, eliminate trailer.
Trailer Code L	Original Disposition Code. This trailer is furnished with a disposition code 47 reply (which is a reply to a duplicate admission). The purpose of the L trailer is to give the disposition code that was furnished in the original response.	Since code 47 replies are eliminated, eliminate trailer.

REPLY FORMAT

Type 1 reply.--The example below is a typical reply to a hospital notice of admission. The list of data beneath it explains what each item of data means.

1.01212.021102011D.01.081581.00.00.190.150.100.00001.2.3.0000.0766.
.0766.00.

Reply Code
Intermediary #
HICN
Disposition Code
* Date of Admission
* Hospital Days (Full)
* Hospital Days (Co-Pay)
Psychiatric Days
* SNF Days
HHA Visits Part A
* In-Patient Hospital Deductible
Part B Deductible
Blood Deductible
* Last Discharge Date
Part A Effective Date
Part B Effective Date
* Year Benefit Period Began

o The query reply format remains the same. However, the fields annotated with an asterisk change in the following manner:

Hospital days (full) - will be zeroes.

Hospital days (co-pay) - will be zeroes.

SNF Days - will contain the number of SNF days remaining for the calendar year up to a maximum of 150.

Inpatient Hospital Deductible - will contain a met/not met indicator in the fifth position of the field. A "1" denotes met, a "2" not met. The first four positions of the field will be zeroes.

Last Discharge Date - will be zeroes.

Year Benefit Period Began - will be zeroes.

All other fields remain the same.

H. UNIBILL.--The UNIBILL format and data set remain the same with one exception. If you are sending an inpatient hospital bill without deductible because you know the deductible was previously taken on a stay for which the bill has not been processed by HCFA, code the bill with a "B" in field 65. HCFA will process the bill without deductible and diary the bill. If the bill taking deductible is not processed at the end of six months, HCFA sends the intermediary submitting the bill with the B in position 65 an L1001 to collect the deductible. If you are sending UNIBILL for a SNF stay where the beneficiary's eligibility to SNF benefits after 1988 is dependent on an admission after 1988, this admission must be reflected on UNIBILLS.

Some fields will be edited differently. A summary of UNIBILL processing changes follows:

Code	Change
	Consistency Edits
1503	Qualifying hospital stay not within 30 days of SNF admission. Will no longer apply.
2301	Utilization days over maximum for a spell. Hospital days maximum will go from 150 to 365 (366 in leap year). SNF days maximum will go from 100 to 150 (30 to 45 for Christian Science).
2501	Coinsurance days exceed maximum. Will no longer apply to hospital bills, except psychiatric hospital bills which will be 190 days maximum. It will apply to SNFs, but 8 days maximum (instead of 80) will be permitted. (45 will be permitted for Christian Science SNF).
2502	Coinsurance days exceed utilization days. Will no longer apply to hospital bills - only SNF.
2503	Full days overutilized. Will no longer apply to hospital bills - only SNF. SNF maximum will be 142.
2504	Coinsurance rate is incorrect. Will no longer apply to hospital bills - only SNF.
2505	Coinsurance rate exceeds applicable rate. Will no longer apply to hospital bills - only SNF.
2506	Coinsurance amount missing. Will no longer apply to hospital bills - only SNF.

2507	Coinsurance days plus lifetime reserve days exceeds days on statement covers period. Will no longer apply.
2508	Coinsurance days or lifetime reserve days have been applied for utilization days for billing dates after 12/31/88.
2601	Lifetime reserve days exceed 60. Will no longer apply/
2602	Lifetime reserve days shown, but no amount shown for lifetime reserve coinsurance. Will no longer apply.
2603	Lifetime reserve rate exceeds maximum for applicable period. Will no longer apply.
2604	PPS bill containing lifetime reserve days does not include a day outlier. Will no longer apply.
28X3 - 28X5	Date of guarantee of payment began....Will apply to inpatient psychiatric hospital only.
28x6	Date of guarantee of payment is earlier than date benefit exhausted. Will apply to psychiatric hospital only.
28x7	Date of guarantee of payment began + utilization days - (coinsurance days + nonutilization days) cannot exceed statement covers period. Will apply to psychiatric hospital only and coinsurance days will be removed.
28x0	Benefits exhausted - this date is outside the "statement covers date". Will no longer apply to hospital bills (will apply to SNF and inpatient psychiatric).
28xA	Utilization days are greater than number of days from date to date benefits exhausted. Will no longer apply to hospital bills. (SNF or inpatient psychiatric only).
28xC	Date benefits exhausted - a date is shown for other than Part B I/P bill. Will apply only to inpatient psychiatric hospital.
33x1	Qualifying stay dates. Will be eliminated.
33x2	Qualifying stay dates. Will be eliminated.
33x3	Qualifying stay dates. Will be eliminated.
33x4	Qualifying stay dates. Will be eliminated.

94C3	Utilization days plus days used exceed 150. Will be (for psychiatric raised to 190. Will not be applied to inpatient hospital.
9904	Occurrence span code 70 - qualifying stay dates not present. Will be eliminated.

Utilization Edits

The following utilization edits will be modified or eliminated when catastrophic is implemented.

5500	Inpatient days overutilized. Will not apply to hospitals.
5501	Underutilized full coverage days. Will no longer apply.
5510	Overutilized coinsurance days. No longer applies to hospitals. First 8 days per/year for SNFs. (45 for Christian Science SNF).
5511	I/P coinsurance days underutilized. Now applies to hospitals only. Will be eliminated for hospitals. Will be used for SNFs.
5520	Lifetime reserve days overutilized. No longer applicable.
5703	This bill links two benefit periods. Eliminate.
5704	Links two benefit periods. Eliminate.
5705	Noncovered stay or qualifying stay overlaps previously posted bills. No qualifying stay dates needed.
5901	Kron bill does not meet Kron bill criteria. Eliminate.

Automatic Notices

7400	See 5400.
7500	Full reimbursement days have been changed to coinsurance days where reserve days are not involved. No coinsurance days for hospitals. No lifetime reserve days. Will no longer apply. Eliminate.
7511	Part A inpatient nonlifetime coinsurance days have been increased. Can be used for SNFs only. Eliminate nonlifetime.

I. Medicare Benefit Notices, Form HCFA-1533.—Notices are still required in the same situations described in 3718. However, for discharges on or after January 1, 1989, do not include in item 2, Payment Status, either of the following:

- ($ AMOUNT) for the (XX) days of hospital care after first 60 days;
- ($ AMOUNT) for the (XX) days of skilled nursing facility care after first 20 days.

For SNF services after 1988, add the following message:

- ($ AMOUNT) for the first (XX) days of skilled nursing facility care during the calendar year.

IM 3629 Planning for Implementation of HCPCS for Hospital Outpatient Radiology Services.--

A. General.--This provides you with HCFA's current planning for implementing §4066 of the Omnibus Budget Reconciliation Act of 1987 which establishes payment limitations for radiology and other diagnostic services furnished by a hospital on an outpatient basis. That section enacted §1833(a)(2)(E) and §1833(n) of the Social Security Act.

Use this transmittal for your planning and systems development.

B. Definitions and Effective Dates.--HCPCS must be used for billing radiology services provided after September 30, 1988 and for other diagnostic procedures as soon as they are identified by HCFA. Radiology services include diagnostic and therapeutic radiology, nuclear medicine, CT scan procedures, magnetic resonance imaging services, ultra-sound, and other imaging procedures.

Although payment limitations are not required for other diagnostic procedures until October 1, 1989, be prepared to accept HCPCS for them when HCPCS is implemented for radiology services. HCFA will identify other diagnostic procedures subject to §4066. This will permit hospitals and you to make one systems redesign to handle both provisions.

C. Billing.--The billing format is similar to that for clinical diagnostic laboratory tests.

The list of acceptable HCPCS codes for radiology is taken from the CPT-4 portion of HCPCS and is included in subsection J. HCPCS modifiers are not necessary. When other diagnostic procedures are defined, you will be informed of the need for modifiers, if any.

HCPCS codes for radiology are required for the following revenue codes but may be reported with any revenue code since the payment limitation applies to charges for radiology regardless of the revenue code used and/or applicable cost center.

32x Radiology - Diagnostic
33x Radiology - Therapeutic
34x Nuclear Medicine
35x CT Scan
40x Other Imaging Services
61x MRI

For services on or after 10/1/88, if you receive a bill with one of the above revenue codes, edit it to ensure that you receive an HCPCS code within the radiology range (70000-79999). Note that 33x contains chemotherapy subcategories. Apply the edit to revenue code 333 in the 33x series.

We are instructing hospitals to:

- o Revise their chargemaster systems to include HCPCS codes for radiology or provide a crosswalk from their chargemasters to HCPCS;
- o Assign a HCPCS code to every radiology service on their chargemasters;
- o Report the HCPCS code for radiology services in Item 50 to the right of the dotted line adjacent to the revenue code;
- o Use current instructions in revenue coding level;
- o Report units for each HCPCS code in Item 52; and
- o Use bill type 13x or 83x according to whether an ASC procedure is on the same bill.

There is no need for a separate bill.

D. Unlisted Service or Procedure.--In revising their chargemasters to include HCPCS codes for radiology, hospitals may find radiology services for which a corresponding code in subsection J may not be found. These are typically services that are rarely provided, unusual, or new. Hospitals have been instructed to assign the appropriate "unlisted procedure" code from the following list to any such service:

76499	Unlisted diagnostic radiologic procedure
76999	Unlisted ultrasound procedure
77299	Unlisted procedure, therapeutic radiology clinical treatment planning
77399	Unlisted procedure, medical radiation physics, dosimetry and treatment devices
77499	Unlisted procedure, therapeutic radiology clinical treatment management
77799	Unlisted procedure, clinical brachytherapy
78099	Unlisted endocrine procedure, diagnostic nuclear medicine
78199	Unlisted hematopoietic, reticuloendothelial and lymphatic procedure, diagnostic nuclear medicine
78299	Unlisted gastrointestinal procedure, diagnostic nuclear medicine
78399	Unlisted musculoskeletal procedure, diagnostic nuclear medicine
78499	Unlisted cardiovascular procedure, diagnostic nuclear medicine
78599	Unlisted respiratory procedure, diagnostic nuclear medicine
78699	Unlisted nervous system procedure, diagnostic nuclear medicine
78799	Unlisted genitoruinary procedure, diagnostic nuclear medicine
78999	Unlisted miscellaneous procedure, diagnostic nuclear medicine
79999	Unlisted radionuclide therapeutic procedure

It is expected that the number of "unlisted procedures" will be small. Because payment limitations will not be applied to "unlisted procedures," hospitals have been instructed to forward to you by September 1, 1988 a complete list of every radiology procedure on their chargemaster to which they have assigned an "unlisted procedure" code. Included will be a narrative definition of the procedure and a description of the nature, extent and need for the procedure and the time, effort, and equipment necessary to perform it. Determine if the hospital has correctly identified the procedure as "unlisted." If not, inform the hospital of the correct HCPCS code from subsection J to assign to the procedures in the hospital's chargemaster. Where the hospital has correctly identified the service as "unlisted," refer the information reported by the hospital to the HCPCS coordinator in the RO. Initial reports are due October 1 or as soon as hospitals begin providing services for which there are no codes.

E. EMC Formats.--

1. Standard Tape Format.--Use record type 61 (Addendum A) to report outpatient services. Record type, sequence number, patient control number (if used), revenue code, HCPCS code, units and charges are required. Modifiers and dates of service are not needed. The from and through dates of the bill are included in another record in the EMC format.

2. Direct Data Entry.--Accept HCPCS codes for radiology in the same location used for clinical lab HCPCS codes.

F. Reimbursement Methodology.--The payment change for radiology services is effective for services furnished on or after October 1, 1988, and the payment change for other diagnostic procedures is effective for procedures furnished on or after October 1, 1989. Aggregate payments are the lesser of the amount that would be paid under the law prior to enactment of §4066 or a blended amount based in part on prevailing charges for the same services performed in physicians' offices in the same locality. Final payment is based upon the hospital's cost report.

For outpatient radiology services, calculate the blended payment amount according to a formula that sums the "cost proportion" and the "charge proportion."

The "cost proportion" is the amount that would be paid under the law prior to enactment of §4066, i.e., the lesser of reasonable costs or customary charges, after subtracting deductible and coinsurance.

The "charge proportion" is 62 percent of 80 percent of the prevailing charges (after application of deductible) paid to participating physicians for the same services as if they were performed in a physician's office in the same locality.

For radiology services provided October 1, 1988 through September 30, 1989, the blended amount is 65 percent "cost proportion" and 35 percent "charge proportion."

Beginning with radiology services provided on or after October 1, 1989, the blended amount is 50 percent "cost proportion" and 50 percent "charge proportion."

The payment limits for other outpatient diagnostic services do not apply until October 1, 1989. Calculate the blended payment amount by the same formula used to calculate outpatient radiology services, except that the "charge proportion" is 42 percent of 80 percent of the prevailing charges of participating physicians in the same locality or some other appropriate percentage which may be determined later. The blended amount is based on 65 percent "cost proportion" and 35 percent "charge proportion" for other diagnostic services provided on or after October 1, 1989 and before October 1, 1990; and 50 percent "cost proportion" and 50 percent "charge proportion" for such services on or after October 1, 1990.

We will furnish a computer program that utilizes records from the PS&R to determine the applicable reimbursement. This will be run in conjunction with cost settlement.

G. Coordination With Carriers.--The carrier(s) in your area will furnish you tapes containing prevailing charge amounts by HCPCS code for the radiology services listed in subsection J except for the "unlisted procedures." We will give you details later about the file structure. It will be broken out by locality (geographic area) within the State if the carrier uses different localities. The carrier will supply maps which delineate them. The prevailing charge applicable to a hospital is determined by the locality of the hospital.

H. HCFA Software Support.--HCFA will supply a closed callable subroutine to calculate the reimbursement limitation. In addition, the OCE program will be modified for September 1 implementation to include a list for radiology HCPCS codes not billable by hospitals because they are physician's services only. A new error type will be added. Other OCE interface requirements will not change, except as described in subsection I.

I. Assistance to Hospitals in Implementation.--Assist hospitals in implementation:

o Ensure that they receive the related Hospital Manual issuance as soon as it is available;

o Alert appropriate management of the billing changes required;

o Work with hospitals and carriers before October 1 to identify services for which no codes are established; and

o Use the OCE and the edit related to the revenue codes listed in subsection C to identify and report their billing errors for educational purposes during September. Do not return bills for coding errors if there is enough information for processing. Beginning October 1, 1988, return bills for necessary coding corrections. See the insert in the Outpatient Code Editor (OCE), Software Installation Guide, Fourth Revision, for instructions on how to identify errors for analysis in September 1988 and for return beginning in October 1988.

J. HCPCS Codes for Radiology.--In some instances the description of a CPT-4 code states whether a contrast agent is included or excluded. Where a hospital includes contrast media in the radiology cost center, the hospital uses the CPT-4 code with contrast. If the hospital bills the contrast agent under a cost center other than radiology, (e.g., pharmacy) the CPT-4 code without contrast is appropriate.

Hospitals should use only those codes for radiology services that are included on the following list:

Automatic Data Processing Systems Controls

3700. INTERNAL CONTROLS OVER AUTOMATIC DATA PROCESSING SYSTEMS.

It is essential that you maintain adequate internal controls over title XVIIII automatic data processing systems to preclude increased program costs and erroneous and/or delayed payments.

The following hypothetical cases illustrate the necessity for their establishment:

CASE 1: A modification of the address routine results in the address intended for a beneficiary being printed on the checks of all beneficiaries. The problem is detected after the checks have been printed but, prior to their insertion into envelopes.

The defective routine was inserted by a careless employee.

CASE 2: A modification of the address routine results in the address intended for check number 2038 being printed on check number 2037, the address intended for check number 2039 being printed on check number 2038, etc. The problem is after all the checks have been mailed.

The defective routine was inserted by a disgruntled employee.

In general, the best protection against careless or intentional error is a set of formal procedures requiring two or more individuals' involvement in each program change. Adopt safeguards as follows:

- Specific individuals or an organizational segment should have the exclusive right to authorize changes to title XVIII EDP programs. The authorization should be in writing and should describe, in lay language, the reason(s) for the change.

- Keep the source and/or object decks, as appropriate, in a locked cabinet. Grant access to a program deck on the basis of a written authorization for the program change or written statement of the emergency requirement for a change. Obtain an authorization for each emergency change as soon as possible.

- Prepare code sheets for each program change. They should be signed by the programmer making the change and the individual reviewing the change.

See Part II, Systems Security—Appendix for mandatory safeguards.

- Prepare a transmittal for each updated program deck released to the EDP operating personnel. The transmittal should include a description, in lay language, of the reason for the change.

- File all documentation in some logical manner so that it will be easy to ascertain when an improvement, correction, or other modification was made. This documentation will also facilitate pinpointing when errors were introduced, who was responsible, etc.

- Establish procedures to insure that EDP systems changes are scheduled and approved by responsible parties representing both the claims and EDP areas. These procedures should insure that the responsible parties are aware of the nature of the changes and their import.

The establishment and enforcement of these internal controls over program changes does not negate the need for audit activity to insure that the automatic data processing system is functioning properly. Continue to develop techniques for validating each EDP run.

Benefit Checks and Provider Notices

3701. MEDICARE IDENTIFICATION ON ALL WRITTEN COMMUNICATIONS.

All written Medicare communications must contain Medicare identification to distinguish Medicare claims correspondence from your private business correspondence and to establish program identity with providers and beneficiaries. The word "Medicare" must be at least as large as your own organization identification and in a location that gives it at least equal prominence. Summary vouchers and checks must contain Medicare identification as should any forms, letterheads, or envelopes which are used in the Medicare part of your operation. Any notices or letters sent to beneficiaries must be identified as Medicare. (See Part 2, § 2955, for additional guidelines on Medicare identification of written communications.)

3702. NOTICE OF PAYMENT TO PROVIDERS. (REMITTANCE ADVICE)

Make payments to providers not less often than monthly. Send a notice of payment to the provider describing the payment. Minimum data acceptable is identification of the patient, period and type of service, charges, deductions payment, and DRG if applicable. You may include additional data. The method and format of the notice is up to you. Electronic media is preferable where it is cost effective. (For notices to beneficiaries, see §§ 3717ff.)

3703. BENEFIT CHECKS.

Checks must contain the legend: "For Health Insurance--Social Security Act."

Combine payment checks wherever feasible, for all services for which payments are being made to a single provider. Combine checks for separate claims as well as separate services.

Do not combine title XVIII benefits with complementary coverage benefits in a single check. (See Part 1,§ 1412.)

3703.1 Provider Payments to the Home Office of a Chain Organization.—Reimbursement amounts for providers of a chain organization may be forwarded to a central location of the home office when it has set up a lock box or special bank account and you have secured a written assignment or other authorization from the respective provider(s) that payment may be sent to the home office. The payments must be made out in the individual provider's name and they must be made by check.

Establishment of internal controls and other related administrative details necessary to effect these payments is left to the individual contractors involved. However, be sure that the individual signing the assignment can legally bind the provider.

3703.2 Cancellation of Outstanding Checks Resulting from Contractor Follow-Up or Beneficiary Allegations.—HCFA has not set a time limit within which a benefit check must be cashed. This is due to the varied commercial practices of contractors and the banks with which they deal, as well as variances in State laws. However, with the exception of large settlement checks (see Part 1, § 1412.7A), allow at least 6 months for benefit checks to be negotiated. The following aged check cancellation procedures are recommended in disposing of checks which are outstanding beyond 6 months:

- Where an existing Medicare bank account is being terminated and a new account opened with a different commercial bank, follow the check voiding and reissuance instructions in Part 1, § 1406.2.

- Where a check is not presented for payment within 1 year from date of issue, cancel the check.

In all other instances it is within your discretion to determine when checks beyond the 6-month minimum should be cancelled. Make this determination in light of your usual practices and the commercial practices in your area.

Establish a system of contacting providers and beneficiaries to whom outstanding checks have been issued. The period for follow-up on outstanding checks should be flexible, depending upon your experience as to the normal time required for clearance of checks, e.g., when the check has been outstanding 90 days. (Contact need not be made for outstanding checks of $5 or less.) The contact should disclose why the check was not negotiated, such as non-receipt, loss, theft, destruction, etc. On the basis of the beneficiary's signed statement, the original check can immediately be voided and a duplicate issued. Do not require the beneficiary to undergo the expense of having the statement notarized. Where the beneficiary cannot be reached, do not void the check for at least 6 months.

When you learn of the non-receipt, loss, theft, destruction, etc., of a check as the result of a beneficiary-initiated report (i.e., not resulting from your follow-up), check your records to determine whether the original check is unnegotiated. If the check has not been negotiated, obtain the beneficiary's signed statement that the check was lost, stolen, etc., if you do not already have such a signed statement. Proceed to void the original and to issue a duplicate. (If the check has been negotiated, follow § 3476.)

Establish a system of control to document the cancellation of outstanding checks; e.g., annotate the beneficiary's claim file, maintenance of a cancelled check listing.

Social Security Office--Intermediary Contacts

3706. SOCIAL SECURITY OFFICE-INTERMEDIARY CONTACTS VIA FORMS HCFA-1980 AND HCFA-1938

A. Requesting Social Security Assistance.-- Form HCFA-1980 (Carrier or Intermediary Request for SSA Assistance, is a standard form for requesting social security office (SSO) assistance. Use it for requesting assistance in all cases except where arrangements with the RO require other procedures.

The HCFA-1980 is a three-part snap-out set. The original is for the servicing SSO (the SSO servicing the beneficiary), the first copy is for the parallel SSO (the SSO servicing you), and the second copy is your control copy. Submit the original and first copy simultaneously to the parallel SSO except when dealing directly with the beneficiary's servicing SSO. In this case, discard the parallel SSO copy.

When the form is sent to the servicing SSO through a parallel SSO, the parallel SSO makes appropriate follow-up requests and notifies you of any delay in replying to the request. When you send the request directly to the servicing SSO, make appropriate follow-up requests as specified by regional procedures.

B. Requests for Assistance from Social Security Offices.-- Inquiries about claims may be received from a claimant directly or via an SSO. Some SSOs use form HCFA-1938 (SSA Request for Carrier or Intermediary Assistance) for submitting claimant requests for the status of their claims, or for information about the initial determination on their claims.

When an inquiry is received on a form HCFA-1938, complete Item 13 when the SSO checks the block "Reply to this office only" in Item 12. When either of the other blocks is checked, furnish the inquirer or beneficiary, as appropriate, a written reply. Return a copy of the reply with the HCFA-1938. Return all HCFA-1938s through the parallel SSO to the requesting SSO, unless a procedure permitting direct contact has been established.

Refer requests for assistance involving service by a provider under the jurisdiction of another intermediary to that intermediary and notify the SSO in the reply section of a photocopy of the form.

Overpayments

3707. OVERPAYMENTS FOR PROVIDER SERVICES--GENERAL

The term "overpayment" as used in this chapter refers to an incorrect payment for provider services made under title XVIII and to payments made under the "guarantee of payment" provision. (See §§ 3714ff.)

Sections 3708-3708.6 contain the rules for determining liability for overpayments for items and services furnished beneficiaries.

Sections 3709-3714 contain instructions for the recovery of individual overpayment cases. Examples of individual overpayment cases are:

- o Payment for provider services after benefits have been exhausted, or where the individual was not entitled to benefits.
- o Incorrect application of the deductible or coinsurance.
- o Payment for noncovered items and services, including medically unnecessary services or custodial care furnished an individual.

Instructions for recovering the following types of overpayments from the provider are contained in Part II, §§ 2220-2231.3.

- o The provider fails to repay accelerated payments.
- o The provider fails to file cost reports.
- o You made excessive interim payments.
- o Payments on behalf of a large group of beneficiaries for noncovered services which the provider knew, or should have known, were not covered in accordance with the liability rules in §§ 3708.1 and 3708.2. (The rules on notifying beneficiaries where the overpayment was determined on the basis of a sample are in § 3710.3).

You are not liable for overpayments you make, in the absence of fraud or gross negligence on your part. However, once it is determined an overpayment has been made, the amount so determined is a debt owed to the United States Government. The Federal Claims Collection Act of 1966 requires each Federal agency to take timely and aggressive action to recover overpayments arising out of the activities of the agency.

The Medicare law contains two provisions (Sec. 1870 and Sec. 1879) dealing with liability for, and recovery of, overpayments. These provisions are reflected in §§3708 -3709.5. The following paragraphs summarize the provisions dealing with liability for overpayments to providers, and waiver of recovery of overpayments to providers and beneficiaries.

A. Overpaid Provider Not Liable Because It Was Without Fault (Section 1870(b) of the Act.)—If a provider was without fault with respect to an overpayment it received (or is deemed without fault, in the absence of evidence to the contrary, because the overpayment was discovered subsequent to the third calendar year after the year of payment) it is not liable for the overpayment; therefore, it is not responsible for refunding the amount involved. You make these determinations. This provision forms the basis for policies and instructions in §§3708, 3708.1, 3708.2, 3708.4, and 3708.6.

B. Beneficiary Liable for Overpayments to Provider Which Was Without Fault With Respect to the Overpayment (Sections 1870(a) and (b) of the Act).—If an overpaid provider was without fault, or is deemed without fault and therefore not liable for refund, liability shifts to the beneficiary. (If the overpayment involves medically unnecessary or custodial services, you may waive the beneficiary's liability for the overpayment in accordance with C below. If the overpayment does not involve medically unnecessary or custodial services, HCFA or SSA may waive recovery from the beneficiary in accordance with D below.) This provision forms the basis for the policies and instructions in §§3708.3, 3708.4 and 3708.6.

C. Contractor Waiver of Liability Where Provider and Beneficiary Are Without Fault with Respect to Overpayment for Medically Unnecessary or Custodial Services (Section 1879 of the Act).—When both the provider and the beneficiary are without fault with respect to an overpayment for medically unnecessary or custodial services, waive liability for the overpayment, i.e., take no action to recover the overpayment. This provision forms the basis for the policies and instructions in §§3708, 3708.3 and 3709.2C. (Refer to §§3432ff. for instructions regarding implementation of Section 1879.)

D. HCFA or SSA Waiver of Recovery from Beneficiary (Section 1870(c) of the Act).—If a beneficiary is liable for an incorrect payment, HCFA or SSA may waive recovery if the beneficiary was without fault with respect to the overpayment and recovery would defeat the purposes of title II or title XVIII of the Social Security Act (i.e., cause financial hardship) or would be against equity and good conscience. (Where an overpayment is discovered subsequent to the third calendar year after the year the payment was made, recovery is deemed against equity and good conscience if the beneficiary was without fault.) This section forms the basis for policies and instructions in §§3708.4, 3708.6, 3709.3, and 3709.5.

3707.1 Time Limits on Recovery of Overpayments.—There are two time limitations to consider in deciding whether to recover an overpayment. Do not recover an overpayment not reopened within 4 years (48 months) after the date of payment unless the case involves fraud or similar fault. (See §§3709.2B and 3799ff.) Do not recover an overpayment discovered later than 3 full calendar years after the year of payment unless there is evidence that the provider or beneficiary was at fault with respect to the overpayment. (See §3708.4.)

3708. DETERMINING LIABILITY FOR OVERPAYMENTS ON CLAIMS

Determine whether the provider or beneficiary is liable for the overpayment. Most payments for provider services are made to providers on behalf of the beneficiaries who received the services. In the comparatively few cases where payment is made directly to the beneficiary, liability always lies with the beneficiary. Where the provider has been overpaid, it is liable for the overpayment unless you determine that it was without fault with respect to the overpayment.

If you determine that an overpaid provider was without fault, relieve the provider of liability for the overpayment. The beneficiary automatically becomes liable, whether or not the beneficiary was at fault.

Do not make decisions concerning beneficiary fault except in the case of overpayments arising from medically unnecessary or custodial services. Waive liability if you find both the beneficiary and provider without fault, i.e., take no action to recover the overpayment. (See SS3707(3), 3709.2C, 3709.5A and 3432.) The question of beneficiary fault is considered by HCFA and SSA in deciding whether to waive recovery from the beneficiary in the case of other overpayments. (See S3709.5B.)

3708.1 Provider Liability.-- A provider is liable for overpayments it received unless it is found to be without fault. You make this determination.

Consider a provider without fault, if it exercised reasonable care in billing for, and accepting, the payment; i.e.,

- It made full disclosure of all material facts; and
- On the basis of the information available to it, including, but not limited to, the Medicare instructions and regulations, it had a reasonable basis for assuming that the payment was correct, or, if it had reason to question the payment, it promptly brought the question to your attention.

Normally, it will be clear from the circumstances whether the provider was without fault in causing the overpayment. Where it is not clear, develop the issue. (See S3708.4 for special rule where the overpayment is discovered more than 3 calendar years after the year it was made.)

3708.2 Examples of Situations in Which Provider Is Liable.--In accordance with SS3708 and 3708.1, the following are examples of situations in which the provider is liable for an overpayment it received.

A. The Provider Furnished Erroneous Information or Failed to Disclose Facts That It Knew or Should Have Known, Were Relevant to Payment of the Benefit.--This includes, among others, situations in which a provider failed to request information needed by you to identify cases in which Medicare may be secondary payer, or if it did request such information, it failed to annotate the billing form. (Providers are instructed to ask beneficiaries for, and to annotate the claims form with, information needed to help you identify cases in which Medicare may be secondary payer, e.g., information about the circumstances of the illness or injury and the availability of benefits under an insurance policy or plan.) (See §§3414.3, 3419.3, 3489.3, 3490.15, 3491.5 and 3491.7.)

EXAMPLE 1: A beneficiary was involved in a minor automobile accident shortly before entering a hospital for treatment of back pain. The provider billed an automobile no-fault insurer for the treatment. The automobile insurer refused to pay, claiming that the beneficiary's back pain was due to a pre-existing condition. The provider then billed Medicare but failed to annotate the bill that the beneficiary had been involved in an automobile accident.

Following a beneficiary appeal, the automobile insurer agreed that the treatment of this episode of pain was covered under its policy and paid benefits up to the limits of the insurance coverage for services not covered by Medicare. Later, you learned that the insurer had changed its decision and asked it to reimburse Medicare. The insurer did not pay because the insurance benefits had been exhausted. The provider is liable for the overpayment because it failed to annotate its bill to Medicare with information which would have enabled you to recover Medicare benefits paid for services related to the automobile accident.

EXAMPLE 2: A beneficiary fell in a supermarket, breaking his hip. The provider properly billed Medicare (Medicare pays in potential liability cases subject to recoupment if the beneficiary or provider later receives payment from a liability insurer) but failed to annotate the bill that the beneficiary's injuries occurred as a result of an accident other than an automobile accident. The beneficiary subsequently received a liability settlement from the supermarket's insurer, but did not refund the Medicare payments.

Several months later, you learned of the settlement but were unable to recover the overpayment from the beneficiary because he had died and left no estate. The provider is liable for the overpayment, because, at the time it submitted its bill to Medicare, it failed to furnish information needed by you to conduct the development which might have enabled you to recover the Medicare payment from the liability insurer at the time of settlement.

B. The Provider Improperly Billed Medicare Instead of Another Insurer or Plan for Primary Benefits Where It Knew, or Should Have Known, That The Other Insurer or Plan Was Primary Payer—Providers are instructed to bill other insurers as primary payers where services can be paid for by automobile medical or no fault insurance, workers' compensation, and, an EGHP in the case of working aged beneficiaries. This includes situations where the provider initially could not have known that another insurer or plan was primary payer but, after being so informed, failed to bill the other insurer or plan as the primary payer.

EXAMPLE 1: A beneficiary is referred by an employer to Park Hospital for a fracture received from a fall at work. Park knows that the employer has fewer than 20 employees so the EGHP is not the primary payer. Park checked the work-related box on the billing form affirmatively, but erroneously billed Medicare for the services. You mistakenly paid the bill. Park Hospital is at fault because it failed to bill WC as the primary payer.

EXAMPLE 2: A beneficiary was injured in an automobile accident and was hospitalized for 60 days. The treatment was covered under automobile no-fault insurance. In addition to the hospital care, the beneficiary received extensive private duty nursing care, which is excluded from Medicare coverage. In view of the total expenses incurred for treatment and the dollar limits contained in the automobile policy, it was doubtful if the automobile insurance would be sufficient to pay for all expenses related to the accident. The beneficiary, therefore, requested the hospital to bill Medicare as the primary payer for Medicare covered services.

The hospital billed Medicare as requested, and primary Medicare benefits were incorrectly paid. You later learned that the hospital services could have been paid for by the automobile insurer. The hospital is at fault because it failed to bill the automobile insurer as primary payer.

NOTE: Where there is evidence of a deliberate attempt to obtain Medicare payments to which the provider was not entitled, resolve the fraud issue in accordance with §§3450ff. before attempting recovery. However, retain any unsolicited refund which the responsible party makes.

C. Provider Receives Duplicate Payments from Medicare and Another Insurer or Plan Which Is Primary Payer, i.e., an automobile medical or no-fault insurer, any liability insurer, a WC insurer, or, under certain circumstances, an EGHP. The provider is liable for the portion of the Medicare payment in excess of the amount Medicare is obligated to pay as secondary payer regardless of which payment it received first, even if it refunded the insurance payment to the beneficiary or the insurer.

D. The Overpayment Resulted Through Misapplication of the Deductible or Coinsurance Requirement or Payment After Exhaustion of Benefits and the Provider Could Have Known From Its Own Records the Beneficiary's Utilization Status. Provider is considered liable if it received a remittance record within the 60 days preceeding billing indicating deductible and benefit status. This condition is considered met where, within the 60-day period preceding the admission that gave rise to the overpayment, the beneficiary had been a patient in the same institution or the provider could have known the beneficiary's utilization status from its own records.

The provider is expected to ask the beneficiary, or the person acting on his behalf, at the time of admission if he received inpatient services in a hospital or SNF within the past 60 days, and note the response on its records.

If you refer such an overpayment to HCFA as uncollectible, include this information in Item 11 of the form HCFA-2382. (See §3712.2, Item 11.)

EXAMPLE: John Doe entered University Hospital on January 10, 1985. After using all of his benefit days, including lifetime reserve days, he returned home, but reentered the same hospital in fewer than 60 days and stayed an additional 30 days. University Hospital neglected to check its records and billed you for 30 days of inpatient hospital care. You made payment. Subsequently, the overpayment was discovered. Since the hospital should have known from its own records that John had exhausted his benefit days, seek recovery from the hospital.

If the previous stay had been in a different hospital, or if more than 60 days had elapsed between the end of the first stay and the start of the second stay but the benefit period had remained unbroken because John had been in an SNF or a different hospital, consider University Hospital "without fault." In this latter situation, the hospital would not have been able to ascertain from its own records that benefit days had been exhausted. Seek recovery from the beneficiary.

E. The Overpayment Was Due to a Mathematical or Clerical Error, e.g., an error in calculation by you or the provider, or overlapping or duplicate bills. Mathematical error does not include a failure to assess properly the coinsurance and deductible. Determine the liability for coinsurance and deductible overpayments in accordance with D. above.

F. The Provider Does Not Submit Documentation to Substantiate That Services Billed to the Program Were Covered.

G. The Provider Does Not Submit Documentation to Substantiate That It Performed the Services Billed to the Program Where There Is a Question as to Whether the Services Were Performed. (See §§3450ff. if fraud is suspected.)

H. The Beneficiary Was Not Entitled to Part A Benefits and the Provider Had Reason to Believe That the Beneficiary Was Not Entitled to Such Benefits, e.g., the SSO notified the hospital that the individual was not entitled to hospital insurance benefits.

I. Medicare Paid the Provider for Noncovered Services, and the Provider Should Have Known that the Services Were Noncovered.

1. Services Other Than Medically Unnecessary or Custodial Services, e.g.,skilled physical therapy services furnished by a nonqualified physical therapist, or services rendered pursuant to an authorization from the VA. (See §3153.2.)

In general, the provider should have known a policy or rule, if:

- o The policy or rule is in the provider manual or regulations,
- o You provided general notice to the medical community concerning the policy or rule, or
- o You gave written notice of the policy or rule to the particular provider.

Generally, a provider's allegation that it was not at fault with respect to payment for noncovered services because it was not aware of the Medicare coverage provisions is not a basis for finding it without fault if any of the above conditions is met. However, there may be other circumstances which justify a finding that the provider was not at fault. Consider all of the circumstances, including such factors as whether and to what extent a coverage rule is spelled out in regulations, instructions, or in a HCFA notice, and whether an intermediary misinformed the provider about the rule, in deciding whether a provider acted reasonably in billing for and accepting payment for noncovered services. (See §3709.3D.)

2. Medically Unnecessary or Custodial Services.

Apply the criteria in §§3432ff. in determining whether the provider should have known that the services were not covered.

J. The Overpayment Resulted From Services Rendered in a Nonparticipating Portion of the Facility or in a Bed Certified for a Type of Care Other Than That Furnished.

3708.3 Beneficiary Liability.—A beneficiary is liable for:

Overpayments made to a provider which was without fault with the exception of overpayments for medically unnecessary services or custodial care where the beneficiary, as well as the provider, was without fault. (See §§3432ff.) Included are situations in which Medicare pays a provider, and a WC carrier, automobile medical or no-fault insurer or any liability insurer or EGHP pays primary benefits to the beneficiary for the same services.

Payments made under the "guarantee of payment" (see §§3714ff.),

Overpayments made to the beneficiary.

3708.4 Liability for Overpayments Discovered Subsequent to Third Calender Year After the Year the Payment Was Approved.-- The law prescribes special rules which apply when an overpayment is discovered (i.e., it is determined that a "payment was incorrect") subsequent to the third calendar year after the year in which the claim was approved. Under these rules, deem an overpaid provider without fault without further development, in the absence of evidence to the contrary, i.e., if there is no indication that the provider was at fault. (This provision provides limited relief to providers since, in most cases, the facts that bring to light the overpayment are a sufficient basis for determining whether the provider was at fault.) Where the beneficiary is liable, HCFA will waive recovery if the beneficiary is without fault. A provider is not deemed without fault with respect to overpayments for noncovered services which are part of a pattern of billing for similar services. In such cases, initiate any necessary development to establish whether the provider was without fault.

See §§3709.3A, 3710.3C, 3710.4B, and 3712.4 for the processing of overpayments discovered subsequent to the third calendar year.

If information indicating the provider was at fault comes to your attention without development within 4 years (i.e., 48 months) after the date of the initial determination (the 4-year time limit on reopening described in §§3799ff.) your determination may be revised. After 4 years, your determination may be reopened only in cases involving fraud or similar fault. (See §3709.2B.)

NOTE: Where Medicare makes conditional primary payments and a WC plan, automobile medical or no-fault insurer or any liability insurer or EGHP subsequently pays primary benefits for the same services, HCFA does not waive recovery solely because the other insurer or plan made its payment subsequent to the third calendar year after the year in which the Medicare primary payment was approved.

The statutory language dealing with this waiver provision indicates that it applies only to determinations that a Medicare payment was "incorrect." Since conditional Medicare payments are correct payments, (which are recovered when another insurer reimburses the provider or beneficiary for the same services) they are not subject to this waiver provision.

Similarly, the 4-year limit on reopening does not apply where another insurer makes payment more than 4 years after a Medicare conditional primary payment was made. The 4-year limit on reopening pertains only to the Government's right to change a determination or decision. Since a conditional Medicare primary payment is a correct determination (and remains correct even after the conditional payment is recovered), a Medicare conditional primary payment may be recovered without regard to the 4-year reopening limit when another insurer, primary to Medicare, makes payment.

3708.5 Limitations on Charging Without Fault Beneficiary Where Overpayment for Medically Unnecessary Services or Custodial Care is Discovered Subsequent to the Third Calendar Year.—Where an overpayment to a provider for medically unnecessary services or custodial care is discovered subsequent to the third calendar year after the year in which the payment was approved, the provider is prohibited from charging the beneficiary or any other person for the services notwithstanding the fact that the provider has refunded the overpayment if:

- The provider was at fault with respect to the overpayment; and

- The beneficiary was without fault with respect to the overpayment. (Where the overpayment is discovered in, or before, the third calendar year, an "at fault" provider is not prohibited from charging the beneficiary for if it has refunded the overpayment. However, a without fault beneficiary who pays an at fault provider's bill for medically unnecessary services or custodial care, can be indemnified in accordance with §§3446ff.)

3708.6 How to Determine the Third Calendar Year After the Year the Payment Was Approved. -- Only the year the payment was approved and the year it was found to be an overpayment enter into the determination of the 3-calendar year period. The day and the month are irrelevant. With respect to payments made in 1985, the third calendar year thereafter is 1988. For payments made in 1986, the third calendar year thereafter is 1989, etc. Thus, the rules apply to payments approved in 1985 and discovered to be overpayments after 1988, to payments approved in 1986 and discovered to be overpayments after 1989, etc.

3709. RECOVERY-- GENERAL

After you have established who is liable for an overpayment, undertake recovery action as soon as possible, provided the overpayment is not one of the situations listed in § 3709.2, or 3709.3. See §§ 3710ff. for recovery from providers, and §§ 3711ff. for recovery from beneficiaries.

3709.1 Offset of Overpayments Against Other Benefits Due.--

A. Benefits Payable Under Part B.-- Where you determine that a Part A overpayment has been made to a provider on behalf of a beneficiary, ascertain whether the beneficiary is entitled to any Part B payment for the services in question. (See §3110.) If it appears that Part B benefits are payable, arrange for billings under Part B. Use any Part B benefit as an offset against the Part A overpayment.

B. Use of Lifetime Reserve Days.-- If a Part A overpayment for which a beneficiary is liable was caused by payment for services rendered after exhaustion of benefit period days, reduce the amount of the overpayment by the application of his lifetime reserve days, unless the individual elected not to use them. An individual who has been overpaid for services rendered after exhaustion of benefits can elect not to use reserve days only if he refunds the overpaid amount. (See § 3106.2C.)

3709.2 When You Do Not Attempt Recovery Action and Do Not Refer the Case to HCFA.—

A. Total Overpayment Less Than $50. The cost of recovering such a small amount ordinarily exceeds the amount recovered. However, accept unsolicited overpayment refunds regardless of the amount. If an individual owes several small overpayments, each of which is less than $50, consider the aggregate amount owed for purpose of this tolerance. Thus, if the overpayments total $50 or more, recover the amount even though each individual overpayment is less than $50.

B. You Have Not Taken Action to Reopen the Payment Decision Within Four Years (48 Months) After the Date of the Initial Payment Determination.-- Unless fraud or similar fault is present, a payment determination may not be reopened where you have not taken some action (which can be documented) questioning the correctness of the determination within 4 years (48 months) after the date the initial determination was approved. (See §§ 3799ff. for policies governing the reopening and revision of decisions to allow or disallow a claim.)

C. Payments to Providers for Medically Unnecessary Services or Custodial Care Where Waiver of Liability Applies.—Where both the beneficiary and provider were without fault (see §§3432ff), waive liability for the overpayments.

3709.3 When You Do Not Take Recovery Action In Beneficiary Cases but Refer Cases to HCFA for Waiver of Recovery Consideration.--

Subject to § 3709.2, refer the following overpayment cases to HCFA for consideration of waiver of recovery from the beneficiary following the instructions in § 3712ff. Note especially, the annotation and information required by § 3712.4. These are cases in which the beneficiary is liable and the criteria in §3709.5B for waiver of recovery from the beneficiary are likely to be met, i.e., it appears from the circumstances that the beneficiary was without fault and that recovery is against equity and good conscience or defeats the purpose of the Medicare program (i.e., cause the individual financial hardship). HCFA makes the waiver determination. If HCFA decides that the information available does not justify waiver, it returns the case for normal recovery efforts from the beneficiary.

A. Overpayments Made to Without Fault Provider:--For noncovered services other than medically unnecessary services or custodial care. (See 3709.2C for overpayments to without fault providers for medically unnecessary or custodial care.);

Discovered subsequent to the third calendar year after the year the payment was approved regardless of the cause of the overpayment. (See §3712.4 for special information to include on Form HCFA-2382.)

B. Overpayments to Beneficiaries for Noncovered Services (including overpayments for medically unnecessary services or custodial care).

C. Overpayments to Beneficiaries for Other Than Noncovered Services Discovered Subsequent to the Third Calendar Year After the Year Payment Approved.--(Recovery from a without fault beneficiary is waived if the overpayment was discovered after the third calendar year, per §3708.4.)

D. Overpayments Which Resulted From Misinformation From an Official Source Concerning the Medicare Law or Regulations.--For example, where it is determined that the provider was without fault because it relied on incorrect advice from an intermediary or HCFA concerning the coverage of services.

NOTE: This paragraph does not apply to overpayments resulting from an incorrect query reply concerning a beneficiary's Part A utilization status or Part B deductible status. An incorrect query reply is not considered "misinformation" for this purpose.)

E. Overpayments to Providers or Beneficiaries for Items and Services Rendered During a Period When SSA Records Showed that the Beneficiary Did Not Have Medicare Entitlement.-- See §§ 3711.11A & 3712.4 for processing of overpayments from lack of Medicare entitlement.

F. Effectuation of an Appeal Decision Results in Overpayments for Subsequently Furnished Services.--In some cases, effectuation of a reconsideration, ALJ, AC or Court decision favorable to the beneficiary results in an overpayment to a provider that furnished subsequent services. Such overpayments result, for example, where effectuation causes days previously paid for as full days to become coinsurance days, coinsurance days to become lifetime reserve days, or lifetime reserve days to become "no payment" days. (See § 3787.) In accordance with § 3708.2B, the overpaid provider is not liable since it had no reason to question the beneficiary's entitlement to benefits.

G. Overpayments for Services Which Should Have Been Paid for by Another Insurer or Under Another Government Program, e.g., Medicaid or WC, and the Time Period for Claiming Benefits from the Other Program Has Expired.

H. Overpayments for Which a Medicaid Beneficiary Is Liable and Which the Medicaid Agency Does Not Refund, except where it is apparent from the circumstances that the beneficiary knew or should have known that the payment was incorrect.

3709.4 Recovery Where Fraud Is Suspected.—If there is reason to believe that the overpayment may have been caused by fraud, make no request for refund until the fraud issue is resolved. However, retain any amount voluntarily refunded pending resolution of the fraud issue. (See § 3468.1A.) Also, payments may be suspended with RO concurrence. (See § 3466.)

3709.5 Waiver.--

A. Waiver by You.—Where Medicare has paid a provider for services that are later determined to be not reasonable and necessary or custodial, waive liability if the provider, and the beneficiary, were both without fault, i.e., under the criteria in §3432, the parties did not know, and could not have been expected to know, that the items or services were not covered. Do not take recovery action on these cases and do not refer them to HCFA.

B. HCFA or SSA Waiver of Recovery.—The law provides that if a beneficiary is responsible for an overpayment, recovery may be waived by HCFA or SSA if:

- The beneficiary was without fault, and
- recovery of the overpayment would;
    - (1) defeat the purpose of title II or title XVIII of the Social Security Act by causing financial hardship for the beneficiary; or
    - (2) would be against equity and good conscience.

Consideration of waiver is normally contingent upon the beneficiary's request in response to your refund request or the request of SSA's program service center. However, see §3709.3 for cases which you refer to HCFA for waiver consideration before taking any recovery action.

3709.6 Information and Help Obtainable from the SSO.—Occasionally, it may be possible to get information or help from the local SSO. (See § 3400.) For instance, if the enrollee has moved, the SSO may know the new address; or if he has died, it may know whether the estate will be administered. If the beneficiary takes a check representing an incorrect payment to the SSO, it forwards the check to you. However, do not ask the SSO to collect, or indirectly aid in, the collection of an overpayment.

3710. RECOVERY OF INDIVIDUAL OVERPAYMENT FROM THE PROVIDER

3710.1 Participating Provider.—If you determine that an overpayment on an individual claim should be recovered from a participating provider, notify the provider in writing indicating:

- That an overpayment was made;
- The name and HI number of the beneficiary involved;
- The dates and types of services for which the overpayment was made;
- Why the payment was incorrect;
- How the overpayment was calculated;
- Why it is liable for a refund; i.e., the reasons for finding the provider at fault;
- The proposed method of recovering the overpayment, i.e., by reduction of subsequent Medicare payments due the provider (offset) or by direct refund;
- If it is proposed to recover the overpayment by offset, that the offset will be put into effect 30 days after the date of the notice.
    - If, within 30 days after the date of the notice informing the provider of the intention to offset, the provider submits a request for reconsideration or hearing, or otherwise protests the offset, make an effort to conclude the appeal procedure before the deadline for effectuation of the offset, i.e, the 30th day after the date of notice. However, begin offset 30 days after the initial request for refund, regardless of the status of any appeal request.
- If the overpayment was for medically unnecessary services or for custodial care, and the beneficiary was without fault, and the provider collects the amount of the overpayment from the beneficiary:
    - The beneficiary can be indemnified for this amount by the program and the amount charged to the provider as an overpayment; and
    - The provider has a right to a reconsideration of the decision on coverage of the overpayment, provided it requests it within 60 days of the date of the notice. (See § 3432.2B.)
- If the overpayment was for medically unnecessary services or custodial care and was discovered more than 3 calendar years after the year in which the payment was approved, and the beneficiary was without fault (see §3708.5), the provider is prohibited by law from charging the beneficiary.

3710.2 Provider No Longer Participating.--If the provider is no longer participating in the program (and the provider is not involved in bankruptcy proceedings), recover an overpayment on individual claims in accordance with the following. (See Part II, § 2760, for handling overpayments to providers involved in bankruptcy proceedings.)
If the provider's final cost report has been received, but the final cost settlement has not been completed, adjust the cost report statistics (HI days and HI charges) to properly reflect the amount of the overpayment and notify the provider of the adjustment and the reasons. Include in the notice to the provider appropriate data outlined in § 3710.1

If final cost settlement has been effected and no further funds are due or owing by the provider, send no more than two written requests for refund 30 days apart. They contain appropriate information outlined in §3710.1. In the second refund letter state that if the overpayment is not refunded, HCFA will refer the overpayment to the Dept. of Justice for collection.

If the provider does not make the refund within 30 days after the second request, refer the overpayment to RO for further recovery efforts as required by Part II, § 2227. Referrals to RO consist of a covering letter containing the information and attachments listed below.

Information required:

- An explanation that the letter pertains to an uncollected overpayment due from a provider no longer participating, that the provider's cost report had been received and settled, and that no other monies are due to, or from, the provider;

- The provider's name, address and provider number; and

- The appropriate information outlined in § 3710.1..

Documentary attachments:

- Copies of the original and corrected billing forms;

- Copies of the initial and followup letters sent to the provider; and

- Copies of any other relevant documentation; e.g., the provider's replies to the recovery letters.

If you have completed the final cost settlement of the provider's final cost report (or if the provider has failed to submit its cost report) and have sent the case to the RO for further collection efforts, notify the RO of the overpayment on the individual beneficiary's claim. Identify the adjustment(s) to be made to the cost report statistics in a format which can be used as documentation for the case file.

(If you are preparing to send such a cost overpayment case to the RO, include the individual overpayment in the aggregate overpayment case file.)

Make clear to the RO that it pertains to an uncollected overpayment due from a provider no longer participating, that you have completed the final cost settlement of its final cost report (or that the provider has failed to submit one), and that you have previously sent the case to the RO for further collection efforts. Include the same information required in the notice to HCFA and specify the adjustment(s) to be made in the cost report data.

If you have sent the case to the RO, notify the provider of the overpayment--but only with the approval of the RO since legal action is being taken by the Government. If you have RO approval, your notification to the provider contains appropriate items listed in § 3710.1. Indicate that an upward adjustment will be made to the cost report overpayment which had been referred to the RO for collection.

3710.3 Notification to the Beneficiary When Recovery Is Sought from the Provider.—A notice to the beneficiary is required whenever recovery is sought from the provider.

Include in the notification to the beneficiary a copy of the letter sent to the provider unless the letter to the provider refers to matters which do not concern the particular beneficiary; e.g., where the provider was overpaid on behalf of more than one beneficiary.

Where overpayments to a provider have been determined by means of a sample study, send a notice only to the beneficiaries identified in the overpayment notice sent to the provider as individuals on whose behalf the provider was overpaid a specified amount. Do not send the notice to the beneficiaries until it has been established that recovery action will be taken.

The notice to the beneficiary should contain the following:

- o The name and address of the provider and dates of service for which the overpayment was made.
- o A clear explanation of why the payment was incorrect.
- o A statement that the provider had been requested to refund the overpayment and, if the provider is liable for medically unnecessary services or custodial care, the following additional information, as applicable:
- o If the error is discovered subsequent to the third calendar year after the year the payment was approved, and the other conditions described in § 3708.5 apply, advise the beneficiary that the provider is prohibited, by law, from requesting payment for the services; or

- o If the beneficiary is determined to be without fault state that if the provider collects payment from the beneficiary for such services, the beneficiary has the right to request you to indemnify him for the amount of such payment, less any applicable deductible and coinsurance, and that any indemnification paid the beneficiary will be recovered from the provider. (See §§3446ff.).

- o In all other cases, that the Medicare law does not prohibit the provider from requesting the beneficiary to pay.

An explanation of the beneficiary's appeal rights. (See §3799.15.) Do not mention waiver in the notice of recovery to the beneficiary since there is no provision for waiver when the provider is liable for the overpayment.

3710.4 Sample Letter to Beneficiary Where Recovery Is Sought From Provider.--

Dear _______________:

In (month and year), we made a payment to (provider name and location) on your behalf for services provided you from _______ to _______.

We have reviewed the payment and determined that the services were not covered under the Medicare program. (Explain as clearly as possible the reason why all, or part, of the payment was erroneous. Use the stock paragraphs in §§ 3722ff. where appropriate.)

Use either A, B, or C as appropriate:

A. Provider Liable (In Accordance with §3432.2B) for Medically Unnecessary or Custodial Care Services.-- We have determined that you had no knowledge or any way of knowing that the services you received from _____ to _____ were not covered under the Medicare program. However, the records show that (provider's name) did have knowledge that such services would be considered noncovered. When this situation occurs, the law requires that the liability for these noncovered services be transferred to the provider of services.

We have determined that you are not responsible for the charges billed by the (provider's name) for the period from _____ to _____ except for deductible or coinsurance amounts that apply or any charges for other services or items not covered by Medicare. If the (provider's name) obtains payment from you for the services at issue, reimbursement can be made to you for the amounts paid, less any applicable deductible or coinsurance amounts, and such reimbursement paid to you will be recovered from the provider. To obtain this reimbursement, please advise this office and enclose the following documents:

- o A copy of this notice.

- o The bill you received for the services, and

- o Your receipt for payment to the (provider's name), or any other evidence showing that you have paid the (provider's name) for the services at issue.

B. Provider at Fault and Beneficiary Not at Fault for Medically Unnecessary or Custodial Services and the Overpayment Discovered Subsequent to the Third Calendar Year After Year Payment Was Approved.-- (See NOTE in § 3708.4.) (Provider's name) has been requested to refund this overpayment because it has been found to be at fault in causing it. Under the Medicare law, (provider's name) is prohibited from billing you, or any other source, for these noncovered services. If (provider's name) sends you a bill for these services, send it to us with a copy of this letter.

C. All Other Cases.-- (Provider's name) has been requested to refund the overpayment because it has been found to be at fault in causing it. Since the above services are not covered by Medicare, (provider's name) may ask you to pay for them. However, if you are billed, this is a matter between you and (provider's name) and will not affect your entitlement to future Medicare benefits in any way.

The notification of appeal rights should be in accordance with the reopening rules in §3799.15.

3711. RECOVERY WHERE THE BENEFICIARY IS LIABLE FOR THE OVERPAYMENT

When you have determined the beneficiary to be liable for the overpayment, initiate recovery efforts in accordance with the following sections, as appropriate.

3711.1 Recovery Where Beneficiary Covered Under Medicaid or Another Health Insurance Plan, Private or Governmental.—When the beneficiary carries supplemental health insurance or is covered by another Government health benefits program such as Medicaid, CHAMPUS, CHAMPVA, or the Federal Employees Health Benefits Program, it may be possible to recover the overpayment from the other plan or program. Payments of deductible or coinsurance amounts and payment for services rendered persons who are not entitled to Medicare are the payments most likely to be recoverable.

If, based on the circumstances of the overpayment and your knowledge of the other plan or program, you believe there is a possibility that it will refund the overpayment, attempt to recover from the other plan or program. In this connection, it may be necessary to ask the beneficiary for his policy number or other information concerning his non-Medicare coverage. (See §3416.1 for procedures to follow where the overpayment is for services that should have been paid for by a WC carrier.)

To facilitate recovery of the Medicare overpayments to the extent possible, attempt to work out mutually satisfactory arrangements with the other carrier(s). The methods listed below have been used successfully. Use any one or a combination, as you find appropriate. The most desirable method in a given situation depends upon the particular circumstances, and the provisions of the other plan or program.

- Arrange with the other plan or program for direct refund of overpayments to you. If you are the carrier under the other plan or program, a transfer of funds is the most convenient method of recovering. If another carrier is involved, send it a letter requesting refund of the overpayment. Explain how the overpayment occurred and how it was calculated. Follow up in 30 days by with another letter or a phone call if payment or a letter of explanation has not been received. If this does not bring a meaningful response, write to the President or Chief Administrative Officer of the other carrier.

- If you do not use the above method, arrange with the other plan or program to make payment to overpaid providers upon your request, (even though the provider has not billed the other plan or program) and to notify you of the payment. Upon receiving such a notice, recover the Medicare overpayment from the provider.

- Where neither of the above methods is possible, ask the provider if it would be willing to refund the overpayment and to bill the other plan or program, with the understanding that if it is unable to obtain payment the amount recovered will be refunded to the provider. If the provider does not agree to refund the overpayment before collecting from the other plan or program, ask it to bill the other plan or program and to use the payment to refund the overpayment. If you receive notice that a provider or a beneficiary plans to file a claim with another plan or program, suspend recovery efforts for a reasonable period.

best copy available

If you have questions concerning the proper approach in recovering from a welfare agency, or another insurance plan, contact your RO.

If efforts to recover the overpayment are not successful, or if you are certain that the other plan or program will not refund a particular overpayment, seek recovery from the beneficiary in accordance with § 3711.2. Explain in the notice to the beneficiary that the other plan or program will not make payment directly to you. However, if the beneficiary is a Medicaid recipient, do not attempt recovery from the beneficiary. Instead refer the overpayment to HCFA in accordance with §§3712ff. and 3709.3.

3711.2 Recovery From the Beneficiary.—Initiate recovery from the beneficiary by sending a letter containing the information in §3711.5 if the overpayment is $50 or more. (See model language in §§3711.6 and 3711.7.)

If the refund letter does not result in a refund, send a followup letter unless one of the conditions in § 3711.3 is met. If the beneficiary does not respond to the followup letter within 30 days, refer the overpayment to HCFA as uncollectable.

If the beneficiary protests following the receipt of a notification of overpayment, handle the protest in accordance with §3711.11.

Do not initiate further recovery action after referring a beneficiary overpayment to HCFA since, in most cases, the overpayment will be deducted from the individual's monthly social security or railroad retirement benefits or recovery of the overpayment will be waived. However, if payment is offered after referral to HCFA, accept the payment. Notify HCFA immediately to avoid duplicate collection efforts.

If full or partial refund is made, report the refund on the HCFA-1522, Monthly Intermediary Financial Report, Section D, Line 16b. (See Part I §1414.3e.) If the entire overpayment is not refunded, refer the uncollected portion to HCFA.

3711.3 When to Suspend Efforts to Recover From the Beneficiary Following Initial Letter.—Suspend your efforts to recover from the beneficiary if:

A. The Beneficiary Asks for a Reconsideration or Questions the Overpayment Decision.—Make no further recovery efforts until you dispose of the request for reconsideration. (See §3711.11.)

B. The Beneficiary Requests That Recovery be Waived or States Conditions that Might Qualify Him for Waiver of Recovery.—(See §3709.5 for the qualifying conditions for waiver of recovery.) If the overpayment was for reasons other than services found to be not reasonable and necessary or custodial care, refer the case to HCFA in accordance with §§3712ff. unless recovery of the overpayment is still pending with a State welfare department or other third party. If the overpayment was for services found to be not reasonable and necessary or custodial care, determine whether the beneficiary's liability can be waived in accordance with §§3430ff. and notify the beneficiary of your finding. If you determine that the conditions for waiver of liability under this provision are not met, refer the case to HCFA.

C. The Beneficiary Is Receiving Welfare Benefits.—If the beneficiary is receiving welfare benefits, i.e., cash benefits or Medicaid, ascertain whether the welfare agency will reimburse Medicare for all, or part of, the overpayment. (See §3711.1.) If it does not refund the overpayment in full, do not attempt recovery from the beneficiary. (See §3709.3F.)

D. It May Be Possible To Recover From Another Health Insurance Plan or Governmental Program.—If, after initiating recovery efforts from the beneficiary, you learn that the beneficiary is covered by other health insurance or another governmental program, ascertain whether the other plan or program will reimburse Medicare for all, or part of, the overpayment. Do not send a followup letter to the beneficiary until your efforts to recover from the other plan have been completed. (See §3711.1.)

3711.4 Computation of Overpayment When Recovery Is From Beneficiary.—Subject to the recovery limitations in §§3709.2 and 3709.3, the amount to be recovered from a beneficiary who is liable for a provider overpayment under §3708.3 is calculated as follows:

A. Providers Reimbursed on the Basis of Reasonable Cost.

1. Overpayments Due to Erroneous Payment of Cash Deductibles and/or Coinsurance Amounts.—Where the overpayment resulted because you erroneously reimbursed the provider for some or all of the beneficiary's inpatient deductible, SMI deductible, or coinsurance obligation, the beneficiary is requested to refund the amount of the actual erroneous payment. (See paragraph C, Example 1, below.)

Where the overpayment resulted from erroneous payment for unreplaced deductible blood under Part A or Part B, the beneficiary is requested to refund the amount the provider would have charged for the blood in question if it had not been paid for under Medicare. This conforms with the manner in which reimbursement is made for unreplaced blood. (See §3670, Items 40 through 43.)

2. General Rule for Other Overpayment Cases.—Where the overpayment was caused by reasons other than those specified in 1. above, the amount the beneficiary is asked to refund will be determined as follows. (See 3. below for exception.)

- Where interim reimbursement to the provider is determined on the basis of a percentage of billed charges, request the beneficiary to refund the amount of interim reimbursement incorrectly paid the provider;

- Where interim reimbursement to the provider is determined on some basis other than a percentage of charges, determine the product of the charges that were initially billed by the provider but subsequently determined to be noncovered, by the ratio which the provider's total Medicare reimbursable costs for covered services bears to the provider's total Medicare charges for covered services as reflected in the provider's cost report for the fiscal year in which the beneficiary's stay began. The beneficiary is requested to refund this amount less any applicable deductible or coinsurance amount. If the ratio for the appropriate fiscal year is unobtainable, use the ratio from the most recent cost report available. (See paragraph C, Example 1, below.)

3. Exception to the General Rule Where Medicare Payment Exceeds Provider's Customary Charges.—The beneficiary will be requested to refund the provider's customary charges for the erroneously reimbursed services (less any applicable deductible or coinsurance) in any situation where this amount is less than the amount determined under 2 above (e.g., where the provider is a public provider and is reimbursed on the basis of fair compensation because its charges to the public are nominal). This is because a beneficiary is liable for the Medicare overpayment only to the extent that he benefited from that payment.

B. Providers Reimbursed Under Prospective Payment System.

1. Overpayments Due to Erroneous Payment of Inpatient Deductible and/or Coinsurance Amounts.—Where the overpayment resulted because you erroneously reimbursed the provider for some or all of the beneficiary's inpatient deductible or coinsurance obligation, the beneficiary is requested to refund the amount of the actual erroneous payment. (See paragraph C, Example 2, below.)

Where the overpayment resulted from erroneous payment for unreplaced deductible blood under Part A, the beneficiary is requested to refund the amount the provider would have charged for the blood in question if it had not been paid for under Medicare.

2. General Rule for Other Overpayment Cases.—The beneficiary will be requested to refund the lower of the PPS payment (determined in accordance with §§2405ff of the Provider Reimbursement Manual) or the provider's customary charges less any applicable deductible or coinsurance. (See paragraph C, Example 3, below.)

C. Examples of How Much to Recover from Beneficiary.—Example 1 illustrates a case in which an overpayment was based in part on misapplication of the deductible and coinsurance amounts (§3711.4A1) and in part on payment for services after benefits were exhausted (§3711.4A2b) where the hospital is reimbursed on the basis of reasonable cost; Example 2 illustrates a case in which an overpayment is based on misapplication of the inpatient coinsurance amount where a hospital is reimbursed under PPS (§3711.4B1); Example 3 illustrates a case in which an overpayment is based on nonentitlement where the hospital is reimbursed under PPS (§3711.4B2).

EXAMPLE 1 Provider Reimbursed on Basis of Reasonable Cost:

A beneficiary is hospitalized for 20 days during 1986. The total covered charges are $7,000.

The intermediary receives and approves the bill. The query response indicates that the stay is the beginning of a spell of illness. Since the provider's interim reimbursement formula is $300 per diem, the intermediary made payment of $5,508 (20 days X $300 per day minus $492 deductible).

Subsequently, the intermediary learns that the original query response was incorrect and at the time of admission the beneficiary had only 8 lifetime reserve days available. Consequently, the provider submits a corrected bill showing $3,050 in covered charges and $3,950 in noncovered charges.

The amount which the beneficiary will be requested to refund will be calculated as follows:

1. The beneficiary's liability for the first 8 days of the stay, i.e., the period for which payment was based on misapplication of the deductible and coinsurance, is calculated as follows:

a.	amount of coinsurance which should have been applied (8 lifetime reserve days at $246 per day):	$1968
b.	amount of deductible actually applied:	-$492
c.	amount for which the beneficiary is liable:	$1476

2. The beneficiary's liability for the last 12 days of the stay, i.e, after benefits were exhausted, is calculated as follows:

a.	charges initially allowed but subsequently determined to be noncovered:	$3950
b.	ratio of provider's total Medicare reimbursable costs for covered services to provider's total Medicare covered charges as reflected on cost report for year of admission:	X 90%
c.	amount for which the beneficiary is liable (product of a and b):	$3555

3. Total amount for which the beneficiary is liable: (sum of amount determined under 1 and 2 above).	$5031

EXAMPLE 2 Provider Reimbursed Under PPS:

A beneficiary is hospitalized for 20 days during 1986. The outlier threshold is day 23. The query reply indicated that 27 days of full benefits were available, and that the deductible had been met previously. On that basis, the intermediary reimbursed the hospital its full Medicare payment rate (determined in accordance with §§2405ff of the Provider Reimbursement Manual). The intermediary subsequently discovered that at the time of admission the beneficiary had only 8 lifetime reserve days available. Therefore, the Medicare payment should have been reduced by 8 days of lifetime reserve coinsurance, or $1968 (8 X $246). That is the amount for which the beneficiary is liable. There is no overpayment due to benefits being exhausted, since an entire stay that is within the day outlier threshold is covered under PPS as long as the beneficiary has at least one benefit day remaining at the time of admission. (See §3637.1.)

EXAMPLE 3 Provider Reimbursed Under PPS:

A hospital is incorrectly paid $9,208 ($9,700 Medicare payment rate (determined in accordance with SS2405ff of the Provider Reimbursement Manual) minus $492 deductible) for services rendered in 1986 to an individual who was not entitled to Medicare. The provider had no basis to question the individual's entitlement. The provider's charges for otherwise covered services are $7,000. The individual is requested to refund $6,508, the lower of the hospital's PPS payment or its charges less the $492 deductible.

3711.5 Content of Request for Refund Letter.—Any correspondence with a beneficiary concerning an overpayment must contain a clear and complete explanation of the overpayment. An overpayment which is not clearly explained is less likely to be refunded. Furthermore, lack of clarity may deprive the individual of sufficient information to decide whether there is a basis for questioning your determination. Clarity is important because the letter may eventually be used by HCFA and SSA for further recovery attempts. Your letter and the referral form (Form HCFA 2382 are usually the only sources available to HCFA and the SSA for information regarding the overpayment.

The following is the minimum information to include in refund letters sent to a beneficiary:

- The name and address of the provider;
- Dates and type of services for which the overpayment was made;
- A clear explanation of why the payment was not correct;
- The amount of the overpayment and how it was calculated;
- A statement that the provider was without fault and that the individual is responsible for refunding overpayments where the provider was without fault;
- The refund should be by check or money order and how it should be made out (enclose preaddressed envelope);
- The refund can be made by installments (see S 3711.9);
- That unless a refund is made, the overpayment will be referred to SSA for further recovery action;
- Possible recovery from other insurance (if applicable),
- An explanation of the beneficiary's right to a reconsideration or hearing as appropriate; and
- An explanation of the HCFA/SSA waiver of recovery provisions. (See S3709.5.)

3711.6 Sample Request for Refund Letter.-- You may use or adapt the following model letter for requesting refunds of overpayments:

"Dear Mr. _________:

A. Opening Paragraph:

"In (month and year) we paid (provider's name and location) (you) $____ as reimbursement for (inpatient) (outpatient) services provided to you (from _________ through _____) (on _________). We have reviewed the payment and determined that it was incorrect. The correct payment should have been $________." Include a clear and complete explanation of how the overpayment arose (see §§ 3711.7 and 3722ff. for some suggested explanations), the amount of the overpayment and how it was calculated.)

Add if applicable: "We have recovered $_____ from (specify source). Thus, the total remaining overpayment is $_____.

B. Liability of Beneficiary.-- "Under the Medicare law, you are responsible for overpayments made on your behalf if the provider of services was not at fault in causing the overpayment. In this case, (provider's name) was not at fault. Therefore, you are liable for the $__________ incorrectly paid for the services you received."

C. Request for Refund.—"Please send us a check or money order for $____, within 30 days. Make the check or money order payable to (your name), and mail it in the enclosed self-addressed envelope. If you do not repay this amount, this overpayment will be referred to the Social Security Administration (or Railroad Retirement Board) for further recovery action which, among other actions, may result in the overpayment being deducted from any monthly social security (or railroad retirement) benefits to which you may be entitled.

D. Installment Payments.—"If you are unable to refund this amount in one payment, you may make regular installments. To refund in installments, you are required to pay a minimum of $_____ each month for ___ months. However, we urge you to pay more each month so that this matter can be settled as soon as possible. If you prefer to repay this overpayment through installments, please notify us promptly how much you are able to pay and how often."

E. Possible Recovery from Other Insurance.—(Do not use where you have determined that the private insurer will not pay.) "If you carry private health insurance to supplement your Medicare benefits, you may be able to recover the amount of this overpayment by claiming benefits from the other plan, or (name of provider) may be able to submit such a claim on your behalf. If you plan to file a claim with a supplemental plan and use the proceeds to refund this overpayment, please let us know. If you need help in filing such a claim, please contact any Social Security office."

F. Notification of Appeal Rights.—The notification of appeal rights must be in accordance with the reopening rules in § 3799.15.

NOTE: If the overpayment was for medically unnecessary services or for custodial care, begin the first sentence of the appeals paragraph: "If you believe that this determination is not correct, or if you did not know that Medicare does not pay for these services."

G. Notification of Waiver of Recovery Provision.—"The law requires that you must repay an overpayment of Medicare benefits unless you meet both of the following conditions:

- You were without fault in causing the overpayment in that the information you furnished in connection with the claim was correct and complete to the best of your knowledge, and you had a reasonable basis for believing that the payment was correct, and

- Paying back the overpayment would keep you from meeting your ordinary and necessary living expenses or would be unfair.

If you claim that repayment will cause you serious financial hardship, it will be necessary to submit a statement to the Social Security Administration regarding your income, assets, and expenses.

"If you believe that both conditions for waiver of this overpayment apply in your case, please let us know, giving a brief statement of your reasons. You may contact your Social Security office. You will be notified if recovery of this overpayment is waived. If waiver cannot be granted, you will have the opportunity to present your case at a personal conference. The conference will be conducted by an employee of the Social Security Administration who did not participate in the initial waiver determination."

3711.7 Optional Paragraphs for Inclusion in Refund Letters.--We suggest you use or adapt the following paragraphs in explaining how the overpayment occurred.

A. Inpatient Hospital Deductible or Coinsurance Not Properly Assessed.—

1. General.—Medicare pays all costs of covered services furnished during the first 60 days of hospitalization except for the first $____ (the inpatient deductible). For the 61st through the 90th days Medicare pays all costs except for a coinsurance of $ per day. After 90 days of benefits have been used, an additional 60 lifetime reserve days are available. There is $____ per day coinsurance for each lifetime reserve day used.

2. Deductible Overpayment.—Our records show that the claim for the inpatient services you received at (provider's name) was improperly processed. Benefits were mistakenly paid for _____ days in full. However, since these were the first inpatient hospital services furnished in this benefit period, the $____ inpatient hospital deductible should have been subtracted from the reimbursement paid (provider's name) on your behalf. Thus (provider's name) was overpaid by $____.

3. Coinsurance Overpayment.—Our records show that the claim for the inpatient services you received at (provider's name and address) was improperly processed. Benefits were mistakenly paid for _____ full days (less the $____ deductible). However, since you had previously been hospitalized for ______ days at (name of provider where previously hospitalized) during that benefit period, your claim should have been processed as ____ full days and _____ coinsurance days (and/or lifetime reserve days). Therefore (provider's name) has been overpaid on your behalf for ____ coinsurance days at $____ per day and/or lifetime reserve days at $____ per day) (less $____ for the inpatient hospital deductible which was improperly applied to your claim). The total overpayment is $____.

B. Payment Made Under CW Law.—We paid $ in benefits for services furnished you by (provider's name and location) from_________ to________. However, these payments were in error since these services were covered under the (State) workers' compensation law and Medicare may not pay for services which are covered under workers' compensation. Since (provider's name) was not at fault in causing this overpayment, you are required to refund the $____ Medicare paid on your behalf. You may wish to submit the bill for these services to your employer or his workers' compensation carrier for payment under the State workers' compensation provisions.

C. Beneficiary Not Entitled to Medicare Benefits.—"The Social Security Administration's records show that you were not entitled to (specify Part A hospital insurance and/or Part B medical insurance) benefits when these services (item(s)) were furnished. Your Medicare Handbook explains the difference between Part A (hospital) and Part B (medical) insurance. The decision that you were not entitled to these benefits was made by the Social Security Administration, and not by (your name). Therefore, if you disagree with this decision, or if you have any questions about your entitlement to Medicare benefits, contact your Social Security office. If you go to the Social Security office, take this letter with you.

3711.8 Recovery Where Beneficiary Is Deceased.—Where a beneficiary who is liable for an overpayment dies, attempt to recover from such sources as State welfare agencies, or private insurance plans (see § 3711.1), or withhold the overpayment from any underpayments due the beneficiary's estate or due a surviving relative. (See §§ 3715ff.).

If the entire overpayment cannot be recovered by the above methods, send a letter (see sample below) addressed to the estate of the deceased at the address of the legal representative if known, or to the last known address of the deceased. Include the basic information in § 3711.5, but do not mention the possibility of installment payments or the possibility of offset against monthly benefits.

Do not direct recovery efforts against a person who answered a recovery letter concerning an overpayment unless it is known that the individual represents the beneficiary's estate. Do no recover by offset against underpayments payable to a provider of services or to a person (other than the beneficiary's estate) who paid the bill.

If a refund is not received within 30 days after writing to the estate, refer the case to HCFA in accordance with §§ 3712. Include any information you have about the appointment of a legal representative, copies of any correspondence with survivors or others concerning the overpayment and any instructions received for filing a claim against the estate. Annotate item 13, Remarks, of the referral form (HCFA-2382) as follows: "Expedite. Case involves deceased beneficiary." If the file contains instructions for filing a claim against the estate, mention this also.

When forwarding the overpayment to HCFA, notify any party that responded to your recovery letter that the case is being transferred to the Social Security Administration and that further recovery action will be taken by the agency.

Model Refund Request to Estate of Deceased Beneficiary (Adapt to Fit the Situation)

Estate of (deceased beneficiary) (or, if known, "Representative of the Estate of (deceased beneficiary)).

Dear Sir (or Dear M. ______________ if estate representative's name is known).

On (date) we paid (provider's name and location) $_____ more than was due for inpatient services provided to (deceased beneficiary) from _____ through ______." (Include a clear and complete explanation of how the overpayment arose (see §§ 3711.6 and 3722ff. for some suggested explanations), the amount of the overpayment, how it was calculated, and why the payment was not correct.)

Add if applicable: "We have recovered $______ from (specify source). Thus, the total remaining overpayment is $____."

If other Medicare benefits become payable to the estate and you have not refunded the incorrect payment, we will withhold the amount owed from those benefits."

Under the Medicare law, the beneficiary is responsible for overpayments made on his behalf if the provider was not at fault in causing the overpayment. In this case (provider's name) was not at fault. Therefore, the estate of (deceased beneficiary) is liable for the $___ incorrectly paid to (provider's name) for the services it furnished (deceased beneficiary).

Please send us a check or money order in the amount of $___ payable to (your name) in the enclosed, self-addressed envelope within 30 days."

If we do not hear from you within 30 days, we will be required to refer this matter to the Social Security Administration (or Railroad Retirement Board) for further recovery action.

NOTE: Undertake notification of appeal rights in accordance with the reopening rules in § 3799.15.

If you believe that (deceased beneficiary) was without fault in causing this overpayment and that recovery of the overpayment would be unfair, you may request that recovery of the overpayment be waived. Your request should include a brief statement of your reasons for requesting waiver."

3711.9 Beneficiary Wishes to Refund in Installments.—

A. General.—If an overpaid beneficiary states that he is unable to refund the full amount of an overpayment at one time, regular monthly installment payments are acceptable. The amount and frequency of the installments should be in reasonable relationship to the amount of the overpayment.

Normally, the installments should be large enough to effect recovery within 3 years; however, allow a longer installment period if the beneficiary is willing to refund at least $50 per month. In notifying a beneficiary that he can refund an overpayment by installments, specify the amount (not less than $10) and the number of monthly installments necessary to recovery the overpayment. (See § 3711.6D.)

NOTE: These provisions for repayment in installments do not apply to overpayments for which providers are liable.

Exercise care in distinguishing between a request for repayment in installments, and a request for waiver. Where a beneficiary states that he cannot afford an installment of at least $10 per month, or that he can afford installments of $10 to $50 per month but the overpayment is so large that recovery would take substantially more than 3 years, treat his statement as a request for waiver. Refer it to HCFA. Annotate Item 13, Remarks, of the form HCFA-2382 with the phrase, "FOR CONSIDERATION OF WAIVER - BENEFICIARY ALLEGES HARDSHIP."

Notify the beneficiary that his file has been forwarded to HCFA for further consideration and that he will be notified of the decision. The following paragraph is suggested for use in notifying a beneficiary:

> Because you have stated that you cannot afford to pay the monthly installment amount that we require, we have sent your file to the Health Care Financing Administration for further consideration. The Health Care Financing Administration will contact you if additional information is needed and it will also notify you of the decision made in your case.

B. Notification of Installment Schedule.—When agreement is reached with a beneficiary for refund by installments, notify him of the installment schedule. You may, at your option, ask the beneficiary to sign an installment agreement such as the one in paragraph C below. Give one copy of the agreement to the beneficiary. Retain the other.

C. Suggested Installment Agreement.--

______________________________ ______________________________

Name of Overpaid Beneficiary Health Insurance Claim Number

____

Beneficiary's Address

I hereby agree to repay my Medicare overpayment totalling $_____ to (your name), which will receive the payments on behalf of the Health Care Financing Administration. My payments will be made as follows:

DATE PAYMENT DUE (Month, Day, Year)	Amount of Payment

____

Signature of Beneficiary - Date

D. Beneficiary Fails to Remit Installments.—If the beneficiary fails to remit two installments (not necessarily consecutive), or after remitting the overdue instamments he fails to remit any subsequent installments, ask the beneficiary the reason for the lapse. If you do not receive a response within 30 days, or are informed that the beneficiary is unable to continue paying any installments, refer the case to HCFA. (If the beneficiary states that he can afford a lesser installment amount, see paragraph E below.) If you learn that the beneficiary is deceased, see § 3711.8. When referring defaulted cases, annotate the overpayment referral form (HCFA-2382) to that effect, specifying the amount of the installments which were agreed upon, and the amount refunded by the beneficiary.

E. Beneficiary Can No Longer Afford Installment Amount But Can Afford a Lesser Amount.—If the beneficiary notifies you that he can no longer afford to pay the agreed-upon installments but can afford a lesser amount, set up a new agreement, provided the new installment is at least $10 per month, and large enough to effect recovery of the remainder of the overpayment within approximately 3 years after the date of the new installment agreement. If the beneficiary cannot afford such an amount, refer the case HCFA. Annotate the overpayment referral form (HCFA-2382) as in A above.

3711.10 Recording Overpayment Cases in Which the Provider is Not Liable.—If a provider is relieved of liability for refunding an overpayment, and an adjustment bill is required in accordance with §§ 3816ff., treat the charges involved in the year-end cost report as though they were covered; i.e., make provision to assure that the overpaid amount is not recovered from the provider at the time of final cost settlement. To accomplish this, keep a record of such cases including the forms and documents listed in § 3712.1.

If you have a system capable of preventing year-end recovery from the provider, where it was relieved of liability for refunding an overpayment, an additional record of the case is not necessary.

3711.11 Beneficiary Protests.—A beneficiary's reply to a notification of overpayment or request for refund may constitute a request for reconsideration or hearing, a request for waiver or both.

A. Protests To Treat As Requests for Reconsideration or Hearing.—Consider a beneficiary's reply a request for reconsideration or hearing if the beneficiary protests the existence of an overpayment, the amount of the overpayment, or if the nature of the protest is unclear. (See B below for protests to consider requests for waiver.) Take no further recovery action in such cases until the reconsideration or hearing is completed. (See §§ 3781ff.) Tell the beneficiary that the request is being considered (or has been forwarded to the Office of Hearings and Appeals, if a hearing request) and that no action is necessary until further notice. If the overpayment case has been referred to HCFA, inform HCFA of the appeal so that recovery action by SSA may be suspended pending the results of the appeal.

If the reconsideration or hearing determination is that the beneficiary is liable for an overpayment, send the beneficiary another request for refund of the overpayment (including all information in § 3711.5), unless the beneficiary has also requested waiver. In that event, see B below. If the beneficiary does not reply within 30 days, forward the case to HCFA.

If a protest involves entitlement, refer the case to:

Health Care Financing Administration
Overpayment Section
P. O. Box 120
Baltimore, MD 21203

Annotate Item 13, "Remarks" of the HCFA-2382 in red "NONENTITLEMENT CASE - For HCFA Development and/or Waiver Consideration."

An individual may protest a Medicare overpayment determination at a local SSO. That office helps the individual to complete an appeal request. If the overpayment involves an issue other than entitlement to benefits, the SSO forwards the request using form HCFA-2649 (Part A) or form HCFA-1964 (Part B), to you. If the overpayment resulted from a decision that the individual was not entitled to Medicare during the period in which the services were rendered, the SSO uses form HCFA-561 and sends the original to its Program Service Center for a reconsideration. It sends you an informational copy so that can suspend recovery action pending the outcome of the appeal. When the reconsideration is complete, the Program Service Center sends you a copy of its determination. Either resume or terminate recovery action as appropriate. Notify the beneficiary when the recovery is terminated or resumed.

B. Protests To Treat As Requests for Waiver.—If an overpaid beneficiary protests on the grounds of hardship, or that recovery would be inequitable, treat the protest as a request for waiver even if it is filed on a form ordinarily used for requesting reconsiderations. Discontinue collection efforts and refer the case to HCFA for consideration of waiver. If the beneficiary offers evidence about his financial condition, forward it, but do not solicit such evidence. Tell the beneficiary that the overpayment case will be forwarded to the Social Security Administration and that no action is necessary until further notice.

NOTE: If the beneficiary has also requested reconsideration, conduct the reconsideration prior to the referral; and if the original decision is affirmed, advise him that the matter has been referred to SSA for consideration of his claim that refunding the overpayment would be a hardship for him and/or would be unfair.

3712 REFERRAL TO HCFA OF UNRECOVERED OVERPAYMENT CASES (INCLUDING GUARANTEE OF PAYMENT CASES).

When you determine in accordance with §§ 3709.3, 3711ff. or 3714.2 that an overpayment case is to be referred to HCFA as uncollected, address it to:

Health Care Financing Administration
Overpayment Section
P. O. Box 120
Baltimore, MD 21203

(If the Railroad Retirement Board (RRB) has jurisdiction, HCFA forwards the file to the RRB.)

HCFA (or RRB) reviews the case for correct application of program policies and, refers the case to the servicing program center for further recovery efforts or waiver consideration. When referring overpayment cases to HCFA (or RRB) include sufficient information to enable HCFA to determine how the overpayment occurred and whether it was correctly calculated.

No further recovery action is required after referring an uncollected overpayment. However, if the beneficiary refunds all, or part, of the overpayment, or appeals the overpayment decision, or requests waiver, notify HCFA promptly.

3712.1 Use of Form HCFA-2382 to Refer Uncollected Overpayments to HCFA.—Use form HCFA-2382, Intermediary Transmittal of Uncollected Medicare Overpayments, to refer to HCFA, unrecovered overpayments of more than $50 for which beneficiaries are responsible. This form with its attachments, serves a dual purpose.

- It affords a basis for a HCFA review of the overpayment, and
- It provides a summary of how the overpayment arose and was calculated for use by the Social Security Administration, or the HCFA in making further recovery efforts.

3712.2 Instructions for Completion and Distribution of Form HCFA-2382.—Send the original with appropriate attachments to HCFA. Retain a copy for your files. The following are specific instructions for completing certain items on the form.

Item 4. Beneficiary Deceased
You need make no n effort to find out whether the estate of a deceased beneficiary is being administered, but include the information under "Remarks" if it is known.

Item 5. Welfare Number
If the beneficiary is entitled to Medicaid or cash welfare benefits, enter the individual's welfare and/or medical assistance number.

Item 5. Dates of Services
Show the dates of services for which the overpayment was made. Dates are pertinent, for example, to statutory rules on coverage of services, the deductible and coinsurance amounts, and the determination of days covered by the guarantee. In (b) show the number of reserve days used because of the overpayment due to prior utilization or exhaustion of benefits. (See § 3106B.)

Item 9. Cause of Overpayment
Where the checkboxes provided in this item, plus the enclosed correspondence are insufficient to completely describe the cause of the overpayment, furnish additional information under "Remarks". (See § 3712.3.) If the "services not covered" block,explain why the services were not covered in Item 13, "Remarks," and cite the pertinent sections of this manual.

Item 10. Amount of Overpayment
Determine the amount of the overpayment taking into account § 3709.1. Explain the computation of the overpayment in Item 13 "Remarks". The explanation must be sufficient to enable the program service center to explain to the beneficiary how the overpayment was computed.

Item 11. Why Offset Not Made Against Provider
Fully explain why the provider was relieved of liability, in terms of §§ 3808ff. A mere statement that the provider was not at fault or that the overpayment was due to your or HCFA's error is not sufficient.

If the overpayment occurred because of prior utilization; i.e., because of misapplication of the coinsurance or payment for services rendered after benefits were exhausted, list the dates of all prior services rendered by the provider in that benefit period. This information should show that either:

- The beneficiary had not been a patient in this provider during the 60-day period prior to the admission which gave rise to the overpayment or
- If the beneficiary was a patient there during the 60-day period, the provider could not have known from its own records that the payment it received was incorrect. (See § 3708.2B.)

(If in the case of a utilization overpayment, the circumstances do not fit these conditions, recover from the provider.)

Item 12. Efforts to Recover
List the dates of recovery letters and any other efforts (e.g., telephone or personal contacts or offset) undertaken to recover the overpayment. State whether any part of the overpayment has been recovered and from what source. If a beneficiary's response to a notice of overpayment indicates that repayment would cause hardship, note that fact and enclose a copy of his reply.

If the beneficiary was receiving cash welfare benefits or medical assistance or is covered by private health insurance or another government plan, state what efforts you made to recover the overpayment from the welfare agency or insurance plan. If efforts were made, explain why the agency or plan did not refund the overpayment. (Attach a copy of the agency or plan's letter if the refusal was in writing.) If you made no efforts were made to recover from the welfare agency or insurance plan explain why not.

Item 13. Remarks
Use for the following purposes:

- If the beneficiary or survivor requests waiver or indicates that refund would be impossible, would be unfair, or would work a hardship, include a statement to that effect.
- Give further details concerning the information required by any other item, as necessary (particularly items 4, 9 and 10).
- Any pertinent information not provided on the form.
- Include the special annotation and information described in § 3712.4.

3712.3 Attachments to the Form HCFA-2382.—Include the following material:

- Copies of original and corrected billing forms. If the beneficiary filed the claim, include copies of any necessary supporting forms, such as emergency admission information.
- Copies of the initial overpayment letter and any followup letters informing him that he was overpaid.
- Originals of replies from the beneficiary, anyone acting on his behalf, his survivor or estate's representative.
- If the beneficiary or another party questioned the existence of the overpayment, include the disposition of the request for reconsideration and of any subsequent appeal.
- Copies of any letters you sent to insurance companies or welfare agencies requesting reimbursement. Any replies received.
- Any documentation or correspondence bearing on whether the beneficiary was at fault with respect to the incorrect payment, e.g., a letter from the beneficiary.
- Other pertinent correspondence.

3712.4 Special Annotation and Additional Information Required for the Overpayment Situations in § 3709.3.—Section 3709.3 specifies the types of overpayments to referred to HCFA for waiver consideration before undertaking any recovery action.

When referring cases under §3790.3, include (Remarks) the following:

- o The annotation: "For HCFA consideration of waiver per § 3709.3."
- o A recommendation as to whether the beneficiary was without fault with respect to the overpayment and the reason for the recommendation; and
- o If the overpayment was discovered subsequent to the third calendar year after the year of payment:
  - The date the payment in question was approved; and
  - The date the payment was determined to be incorrect. (§3708.6 explains how to determine the third calendar year after the year of payment.)

When referring overpayments caused by lack of Medicare entitlement, annotate (Remarks) in red "Nonentitlement Case - for HCFA development and/or waiver consideration.

3712.5 Refund Offered After Referral to HCFA or RRB.—After an uncollected overpayment for which a beneficiary is liable has been referred to HCFA, do not start any further action to collect the incorrect payment. In most cases either the overpayment can be deducted from the beneficiary's monthly social security or railroad retirement benefit, or recovery may be waived by HCFA or the SSA program service center (or RRB).

In the event that payment is offered after referral, accept it and notify HCFA as soon as possible to avoid duplicate collection.

3712.6. HCFA Processing of Provider Overpayments for Which Beneficiary is Liable.—HCFA refers overpayment cases for which a beneficiary is liable to the appropriate social security program service center and that office either recovers the overpayment or waives recovery. In some cases HCFA may waive recovery. The Medicare law permits waiver of recovery from a beneficiary if :

- o The beneficiary was without fault in causing and accepting the overpayment; and
- o Recovery would either be against equity and good conscience, would defeat the purpose of the Medicare program or would cause economic hardship.

If the program service center is unable to either recover or waive the overpayment, it may report it to the Department of Justice for further recovery action.

3714. GUARANTEE OF PAYMENT PROVISIONS.

A. General.—Under the guarantee of payment provisions, a hospital may be paid, under certain conditions, for inpatient hospital services furnished to a beneficiary whose eligibility for inpatient hospital benefit days has been exhausted. The guarantee provisions also apply to the 190-day lifetime limitation on inpatient psychiatric hospital services.

The guarantee of payment provisions are not applicable until the individual has exhausted his 60-day lifetime reserve days of inpatient hospital services except where the beneficiary is deemed to have elected not to use lifetime reserve days. In these cases, the guarantee of payment provision generally applies since the reserve days cannot be used. (See §§3106B and C and §§3106.2A and 2D(2); but see also §3106.2A for the exception to this rule.)

The guarantee applies only to inpatient hospital services furnished by a participating hospital, whether general or psychiatric. The guarantee does not apply to other benefits provided under the hospital or medical insurance program. The provision assures that payment will be made to a hospital, as limited by the provisions described in §§3714.1 and 3714.2, where it provides services before it becomes aware that the patient's benefits are exhausted.

The guarantee extends only to inpatient services furnished individuals who have exhausted their eligibility for inpatient hospital services as described above, and does not extend to individuals who have no coverage for other reasons, e.g., one who is not entitled under hospital insurance or whose entitlement has been terminated.

A hospital is not required to claim payments under this provision; it may look to the patient for payment. A hospital may not charge a beneficiary for services for which it is paid under the guarantee.

B. Requirements for Payment Under the Guarantee.—A hospital billing involving the guarantee of payment must be accompanied by information sufficient to justify payment under this provision. If such information is not included, request it from the hospital. Evaluate the information on the billing form and the explanation along the following guidelines:

1. Covered Services.—The services shown on the bill must be within the scope of covered services.

2. Reasonable Grounds to Believe Entitlement Existed.—There must have been reasonable grounds for the hospital's assumption that entitlement to benefits existed, e.g., the patient displayed an HI card and was identified as the proper holder of such card or the Social Security Administration office informed the hospital that the patient was insured and had reached age 65. Use the criteria in §3708.1 in deciding whether the hospital acted in good faith in assuming that the individual was entitled to inpatient hospital benefits.

3. Refund Made.—See §3401.1 for requirement that the provider refund payments received from the beneficiary before receiving payment under the guarantee.

C. Attempts to Obtain Payment From Other Third Party Payers.—If the beneficiary has other coverage which pays primary benefits for hospitalization or secondary benefits after Medicare benefits are exhausted, the hospital should seek payment from the other plan before claiming benefits under the guarantee. Every claim under the guarantee should be accompanied by an explanation of why payment for the services could not be obtained from another insurer or Medicaid.

3714.1 Application of the Guarantee When the Hospital Is Reimbursed on a Reasonable Cost Basis.

A. General.—The guarantee includes not only cases in which it is determined that benefits were exhausted prior to admission, but also cases where a beneficiary had some inpatient hospital benefits remaining at the time of admission, e.g., 2 or 3 days of remaining eligibility. Payment under the guarantee for those days after benefits are exhausted, is made at the full rate. The hospital will receive payment on the basis of reasonable cost without reduction for coinsurance.

B. Maximum Number of Days Under Guarantee.—Pay the hospital for inpatient services furnished for up to the 6th elapsed day after the day of admission. Saturdays, Sundays, legal holidays, and the first calendar day of admission are omitted in determining the 6th elapsed day. However, no payment may be made for any day after the day the hospital receives notice from the intermediary, the patient or any other source that the patient's benefits have been exhausted. Note that no payment may be made for any day which is later than the 6th day (as defined) after the admission date. If the notice is given by telephone, the date of confirmation in writing is considered the date of notification.

In determining the days covered by the guarantee, legal Federal holidays are:

New Year's Day
Martin Luther King, Jr.'s Birthday
Washington's Birthday
Memorial (Decoration) Day
Independence Day
Labor Day
Columbus Day
Veterans Day
Thanksgiving Day
Christmas Day

Exclusion of Federal nonwork days prolongs the period covered by the guarantee. When a Federal holiday occurs on Sunday, the day following is observed as a Federal nonworkday and is not counted as an elapsed day. When the holiday falls on Saturday, the previous Friday is not counted as an elapsed day. The hospital is paid for all the days of inpatient services within the guarantee period, i.e., weekends, holidays, and the day of admittance are included in computing the benefit amount due.

C. Recovery from Beneficiary of Funds Advanced Under Guarantee Provision.—Benefits paid to a hospital under the guarantee provision are subject to recovery from the beneficiary and/or third party payers in the same way as other overpayments for which beneficiaries are liable. (See § 3711ff.) The amount for which the beneficiary is liable is the lesser of the customary charges for otherwise covered services furnished during the period encompassed by the guarantee or the Medicare payment. (See §3711.4A3.)

3714.2 Application of the Guarantee When the Hospital Is Reimbursed on Prospective Payment Basis.

A. General.—The hospital receives payment under the guarantee at the full Medicare payment rate (determined in accordance with §2405ff of the Provider Reimbursement Manual) without reduction for coinsurance. The rules for determining when payment can be made under the guarantee depend upon the beneficiary's entitlement status and whether or not outlier days are involved.

B. Determining When Payment Under the Guarantee Provision Can Be Made.—

1. Nonoutlier Days.—If one or more regular benefit days is available, or if regular benefit days are exhausted and one or more lifetime reserve days is available for use under the criteria in §3106.2D(2)(b), payment is made as a regular benefit (not under the guarantee provision). If regular benefit days are exhausted at the time of admission and lifetime reserve days are not available for use under §3106.2D(2)(b) because the beneficiary is deemed to have elected not to use lifetime reserve days, payment is made under the guarantee provision. Pay for the nonoutlier portion of the stay at the full Medicare payment rate, without regard to the period of 6 elapsed days (as defined in §3714.1B).

NOTE: Where the beneficiary has no regular benefit days and no lifetime reserve days available at the time of admission, Medicare pays for the nonoutlier portion of the stay irrespective of when (after admission) the hospital receives information regarding an individual's nonentitlement since all nonoutlier days are included in the prospective payment amount which is paid under the guarantee of payment provision.

2. Outlier Days.—All regular benefit days must be exhausted and all lifetime reserve days must either be exhausted or not available for use under §3106.2D(2) before considering payment under the guarantee provision. Pay for outlier days that fall within the period of 6 elapsed days (as defined in §3714.1B). No payment can be made under the guarantee for any outlier days that fall after the date the hospital receives information regarding the individual's nonentitlement.

3. Examples.--

Example A:

A beneficiary has 12 regular benefit days and no lifetime reserve days available. He is admitted to a hospital on a Friday and is discharged on the 14th calendar day, a Thursday. Days 1 through 8 comprise the nonoutlier portion of the stay; days 9 through 13 comprise the outlier portion. In this instance, "6 elapsed days" encompasses a period of 11 calendar days. Since the beneficiary's regular benefit days do not run out before the end of this period (8 nonoutlier + 3 outlier days = 11 regular benefit days), no payment can be made under the guarantee of payment provision.

Example B:

Same facts as example A except the beneficiary has only 9 regular benefit days remaining. In this instance, days 1 through 8 (nonoutlier days) and day 9 (outlier day) are covered as a regular benefit. Days 10 and 11 (outlier days), furnished after regular benefit days have run out, may be paid for under the guarantee of payment provision since they fall within the period of 6 elapsed days (11 calendar days). No payment can be made for days 12 and 13.

Example C:

A beneficiary has 2 regular benefit days and 7 lifetime reserve days available. He is admitted to a hospital on a Friday and is discharged on the 19th calendar day thereafter. Days 1 through 8 comprise the nonoutlier portion of the stay; days 9 through 18 comprise the outlier portion. In this instance, "6 elapsed days" encompasses a period of 11 calendar days. Lifetime reserve days can be used. Days 1 through 8 (nonoutlier days) are covered by the 2 regular benefit days. Days 9 through 15 (outlier days) are covered by the 7 available lifetime reserve days. No payment can be made under the guarantee provision.

If available lifetime reserve days could not be used because the beneficiary is deemed to have elected not to use lifetime reserve days, payment may be made under the guarantee provision for days 9 through 11, outlier days that fall within the defined period of 6 elapsed days.

Example D:

The beneficiary has two lifetime reserve days available (no regular benefit days). He is admitted to a hospital for a ten day stay. The outlier threshold is day 15. Lifetime reserve days can be used. No payment can be made under the guarantee since the 2 lifetime reserve days are used to cover the entire stay.

Example E:

A beneficiary has 12 lifetime reserve days available (no regular benefit days). He is admitted to a hospital on a Friday and is discharged on the 14th calendar day, a Thursday. Days 1 through 8 comprise the nonoutlier portion of the stay; days 9 through 13 comprise the outlier portion. Lifetime reserve days cannot be used because the beneficiary is deemed to have elected not to use lifetime reserve days. In this instance, "6 elapsed days" encompasses a period of 11 calendar days which can be paid for under the guarantee.

Example F:

Same facts as example E except the beneficiary has only 9 lifetime reserve days available and lifetime reserve days can be used. In this instance, days 1 through 8 (nonoutlier days) and day 9 (outlier day) are covered as a regular benefit (not under the guarantee provision). Days 10 and 11 may be paid for under the guarantee of payment provision since they fall within the period of 6 elapsed days (11 calendar days). No payment can be made for days 12 and 13.

NOTE: No payment will be made for outlier days which fall after the date the hospital receives nonentitlement information. Thus, if the provider receives information regarding the beneficiary's nonentitlement status before the period of 6 days (as defined) elapses, payment for outlier days under the guarantee provision shall be barred. For instance, in examples B and F, if nonentitlement information had been received by the hospital within the first 9 days of the stay, no payment could be made under the guarantee. Medicare would pay for days 1 through 9 (8 nonoutlier, 1 outlier) as a regular benefit (not under the guarantee provision); no payment could be made for days 10 and 11 under the guarantee provision since no payment is permissible for outlier days that fall after the date of receipt of nonentitlement information.

C. Recovery from Beneficiary of Funds Advanced Under Guarantee Provision.—The Medicare payment rate under PPS (determined in accordance with §2405ff of the Provider Reimbursement Manual) paid to a hospital under the guarantee of payment provision is subject to recovery from the beneficiary and/or third party payers in the same way as other overpayments for which beneficiaries are liable. (See §3711ff.)

The beneficiary's liability is limited to the lesser of the Medicare payment rate to the hospital on the basis of the guarantee or the hospital's customary charges for otherwise covered services furnished during the period encompassed by the guarantee. (See §3711.4B2.) If the beneficiary remains in the hospital thereafter, the additional hospital services will not increase his liability for nonoutlier days. Also, the hospital may not charge him for continued care during the nonoutlier phase of the stay.

When a prospective payment hospital learns that a patient's Part A benefits are exhausted, it should advise him of this fact immediately if he is in day outlier status or about to enter day outlier status, since he will be liable to the hospital for his continued stay in outlier status thereafter.

3715. UNDERPAYMENTS

A. General.—The term "underpayment" refers to situations where a beneficiary to whom a Medicare benefit was payable dies before filing a claim or where he filed a claim but died before his claim was settled (e.g., a check was issued but was not negotiated prior to his death).

An underpayment situation includes a situation where the beneficiary dies prior to receiving a refund of overcollected Part B deductible amounts he paid for Part B provider services. (See § 3400B, last sentence.)

It also includes the situation where a Medicare benefit was payable to the beneficiary for covered inpatient hospital services, outpatient hospital services, and Part B services furnished on an inpatient basis by a nonparticipating hospital. These covered services may be classified as follows:

- Emergency and foreign inpatient hospital services provided by a nonparticipating hospital where the hospital has not filed an annual election to bill the program for hospital services;
- Emergency outpatient services provided by a nonparticipating hospital where the hospital has not filed an annual election to bill the program for emergency hospital services; and
- Certain Part B medical and other health services furnished by a nonparticipating hospital.

Where the patient died before the Medicare payment to him for the above services was completed, disposition of the case depends on the type of service rendered the patient and whether or not the hospital services have been paid for.

B. Services Not Paid For.—No health insurance benefits are payable after the death of the beneficiary where Part A inpatient services furnished by a nonparticipating hospital have not been paid for.

Where the case involves outpatient or other Part B services and the hospital has not received payment from the beneficiary or his estate or from another person on his behalf, pay the hospital if it agrees that the reasonable charge, as determined by you, is the full charge. This agreement may be entered in the Remarks section of the HCFA-1450. If the provider does not make this agreement, payment may be made on the basis of an unpaid hospital bill to the legal representative of the beneficiary's estate or other person who assumes the legal obligation to pay the charges. (See § 3715.8.)

An assignment executed by the beneficiary prior to his death continues to be effective after his death. Thus, where the beneficiary has assigned the right to payment for the Part B services prior to his death, you may reimburse the provider.

C. Persons Entitled to Receive Payment on Paid Bills After Patient's Death.--Where the services in subsection A. have been paid for, but the beneficiary died before the Medicare payment to him was completed, the person(s) who paid for the services has the first right to any Medicare payment due. If the services were paid for by the beneficiary or from funds of his estate, pay the legal representative of his estate.

If the person who paid for the services is other than the beneficiary and is deceased or if the deceased beneficiary paid the charges and no legal representative has been appointed, pay certain survivors of the beneficiary in the following order of priority (more detailed definitions of the various degrees of relationship are contained in §3715.6):

1. Surviving spouse who was either living in the same household with the beneficiary at the time of his death or was entitled to monthly social security or railroad retirement benefits on the same earnings record for the month of his death;

2. Child or children of the beneficiary who were entitled to monthly social security or railroad retirement benefits on the same earnings record for the month of his death;

3. Parent or parents of the beneficiary who were entitled to monthly social security or railroad retirement benefits on the same earnings record for the month of his death;

4. Surviving spouse of the beneficiary who was not living in the same household with him at the time of his death, and was not entitled to monthly social security or railroad retirement benefits on the same earnings record for the month of his death;

5. Child or children of the beneficiary who were not entitled to monthly social security or railroad retirement benefits on the same earnings record for the month of his death;

6. Parent or parents of the beneficiary who were not entitled to monthly social security or railroad retirement benefits on the same earnings record for the month of his death.

NOTE: If the charges were paid by someone other than the beneficiary and that person died before the Medicare payment to him was completed, do not pay such person's estate. Nor does the right to payment pass directly to the legal representative of the beneficiary's estate. Pay a surviving relative of the beneficiary in accordance with the six priorities above. If none of the relatives listed survive, pay the legal representative, if any, of the beneficiary's estate.

If no person survives who meets the above requirements, payment may not be made. Furthermore, if a person higher on the priority listing is unavailable or his whereabouts are unknown, do not pay a person in a lower priority. Under this same principle, a person may not waive his right to claim the benefit in favor of a person in a lower priority.

3715.1 Development of Underpayment Claims--

A. Action on Receipt of Notice of Death.--Where notice of the beneficiary's death is received before his claim has been processed to completion (i.e., the claim is still in processing or an unnegotiated check has been returned), check your records and contact the hospital or other sources for information regarding the type of service rendered, whether or not the services have been paid for, and if paid, the name and address of the person who paid.

If the case involves Part B services for which the hospital has not received payment, advise the hospital how to claim the payment. (See § 3715B.) Where the hospital bill has been paid, develop a claim for the underpayment (or request SSO assistance) subject to the tolerance in subsection D. Where the hospital bill remains unpaid, the hospital does not want to file a claim , and someone has assumed or wishes to asume a legal obligation to pay the charges, develop a claim for underpayment (or request SSO assistance) and obtain a statement of assumption of legal obligation in accordance with § 3715.8, subject to the tolerance in subsection D.

B. SSO Development.--Most underpayment claims are developed in an SSO, and as a result, a claim is filed by the qualified person. Thus, if the SSO has assisted in the development of the case, you may assume that the claimant meets the necessary qualifications to receive the underpayment.

C. Requesting SSO Assistance.--Where a claimant contacts you and further information is needed (see also subsection D. below), SSO assistance may be sought. To enable it to obtain sufficient information to determine the proper payee, furnish SSO with all pertinent lead information and specify what is needed to complete the case. For example, indicate the type of service involved, whether the services have been paid for, whether it is known who paid for the services, etc., and what action has already been taken (e.g., a check was issued on a receipted bill and was returned; a widow has submitted a claim on a paid bill but it is not known whether there is a legal representative or whether she was living with the deceased or is entitled to monthly benefits on the same earnings record).

D. Tolerance Rule.--Do not routinely request underpayment development where the amount payable is less than $50. However, where a claim for the underpayment is received, process it regardless of the amount.

E. Returned Check.--If an unnegotiated check is returned by an individual who is also claiming the underpayment or requesting information about how to do so, follow subsection A.

If a check is returned by the Post Office Department marked "Addressee Deceased", etc., and there is no accompanying request for the underpayment, void the check and take no further action if the underpayment is less than $50. If a claim is later filed, process it regardless of the amount. If the underpayment is $50 or more, request SSO assistance.

F. Determination of Relationship.—Although in most cases the person qualified to receive the underpayment is readily apparent, decisions of relationship are governed by the social security law. Refer complex questions to an SSO for development and/or resolution. However, the case need not be routinely referred for verification of the claimant's allegations that he or she is the relative or other person qualified to receive the underpayment and that no one survives in a higher priority are not contradicted by information in file. For example, if the beneficiary had submitted a claim on a paid bill prior to his death, payment may be made to the legal representative without referral to the SSO if the requirements of § 3715.4 are met. Similarly, a claim filed by a widow can be processed without SSO assistance if it is apparent that she lived at the same address with the beneficiary at the time of his death (or is entitled on the same earnings record) if she states in writing that there is no legal representative of the estate and there is no reason to question her statement.

G. SSA Responsibility for Settling Disputes.—In the event of conflict in the evidence, the Social Security Administration has the responsibility for settling a dispute as to whether a claimant meets the qualifications for entitlement to the underpayment. If there is an adverse claimant when you receive the case, or if a decision of entitlement is disputed either before or after payment has been made, refer the case in accordance with § 3715.7.

3715.2 General Provisions Which Pertain to All Underpayment Claims.—

A. Request for Payment.—Aside from the issue concerning the person qualified to receive an underpayment, develop all other aspects of a claim for reimbursement in the same manner as if filed by a living beneficiary. Accordingly, if the beneficiary had not filed a claim prior to his death, a claim is required. The claimant should sign his own name in the space provided. If the beneficiary had filed a claim before he died, it is not necessary for a person claiming the underpayment to file another. In such a situation, any written request for the underpayment suffices.

B. Required Evidence.—Evidence that the services have been paid for and by whom must be submitted in every case. This evidence might be: a receipted bill showing who paid the bill, a cancelled check, or a statement from the provider or other probative evidence.

C. More Than One Person Entitled.—Where more than one person has a right to share in the Medicare underpayment, an application or payment request for the total payable to all is required from only one member of such a group. However, except as specified below, a separate check is issued to each individual entitled. Include with the check to each payee an explanation that a claim for the payment (show amount) has been made by (claimant's name) on behalf of all qualified parties and the enclosed amount represents his share.

D. Total Amounts Payable to Two or More Claimants Do Not Exceed $200.—Where the total program benefit payable to multiple claimants is $200 or less, in the absence of objection by one of the parties, pay the person who files as agent for himself and all others entitled. Obtain an agreement in writing to divide the payment in the proper amounts among the other entitled individuals. If one of the parties objects to this, issue a separate check to each.

E. Partially Paid Bills.—Where only a portion of a medical bill has been paid, payment may be made (or SSO development requested) on the paid portion as on any paid bill. In addition, contact the provider and explain how it may claim the payment on the unpaid portion of the bill. (See §3715B.) If the provider does not wish to claim the payment, you need take no further action. Advise the SSO (which services the claimant on the paid portion of the bill) that the provider has been contacted and does not wish to claim the payment. This notification will aid it in responding to inquiries regarding the case.

3715.3 Special Provisions Regarding Payment to Person Who Paid for the Services.—

A. Identifying Person Who Paid for Services.—A person who paid part or all of a bill may apply for the underpayment. He should furnish the identity and address of any other person who paid any part of the charges.

B. Payment From Own Funds.—The health insurance payment or refund on a receipted bill may be paid to a person who paid part or all of the charges with his own funds. Consider that the charges were paid from funds of the decedent's estate, and a "payer" will not qualify to receive a health insurance payment or refund if:

- He paid the charges in settlement of a debt or obligation to the decedent or his estate,

- He paid the charges from funds of an insurance policy of which the decedent or his estate is the beneficiary, or

- He paid the charges as an employer under a plan or contract of employment. However, there are some employer, union, insurance, or welfare plans that are liable only for deductibles and coinsurance but pay the enrollee's entire medical bill with the understanding that they will receive the Part B reimbursement. Where the medical bill is paid under such a plan, it is not considered paid by the patient's estate. Where the organization claims the payment on such basis, request the RO to verify the organizations qualifying for payment.

In the absence of some indication that these conditions exists, you need not develop further the basis upon which the bill was paid.

C. Charges Paid By More Than One Person.—If the charges have been paid by more than one person, each person who paid is entitled only to his proportionate share of the reimbursement. Where one (or more) of the group has died, his share of the payment is settled under the NOTE in § 3715C.

3715.4 Special Provisions Regarding Payment to Legal Representatives.--

A. Definition of Legal Representative.-- "Legal Representative" of a deceased individual means the executor or administrator of his estate, and includes the survivors designated to receive the assets of the deceased under the small estate statutes of the State in which the deceased resided at the time of his death.

Refer questions concerning the small estate laws and other questions relating to the appointment and authority of a legal representative to the SSO.

B. Order of Appointment.--Obtain a copy of the order of appointment with the request for payment filed by the legal representative unless this proof has already been submitted in connection with another claim. If this proof has been submitted to an SSO, a statement to this effect over the signature of a staff member of the SSO may be accepted as proof of appointment in lieu of a copy of the appointment papers.

3715.5 Special Provision Regarding Payment to Survivors.--

A. Obtaining an HCFA-1660 or Equivalent Information.--The relative(s) highest on the list of priorities in § 3715C must provide information in writing regarding:

- His relationship to the deceased patient;
- His status with respect to entitlement to monthly social security or railroad retirement benefits on the same earnings record as the deceased patient; and
- Whether or not there is a person higher in priority. The HCFA-1660 (Request for Information - Medicare Payment for Services to a Patient Now Deceased) was developed to serve this purpose.

If you secure the necessary information in writing by some means other than an HCFA-1660, do not obtain a completed form.

The questions in item 1 of the HCFA-1660 are general in nature and are required for identifying the type of payee who is eligible. If question 1(a) is answered "yes" and no legal representative is shown in 1(c), or, if question 1(b) indicates that the person who paid the bill is deceased, item 2 is completed. The person who completes item 2 fills in only one block, i.e., the name and address of the living survivor(s) who is a relative in the highest category as listed on the form.

When you send an HCFA-1660 directly to a claimant for completion, enter the deceased patient's name and HICN in the blocks provided. This information is necessary for later association of the completed form with the patient's file. Enclose an addressed return envelope.

Also complete the first part of item 1 to identify the medical bill(s) involved.

B. Evidence to the Contrary of Claimant's Statement.—In the absence of evidence to the contrary, accept a written and signed allegation of the claimant as to his entitlement status and his relationship to the deceased, that there is no relative in a higher priority who qualifies to receive the Medicare payment, and that there is no legal representative of the estate. "Evidence to the contrary" includes situations where there is an indication that a person in a higher priority exists, the claimant does not meet the relationship requirements, etc.

C. Payment to More Than One Child.—Where there is more than one child of the decedent, divide the Medicare payment equally, subject to the $200 rule in §3715.2D. If, however, one or more children has died (either before or after the beneficiary's death) divide the entire amount among the surviving children.

D. Payment to More Than One Surviving Parent.—Where there is more than one surviving parent and they are living together, the payment may be combined and a joint check issued. If the surviving parents are not living together, divide the payment equally between them subject to the $200 rule in §3715.2D.

E. Incompetent Payee.—If a relative who qualifies for payment is incompetent, or where such relative is a minor, the claim may be made on such person's behalf by his legal guardian or other person who has assumed responsibility for him. In the absence of evidence to the contrary, accept the claimant's statement that he has authority to act for the qualified individual.

F. On the Same Earnings Record.—The phrase "on the same earnings record" does not necessarily mean the earnings record of the beneficiary. For example, a female beneficiary may not have an earnings record, but is entitled to monthly benefits on her husband's account. Thus, both parties are entitled on the same earnings record. If she is the deceased beneficiary, her husband qualifies in priority number 1 of §3715C.

3715.6 Definitions of Relationship and Related Principles Governing Eligibility of Survivors.—

A. General.—A decision as to whether an individual meets the requirements of relationship is governed by the social security law. Accordingly, a survivor who has been awarded monthly social security or railroad retirement benefits as the spouse, child, or parent of the deceased is deemed to have this status for Medicare purposes.

However, where a claimant's allegation of relationship is challenged because of evidence to the contrary, be aware of the definitions of relationship which have been established by SSA. Although you are not required to make complex findings of fact, be familiar with the principles which are summarized in the following paragraphs.

Each degree of relationship—spouse, child, parent—appears twice in the priority listing in §3715C. Therefore, the individual who meets the definition may be either high or low on the list. The factor which controls his position in the priorities, in most instances, is whether he is entitled to monthly benefits on the same earnings record as the deceased beneficiary.

B. Surviving Spouse.—Aside from the question of entitlement to monthly benefits, a person who was living with the husband or wife in the month of his or her death is presumed to be the spouse of the deceased in the absence of clear and strong evidence to the contrary and qualifies in the 1st priority in § 3715C. Where the marital relationship is questioned, a person who was living with the beneficiary qualifies as a surviving spouse in priority number 1 if he or she was validly married to the beneficiary at the time of his death, or would have the status of widow or widower with respect to the taking of intestate personal property by the courts of the State in which the deceased lived at the time of his death.

A person also qualifies in the first priority as a surviving spouse if he or she married the beneficiary in good faith but the marriage was invalid because of a legal impediment not known to the claimant at the time of the marriage, provided the claimant was living with the beneficiary at the time of the beneficiary's death.

A couple is considered to be living together as husband and wife in the month of the beneficiary's death even though they were actually separated at the time of death if the separation was caused solely by the illness of either or other circumstances beyond their control. The SSO has been instructed to record the length of, and reason for, the separation. If the separation lasted more than 6 months, the SSO obtains sufficient information about the circumstances to make a determination as to whether there was an intent to resume living together in the same household. If such intent can reasonably be found, payment may be made to the surviving spouse.

An individual who was neither living with the decedent at the time of death, nor entitled to monthly benefits on the same earnings record, qualifies as a surviving spouse in priority number 4 if he or she meets the requirements in the first paragraph of this section.

C. Child.—The term "child" generally means:

- A person who would have the right under applicable State law to inherit intestate personal property from the beneficiary as his natural legitimate child;
- A person who was legally adopted by the beneficiary; or
- The beneficiary's stepchild.

In addition to the above, the Social Security Act recognizes the following individuals as "children" of a beneficiary:

- A child of an invalid ceremonial marriage which would have been a valid marriage except for a legal impediment;

- An illegitimate child who, prior to the beneficiary's death, was acknowledged in writing by the beneficiary to be his son or daughter; who was decreed by a court to be the beneficiary's child; where the beneficiary was ordered by a court to contribute to the child's support; or where the deceased is shown to be the father by other evidence and was living with the child or contributing to the child's support; or

- A child who retains inheritance rights in the beneficiary's estate even though adopted by another person during the beneficiary's lifetime.

D. Parent.—A person qualifies as a parent of the deceased beneficiary if he or she would have the status of parent with respect to the taking of intestate personal property under the law of the State in which the beneficiary lived at the time of his death; is a stepparent of the beneficiary; is an adoptive parent.

3715.7 Adverse Claims Based on Paid Bills.—The law delegates to SSA the responsibility of settling disputes involving the initial determination of relationship. Therefore, where an individual questions a denial or files a claim based on a bill on which reimbursement has already been made, or where an adverse claimant appears before payment has been made, refer the case to HCFA.

Where payment was properly made to a relative because there was no administrator at the time the claim was settled, the subsequent appointment of an administrator does not render the payment erroneous.

3715.8 Assumption of Legal Obligation to Pay Bill.—If a hospital does not want to file a Part B claim on an unpaid bill for services to a deceased beneficiary, the Part B payment may be made to the legal representative of the beneficiary's estate or to some other person who assumes a legal obligation to pay the charges.

If the legal representative seeks payment on that basis, he must submit a signed statement substantially as follows:

> "I am the legal representative of the deceased beneficiary's estate. The estate has assumed the legal obligation to pay charges of (amount of charges) by (name of hospital) for services to ________________, the deceased beneficiary, on (dates of services)."

The legal representative must also submit a copy of his order of appointment as legal representative.

If someone other than the legal representative of the estate seeks payment on that basis, he must submit a statement substantially as follows:

> "I have assumed a legal obligation to pay, from my own personal funds, the charges of (amount of charges) by (name of hospital) for services to ________________, the deceased beneficiary, on (dates of services)."

3716. ALIEN NONPAYMENT CASES

An alien is not eligible for social security monthly benefits and health insurance benefits in certain cases after he has been outside the United States for 6 full consecutive calendar months. (A period of absence from the United States is broken for an alien who has been outside the United States for 30 full consecutive days, if the alien spends a period of 30 full consecutive days in the United States before the expiration of a 6 full consecutive calendar month period. A new period of absence begins as of the first day of the month after the month he again leaves the United States.) If he returns to the United States, benefits become payable beginning with the first full calendar month of presence in the United States. SSA will determine when this susension applies.

You know this provision may apply when you receive a reply to a query showing disposition code 26. See §§ 3512 and 3531.

When you receive this reply, contact the local SSO. Indicate an alien nonpayment case and furnish at least the following information: name, HICN, address, and inclusive dates of hospital and/or medical services. The SSO investigates to determine whether payment may be made. It furnishes a written statement stating whether any or all of the medical services are reimbursable.

The statement shows months for which payment may be made. Future months may be shown. Pay the claim based upon this statement. Subsequent claims where expenses are incurred within this period may be processed based on this report even though you receive another reply showing disposition code 26.

For expenses incurred after the period covered by the report, ask the beneficiary whether he or she was out of the United States after the last month shown on the report. The beneficiary's signed statement that he/she was not, is sufficient to pay the claim. If the beneficiary was out of the United Sttes, refer the case to the SSO for another investigation. Include the beneficiary's statement.

When these cases are referred to the SSO, tell the provider that payment may be barred and that a definitive reply will follow. The follow denial notice to the provider and, where appropriate, to the beneficiary includes a paragraph similar to the following:

> In certain cases, an alien who has been outside of the United States for 6 full consecutive calendar months is not eligible for health insurance benefits. Payment can only be made to, or for, such an alien for the first full calendar month of presence in the United States. It has been determined that payment cannot be made in this case for (months(s).)

Medicare Benefit Notices

3717. MEDICARE NOTICES SENT TO THE BENEFICIARY

Notify Medicare beneficiaries of the disposition of health insurance claims that they have filed, or that providers have filed on their behalf, to advise them about their Part A and B benefits used, Part A and B deductible status, lifetime reserve status, appeal rights, and to assist them in applying for complementary insurance benefits.

Beneficiary notices are prepared and sent by you, by the carrier, and by the Health Maintenance Organization (HMO) contractually obligated to make payment on Medicare claims. The notices prepared and sent to the beneficiary by you (see §§3718ff.) are explained below.

3718. INTERMEDIARY PREPARATION OF THE MEDICARE BENEFIT NOTICE

Furnish a Medicare Benefit Notice, Form HCFA-1533, to each beneficiary for whom you process a hospital or SNF inpatient bill, (except for hospital bills denied partially or completely by a PRO). The PRO sends the denial notices for bills it denies. You send the Medicare Benefit Notice explaining the portion of partially paid bills for which you make the decision (Benefits exhausted, MSP, etc.).

Prepare this notice within 5 working days of the day you prepare the related UNIBILL, and mail it immediately. Use the HCFA supplied Form HCFA-1533, or a facsimile.

In the following instances, prepare a Medicare Benefit Notice only upon the request of the beneficiary or the beneficiary's representative:

o Outpatient services;

o No covered days;

o "R" coded bill. This means that no program payment was made, but utilization is chargeable;

o Home health bill;

o Emergency inpatient hospital services (facility does NOT participate, and the patient elected to file the bill directly instead of via the hospital. (Since payment is made to the patient, there is no need of a notice.);

o Deceased beneficiary with service dates preceding your processing date by 12 or more months; or

o Service dates precede your processing date by 4 or more years.

3718.1 Completing Form HCFA-1533, Medicare Benefit Notice.—This notice primarily reflects the benefits used and any applicable remarks about deductibles, coinsurance, and/or lifetime limits on days. Do not show remaining days for a benefit period. Make entries within the prescribed blocks on the front of the form as shown below.

A. Identification Information.--

1. Name and Address.--Show the name and address of the beneficiary or representative payee in the address block. When your record shows that the beneficiary is deceased, add "THE ESTATE OF" as the first line of the address unless the beneficiary had a representative payee. If there is a representative payee and the payee's name is John Smith and the patient's is George Brown, the legend reads: "John Smith for George Brown."

2. Date and HICN.--Show the date the form is prepared and the HICN.

B. Medicare Benefits (Item 1).--

1. SERVICES FURNISHED BY.--The name and address of the facility that furnished the services.

2. DATE(S).--The FROM and THRU dates covered by the bill.

3. BENEFITS USED.--Show the entries (XX) INPATIENT HOSPITAL DAYS, and/or (XX) HOSPITAL RESERVE DAYS or (XX) SKILLED NURSING FACILITY DAYS as applicable.

C. Payment Status (Item 2).--

Medicare is Primary Payer

Medicare makes either an unconditional or a conditional payment.

If service(s) are all or partially covered (no noncovered days) and no secondary payer involvement, the message(s) are:

MEDICARE PAID ALL COVERED SERVICES, or MEDICARE PAID COVERED SERVICES EXCEPT: (Use one or more of the indented messages)

($AMOUNT) FOR THE INPATIENT DEDUCTIBLE.
($AMOUNT) FOR (XX) DAYS OF HOSPITAL CARE AFTER FIRST 60 DAYS.
($AMOUNT) FOR THE COST OF (XX) PINTS OF UNREPLACED BLOOD.
($AMOUNT) FOR (XX) DAYS OF SKILLED NURSING FACILITY CARE AFTER FIRST 20 DAYS.
($AMOUNT) FOR PHYSICIAN CHARGES BILLED SEPARATELY TO THE MEDICARE CARRIER.

Medicare is Secondary Payer

Primary payer is EGHP for an employed beneficiary and spouse or for a beneficiary entitled to Medicare on basis of ESRD within a prescribed 12 month coordination period, or for a beneficiary entitled to Medicare as a disabled beneficiary.--If services(s) are all or partially covered (no noncovered days), the message is:

MEDICARE PAID ALL COVERED SERVICES NOT PAID BY OTHER INSURER, or MEDICARE PAID ALL COVERED SERVICES NOT PAID BY OTHER INSURER EXCEPT:

($AMOUNT) FOR THE INPATIENT DEDUCTIBLE.
($AMOUNT) FOR (XX) DAYS OF HOSPITAL CARE AFTER FIRST 60 DAYS.
($AMOUNT) FOR THE COST OF (XX) PINTS OF UNREPLACED BLOOD.
($AMOUNT) FOR (XX) DAYS OF SKILLED NURSING FACILITY CARE AFTER FIRST 20 DAYS.
($AMOUNT) FOR PHYSICIAN CHARGES BILLED SEPARATELY TO THE MEDICARE CARRIER.

Primary payer is automobile no-fault or liability insurance, WC, BL, VA, PHS, or other Federal agency.—If service(s) are all or partially covered (no noncovered days), the message is:

MEDICARE PAID ALL COVERED SERVICES NOT PAID BY OTHER INSURER, or MEDICARE PAID ALL COVERED SERVICES NOT PAID BY OTHER INSURER EXCEPT:

($AMOUNT) FOR THE INPATIENT DEDUCTIBLE.
($AMOUNT) FOR (XX) DAYS OF HOSPITAL CARE AFTER FIRST 60 DAYS.
($AMOUNT) FOR THE COST OF (XX) PINTS OF UNREPLACED BLOOD.
($AMOUNT) FOR (XX) DAYS OF SKILLED NURSING FACILITY CARE AFTER FIRST 20 DAYS.
($AMOUNT) FOR PHYSICIAN CHARGES BILLED SEPARATELY TO THE MEDICARE CARRIER.

Primary Payer other Than Medicare Pays For All Services That Medicare Would Have Covered.—If service(s) that Medicare would have covered are all paid by a payer primary to Medicare, the message is:

OTHER INSURER PAID ALL COVERED SERVICES AS PRIMARY PAYER.

Medicare is Primary or Secondary Payer

If the bill includes both covered and noncovered days of service, enter the applicable remarks above as well as:

(XX) DAYS WERE NOT PAID FOR BY MEDICARE. PLEASE REFER TO THE LETTER WE SENT YOU EXPLAINING THE NONCOVERED PORTION.

If the billing data is from an Indian Health Service Hospital, include the following message:

MEDICARE PAYMENT LIMITS DO NOT AFFECT AN INDIAN'S RIGHT TO FREE CARE AT INDIAN HEALTH SERVICE INSTITUTIONS.

If the billing data is for inpatient psychiatric services and no additional psychiatric lifetime days are available, include the following message:

YOU HAVE USED YOUR LIMIT OF 190 DAYS OF PSYCHIATRIC HOSPITAL SERVICES.

If the billing data is for inpatient psychiatric services and days are still available, include the following message:

YOU HAVE (XXX) DAYS REMAINING TOWARD YOUR LIMIT OF 190 DAYS OF PSYCHIATRIC HOSPITAL SERVICES.

If the billing data is for inpatient hospital services and includes lifetime reserve days and days are still available, include the following message:

YOU HAVE (XX) DAYS REMAINING TOWARD YOUR LIMIT OF 60 HOSPITAL RESERVE DAYS.

If the billing data is for inpatient hospital services and includes lifetime reserve days and no additional days are available, include the following message:

YOU HAVE USED YOUR LIMIT OF 60 LIFETIME RESERVE DAYS.

Since potential exists for another insurer to pay for the same services already paid for by Medicare, include the following message (set off from other messages in the notice) on all notices showing Medicare as primary payer:

IF AUTOMOBILE OR LIABILITY INSURANCE, WORKERS' COMPENSATION OR, IN SOME CASES, A HEALTH PLAN FOR EMPLOYEES ALSO PAYS FOR THESE SERVICES, A REFUND MAY BE DUE THE MEDICARE PROGRAM. PLEASE CONTACT US IF YOU HAVE HEALTH INSURANCE COVERAGE FROM ONE OF THESE SOURCES. IF YOU DO NOT HAVE HEALTH INSURANCE COVERAGE FROM ONE OF THESE SOURCES YOU NEED NOT CONTACT US.

If there are admissions of record for earlier dates than the one for which a bill is accepted, include the following message:

YOU WILL BE NOTIFIED OF BENEFITS USED DURING ADMISSION(S) OF XX/XX/XX, WHEN THE BILL(S) FOR THE ADMISSION(S) ARE PROCESSED.

If the beneficiary received a covered organ transplant, include the following message:

> IMMUNOSUPPRESSIVE DRUGS MAY BE COVERED UNDER MEDICARE IF PURCHASED WITHIN ONE YEAR FOLLOWING MMDDYY. THIS IS THE DATE YOU WERE DISCHARGED FROM THE HOSPITAL AFTER YOUR ORGAN TRANSPLANT.

Enter your name, address, and telephone number below Item 2.

3718.2 Amended Medicare Benefit Notices, HCFA-1533.—When you process an adjustment bill (other than in response to a PRO denial) which affects a beneficiary's utilization, deductible or coinsurance data, prepare a HCFA-1533 with the remark "THIS IS AN AMENDED NOTICE" printed across the upper margin on the notice. Use appropriate remarks to explain why the data shown on the beneficiary's original notice have been revised. Base the remarks and data on either the "cancel only" bill of a cancel only adjustment or the "debit" bill of a credit/debit adjustment.

Do not prepare an amended notice for a deceased beneficiary if the service dates on the adjustment bill percede HCFA's processing date by 12 or more months. Upon request, however, prepare a notice for any adjustment bill which is processed after the 12-month limit.

A. Cancel Only Adjustment.—Prepare an amended notice with remarks describing the reason for the cancellation. Some of the remarks and the particular situations which would cause an amended notice to be prepared are:

1. Situation.—Plan transfer, i.e., transfer from Part B to Part A or vice versa.

REMARK: THE SERVICES ABOVE HAVE BEEN REMOVED FROM YOUR RECORD AS THEY WERE PROCESSED INCORRECTLY. YOU WILL RECEIVE A CORRECTED NOTICE LATER.

2. Situation.—Same bill posted to your records more than once.

REMARK: THE SERVICES ABOVE HAVE BEEN REMOVED FROM YOUR RECORD. THEY WERE POSTED TO YOUR RECORD TWICE.

3. Situation.—Bill posted to the wrong individual's record.

REMARK: THE SERVICES ABOVE HAVE BEEN REMOVED FROM YOUR RECORD. THEY WERE RECEIVED BY ANOTHER PERSON.

4. Situation.—Coverage transfer (covered to noncovered); i.e., a previously covered bill is replaced with a noncovered bill; for example, when workers' compensation will pay for the services.

REMARK: THE SERVICES WERE POSTED TO YOUR RECORD IN ERROR. THEY HAVE BEEN REMOVED.

5. Situation.—Cancellation for reason other than described above.

REMARK: THE SERVICES ABOVE HAVE BEEN REMOVED FROM YOUR RECORD AS THEY WERE POSTED INCORRECTLY.

B. Credit/Debit Adjustment.—Send a notice for credit/debit adjustments only if utilization or deductible is affected. Since the debit bill is the basis for an amended notice, enter the same remarks you entered on the original notice, preceded by the statement, "THIS RECORD REPLACES THE PREVIOUS RECORD YOU RECEIVED FOR THE SERVICES ABOVE."

Other Notices

3719 OTHER MEDICARE NOTICES

3719.1 Notices for Part A Bills.—You are responsible for sending the beneficiary and provider Medicare notices in the following situations:

- Totally or partially denied Part A bills other than PRO denials.
- Special spell of illness notices
  - Send a special notice of presumed skilled care relating to the SNF stay immediately prior to the present hospital or SNF inpatient stay sent when presumption 5, §3035 is applicable, the present hospital or SNF bill is totally paid, and the prior SNF stay was at least 60 days, or if less than 60 days, the SNF stay in conjunction with nonhospital and non-SNF days equaled 60 or more consecutive days. Include the following notice language on a special notice.

Medicare has determined that your stay in (name of facility) from (date) to (date) is part of your current benefit period, rather than the beginning of a new one. To make this determination Medicare found that during your prior nursing home stay in (name of facility) from (date) to (date), you received services at the skilled level of care because: (insert reason here)

Although your claim for nursing home benefits in that prior nursing home stay was denied by Medicare and/or Medicaid, it was not denied because the services provided failed to meet skilled level of care requirements.

You may appeal the above determination if you believe that you received services which were not at the skilled care level during your prior nursing home stay. This appeal may be filed now, but in any case it must be filed no later than 60 days after you receive an additional notice (HCFA-1533), which reflects the benefits used during your (SNF or hospital) stay. If you appeal and Medicare agrees that these services were below the skilled level, your stay in (name of facility) from (date) to (date) will begin a new benefit period and if your recent care was in a hospital you will be required to pay a new deductible. Please contact our office or your Social Security Office for assistance in deciding if it is in your best interest to appeal this determination.

- Send a special notice of presumed nonskilled SNF care when presumption 6 or 7, §3035 is applicable and where prior SNF stay was at least 60 days, or if less than 60 days, the SNF stay in conjunction with nonhospital and non-SNF days equaled 60 or more consecutive days. Include the following notice language on a special notice.

Medicare has determined that your stay in (name of facility) from (date) to (date) began a new benefit period, which requires the payment of a new deductible. To make this determination Medicare found that during your prior nursing home stay in (name of facility) from (date) to (date), you did not receive skilled level services because:

- o No Medicare or Medicaid claim was submitted for that prior stay, or
- o A Medicare claim was submitted but the claim was denied because the services were not at the required skilled care level.

You may appeal the above determination if you believe that you received services at the skilled care level during your prior nursing home stay. This appeal may be filed now, but in any case, it must be filed no later than 60 days after you receive an additional notice (HCFA-1533), which reflects the benefits used during your (SNF or hospital) stay. If you appeal and Medicare agrees that these services were provided at a skilled level of care, your stay in (name of facility) from (date) to (date) will not begin a new benefit period. Therefore, you will avoid payment of a new deductible (where the current claim is for inpatient hospital services), but you may become liable for other items, such as coinsurance or lifetime reserve day payments. Please contact our office or your SSO for assistance in deciding if it is in your best interest to appeal this determination.

NOTE: To avoid the impression that the beneficiary is personally liable for his stay at a free, State financed, no charge structure hospital, do not send denial letters to patients whose only stay was in such a hospital.

For HMOs which do not pay claims, you will continue to send the above notices.

Send total denial notices (HCFA-1954) and partial denial notices (HCFA-1955) at the earliest date you can make a noneligibility decision. You may base the decision on one or more eligibility factors such as:

- o Lack of Entitlement to Medicare Benefits;
- o Spell of Illness Requirements;
- o The 3-day Stay Requirements;
- o For SNF stays, the 30-day Transfer Requirements; and
- o Psychiatric Lifetime Limitation Used.

Where you make an advance denial decision, provide an oral denial notification to the provider at once. Follow this immediately by a formal notification (HCFA-1954 or HCFA-1955). Where you give such a decision prior to receipt of the bill and you find that the original notice is incorrect or incomplete, send a corrected notice. Combine the corrected beneficiary notice with any overpayment notice which results, if it will not cause an undue delay in releasing the corrected notice.

In situations involving total denials where no utilization is chargeable, the denial notice (HCFA-1954) is the only official notice the beneficiary will receive, since a HCFA-1533 will not be sent. In situations involving partially denied bills (either initial, interim, or final), in addition to sending the beneficiary the denial notice, also send a HCFA-1533 since you will have posted some utilization and/or deductible to the beneficiary's record. (See §3718 regarding the HCFA-1533.) At your option, you may combine the partial denial message with the Form HCFA-1533.

When an interim bill is fully payable but data included indicates termination or exhaustion of coverage for the remainder of the admission, prepare a partial denial notice. However, you need not repeat the notice on subsequent bills for the same admission.

3719.2 Notices for Part B Bills.—You send beneficiary notices for Part B services you process. In addition, send a Part B notice of denial and partial denial for bills for HHA services including visits. Use the HCFA-1954 and HCFA-1955 form letters. (See §3722.)

3719.3 Notices on Claims Involving Both Part A and Part B Services.—If practical, when you send a denial notice for Part A benefits but pay for some of those services under Part B, send the denial notice and the EOMB together.

3719.4 Notices on Claim Denials Resulting from PRO Determinations.—PROs send denial notices on cases they deny. This applies to both hospital and beneficiary notices. Show on your remittance record to the hospital that the adjustment was a result of PRO review. Do not send a separate written notice to the hospital or beneficiary.

You are responsible for denial notices on cases you deny.

3719.5 Preparation of Medicare Benefit Notices Upon Request.—Medicare beneficiaries or someone acting on their behalf, e.g., SSOs via the HCFA-1938 "SSA Request for Carrier or Intermediary Assistance", may request notice of utilization information from you. Upon receipt of a request, check your records to see if you have received the claim in question. If you have not, advise the SSO accordingly. If you have received the claim, process it, and prepare a HCFA-1533 to forward either to the beneficiary or the inquirer as requested on the HCFA-1938.

3721. DISALLOWANCE FORM LETTERS HCFA-1954 and HCFA-1955.

The HCFA-1954 three-part disallowance letter when you, on behalf of HCFA, are totally disallowing a claim. Use the HCFA-1955 when you or the HMO is partially denying a claim. Since partial denials involve two beneficiary notices for the same bill, the 60-day time period within which a beneficiary may file a reconsideration request must be figured from the final notice sent by HCFA, (one notice from you or a HMO regarding the denied portion of the bill and a subsequent one from HCFA regarding the utilization data.) The only differences in the two letters are that the HCFA-1954 has a sentence in the preprinted closing paragraph covering the 60-day time period for filing a reconsideration request whereas the HCFA-1955 omits this sentence; and the partial denial letter, HCFA-1955, has another preprinted paragraph which mentions the subsequent utilization notice the beneficiary will receive.

Send the original of the HCFA-1954 and the HCFA-1955 to the beneficiary. One copy is retained by you or a HMO and the third copy may be sent to the provider.

NOTE: In addition to sending the HCFA-1954 or HCFA-1955, you or a HMO include a pamphlet, SSA-75-10085, "Your Right to Question the Decision on Your Hospital Insurance Claim" for information regarding the beneficiary's appear rights.

For waiver of liability decisions, in addition to a copy of the HCFA-1954 or HCFA-1955, send the provider a letter explaining its appeal rights under the waiver provision. (See S3722.5C.)

Type the HCFA-1954 and HCFA-1955 to assure ligibility on all copies. Not only is it important that the beneficiary receive a legible copy, but a readable file copy is needed for documentation in any appeals.

Show your return address on the envelope used for mailing the denial notice so that the procedures for handling undeliverable beneficiary notices can be followed. (See S3728.) In addition, the return envelope should have the Medicare identification as required by S3701.

The HCFA-1954 and HCFA-1955 form letters are preprinted by HCFA and may be ordered with your name and address name and address on the form. (See Part 2 S2954B.) Entries to complete on the HCFA-1954 (Total Denials) and HCFA-1955 (Partial Denials) are:

- o Intermediary Number, Name, and Address.—Place your assigned number and name followed by the mailing address.
- o Beneficiary Name and Address.—Show the name and address of the beneficiary or his representative payee in the address block.

- Date.—Date the three copies of the form as if the date is the record used for purposes of establishing the 60-day time limitation for filing a reconsideration request. Use dates, not numbers, i.e., use January 1, 1986, not 1/1/86.

- HICNs.—Place the HICN and alphabetic suffix assigned to the beneficary in the block provided. See §3504 for variations in the HICNs.

- Type of Service Provided.-- Identify the type of service provided, "Hospital," "Skilled Nursing Facility," "Home Health," or "Other," and indicate whether services are for hospital of medical insurance.

- Date of Admission.-- Enter the admission date or the date of first visit on the line provided if the letter is sent based upon an admission notice rather than a bill.

- Services Provided By.--Enter the provider's number followed by its name and address in the space provided.

- Notice Covers Period.-- Show the "from" and "through" date of the billing period.

NOTE: In denial situations where waiver is applicable and a preprinted denial form is used, where necessary, insert the period of time for which waiver applies and check the appropriate box.

Explanation of Denial.-- Enter the appropriate hospital, SNF, HHA, or miscellaneous denial paragraphs located in § 3722ff.

This letter contains an appeals paragraph outlining both Part A and B appeals procedures and directs the beneficiary to contact the local SSO if he questions the decision. (See §§ 3780ff. regarding the reconsideration procedure.)

3722. STOCK DENIAL PARAGRAPHS

The stock paragraphs cover common denial situations to utilize as specified in §3632 or by the HMO in the preparation of denial letters to the beneficiary and providers. The paragraphs may be used on Forms HCFA-1954 and 1955 or in letters which you develop.

The object of denial letters is to explain clearly to the beneficiary or provider, the reason for the denial. Where a denial paragraph is inappropriate, or there is no paragraph which explains the reason, develop or modify the language to fit the situation. Otherwise use the furnished paragraphs.

Forward to the RO for submission to CO any denial language which you develop and which you use frequently. The language will be reviewed and included in the manual as appropriate.

The following sections describe denial conditions and give stock denial paragraphs. An HMO contractually obligated to pay Medicare claims is responsible for appropriate denial notices for claims on which it is unable to make full payment. Although these sections do not specifically mention HMOs, they apply to HMOs responsible for claims payment.

3722.1 SNF Denial Letters.—SNF denial letters consist of:

- o A base paragraph (not required for technical denials (TD));
- o A paragraph giving the specific reason for denial with the applicable regulatory and statutory references;
- o A limitation of liability paragraph (used with denial paragraphs SNF-2A through SNF-4B where the statutory basis for denial is §1862(a)(1) or §1862(a)(9)); and
- o An appeals paragraph (Part A or Part B as applicable).

Use all applicable denial paragraphs for services for which you deny payment.

Where a denial situation is not covered in the following paragraphs, adapt one to fit. If a denial situation appears frequently, submit recommended language to your RO.

On all letters which reference the Act, give the full document name in a footnote; title XVIII of the Act, commonly known as the Medicare Program, 42 U.S.C. §3195 et seq.

SNF-1

Condition.—Definition of skilled nursing benefits - Base paragraph (use with paragraphs SNF-3A-through 4C).

Paragraph.—Skilled nursing facility benefits are paid under Medicare for individuals who need, on a daily basis, skilled nursing care or skilled rehabilitation services which, as a practical matter, can only be provided in a skilled nursing facility on an inpatient basis. Skilled care is care which must be furnished by, or under the supervision of, skilled personnel to assure the safety of the patient and to achieve the medically desired result. In addition, skilled nursing or skilled rehabilitation services must be ordered by a physician and be reasonable and necessary for the treatment of a beneficiary's illness or injury.

SNF-2

Condition.--Skilled nursing or skilled rehabilitation - Base paragraph (use with paragraphs SNF-2A-through 2J).

Paragraph.--One of the qualifications for Medicare coverage of skilled nursing facility services is that you must require, on a daily basis, skilled nursing or skilled rehabilitation services which, as a practical matter, can only be provided in a skilled nursing facility on an inpatient basis.

Skilled nursing or skilled rehabilitation services must be performed by or under the supervision of, a professional nurse, or a physical, speech or occuptional therapist to achieve the medically desired effect.

Skilled services that may be needed in a skilled nursing facility include:

o Skilled management and evaluation by a professional nurse or therapist for medical reasons to promote your recovery and medical safety;

o Skilled observation and assessment when your medical condition is unstable or there is a likelihood of a change requiring a skilled nurse to evaluate the need for changes in your plan of care;

o Teaching and training by skilled personnel necessary to help you manage your plan of care; and

o Certain service(s) recognized by Medicare as always requiring skilled nursing or skilled rehabilitation if it is reasonable and necessary for the treatment of illness or injury, for example, nasogastric tube feeding.

SNF-2A

Condition.--General nonskilled care - full denial.

Paragraph.--The medical information provided us shows that you only needed oral medications, assistance with your daily activities and general supportive services. There is no evidence of medical complications or other medical reasons that required the skills of a professional nurse or therapist to safely and effectively carry our your plan of care. Therefore, Medicare cannot pay for your stay. (Section 1862(a)(1)(A) of the Social Security Act, 42 CFR 405.310(k), and 42 CFR 409.31-.35.)

SNF-2B

Condition.—Specific nonskilled service provided - no skilled care (full denial).

Paragraph.—The medical information provided us by the skilled nursing facility shows that you only needed (specify service). This does not generally require the skills of a licensed nurse. The information did not show any medical problems which would have required a licensed nurse to perform the service or manage your care. Since you needed neither skilled nursing nor skilled rehabilitation on a daily basis, Medicare cannot pay for your stay. (Section 1862(a)(1)(A) of the Social Security Act, 42 CFR 405.310(k), and 42 CFR 409.31-.35.)

SNF-2C

Condition.—Specific nonskilled service provided - (partial denial).

Paragraph.—The medical information provided us by the skilled nursing facility shows that you only needed (specify service) after (date). Since you no longer required skilled nursing and did not need skilled rehabilitation on a daily basis, Medicare cannot pay for your stay beginning (date) . (Section 1862(a)(1)(A) of the Social Security Act, 42 CFR 405.310(k), and 42 CFR 409.31-.35.)

SNF-2D

Condition.—Observation and management of care plan.

Paragraph.—You needed skilled nursing care beginning (date) to observe and evaluate your condition. The medical information provided us by the skilled nursing facility gives no indication of further likelihood of significant changes in your care plan or of acute changes or complications in your condition. Since you needed neither skilled nursing nor skilled rehabilitation on a daily basis, Medicare cannot pay for your stay after (date). (Section 1862(a)(1)(A) of the Social Security Act, 42 CFR 405.310(k), and 42 CFR 409.31-.35.)

NOTE: If applicable, substitute therapy and type of therapist for skilled nursing and skilled nurse.

Paragraph.—Because of your condition, you needed a skilled nurse from (date) through (date) to evaluate and manage your care plan. Based on the medical information provided, your condition improved so the services you needed could have safely and effectively been given by nonskilled persons. Since you no longer required skilled nursing and did not need skilled rehabilitation on a daily basis, Medicare cannot pay for your stay after (date). (Section 1862(a)(1)(A) of the Social Security Act, 42 CFR 405.310(k), and 42 CFR 409.31-.35.)

SNF-2E

Condition.—Teaching and training activities.

Paragraph.—Medicare covers daily skilled care for a reasonable amount of time where progressive learning is demonstrated and, when it is needed to teach you the necessary tasks ordered by your physician.

Subparagraph 1. - However, the nurse or therapist continued to teach you when the medical information showed that you had learned or would not be able, at this time, to learn and perform the tasks. Since you no longer needed skilled nursing and did not need skilled rehabilitation on a daily basis, Medicare cannot pay for your stay after (date) . (Section 1862(a)(1)(A) of the Social Security Act, 42 CFR 405.310(k), and 42 CFR 409.31-.35.)

Subparagraph 2. - The services you received reminded you to follow the physician's instructions. This does not constitute teaching. Since you did not require skilled nursing or skilled rehabilitation on a daily basis, Medicare cannot pay for your stay. (Section 1862(a)(1)(A) of the Social Security Act, 42 CFR 405.310(k), and 42 CFR 409.31-.35.)

SNF-2F

Condition.—Foley not needed.

Paragraph.—Daily skilled nursing care related to the insertion, sterile irrigation and replacement of a urethral catheter is covered if the use of the catheter is medically necessary. Urethral catheters are not considered medically necessary when used only for mere convenience or the control of incontinence in the absence of special medical needs. Medicare cannot pay for your stay because the medical information shows that the catheter was not medically necessary. (Section 1862(a)(1)(A) of the Social Security Act, 42 CFR 405.310(k), and 42 CFR 409.31-.35.)

SNF-2G

Condition.—Repetitive exercises.

Paragraph.—The medical information shows that the only therapy services you needed beginning (date) were repetitive exercises and help with walking. These do not generally require the skills or the supervision of a qualified therapist. There was no evidence of medical complications which would have required that the services be performed by a qualified therapist.

Full Denial: Add

Since you did not receive skilled rehabilitation or skilled nursing care on a daily basis, Medicare cannot pay for your stay. (Section 1862(a)(1)(A) of the Social Security Act, 42 CFR 405.310(k), and 42 CFR 409.31-.35.)

Partial Denial: Add

Since you no longer needed skilled rehabilitation or skilled nursing care on a daily basis, no further payment can be made for your stay after (date) . (Section 1862(a)(1)(A) of the Social Security Act, 42 CFR 405.310(k), and 42 CFR 409.31-.35)

SNF-2H

Condition.—Therapy services for overall fitness and well-being. (Skilled therapy is physical therapy, occupational therapy, and/or speech-language pathology.)

Paragraph.—The medical information shows that the therapy services you received were for your overall fitness and general well-being. They did not require the skills of a qualified (______________) therapist to perform and/or supervise the services. Since you did not need skilled nursing or skilled rehabilitation services, Medicare cannot pay for your stay. (Section 1862(a)(1)(A) of the Social Security Act, 42 CFR 405.310(k), and 42 CFR 409.31-.35.)

SNF-2I

Condition.—The services do not constitute covered (________) therapy because they do not require the skills of a (_____) therapist.

Paragraph.—Based on the medical information provided, you did not need skilled rehabilitation or skilled nursing services. The (_____) therapy services you received were only to carry out a maintenance program established to maintain your functional abilities. These services do not require the continued supervision or the skills of a ( ) therapist and, therefore, do not constitute skilled (___) therapy under the Medicare program. (Section 1862(a)(1)(A) of the Social Security Act, 42 CFR 405.310(k), and 42 CFR 409.31-.35.)

SNF-2J

Condition.—The services do not constitute covered (_____) therapy because they do not require the skills of a (____) therapist (previous (____) therapy services were covered.)

Paragraph.—Medicare cannot cover the services you received beginning (date) because, at that time, based on the medical information provided by the skilled nursing facility, you did not need skilled rehabilitation or skilled nursing care. The (____) therapy services you received after (date), were only to carry out a maintenance program established to maintain your functional abilities. These services do not require the continued supervisor or the skills of a (_____) therapist and, therefore, do not constitute skilled therapy under the Medicare program. (Section 1862(a)(1)(A) of the Social Security Act, 42 CFR 405.310(k), and 42 CFR 409.31-.35.)

SNF-3A

Condition.—Specific skilled service is not reasonable and necessary (service not specific or effective).

Paragraph.—The (specify service(s)) you received is/are considered a skilled service by Medicare. However, based on the medical information provided, this/these service(s) is/are not considered a specific and/or effective treatment for your condition. Since the services(s) you received was/were not reasonable or necessary for the treatment of your condition, Medicare cannot pay for your stay. (Section 1862(a)(1)(A) of the Social Security Act, 42 CFR 405.310(k), and 42 CFR 409.31-.35.)

SNF-3B

Condition.—No material improvement in relation to therapy services required.

Paragraph.—The medical information submitted by the skilled nursing facility did not show that the (specify) therapy services provided was/were reasonable in relation to the expected improvement in your condition. In this case, since you do not need skilled nursing on a daily basis, the therapy services are not considered reasonable and necessary, Medicare, therefore, cannot pay for your stay after (date). (Section 1862(a)(1)(A) of the Social Security Act, 42 CFR 405.310(k), and 42 CFR 409.31-.35.)

Paragraph.—While you required skilled (specify) therapy from (date) to (date), the medical information shows that the (specify) therapy services after that time is not reasonable in relation to the expected improvement in your condition. In this case, since you do not need skilled nursing on a daily basis and the therapy services are not considered reasonable and necessary, Medicare cannot pay for your stay after (date). (Section 1862(a)(1)(A) of the Social Security Act, 42 CFR 405.310(k), and 42 CFR 409.31-.35.)

SNF-3C

Condition.—Frequency not reasonable and necessary.

Paragraph.—Although (specify service) generally requires the skills of a (nurse, physical therapist, speech-language pathologist, occupational therapist), the frequency with which the service is given must be in accordance with accepted standards of medical practice. The service(s) you received is/are not normally needed on a daily basis. The medical information does not show medical complications which require the services to be performed on a daily basis. In this case, the services are not considered reasonable and necessary by the Medicare program. Since you did not need skilled nursing or skilled rehabilitation on a daily basis Medicare cannot cover your stay. (Section 1862(a)(1)(A) of the Social Security Act, 42 CFR 405.310(k), and 42 CFR 409.31-.35.)

SNF-4

Condition.—Skilled rehabilitation services not received daily - no skilled nursing.

Paragraph.—Although you required skilled (specify) therapy, you did not receive therapy on each day that it was available in the facility. Therefore, you do not meet the requirement for daily skilled rehabilitation services. Since you also did not need daily skilled nursing, Medicare cannot cover your stay. (Section 1862(a)(1)(A) of the Social Security Act, 42 CFR 405.310(k), and 42 CFR 409.31-.35.)

SNF-4A

Condition.--Skilled services not daily.

Paragraph.--Although you required skilled nursing services, the medical information provided by the skilled nursing facility showed you did not need them on a daily basis. Because you did not need daily skilled nursing or skilled rehabilitation, Medicare cannot cover your stay. (Section 1862(a)(1)(A) of the Social Security Act, 42 CFR 405.310(k), and 42 CFR 409.31-.35.)

SNF-4B

Condition.--SNF or SNF's URC continued stay denied. No independent review performed.

The (name of SNF) (insert if applicable - utilization review committee) has determined that the services you needed beginning (date) did not meet the requirements for payment under Medicare because you did not need skilled nursing or skilled rehabilitation services or did not need them on a daily basis after (above date).

SNF-4C

Condition.--Durable medical equipment not covered in a SNF (Part B only).

Paragraph.--Medicare covers the rental or purchase of durable medical equipment that is reasonable and necessary for use by a patient in his/her home. A skilled nursing facility does not meet Medicare's definition of a home. Therefore, no payment can be made for (specify).

SNF-TD-1

Condition.--Beneficiary does not meet the prior 3-day inpatient hospital stay requirement for SNF services. (For use prior to 1/1/89.)

Paragraph.--Posthospital skilled nursing facility services are covered by Medicare only if a person previously had a medically necessary inpatient stay in a qualified hospital. This stay must have been for a period of at least 3 consecutive days not counting the day of discharge. (Section 1861(i) of the Social Security Act.) Our records show that you do not meet this requirement. Therefore, no Medicare hospital insurance benefits can be paid for your skilled facility stay.

SNF-TD-2

Condition.--Beneficiary neither meets the regular 30-day transfer requirement, nor qualifies for exception to the 30-day requirement. (For use prior to 1/1/89.)

Paragraph.--Posthospital skilled nursing facility services can be paid by Medicare only if you were admitted to a participating skilled nursing facility and received a covered skilled level of care within:

- 30 days after discharge from a qualifying hospital stay; or

- Such time as it was medically appropriate to begin an active course of treatment where your condition was such that skilled nursing facility care would not have been medically appropriate within 30 days after discharge from a qualifying hospital stay. (Section 1861(i) of the Security Act.)

Our records show that you do not meet either requirement. Therefore, no Medicare payment can be made for your stay in the skilled nursing facility.

SNF-TD-3A

Condition.--No benefits are available because the beneficiary has exhausted 100 days of SNF services in the benefit period. (For use prior to 1/1/89.)

Paragraph.--Payment may be made by Medicare for up to 100 days for covered posthospital skilled nursing facility services in each benefit period. (Section 1812(a)(2)(A) and (b)(2) of the Social Security Act.) Our records show that payment had already been made for 100 days during your current benefit period. Therefore, beginning (date) no payment for skilled nursing facility care can be made in this benefit period.

You may be eligible for a new benefit period that would include full hospital insurance skilled nursing facility benefits when, for 60 consecutive days, you are not an inpatient of a hospital or a facility that is primarily engaged in providing skilled nursing or rehabilitation services.

NOTE: Include a notice of presumed skilled SNF care when presumption 5, §3035 is applicable and where the prior SNF was at least 60 days, or if less than 60 days, the SNF stay, in conjunction with nonhospital and non-SNF days, equaled 60 or more consecutive days. Include the following language on the HCFA-1954.

Medicare has determined that your stay in (name of facility) from (date) to (date) is part of your current benefit period, rather than the beginning of a new one. To make this determination, Medicare found that during your prior nursing home stay in (name of facility) from (date) to (date), you received services at the skilled level of care.

Although your claim for nursing home benefits in that prior nursing home stay was denied by Medicare and/or Medicaid, it was not denied because the services provided failed to meet skilled level of care requirements.

You may appeal the above determination if you believe that you received services which were not at the skilled care level during your period of nursing home care. If you appeal and Medicare agrees that these services were below the skilled level, your stay in (name of facility) from (date) to (date) will begin a new benefit period.

SNF-TD-3B

Condition.—No benefits are available because the beneficiary had exhausted 150 days of SNF services in the calendar year. (For admission on or after 1/1/89.)

Paragraph.—Payment may be made by Medicare for up to 150 days for covered skilled nursing facility services per year. Our records show that payment has already been made for 150 days of skilled nursing facility care in calendar year ____. Therefore, beginning (date) no payment for skilled nursing facilitiy care can be made for you. (Section 101(1)(2) of the Medicare Catastrophic Coverage Act, P.L. 100-360.)

3722.3 Home Health Denials, Limitation of Liability and Appeal Paragraphs.—

A. General.—Home health denial letters consist of:

- The base letter (not required for statutory exclusions and miscellaneous paragraphs);
- A base paragraph specific to the reason for denial. (These are identified as base paragraph where applicable);
- The specific denial reason;
- A statement of noncoverage and the statutory and regulatory reference;
- A limitation of liability paragraph where appliable; and
- An appeals paragraph.

Use all paragraphs, specific denial reasons, and statutory references which apply to the services for which payment is denied.

Cite the statutory reference only once when the reference(s) is identified for all services denied. In this case, add all denied services to the no payment statement, e.g., therefore, no skilled nursing or physical therapy can be covered beginning (date).

The no payment statement, statutory reference and appropriate limitation of liability for denial of the qualifying service (SN, PT, SP) also apply to dependent services e.g., home health aide, medical social service, etc., denied solely because there is no need for the qualifying service.

Generally, paragraphs may be used for full or partial denials. Where a particular type, a specific number of visits or visits on specific dates are denied, etc., you may have to substitute a no payment statement for those contained with the statutory/regulatory references. For examples:

- Therefore, no Medicare coverage will be provided for (number and type) visits from date through date .

- Therefore no Medicare payment will be made for type visits made on (dates) .

- Where a denial situation exists that is not covered in the following paragraphs, tailor a paragraph to fit the denial. If a denial situation appears frequently, submit recommended language to the RO for referral to CO.

- On all letters which reference the Act, give the full document name in a footnote; Title XVIII of the Act, commonly known as the Medicare Program, 42 U.S.C. §1395 et seq.

B. Notice of Home Health Determination (Base Letter for Use with HCFA 1954 or Intermediary Letter Format). --The base letter can be manually or computer generated. You have the option to develop complete letters or to use the HCFA - 1954. Use the following letter with all denial paragraphs with the exception of statutory exclusions and the miscellaneous paragraphs. These paragraphs require only the salutation and opening statement.

Dear Medicare Beneficiary:

This is to notify you of the Medicare coverage decision for the services you received from the home health agency during the period (from) (to) . (Show the billing period.)

To qualify for home health benefits under the Medicare program you must be:

- Confined to your home;
- Under the care of a doctor; and
- In need of one or more of the following services:

- Intermittent skilled nursing services;
- Physical therapy;
- Speech therapy; or
- A continuing need for occupational therapy after the need for intermittent skilled nursing care, or physical or speech therapy has ended.

When you meet these requirements Medicare can cover other services such as intermittent or part time home health aide services, medical social services, occupational therapy and medical supplies and durable medical equipment.

The services must be ordered by your doctor on a plan of care which he or she has established and approved and must be considered by Medicare to be reasonable and necessary for the diagnosis or treatment of your illness or injury.

C. Confined to Home.—

1. Base Paragraph.—You are considered to be confined to your home if an illness or injury limits your ability to leave your home or place of residence:

o Except with the aid of a supportive device (such as crutches, a cane, a wheelchair or a walker) or the assistance of another person; or

o Because leaving your home is medically contraindicated.

Your condition should be such that leaving your home requires a considerable and taxing effort, and that absences from home are infrequent or of relatively short duration, or are needed to receive medical treatment.

HB-1

Condition.—Ability to leave home unrestricted.

Paragraph.—Based on the information provided, your ability to leave home was not restricted by an illness or injury nor was leaving your home medically contraindicated.

HB-2

Condition.—Beneficiary leaves home regularly and frequently for nonmedical reasons.

Paragraph.—Based on the information provided, you left your home frequently and for long periods of time for reasons other than to receive medical treatment.

HB-3

Condition.—Beneficiary's residence is primarily engaged in providing medical rehabilitative or skilled nursing care to inpatients.

* Paragraph.--To be paid under the Medicare program, you must be confined to your home except when receiving services provided on an outpatient basis under arrangement by the home health agency. An institution may not be considered your place of residence if it is engaged primarily in providing skilled care to its patients. Based on the information provided, we have determined that you are residing in a facility that does not qualify as your home under Medicare.

2. Homebound Statutory/Regulatory Reference.--For HB-1 and HB-2 add:

Therefore, no services can be covered under Medicare beginning _________. (§1814 (a)(2)(C); §1835 (a)(2)(A) of the Act and 42 CFR 409.42(b)(1).)

For HB-3 add:

Therefore, no services can be covered under Medicare beginning _________. (See §1861(m) and 1814(a)(2)(C) or §1835(a)(2)(A) of the Act and 42 CFR 409.42 (b)(1).)

NOTE: Limitation of liability applies.

D. Skilled Nursing.--

1. Base Paragraph.--(Use with all skilled nursing denials). To be considered reasonable and necessary for the treatment of your illness or injury, the services you require must:

- Be consistent with the nature and severity of your illness or injury;
- Meet your medical needs within accepted standards of medical practice; and
- Require the skills of a licensed nurse.

SN-1

Condition.--Skilled observation.

Paragraph.--Skilled nursing service(s) was required at first to evaluate your medical condition and your response to medication(s) and/or treatment(s). The skills of a nurse are not needed to assess your condition when your medical condition is stable and there are no changes in your condition, medication(s) and/or treatment(s) which require skilled observation.

Paragraph.--Generally, skilled nursing visits are covered when your medical condition is unstable and nursing services are needed to assess your condition and/or your response to medication(s) and treatments.

There must be an indication that a change in your medical condition, treatment, or medication requires observation by the nurse. The information provided did not show any signs of instability or that a likelihood of change existed.

SN-2

Condition.—Teaching.

Paragraph.—Skilled nursing services were required to teach you how to administer medication(s) and/or perform treatment(s) as ordered by your physician. Medicare will cover, for a reasonable amount of time, teaching you or your caregiver the necessary tasks as ordered by your physician. However, the nurse continued to teach when agency records showed that sufficient time had been allowed for you and/or your caregiver(s) to learn and perform the tasks.

SN-3

Condition.—Restorative Nursing

Paragraph.—Medicare will pay for exercises ordered to restore a specific loss of function when they can be performed safely and effectively by a skilled nurse. It is expected that improvement will be achieved in a reasonable amount of time. The records show that you have reached a level of function where you do not need the skills of a nurse to perform such exercises.

Paragraph.—Medicare will pay for exercises ordered to restore a specific loss of function where they can be performed safely and effectively only by a physical therapist or nurse. Repetitive exercises to maintain function generally do not require the skills of a nurse to perform. Your records show that you have reached a level of function where you do not need the skills of a nurse to perform such exercises.

SN-4

Condition.—Procedures which do not require a nurse.

Paragraph.--Medicare covers services that require the skills of a nurse to perform. It generally does not require a nurse to ________________.

Examples for fill in:

- Prepour/place your medication(s) in cups.
- Administer oral/topical medications.

* Paragraph.—Medicare may pay only for the nurse to teach you or your caregiver special procedures and treatments. Medicare generally cannot cover the services of a nurse to __________.

Examples for fill in:

- Perform glucometer testing.
- * Check your pacemaker electronically.
- Prefill your insulin syringes.
- Administer eyedrops.

SN-5

Condition.—Reminding

Paragraph.—Skilled nursing visits made to remind you or a caregiver to follow instructions, do not require the skills of a nurse.

SN-6

Condition.—Venipuncture for Laboratory Tests

Paragraph.--Although the venipuncture for laboratory tests can require the skills of a nurse, the frequency of these venipuncture test(s) must be reasonable and in accordance with accepted standards of medical practice. The frequency of the venipunctures for your laboratory test(s) exceeds that which is considered reasonable under Medicare. Therefore Medicare will not cover the skilled nursing visits on (dates) .

Paragraph.—The collection of venipuncture specimens by a nurse are covered as long as they are needed for your medical condition and ordered by your doctor. However, you have reached a point in your condition where the test(s) are no longer considered by Medicare to be reasonable and necessary.

SN-7

Condition.—Duplication of service(s)

Paragraph.—If the care ordered by your doctor can be given to you during a visit to your doctor's office, a hospital outpatient/clinic, etc., then it would not be necessary to duplicate this service with a home health nursing visit.

SN-8

Condition.—Vitamin B12

Paragraph.--Specific conditions are recognized by Medicare as needing Vitamin B12 injections. You do not have one of the condition(s) for which Medicare considers B12 injection reasonable and necessary.

Paragraph.--The recognized maintenance frequency of Vitamin B12 injection for your condition is one injection per month.

SN-9

Condition.--Medication administration

Paragraph.--Medicare requires that for skilled nursing services to be covered to teach or administer a medication, the medication must be a necessary and an effective treatment for your condition and within accepted standards of medical practice. In accordance with these standards, the medication ordered by your doctor is not considered by Medicare to be reasonable or necessary to the treatment of your condition.

Paragraph.--The medication(s) which was injected by the nurse can be effectively and safely taken by mouth. There was no documentation of reasons which prevented this medication from being taken orally and therefore the injection is not considered to be reasonable and necessary.

SN-10

Condition.--Wound Care

Paragraph.--Wounds usually require the skills of a nurse for observation and/or treatment while they are healing. From the documentation provided, your wound was at a point where it could be cared for by someone other than a nurse.

Paragraph.--Wounds usually require the skills of a nurse for observation and/or treatment while they are healing. Your wounds were at a point where they could be cared for by someone other than a nurse, but Medicare will allow (number and type) visits to monitor the healing process.

SN-11

Condition.--Catheter Care

Paragraph.--The customary medical practice for foley catheter changes is monthly. There may be instances where emergency visits are made for replacement of a catheter, or where your doctor verifies the need for more frequent changes. The documentation provided supports only a need for routine monthly changes during this billing period. Medicare will cover visits made on (dates).

SN-12

Condition.--Psychiatric nursing care.

Paragraph.--Medicare does not consider home health care that is related to the treatment of a psychiatric illness to be reasonable and necessary unless the care is provided by a skilled nurse who has been specifically trained in providing psychiatric nursing care. Based on the information provided, the nurse providing your care has not had this specific training.

SN-13

Condition.--Skilled nursing visits were not intermittent/part time. (Daily skilled nursing service.)

Paragraph.--Intermittent or part time skilled nursing services are usually services for a few hours a day, several times a week. In certain circumstances more frequent services may be provided for a limited period when your doctor documents your need for them and indicates when the need for daily care is expected to end. *

The services you received did not meet the part time or intermittent skilled nursing requirement.

Condition.--Skilled nursing visits were not intermittent. (One nursing visit.)

Paragraph.--Skilled nursing care must be intermittent or part-time for Medicare coverage. A one time skilled nursing visit is usually not intermittent or part-time. The medical information provided showed that you needed only one skilled nursing visit.

E. Skilled Nursing Statutory and Regulatory References.--Add the appropriate statement and statutory/regulatory reference below to skilled nursing denials. See specific references for intermittent skilled nursing denials.

Condition.--If no skilled nursing care was needed at all (from the onset of the care) and the patient also did not need physical or speech therapy, then not only is the skilled nursing care denied, but all other HHA services are denied. Add:

Paragraph.--"Because you did not need skilled nursing care on an intermittent basis, or physical or speech therapy, as the law requires, no home health services can be covered by Medicare. (See §1814(a)(2)(C) or §1835(a)(3)(A) of the Act and 42 CFR 409.42(b)(3).")

Condition.--If skilled nursing care was needed at the onset of the care, but has ceased to be needed and no physical or speech therapy or continued occupational therapy is needed, no further home health care can be covered. Add:

Paragraph.--"Because you have ceased to need skilled nursing care, and do not need physical or speech therapy, no further home health services can be covered by Medicare beginning________. (See §1814(a)(2)(C) or §1835(a)(2)(A) of the Act and 42 CFR 409.42(b)(3).") *

* Condition.--If no skilled nursing was needed (from the onset of care) but physical or speech therapy was needed, then no skilled nursing care may be covered (other home health services may be covered). Add:

Paragraph.—Therefore, no skilled nursing services can be covered by Medicare. (See §1862(a)(1)(A) of the Act and 42 CFR 405.310(k)(1).)

Condition.—If skilled nursing care was needed initially, but ceased to be needed, and the patient needs physical or speech therapy or continues to need occupational therapy, then no further skilled nursing care can be covered but other home health services may continue to be covered. Add:

Paragraph.—Therefore, no further skilled nursing services can be covered by Medicare, beginning ______. (See §1862(a)(1)(A) of the Act and 42 CFR 405.310(k)(1).)

Condition.—If some skilled nursing care is needed, but specific identified skilled nursing services provided from the onset of care were not needed, and were denied, then skilled nursing services of that type may not be covered. Other home health services may be covered. Add:

Paragraph.—Therefore, no (specify type of skilled nursing service) can be covered by Medicare beginning __________. (See §1862(a)(1)(A) of the Act and 42 CFR 405.310 (k)(1).)

Paragraph.—Therefore, Medicare cannot cover (insert more than and/or number) skilled nursing visits from __________ through __________. (Add if applicable) However, * Medicare will pay for (specify number) skilled nursing visits from _______ through ________. (See §1862(a)(1)(A) of the Act and 42 CFR 405.310 (k)(1).)

Condition.—If skilled nursing care is needed, but specific skilled nursing services were needed initially, but have ceased to be needed, and are denied, then skilled nursing services of that type may not be covered. Other home health services may be covered. Add:

Paragraph.—Therefore, no further (specify type of skilled nursing service) can be covered by Medicare beginning __________. (See §1862(a)(1)(A) of the Act and 42 CFR 405.310(k)(1).)

Paragraph.—Therefore, Medicare can no longer cover (insert more than and/or) number skilled nursing visits beginning_________. (See §1862(a)(1)(A) of the Act and 42 CFR 405.310(k)(1).)

NOTE: Limitation of liability applies.

Condition.—If the services are being denied because they do not meet the intermittent requirement and physical or speech therapy was not required, the statement regarding the lack of coverage reads:

Paragraph.--Therefore no home health services can be covered by Medicare beginning ________. (See S1814(a)(2)(C) or 1835(a)(2)(A) of the Act and 42 CFR 409.42(b)(3).)

NOTE: Limitation of liability applies.

Condition.—If the services are being denied because they do not meet the intermittent requirement and physical or speech therapy is required, the statement regarding the lack of coverage reads:

Paragraph.—Therefore no skilled nursing services can be covered by Medicare beginning ___________. (See S1861(m)(1) of the Act and 42 CFR 409.40(a).)

NOTE: No limitation of liability applies. (Intermittent Denials).

F. Physical-Speech-Occupational Therapy.--Use this denial paragraph for physical, speech, and occupational therapy denial letters.

Base Paragraph.—To be considered covered by Medicare (insert physical therapy, speech therapy, and/or occupational therapy), services must be:

- Reasonable and necessary for the treatment of your illness or injury and at a level of complexity which requires the skills of a therapist;
- The amount, frequency, and duration of the services must be reasonable; and
- The services must be considered under accepted standards of medical practice to be specific and effective treatment for your condition, illness, or injury and provided with the expectation that improvement will occur in a reasonable period of time.

REHAB-1

Paragraph.—The medical information provided did not indicate that the (type(s)) therapy services you received were reasonable and necessary, and at a level of care which requires the skills of a therapist.

REHAB-2

Paragraph.—The medical information provided did not indicate that the amount, frequency, and duration of the (type) therapy services were reasonable and necessary.

REHAB-3

Paragraph.—The medical information provided did not indicate that the (type) therapy services you received were provided with the expectation that your condition would improve within a generally reasonable time.

REHAB-4

Paragraph.—The medical information provided did not support your need for continued therapy. You have reached a level of function where your potential for further improvement will not be materially improved by the amount of therapy requested.

REHAB-5

Paragraph.—The medical information provided indicated that sufficient time had been allowed to establish a maintenance (type) therapy program.

REHAB-6

The medical information provided indicated that the physical therapy services you received were for overall fitness and general motivation. These services generally did not require the skills of the physical therapist.

REHAB-7

Paragraph.—The medical information provided indicated that the (type) therapy is not considered by Medicare as a generally acceptable treatment for your condition.

REHAB-8

The medical information provided indicated that you have received (numbers of visits) more than were considered reasonable and necessary by Medicare for the effective treatment of your condition. However, payment will be made for (number) visits.

- Therapy Statutory and Regulatory References.—Add the appropriate statement and statutory/regulatory reference to therapy denials.

Condition.—If no physical or speech therapy was needed at all (from the onset of the care) and the patient also did not need intermittent skilled nursing, Add:

Paragraph.—"Because you did not need skilled nursing care on an intermittent basis, or physical therapy or speech therapy, as the law requires, no home health services can be covered by Medicare. (See §1814(a)(2)(C) or §1835(a)(2)(A) of the Act and 42 CFR 409.42(b)(3).)

Condition.—If physical or speech therapy was needed at the onset of the care, but has ceased to be needed and no intermittent skilled nursing care or continued occupational therapy is needed, then no further home health care can be covered. Add:

Paragraph.--"Because you have ceased to need ________________ therapy and do not need ______________ therapy, or continued occupational therapy or intermittent skilled nursing, no further home health services can be covered by Medicare beginning ________. (See §1814(a)(2)(C) or §1835(a)(2)(A) of the Act and 42 CFR 409.42(b)(3).)

Condition.--If a qualifying service is still needed (e.g., skilled nursing) but the therapy was denied from the outset. Add:

Paragraph.—Therefore, no _____________therapy can be covered by Medicare. (See §1862(a)(1)(A) of the Act and 42 CFR 405.310(k)(1).)

Condition.—If therapy was needed initially but ceased to be needed, and the patient needs another qualifying service. Add:

Paragraph.—Therefore, no further _____________ therapy can be covered by Medicare, beginning ______. (See §1862(a)(1)(A) of the Act and 42 CFR 405.310(k)(1).)

Condition.—If some therapy visits are needed, but specifically identified therapy visits were not needed and were denied. Add:

Paragraph.—Therefore, no (specify type of therapy service) can be covered by Medicare beginning__________. (See §1862(a)(1)(A) of the Act and 42 CFR 405.310 (k)(1).)

Paragraph.—Therefore, Medicare cannot cover more than (number-type) therapy visits from __________through __________. (See §1862(a)(1)(A) of the Act and 42 CFR 405.310 (k)(1).)

NOTE: Limitation of liability applies to all above.

G. Medical Social Services.—

Base Paragraph.—Medical social services may be covered when they contribute to the treatment of your medical condition and your rate of recovery. If social or emotional problems exist to the degree that they impede the progress or stability of your medical condition, the services of a qualified medical or psychiatric social worker may be required.

MSW-1

Paragraph.—The documentation did not show that social or emotional problems existed to the extent that they impeded the effective treatment of your medical condition or rate of recovery.

MSW-2

* Paragraph.—The medical social service visits which were furnished to counsel family members are not generally covered by the Medicare program.

MSW-3

Paragraph.—Medicare allows medical social services visits to handle problems which impede your medical recovery. It was determined that some of the visits which were made did not relate to your plan of care or assist in your recovery.

MSW-4

Paragraph.—Medical social services were needed at first to resolve the problems which were affecting treatment of your medical condition. The information provided shows that these problems were resolved and that your need for medical social services ceased to be considered by Medicare to be reasonable and necessary.

MSW Statutory/Regulatory References

Condition.—If the beneficiary qualifies for coverage of home health services, and the services being denied are dependent services (e.g., home health aide, medical social worker, supplies, or DME) which were not covered from the start of the care because they were not reasonable and necessary. The statement regarding the lack of coverage reads:

Paragraph.—"Therefore, no (enter the type of dependent service(s)) can be covered by Medicare (See §1862(a)(1)(A) of the Act and 42 CFR 405.310(k)(1).)

Condition.—If the beneficiary qualifies for coverage of home health services, and the services being denied are dependent services which were covered at the start of the care, but which ceased to be needed at a later point, the statement regarding the lack of coverage reads:

Paragraph.—"Therefore, no further (enter the type of dependent service(s) can be covered by Medicare beginning ________. (See §1862(a)(1)(A) of the Act and 42 CFR 405.310(k)(1).)

Condition.—If some dependent care is needed but specific services/visits were not needed. Add:

Paragraph.—Therefore, Medicare cannot cover (number) of (dependent service) visits from __________ through __________. (See §1862 (a)(1)(A) of the Act and 42 CFR 405.310 (k)(1).) Add if applicable:

- o However Medicare has covered (number of specific visits).

NOTE: Limitation of liability applies to all above.

H. Home Health Aide.--

Base Paragraph.--Home health aide services are primarily for personal care. Personal care duties can include:

- Helping you bathe;
- Helping you get in and out of bed;
- Helping you to care for your hair and teeth, to exercise, to eat and take medications, and/or to retrain you in self-help skills.

When you need personal care the home health aide may also perform household duties which are in accordance with the physicians plan of treatment as long as they do not increase the length of the visit for personal care. Based on information provided, we have determined that the home health aide services you received were not reasonable and necessary because:

Aide-1

Paragraph.--You have a caregiver who is providing services that adequately meet your personal care needs.

Aide-2

Paragraph.--The home health aide services you received were more frequent than were needed to meet your personal care needs.

Aide-3

Paragraph.--Your medical records indicate that you are generally able to perform your own personal care within a reasonable amount of time.

Aide-4

Paragraph.--Based on our review of the information provided, the (number) home health aide visits made during (date(s)) did not include personal care services.

Aide-5

Paragraph.--Although you qualify for coverage of home health care, the home health aide services must be intermittent or part-time for Medicare coverage.

To be considered intermittent or part-time, home health aide services are usually services for a few hours a day, several times a week. In certain circumstances more frequent services may be covered for a limited period, when your doctor documents your need for these services, and indicates when the need for daily care is expected to cease.

The services you received did not meet the part-time or intermittent home health aide requirement.

- Home Health Aide Statutory/Regulatory References

Condition.--If the beneficiary qualifies for coverage of home health services, and the services being denied are dependent services (e.g., home health aide, medical social worker, supplies, or DME), which were not covered from the start of the care because they were not reasonable and necessary add:

Paragraph.—Therefore, no (enter the type of dependent service(s)) can be covered by Medicare. (See §1862(a)(1)(A) of the Act and 42 CFR 405.310(k)(1).)

Condition.—If the beneficiary qualifies for coverage of home health services, and the services being denied are dependent services which were covered at the start of the care, but which ceased to be needed at a later point, add:

Paragraph.--Therefore, no further (enter the type of dependent service(s) beginning___________ can be covered by Medicare. (See §1862(a)(1)(A) of the Act and 42 CFR 405.310(k)(1).)

Condition.—If some dependent care is needed but specific services/visits were not needed, add:

Paragraph.—Therefore, Medicare cannot cover (number) of (dependent service) visits from______ through _______.

(See §1862(a)(1)(A) of the Act and 42 CFR 405.310(k)(1).) However, Medicare has allowed (number) visits (week/month/other period).

NOTE: Limitation of liability applies.

Condition.—If the services are being denied because they do not meet the intermittent requirement, add:

Paragraph.—Therefore no home health aide services can be covered by Medicare beginning __________. (See §1861(m)(4) of the Act and 42 CFR 409.40 (d).)

* NOTE: No limitation of liability applies.

I. DME.—

Base Paragraph.—Durable Medical Equipment (DME) is used in the home to assist with your treatment and rehabilitation. DME generally is defined as item(s) which:

- Can withstand repeated use;
- Primarily serves a medical purpose; and
- Generally is not useful to a person in the absence of illness or injury.

Based on the information the home health agency provided, we have determined that the equipment you received was not covered because:

DME-1

Paragraph.—The (specify) is not considered by Medicare to be appropriate for home use. (See §1862(a)(1)(A) of the Act and 42 CFR 405.310(K)(1).)

DME-2

Paragraph.—The (specify) is not considered to be equipment that is primarily medical in nature. (See §1862(a)(1)(A) of the Act.)

DME-3

Paragraph.—The (specify) is not considered to be primarily medical in nature by Medicare, but is considered to be a comfort or convenience item. (See §1862(a)(1)(A) of the Act.)

DME-4

Paragraph.—The (specify) furnished was not documented as medically necessary for the treatment of your condition. (See §1862(a)(1)(A) of the Act and 42 CFR 405.310(K)(1).)

- DME Statutory/Regulatory References

"Therefore, the (enter the type of equipment) cannot be covered by Medicare beginning (date). (See §1862(a)(1)(A) of the Act and 42 CFR 405.310(k)(1).)"

* NOTE: Limitation of liability applies to DME 1 and 4.

J. Medical Supplies.—

Base Paragraph.—Medical supplies are therapeutic items which are essential to carry out the care ordered by your doctor. Items used by you such as skin conditioners, soaps, and powders, and which serve a routine hygienic purpose are generally not covered by Medicare. Based on the information provided, we have determined that the supplies you received were not medical supplies because:

MS-1

Paragraph.—The supplies were not medically necessary for the treatment of your condition.

MS-2

Paragraph.—The amount of medical supplies furnished was more than was medically reasonable and necessary for the treatment of your condition.

MS-3

Paragraph.—The medical supplies which were furnished to you were not ordered by your physician.

- MS Statutory/Regulatory Reference

"Therefore the (specify) cannot be covered by Medicare beginning __________ (See §1862 (a)(1)(A) and 42 CFR 405.310 (k)(1).)"

NOTE: Limitation of liability applies to MS1 and 2.

K. Statutory Exclusions.—

Stat-1

Condition.—Services covered by another government agency; e.g., CHAMPUS, VA.

Paragraph.—Patients eligible to receive home health benefits from another government agency are not eligible to receive Medicare benefits for the same service. (See §1862(a)(3) of the Act.)

NOTE: No limitation of liability applies.

Stat-2

Condition.—Excluded services.

Paragraph.—Certain services are excluded from coverage under the Medicare law. No Medicare payment can be made for the services you received for (exclusion).

Use the statutory exclusions to fill in the blank:

*

- o Drugs and Biologicals (See S1861(m)(5) of the Act and 42 CFR 409.40(e));
- o Routine Foot Care (See S1862(a)(13)(c) of the Act and 42 CFR 405.310(1);
- o Personal comfort items (specify). (See S1862(a)(6) of the Act and 42 CFR 405.310(j)); or
- o Orthopedic shoes and Appliances (specify). (See S1862(a)(8) of the Act and 42 CFR 405.310(f).)

NOTE: No limitation of liability applies.

Stat-3

Condition.—Prisoners.

Paragraph.—Based on the information provided, we have determined that the services you received are not covered under Medicare.

Payment may not be made for items or services rendered to prisoners, where the State (or other government component which operates the prison) is responsible for your medical needs. (See S1862(a)(2) of the Act.)

NOTE: No limitation of liability applies.

L. Miscellaneous.—

MISC-1

Condition.—Home health administrative visits/evaluation visit.

Paragraph.—In order to participate in the Medicare program, home health agencies are required to make an initial home visit to determine if they can meet your medical needs, and to determine if you qualify for Medicare home health services. Based on the information provided, the visit on (date) was only for this evaluation. The agency may not charge you for the cost of the visit. (See S1866(a)(1)(A) of the Act.)

NOTE: No limitation of liability applies.

MISC-2

Condition.—ESRD.

Paragraph.—Payment may be made for End Stage Renal Disease (ESRD) services only if they are furnished by an ESRD certified facility. (See §1881(b)(1) of the Act.) Medicare covers home health services provided ESRD patients when:

- The care is not associated with the renal disease; or
- The primary reason for the home health visit is not related to renal disease.

Based on the information provided, the home health services you received appear to relate to the services being provided by the dialysis facility. Therefore, based on our review, no additional Medicare payment can be made beginning ________________.

NOTE: No limitation of liability applies.

MISC-3

Condition.—No physician certification.

Paragraph.—Your home health services are not covered because the physician certification required by Medicare law was not obtained. A certification is a signed statement from your doctor which certifies that you were confined to home and in need of skilled nursing care on an intermittent basis or physical or speech therapy. (See §1814(a)(2)(C) and 1835(a)(2)(A) of the Act and 42 CFR 405.1633 and 42 CFR 489.21(b).) *

NOTE: No limitation of liability applies.

MISC-4

Condition.—Services not provided.

* Paragraph.—The home health agency has billed for visits that were not documented in your medical record. Therefore, no Medicare payment will be made (for number) (type) visits.

The home health agency may not charge you for visits which were provided, but not documented in your record. (See §1866(a)(1)(A) of the Act.)

NOTE: No limitation of liability applies.

MISC-5

Condition.—Services exceeded physician order.

*

Base Paragraph.--An individual is eligible for home health services under the Medicare program when they are ordered by the physician and a plan of treatment for furnishing such services is established.

Paragraph.—The number of visits billed are in excess of those ordered by your doctor on your plan of care. Therefore, no payment can be made under the Medicare program for (number/type of visits) visits. (See §1862(a)(1)(A) of the Act.)

NOTE: No limitation of liability applies.

Paragraph.—The (number, type of visits) were not covered because they were not included in a plan of care established and approved by your physician. The home health agency may not charge you for any items or services that would have been covered by Medicare if they had been included in the plan of care. (See §1814(a)(2)(C), or 1835 (a)(2)(A) 1866(a)(1)(A) and 1861(m) of the Act and 42 CFR 405.1633, 42 CFR 489.21(b) and 42 CFR 409.42(d).)

NOTE: No limitation of liability applies.

MISC-6

Condition.--HHA supervisory visits.

Paragraph.—To participate in the Medicare program, the home health agencies are required to supervise the services provided by home health aides (42 CFR 405.1227). The home health agency cannot charge you for supervisory visit(s) made on (date(s)).

NOTE: No limitation of liability applies.

MISC-7

Condition.—Dependent services billed - no qualifying service ordered.

Paragraph.—Medicare can cover home health services only when intermittent skilled nursing or physical or speech therapy is also rendered. Since you did not receive any of these services, no payment can be made for the (specify dependent service). (See §1814(a)(2)(C) or 1835 (a)(2)(A) of the Act and 42 CFR 409.42(b)(3).)

*

NOTE: Limitation of liability applies.

M. Limitation of Liability.—Use the following paragraphs to explain to the beneficiary and provider their limitation of liability.

L-1

Condition.—Beneficiary liable.

* Paragraph.—Medicare cannot pay the home health agency for the (type of service(s) made on (dates). Based on the information provided, we have determined that you knew that the care would not be covered by Medicare prior to receiving the service(s) because:

o You had been notified of the Medicare denial of these same services under the same circumstances; and/or

o The (agency) notified you in advance of providing the care that Medicare would not pay for the care.

L-2

Condition.—Partial payment under §1879 where the provider is liable.

Paragraph.--Although Medicare cannot cover the (services) that you received, we have paid the agency for the services provided from (date) through (date) because of a special provision of the Medicare law which limits your and/or the agency's liability when certain criteria are met. (See §1879 of the Act.) This permits Medicare payment when neither you nor the agency knew or had reason to know that the services you received were noncovered by Medicare.

For services furnished from (date) through (date) payment was not made because the agency knew that the care would not be covered. However, we believe that you did not know that these services would not be covered by Medicare. Therefore you are responsible only for charges for services not included in the Medicare home health benefit.

If you have paid the agency for the noncovered services prior to the date you received written notification of noncoverage, reimbursement can be made for the amounts paid. Please contact this office or your local Social Security Office (within 6 months of receipt of this letter) and provide:

o A copy of this letter; and

o The bill for services received, receipts, or any other evidence of payment to the agency.

The receipt of this letter is considered notification that you are now aware that the services you received were not covered. Therefore, you will not be protected from liability for the cost of such services in the future if it is determined that they cannot be covered for the same reasons. All subsequent bills for home health services will be subject to review by Medicare.

L-3

Condition.—Provider liable (beneficiary not liable).

Paragraph.--Although Medicare cannot cover the services mentioned above, you are not responsible for paying the home health agency. Medicare has determined from the information provided that you did not know that these services were not covered. Therefore, you are not responsible for charges for these services.

If you have paid the agency for the noncovered services prior to the date you received notification of noncoverage, reimbursement can be made for the amounts charged. Please contact this office or your Social Security Office (within 6 months of receipt of this letter) and provide:

o A copy of this letter; and

o The bill for services received, receipts, or any other evidence of payments to the agency.

L-4

Condition.—Partial provider liability and partial beneficiary liable

Paragraph.--Although Medicare cannot cover the home health care that you received, a provision in Medicare law protects a beneficiary from being responsible for the charges of home health services when the beneficiary neither knew, nor had reason to know, that Medicare would not pay for the charges.

Medicare has determined from the information provided that you did not know that all services you received were not covered until ___(date)___.

Insert Applicable Option

* Option 1.—You had a claim previously denied for the same services under the same circumstances and received notification on (date).

* Option 2.—The home health agency notified you on (date) that your care would not be covered.

Therefore you are responsible only for the charges for services from (date) through (date) which are not included in the Medicare benefit and for all charges for services after (date) .

Please contact this office or your local Social Security Office (within 6 months of receipt of this letter) and provide:

o A copy of this letter; and

o The bill for services received, receipts, or any other evidence of payments to the agency.

* The following information applies to any future claims made for this type of service. The receipt of this letter is considered notification that you are now aware that under the same circumstances the services you received were not covered. Therefore, you will not be protected for the cost of such services in the future if it is determined that they can not be covered for the same reasons. All subsequent bills for services will be subject to review by Medicare.

If you disagree with the determination, you may request a reconsideration as explained in this notice.

L-5

Condition.—Payment made (neither beneficiary nor provider liable).

Paragraph.--Although Medicare cannot cover the home health care that you received, we have paid the agency because of a special provision in the Medicare law. This provision permits Medicare payment for home health services when neither you, nor the agency knew, nor had reason to know that the services would be denied by Medicare. (See §1879 of the Act.)

Since this is the finding in your case, you are responsible only for the coinsurance and any charge for services not included in the Medicare home health benefit. The receipt of this letter is considered notification that you are now aware that services received were not covered. Therefore, in the future you will not be protected from liability for such services if it is determined that they cannot be covered for the same reasons. All subsequent home health bills for services will be subject to review by Medicare.

Even though payment is being made, if you disagree with our determination you may request a reconsideration as explained in this notice.

N. Appeals.--

Condition.--Use the appeals paragraph on all HHA denial letters.

Paragraph.--If you are dissatisfied with this determination, you may make a written request for reconsideration of the determination. For hospital insurance, Medicare Part A, you must file a written request within 60 days from the date of receipt of this notice. For medical insurance (Medicare Part B), you must file your written request for a review within 6 months from the date of this notice. You may file your written request for a review of the determination at your local Social Security Office or by writing directly to (name). You may appoint an attorney or a qualified individual to represent you in your appeal. If you decide you want a representative, you or your respresentative must complete and sign an Appointment of Representative Form SSA-1696-U4 form. This form may be obtained from your local Social Security Office. Forward a copy of this letter with your written request.

- Home health denial determination model letter:

Dear Medicare Beneficiary:

This is to notify you of the Medicare coverage decision for the services you received from the home health agency during the following period (from) (to) .

To qualify for home health benefits under the Medicare program you must be:

- Confined to your home;
- Under the care of a doctor; and
- In need of one or more of the following services:
  - Physical therapy;
  - Speech therapy;
  - Intermittment skilled nursing services; or

* — A continuing need for occupational therapy after the need for intermittent skilled nursing care, or physical or speech therapy has ended.

The services must be ordered by your doctor on a plan of care established and approved by him/her and be considered by Medicare to be reasonable and necessary for the diagnosis or treatment of your illness or injury.

L

To be considered reasonable and necessary for the treatment of your illness or injury, the services you require must:

- Be consistent with the nature and severity of your illness or injury;
- Meet your medical needs within accepted standards of medical practice; and
- Require the skills of a licensed nurse.

Skilled nursing service(s) were required at first to evaluate your medical condition and your response to medication(s) and/or treatment(s). The skills of a nurse are not needed to evaluate your condition when there are no changes in your medication(s) and/or treatment(s) which require skilled observation.

Because you have ceased to need skilled nursing care, and do not need physical therapy or speech therapy, no futher home health services can be covered by Medicare beginning _________. (See §1814(a)(2)(C) or §1835(a)(2)(A) of the Act and 42 CFR 409.42(b)(3).)

Although Medicare cannot cover the home health care that you received, we have paid the agency because of a special provision in the Medicare law. This provision permits Medicare payment for home health services when neither you nor the agency knew or had reason to know that the services would be denied by Medicare. (See §1879 of the Act.)

Since this is the finding in your case, you are responsible only for the coinsurance and any charge for services not included in the Medicare home health benefit. The receipt of this letter is considered notification that you are now aware that services received were not covered. Therefore, in the future you will not be protected from liability for such services if it is determined that they cannot be covered for the same reasons. All subsequent home health bills for services will be subject to review by Medicare.

Even though payment is being made, if you disagree with our determination you may request a reconsideration as explained in this notice.

If you are disatisfied with this determination you may make a written request for reconsideration of that determination. For hospital insurance, Medicare Part A, you must file a written request within 60 days from the date of receipt of this notice. For medical insurance (Medicare Part B), you must file your written request for a review within 6 months from the date of this notice. You may file your written request for a review of the determination at your local Social Security Office, or by writing directly to (name). You may appoint an attorney or a qualified individual to represent you in your appeal. If you decide you want a representative, you or your representative must complete and sign an Appointment of Representative Form SSA-1696-44 form. This form may be obtained from your local Social Security Office. Forward a copy of this letter with your written request.

3722.4 Miscellaneous Situations--All Providers.--

MISC-1

Condition.—The beneficiary has refused to request reimbursement under hospital insurance.

NOTE: When this paragraph is used, omit the appeals paragraph on the HCFA-1954 letter as the appeals procedures are not applicable unless there is a signed claim.

Paragraph.—For Hospital and SNF Show: No benefit can be paid for you under hospital insurance because you did not request payment. Even though no benefits were paid, the days you spent as an inpatient of the institution named above will be subtracted from the total number of days available to you in this benefit period.

If you decide that you want to request payment under Medicare, please get in touch with the institution which provided the services.

Paragraph.—For HHA Visits Show: No benefits can be paid for you because you did not request payment.

If you decide that you want to request payment under Medicare, please get in touch with the HHA which provided the services.

MISC-2

Condition.—Expenses were covered by a WC plan.

Paragraph.—We have been informed that the medical services and supplies you received from the above provider are covered under a WC plan. To the extent that those services are covered by a WC program, payment cannot be made under Medicare. You may resubmit your claim for these benefits if your WC claim is denied.

HHA-2

Condition.—Services did not meet the "intermittent" requirement for skilled nursing care; no physical, speech therapy, furnished. (Applicable to Part A and Part B.)

Paragraph.—An individual is eligible for home health benefits only if he requires skilled nursing care on an intermittent basis or physical or speech therapy. "Intermittent" is defined as the need for a medically predictable skilled nursing service at least once every 60 days except where a condition exists which would clearly establish that the recurring need for skilled nursing services is medically predictable less frequently than once every 60 days.

Since you did not need a skilled nursing service at least once every 60 days and did not have a condition which established a medically predictable recurring need for skilled nursing services less frequently than once every 60 days, you do not meet this requirement. Therefore, no Medicare payment can be made for any of the home health services you received.

HHA-3

Condition.—Services required did not constitute "physical therapy;" no speech therapy, intermittent skilled nursing care furnished. (Applicable to Part A and Part B.)

Paragraph.—An individual is eligible for home health benefits only if he requires skilled nursing care on an intermittent basis or physical, or speech therapy.

Physical therapy has been defined as those services prescribed by a physician which require the skills of a qualified physical therapist and are performed by, or under, the supervision of such a therapist.

Our records show that you do not meet this requirement. Therefore, no Medicare payment can be made for any home health services you received.

HHA-4

Condition.—Beneficiary does not meet requirement of being confined to his home. (Applicable to Part A and Part B.)

Paragraph.—To be eligible for home health benefits under the Medicare program, a beneficiary must be confined to his home. Generally, a beneficiary will be considered to be confined to his home if he has a condition due to an illness or injury which restricts his ability to leave his place of residence except with the aid of crutches, cane, wheelchair, walker, the assistance of another person, or the use of special transportation.

The records show that you did not meet the requirement of being confined to your home. Therefore, no Medicare benefits can be paid for these services.

HHA-5

Condition.--Beneficiary's residence is primarily engaged in providing medical or nursing care to inpatient or rehabilitative services to injured, disabled, or sick. (Applicable to Part A and Part B.)

Paragraph.--To be paid for under the Medicare program, home health services must be furnished in a place of residence used as the beneficiary's home. A beneficiary's home may include an apartment, a relative's home, or a home for the aged. A hospital or a skilled nursing facility may not be considered a place of residence.

The records show that you did not receive home health services in a place that could be considered a place of residence for home health coverage purposes. Therefore, no Medicare benefits can be paid for these services.

HHA-6

Condition.--Nurse's visits not covered since the only services rendered were the administration of vitamin B-12 injections for a condition for which the injections were not a reasonable and necessary treatment. (Applicable to Part A and Part B.)

Paragraph.--An individual is eligible for home health benefits only if he or she receives skilled nursing care on an intermittent basis, or physical, speech therapy. The giving of intravenous and intramuscular injections of medication are considered skilled nursing care. However, in order for the services of the nurse to be covered under Medicare, the injection must be a reasonable and necessary treatment for the condition for which it was given. According to medical advice, vitamin B-12 injections are considered an effective treatment for only certain medical conditions such as pernicious anemia. If the vitamin B-12 injection is not given to treat one of these conditions, the injection is not considered a reasonable and necessary treatment.

The records show that your condition is not one for which vitamin B-12 injections are considered a reasonable and necessary treatment. Therefore, no Medicare payment can be made for the services of the nurse who administered the injection.

B. Partial Denial Paragraphs for HHA Bills (Use with HCFA-1955 Letter).--

HHA-20

Condition.--Services rendered after some initial visits were allowed but did not require the skills of a licensed nurse; no physical or speech, therapy furnished. (Applicable to Part A and Part B).

Paragraph.—An individual is eligible for home health benefits only if he requires skilled nursing care on an intermittent basis or physical or speech therapy. Skilled nursing care is that type of service which must be performed by, or under the supervision of, a licensed nurse to assure the safety of the patient and to achieve the medically desired result.

Beginning with _______ the services you required could have been safely and effectively rendered by a nonmedical person. Thus, they cannot be considered skilled nursing services regardless of who actually performs or supervises the services. Therefore, no further Medicare benefits can be allowed for any home health services furnished you.

NOTE: See S3722.5 for applicable Limitation of Liability paragraph.

HHA-21

Condition.—Nurse's visits not covered for administration of vitamin B-12 injections because the injections were for a condition for which they were not a reasonable and necessary treatment. However, there were covered visits for the other intermittent skilled nursing care provided during the billing period. (Applicable to Part A and Part B.)

Paragraph.—An individual is eligible for home health benefits only if he or she requires skilled nursing care on an intermittent basis, or physical or speech therapy. The giving of intramuscular injections of medication are considered skilled nursing care. However, in order for the services of the nurse to be covered under Medicare, the injections must be a reasonable and necessary treatment for the condition for which it is given. According to medical advise, vitamin B-12 injections are considered an effective treatment for only certain medical conditions such as pernicious anemia. If the vitamin B-12 injection is not given to treat one of these conditions, the injection is not considered a reasonable and necessary treatment.

The records show that your condition is not one for which vitamin B-12 injections are considered a reasonable and necessary treatment. Medicare payment cannot be made for the services of the nurse who administered the injection. Medicare will help pay for the other skilled nursing services that you received during the above billing period even though Medicare cannot pay for the services of the nurse who administered the vitamin B-12 injection. Therefore, Medicare will not pay for (number) visits during this billing period.

HHA-23

Condition.—Some of the visits are reasonable and necesary and others are not. (Applicable to Part A and Part B.)

Paragraph.--The services that you received for your condition during the above billing period would be covered under the home health care provisions of the Medicare law, if they were reasonable and necessary to the treatment of your condition. It has been determined however, that you have received (number) more treatments of (physical therapy or vitamin B-12, etc.) than are necessary and reasonable for effective treatment of your condition. Therefore, Medicare can only pay for the number of visits that are determined to be not excessive.

NOTE: See §3722.5 for applicable Limitation of Liability paragraph.

3722.4 Miscellaneous Situations—All Providers.—

MISC-1

Condition.--The beneficiary has refused to request reimbursement under hospital insurance.

NOTE: When this paragraph is used, omit the appeals paragraph on the HCFA-1954 letter as the appeals procedures are not applicable unless there is a signed claim.

1. Paragraph.—For Hospital and SNF Show: No benefit can be paid for you under hospital insurance because you did not request payment. Even though no benefits were paid, the days you spent as an inpatient of the institution named above will be subtracted from the total number of days available to you in this benefit period.

If you decide that you want to request payment under Medicare, please get in touch with the institution which provided the services.

2. Paragraph.—For HHA Visits Show: No benefits can be paid for you because you did not request payment.

If you decide that you want to request payment under Medicare, please get in touch with the home health agency which provided the services.

MISC-2

Condition.—Expenses were covered by a WC plan.

Paragraph.—We have been informed that the medical services and supplies you received from the above provider are covered under a workers' compensation plan. To the extent that those services are covered by a workers' compensation program, payment cannot be made under Medicare. You may resubmit your claim for these benefits if your workers' compensation claim is denied.

MISC-3

Condition.--VA paid, or or has agreed to pay, the entire bill.

Paragraph.--We have been informed that the Veterans Administration paid for, or has agreed to pay for, the services and supplies you received from the above provider. Under the Medicare law, no payment can be made for these services.

MISC-4

Condition.--A governmental agency paid, or will pay, the entire bill.

Paragraph.--We have been informed that the medical services and supplies you received from the above provider were paid for, or will be paid for, by a governmental agency. Under the Medicare law, no payment can be made for these services.

MISC-5

Condition.--The physician for the beneficiary refuses to certify the hospital or SNF stay or HHA visits for a reason other than lack of medical necessity.

1. Paragraph.--For Hospital and SNF Show: No payment can be made under the Medicare hospital insurance program because your attending physician did not sign the necessary certification, even though your stay may have been medically necessary.

However, the institution may not charge you for any items or services which would have been paid for by the Medicare program had your physician signed the necessary certification.

Although no benefits were paid, the days you spent as an inpatient of the institution shown above will be subtracted from the total number of days available to you in this benefit period.

2. Paragraph.--For HHA Visits Show: No payment can be made under the Medicare hospital insurance program because your attending physician did not sign the necessary certification.

However, the home health agency may not charge you for any items or services which would have been paid for by the Medicare program had your physician signed the necessary certification.

MISC-6

Condition.--Excluded services under Part A and Part B; e.g., noncovered dental care, cosmetic surgery.

Paragraph.--(Describe services) are excluded from coverage under the Medicare law. Therefore, no Medicare payment can be made for these services.

MISC-7

Condition.--Beneficiary is not entitled to Part A.

Paragraph.--The Social Security Administration's records show you are not entitled to hospital insurance benefits under Medicare.

This notice refers only to hospital insurance. Your Medicare Handbook explains the difference between hospital insurance and medical insurance.

MISC-8

Condition.--Beneficiary is not entitled to Part B.

Paragraph.--The Social Security Administration's records show you are not entitled to medical insurance benefits under Medicare. This notice refers only to medical insurance. Your Medicare Handbook explains the difference between medical insurance and hospital insurance.

MISC-9

Condition.--Beneficiary is not entitled to Part A or Part B.

Paragraph.--The Social Security Administration's records show you are not entitled to either hospital or medical insurance benefits under Medicare.

MISC-10

Condition.--Provider fails to submit requested information.

Paragraph.--(Explain the reason for denying the claim in the first part of the fill-in position of the letter. Explain what was needed to complete the bill and why it was not obtainable.)

Add the next paragraph for all types of bills:

"The above facility did not furnish us with the information needed to determine if the services were covered. Therefore, they should not bill you for the services except for the deductible and coinsurance. However, if the institution submits the required information and your claim is reopened, it may be decided that some or all of the services furnished you for the above period were not covered under the Medicare program. In that event, you may have to pay for the noncovered services."

Use the following paragraph for an inpatient hospital on SNF stay:

"Even though no Medicare payment was made on your behalf, the days you spent as an inpatient of the institution named above will be subtracted from the total number of days available to you in this benefit period."

MISC-11

Condition.--Beneficiary (or his representative) is responsible for the failure of the provider to file a timely claim.

Paragraph.--No Medicare payment can be made for the services furnished you for the dates shown above in Notice Covers Period because you did not file a timely request for payment.

The last date you could have filed an effective request for payment was ( ). The records show that your request for payment was filed after this date.

Because you did not file a timely request for payment, the institution may charge you for any items or services furnished during the above period.

NOTE: Where the billing period permits partial payment, appropriately modify the above total denial paragraph.

MISC-12

Condition.--Provider is responsible for failure to file a timely claim.

Paragraph.--No Medicare payment can be made for the services furnished you for the dates shown above in Notice Covers Period because the institution furnishing the services did not file a timely claim. Under the Medicare program, it is necessary for for the institution furnishing the services to file a timely claim for payment.

Although your request for payment was filed timely; the institution did not file its claim within the time limitation.

The institution may not charge you for any items or services which would have been paid for by the Medicare program had the institution filed within the time limitation. The institution can charge you $______ in Medicare deductibles and $______ in coinsurance amounts.

NOTE: Where the billing period permits partial payment, appropriately modify the above total denial paragraph.

MISC-13

Condition.—The services shown did not constitute covered physical therapy, because they did not require the skills of a physical therapist.

Paragraph.—The treatments you received from the provider shown above do not constitute covered physical therapy services for Medicare purposes.

For Medicare purposes, covered physical therapy is defined as those services furnished under a plan of treatment prescribed by a physician, which require the skills of a qualified physical therapist and are performed by, or under, the supervision of such a therapist. The services involved in carrying out an exercise program designed to maintain function do not require the skills of a qualified physical therapist, and, therefore, do constitute physical therapy as defined for Medicare purposes.

MISC-14

Condition.—Beneficiary failed to submit requested information.

Paragraph.—We received a claim for payment for you from the provider stated above but have not been able to verify your entitlement to Medicare hospital insurance. Although we have written you twice requesting verification or correction of your name and/or health insurance number, you have not responded. We are therefore unable to take any further action on your claim.

MISC-15

Condition.—Services may be covered under the BL Program.

Paragraph.—We have determined that the medical services and supplies you received from the above provider may be covered under the Federal Black Lung Benefits Program. To the extent that those services are covered by that program, payment cannot be made under Medicare. Your claim should be submitted to:

Federal Black Lung Program
P.O. Box 34915
West Bethesda, MD 20817

MISC-16

Condition.—Expenses may be covered by automobile medical, or no-fault insurance policy or plan.

Paragraph.—We have been informed that medical services and supplies you received from the above provider may be covered by automobile medical or no-fault insurance policy or plan. To the extent that those services are covered by automobile medical or no-fault insurance, payment cannot be made under Medicare. You may request that the provider resubmit your claim for these benefits if your automobile medical or no fault insurance does not pay your claim in full.

MISC - 17

Condition.--Beneficiary refused to give information concerning other insurance coverage.

Paragraph.--We received a claim for payment for you from the provider stated above, but have not been able to determine if you have other insurance which may be primary to Medicare. Although we have contacted you requesting this information, you have not supplied us with the necessary information. We are, therefore, unable to take any further action on your claim.

MISC - 18

Condition - Expenses covered by EGHP.

Paragraph - We have been informed that the medical services and supplies you received from the above provider are covered by your Employer Group Health Plan. By law the Employer Group Health Plan is primary payer and no Medicare payment can be made for these services unless the Employer Group Health Plan is billed first. Consult your employer and the State Insurance Commissioner or other official having jurisdiction if necessary to receive payment from your Employer Group Health Plan. If the Employer Group Health Plan makes payment but does not pay the full charges, you may request that the provider resubmit your claim for secondary Medicare benefits.

When your Employer Group Health Plan is primary payer under the law, but fails to pay primary benefits or fails to make appropriate reimbursement to the Medicare program, you have the right to take legal action against the Employer Group Health Plan and to collect double damages. This is in accordance with Section 1862(b) (5) of the Social Security Act.

B. Miscellaneous Partial Denial Paragraphs for all Provider Bills (Use with HCFA-1955 Letter).—

MISC-20

Condition.—Part A services and supplies were furnished prior to the beneficiary's entitlement to Part A.

Paragraph.—The Health Care Financing Administration's records show you became entitled to hospital insurance on the first day of (show month and year).

Under the hospital insurance program, we cannot pay for services and supplies furnished you before that date.

MISC-21

Condition.—Part B services and supplies were furnished prior to the beneficiary's entitlement to Part B.

Paragraph.—The Health Care Financing Administration's records show you became entitled to medical insurance on the first day of (show month and year).

Under the medical insurance program, we cannot pay for services and supplies furnished you before that date.

MISC-22

Condition.—Part A services and supplies were furnished after the beneficiary's entitlement to Part A terminated.

Paragraph.—The Health Care Financing Administration's records show your entitlement to hospital insurance ended with the last day of (show month and year).

Under the hospital insurance program, we cannot pay for services and supplies furnished you after that date.

This notice refers only to hospital insurance. Your Medicare Handbook explains the difference between hospital insurance and medical insurance.

MISC-23

Condition.—Part B services and supplies were furnished after the beneficiary's entitlement to Part B terminated.

Paragraph.—The Health Care Financing Administration's records show your entitlement to medical insurance ended with the last day of (show month and year).

Under the medical insurance program, we cannot pay for services and supplies furnished you after that date.

This notice refers only to medical insurance. Your Medicare Handbook explains the differences between medical insurance and hospital insurance.

MISC-24

Condition.--The services do not constitute covered physical therapy because they do not require the skills of a physical therapist; previous physical therapy services were covered.

Paragraph.--For Medicare purposes, covered physical therapy is defined as those services furnished under a plan of treatment prescribed by a physician, which require the skills of a qualified physical therapist and are performed by, or under, the supervision of such a therapist. When a patient reaches the point where the services he requires are designed to maintain his level of function, such services do not constitute physical therapy for Medicare puroses since the carrying out of such services does not require the skills of a physical therapist.

The records show that beginning with __________, the services you required were designed to maintain function and therefore did not require the skills of a qualified physical therapist. Therefore, no further Medicare payment can be made for the services you received.

3722.5 Limitation of Liability Paragraphs--All Providers (Except Inpatient Hospital).--

A. Limitation Provision - Total Denial Paragraphs for all Provider Bills--Except Inpatient Hospital (Use with HCFA-1954 Letter).--

LIMITATION OF LIABILITY-1

Condition.--Beneficiary and provider without fault under the limitation of liability provision of the law.

NOTE: Where applicable, this paragraph is to follow SNF-1, or HHA-1. This paragraph is preprinted on the above forms. If waiver is not applied to total stay, see Limitation-20.

Paragraph.--Despite an adverse determination concerning noncovered services, Medicare payment is being made under the limitation of liability provision. This provision of the law permits payment when it has been determined that neither you, nor the provider, knew or had reason to know that the services received were not covered under Medicare. Since this is the finding in your case, you are liable only for the deductible, coinsurance, and any charges for services or items not covered by Medicare. The receipt of this notice is considered evidence that you are aware that the services you received were not covered. Therefore, you will not be protected from liability for such services in the future if it is determined they involve treatment for the same condition or a similar level of care.

Even though payment is being made, if you disagree with this coverage determination, you may request reconsideration as explained in this notice.

LIMITATION OF LIABILITY-2

Condition.--Beneficiary without fault and provider at fault under the limitation of liability provision of the law.

NOTE: Where applicable, this paragraph is to follow SNF-1, or HHA-1. This paragraph is preprinted on the above forms. If waiver is not applied to total stay, see Limitation of Liability-21, § 3722.5B.

Paragraph.--Despite an adverse determination concerning noncovered services, a provision of the law relieves a beneficiary from liability for payment for such noncovered services when it is determined that the beneficiary neither knew, nor had reason to know, that services received were not covered under Medicare. Thus, you are responsible only for the deductible, coinsurance, and any charges for services or items not covered by Medicare. Also, the number of days and/or visits used during the waived period will be charged against your Medicare utilization record. If you have already paid the provider for the services, please contact this office or your local Social Security office within 6 months of the date of this notice and furnish the following documents: a copy of this notice, the bill received for services, receipts or other evidence of payments to the provider.

The receipt of this notice is considered evidence that you are aware that the services you received were not covered. Therefore, you will not be protected from liability for such services in the future if it is determined they involve treatment for the same condition or a similar level of care. Even though you are not liable for the billed services described above, if you disagree with this coverage determination, you may request a reconsideration as explained in this notice.

LIMITATION OF LIABILITY-3

Condition.--Beneficiary at fault under the limitation of liability provision of the law.

NOTE: Where applicable, this paragraph is to follow SNF-1, or HHA-1.

best copy available

Paragraph.—A provision of the Medicare law could relieve you from liability for charges resulting from certain noncovered services if it is determined that you did not know, and could not reasonably have been expected to know, that the items or services were not covered under Medicare. We have determined that you should have been aware that the services you received were not covered because ___(enter reasons)___.

Therefore, Medicare payment cannot be made for the noncovered services that you received.

If you disagree with either the coverage determination or the decision that you had knowledge that the services you received were not covered, you may request a reconsideration as explained in this notice.

B. Limitation of Liability Provision - Partial Denial Paragraphs for all Provider Bills--Except Inpatient Hospital (Use with HCFA-1955 Letter).--

LIMITATION OF LIABILITY-20

Condition.--Beneficiary and provider without fault under the limitation of liability provision of the law.

NOTE: Where applicable, this paragraph is to follow: SNF-20, and 22A, or HHA-20 and 23. This paragraph is preprinted on above forms. This paragraph may also be used where the total stay is not covered but only a portion of the stay can be waived.

Paragraph.--Despite an adverse determination concerning noncovered services, program payment is being made under the limitation of liability provision for services received after the date given in the above paragraph. This provision of the law permits payment when it has been determined that neither you, nor the provider knew, or had reason to know, that the services received were not covered under Medicare. Therefore, program payment is being made for the services billed by the provider for the period ___(dates)___. The receipt of this notice is considered evidence that you are aware that certain services you received were not covered. Therefore, you will not be protected from liability for such services in the future if it is determined they involve treatment for the same condition or a similar level of care.

If you disagree with this coverage determination, you may request a reconsideration as explained in this notice.

LIMITATION OF LIABILITY-21

Condition.--Beneficiary without fault and provider at fault under the limitation of liability provision of the law.

NOTE: Where applicable, this paragraph follows SNF-20 and 22A, HHA-20 and 22. This paragraph is preprinted on the above forms. It may also be used where the total stay is not covered but only a portion of the stay can be waived.

Paragraph.--Despite an adverse determination concerning noncovered services, a provision of the law relieves a beneficiary from liability for payment for much of the noncovered services when it is determined that the beneficiary neither knew, nor had reason to know, that services received were not covered under Medicare. Therefore, you are not responsible for the charges billed by the provider for the period (dates).

If you have already paid the provider for the services, please contact this office or any SSO (within 6 months of this notice) and furnish the following documents: a copy of this notice, the bill received for services, receipts or other evidence of payments to the provider.

The receipt of this notice is considered evidence that you are aware that certain services you received were not covered. Therefore, you will not be protected from liability for such services in the future if it is determined they involve treatment for the same condition or a similar level of care.

If you disagree with this coverage determination you may request a reconsideration as explained in this notice.

LIMITATION OF LIABILITY-22

Condition.—Beneficiary at fault under the limitation of liability provision of the law.

NOTE: Where applicable, this paragraph follows SNF-20 and 22A, or HHA-20 and 23.

Paragraph.—A provision of the Medicare law could relieve you from liability for charges resulting from certain noncovered services if it is determined that you did not know, or could not reasonably have been expected to know, that the items or services received were not covered under Medicare. We have determined that beginning with (date) you should have been aware that the services you received were not covered because (enter appropriate reason(s) for denial).

Therefore, Medicare payment cannot be made for the noncovered services that you received. If you disagree with either this coverage determination or the decision that you had knowledge that the services you received were not covered, you may request a reconsideration as explained in this notice.

NOTE: For denial situations use: SNF-1, SNF-20, SNF-22A, HHA-1, HHA-20, HHA-23, making sure the beneficiary receives the appropriate waiver paragraphs.

C. Notice to Provider When Either Beneficiary or Provider is at Fault under the Limitation of Liability Provision.—Advise the provider in writing of its rights when services or items are not covered under Medicare. As explained in §3781.4, such rights arise where the ultimate liability rests with the provider or, uder certain circumstances, with the beneficiary.

Where ultimate liability rests with the provider, cover the following:

- Why the services were not covered.
- That the beneficiary was found without fault.
- That no program payment is being made and the provider must bear the cost of the service less any amount collected from the beneficiary attributed to the deductible or coinsurance.
- That the beneficiary will be informed that should the provider obtain payment from him for such services, you will indemnify the beneficiary.
- That the provider has reconsideration rights regarding both the coverage issue and the issue of whether the provider exercised due care.

You may fulfill obligation under this section by sending the provider a copy of the Medicare Notice sent to the beneficiary together with the following statement:

DATE__________

Dear Administrator:

The attached "Medicare Notice" informs the beneficiary that he/she has been relieved of liability for payment of certain items and services under the limitation of liability provision. You, the provider, are ultimately liable for the beneficiary's waived charges since the items or services were not covered because they were not reasonable and necessary or constituted custodial care, and you, the provider, knew or could reasonably have been expected to know, that they were not covered. Specifically, you are ultimately liable because: (give specific reasons why the provider is liable).

You may appeal this determination provided that the beneficiary does not exercise his/her appeal rights. If the beneficiary appeals the initial determination, you are automatically made a party to the appeals determination. If, however, the beneficiary or his/her representative has stated in writing that he/she does not intend to request a reconsideration; or the beneficiary's liability was entirely waived in the initial determination, you may initiate an appeal.

You may ask for a reconsideration for hospital insurance (or a review for medical insurance) regarding both the coverage determination and the issue of whether you exercised due care. The request for reconsideration must be filed within 60 days (or 6 months for a medical insurance review) from the date of receipt of this notice. You may make the request through any social security office or through this office.

____
Signature

Where ultimate liability rests with the beneficiary, cover the following items:

- Why the services were not covered.
- How and why the beneficiary was aware that the care was noncovered.
- How and why the provider was found to have exercised due care.
- That no Medicare payment will be made.
- That the provider has reconsideration rights regarding both the coverage issue and the issue of whether the provider exercised due care.

You may fulfill your obligation under this section by simply sending the provider a copy of the Medicare Notice that was sent to the beneficiary together with the following statement:

DATE______________________

Dear Administrator:

The attached "Medicare Notice" informs the beneficiary that he/she cannot be relieved of liability for payment for certain items and services under the limitation of liability provision.

You may appeal this determination provided that the beneficiary does not exercise his/her appeal rights. If the beneficiary appeals his/her initial determination, you are automatically made a party to the appeals determination. If, however, the beneficiary or his/her representative has stated in writing that he/she does not intend to request a reconsideration, you may initiate an appeal.

You may ask for a reconsideration for hospital insurance (or a review for medical insurance) regarding both the coverage determination and the issue of whether you exercised due care. The request for reconsideration must be filed within 60 days (or 6 months for a medical insurance review) from the date of receipt of this notice. You may make the request through any Social Security office or through this office.

3723. SPECIAL NOTIFICATION LETTERS - REVERSALS OF NONCOVERAGE

Use the following model letter to notify a beneficiary (or representative) when you have reversed a noncoverage decision of the SNF or its URC. (See §3900.1.)

INTERMEDIARY NAME
ADDRESS

DATE

Dear (Beneficiary or Representative):

This is to notify you that we have reviewed medical information submitted by (SNF's Name). We have determined that the medical care and services that you received for your medical condition from (Date) to (Date) are covered under the Medicare program.

You are not responsible for any charges during the period (Date) except for deductible or coinsurance amounts that apply, or charges for services or items not covered by Medicare. If you have been billed by the nursing home and have paid for services during the covered period, you or your representative should request a refund, less the deductible or coinsurance amounts.

This Medicare determination applies only to services you received from (Date) to (Date). No determination has been made for services provided after this time. If you were still in the facility after (Date) you may request that a bill be submitted to Medicare for a coverage decision.

If you have any questions regarding this notice, billing or refund, you may contact any Social Security Office or this office at the above address within 6 months and furnish the following documents: a copy of this notice, the bill(s) received for services, and receipts or other evidence of payments to the provider.

cc: Provider

Use the following model letter to notify the provider of a reversal of its noncoverage decision and to direct the provider to submit a bill for coverage of the determined period. (See §3900.1.)

INTERMEDIARY NAME AND ADDRESS

Provider Name
Address

Date

Re: (Beneficiary Name)

HICN: _____

Dear Administrator:

The attached "Medicare Notice" informs the beneficiary that the medical services provided by your skilled nursing facility from (Date) to (Date) meet the requirements for Medicare coverage based on the medical information which you submitted.

If you have not already submitted a bill for this period, submit it within 30 days of the date of this letter. Reimbursement will be made after you advise us, in writing, that payment has not been made by the beneficiary or other person (e.g., relatives, other insurance carrier or welfare) for covered services, or you submit evidence that a refund has been made.

If the beneficiary remained in the facility after the period described above, you should decide whether to submit a claim for that care. If you have any questions regarding this decision, please contact this office.

Sincerely,

Attachment

3723.1 Letter Requesting SNF to Submit a Bill At Beneficiary's Request.—

INTERMEDIARY NAME
ADDRESS

TO: Name of SNF
Address
Date

RE: Name of Beneficiary
HICN
DATE OF ADMISSION

The beneficiary or person acting on his/her behalf has requested that a determination of Medicare coverage be made for the stay in your facility from (Date) to (Date).

A search of our files indicates that no bill has been submitted for the period in question.

Submit a bill, (specify medical evidence needed) and a copy of the beneficiary denial notice for the period in question within 5 working days of the date of this letter.

Your provider agreement to participate in the Medicare program requires you to submit a bill to Medicare upon the beneficiary's (or his/her representative's) request even though you believe the services to be noncovered. You are prohibited from collecting from the beneficiary or any other person payment for services which could be covered if a bill were submitted to Medicare.

A provider which repeatedly fails to comply with beneficiary's requests to submit bills for Medicare coverage decisions is subject to termination of its participation in the Medicare program.

3724. SPECIAL LETTERS FOR PATIENT-FILED CLAIMS FOR EMERGENCY INPATIENT SERVICES

For emergency admissions to non-participating hospitals where direct payment is made to the patient, prepare and send to the beneficiary one of the letters described below, as appropriate.

The letter explains the Part A payments made and/or the Part B payments made for ancillary services not covered by Part A (see § 3110). This letter also explains the beneficiary's right of appeal.

The emergency services intermediary should retain a duplicate of all notices sent, for documentation in any appeals process. The intermediary should enter the date the notice is released on both copies of all notices.

3724.1 Sample Paragraphs.--

- Enclosed is a check for $____, which is the amount Medicare can pay for the inpatient hospital services you received from (date of admission) to (date of discharge) in (hospital).

- Medicare is able to pay 60 percent of the charges for your room and board plus 80 percent of the charges for all other covered services during the period (date emergency began) to (date payment ended).

- Medicare is able to pay 60 percent of the charges for your room and board, 80 percent of the charges for other separately identified charges, and 66-2/3 percent of the other charges which were not separately identified on the hospital bill.

- Medicare does not pay (the first $__ of charges) (the first three pints of blood) ($ a day after the 60th day) in a benefit period. (Select one or more, if applicable.)

If lifetime reserve days are used, add $__ a day from ____ to ____.

- If you believe your Medicare hospital insurance should have covered all or more, of your expenses, you may get in touch with us at the address shown on this letter or with any social security office.

- If you believe that the determination is not correct, you may request a reconsideration for hospital insurance (or a review for medical insurance). You must file this request within 6 months from the date of this notice. You may make the request through your social security office. If you go in person, please take this notice with you.

- o This check includes a medical insurance payment for 80 percent of the charges for certain nonroutine hospital services which you received from ___ through ___. These services are listed on the enclosed form.
- o If a hospital bill is not itemized, Medicare can pay 66 2/3 percent of the total covered charges. Payment is being made at this rate for charges from (date emergency began) to (date payment ended).
- o We are enclosing a check for $___. This is your payment under medical insurance for 80 percent of the charges for the services which you received from (admission date) through (discharge date) while in (name of hospital). These services are listed on the enclosed form.

When payment cannot be made under hospital insurance, medical insurance covers some, but not all, of the hospital services. Room and board and certain other services are not covered by medical insurance.

3725. SPECIAL LETTERS FOR PARTIALLY OR TOTALLY DENIED (HOSPITAL-FILED) CLAIMS FOR EMERGENCY INPATIENT SERVICES

The patient receives an HCFA-1533 covering the emergency payment of a partially denied claim. A HCFA-1533 is not sent for a wholly denied claim.

Send the patient a letter enclosing model denial letter A or B, as appropriate (see § 3725, Exhibits 1 and 2), and a Part B provider explanation of benefits, prepared by the intermediary. The intermediary's address should be shown on these letters.

EXHIBIT 1

MODEL DENIAL NOTICE A

(Full Denial - Hospital-Filed or Beneficiary-Filed Emergency Claim)

(INTERMEDIARY'S NAME AND ADDRESS)

Date:______________________

DETERMINATION ON EMERGENCY HOSPITAL SERVICES

Beneficiary: ______________________ Claim Number: _______________

We are sorry but payment cannot be made for your stay from _______ through ______ at Hospital ____________, ___________. This is because the ____________ Hospital does not participate in Medicare and it has been determined that your treatment there does not qualify as emergency care.

Under the law, payment for services received in a nonparticipating hospital can only be made if you go, or are brought to the hospital to receive emergency care. Emergency care under Medicare is defined as:

a. Care which is necessary to prevent the death or serious impairment of the health of the individual; and

b. which, because of threat to the life or health of the individual, requires the use of the nearest hospital (in miles or travel time) which has a bed available and is equipped to handle the emergency.

The medical facts of your hospital admission and stay have been carefully reviewed by the Health Care Financing Administration. Based upon this review, we have found that, although it was necessary for you to be hospitalized, a medical emergency did not exist. There would have been time for you to have been admitted to a hospital participating in Medicare.

If you have questions about this notice, or if you believe the determination is not correct, you may request a reconsideration for hospital insurance. You must file your request within 6 months from the date of this notice. You may make the request through your Social Security office.

MODEL DENIAL NOTICE B

(Partial Denial - Hospital-Filed or Beneficiary-Filed Emergency Claim)

(INTERMEDIARY NAME AND ADDRESS)

Date:____________________

DETERMINATION ON EMERGENCY HOSPITAL SERVICES

Beneficiary: ____________________ Claim Number: ______________

This refers to your request for reimbursement under Medicare for the services received while a patient at __________ Hospital, _____________, __________, from ______ through ______.

Payment can be made under the hospital insurance part of medicare only for the costs of your hospitalization from ________ to ________.

The ____________ Hospital does not participate in the Medicare program. Under the law, payment for services received in a nonparticipating hospital can only be made if you go, to or are brought to, the hospital to receive emergency care. Emergency care under Medicare is defined as:

a. care which is necessary to prevent the death or serious impairment of the health of the individual, and

b. which, because of threat to life or health of the individual, requires the use of the nearest hospital (in miles or travel time) which has a bed available and is equipped to handle the emergency.

Payment for emergency services stops when the emergency ends and it is permissible, from a medical standpoint, either to transfer the patient to a participating hospital or to discharge him.

The medical facts of your hospital admission and stay have been carefully reviewed by the Health Care Financing Administration. Based upon this review, we have found that an emergency condition existed when you were admitted. However, the medical information indicates that this emergency condition ended on ________. At that time your condition had improved to the extent that you could have been transferred to a hospital participating in the Medicare program.

If you have questions about this notice, or believe the determination is not correct, you may request a reconsideration. You must file your request within 6 months from the date of this notice. You may make the request through your Social Security office.

Part B Notices

3726. PREPARATION OF EOMB

The EOMB is used to notify Medicare beneficiaries of the actions taken on their claims. An important function of the EOMB is to inform beneficiaries of appeal rights if they do not agree with the decision made on their claims.

Furnish an EOMB to beneficiaries in most situations to describe Part B medical and other health services payments made on their behalf to participating hospitals, SNFs, HHAs, outpatient physical therapy providers, CORFs and RHCs. However, do not prepare a beneficiary EOMB for clinical diagnostic lab services reimbursed at 100 percent of the fee schedule where no deductible or coinsurance applies. If other services will appear on the EOMB necessitating its issuance, include the lab services. Appeal rights are not affected by this requirement.

Part B notices are needed where the services are used to satisfy the beneficiary's deductible and coinsurance even when Medicare does not pay for the services because payment was made by an EGHP.

Where total payment is denied, you may use the EOMB format or the HCFA-1954 letter. (See §3721.)

3726.1 EOMB Specifications.—Show the following data:

- Print your name and address across the top of the form in letters no larger than the word "Medicare" in the title of the form;
- Print the notation "This Is Not A Bill" in block letters at least as large as the largest other printing on the form;
- The date of the notice;
- The beneficiary's name and address (for mailing);
- The beneficiary's HICN;
- The provider's name and address;
- The dates of service (from the bill);
- Services paid and related charges;
- Services disallowed, the reason for disallowance or reduction and related charges;
- Deductions made such as the deductible, coinsurance, professional component, or other (primary) insurance payment;

- If blood was furnished, the number of pints or units furnished, the number replaced, and the charges for unreplaced blood;
- Current unmet blood and cash deductible;
- Print the following language on the back of the form.

GENERAL INFORMATION

A. This notice does not include any Hospital Insurance Benefits you may have received. It may not include any Medical Insurance Benefits for services you have received from a physician or supplier.

If you have received services covered by Hospital Insurance, a separate notice will be sent to you.

B. This notice shows the current status of your Medical Insurance cash deductible and the status of your Medical Insurance blood deductible, if you were furnished blood.

When you receive services again from a doctor or institution, show this notice, along with your Medicare card. The doctor or institution will then know how much of your deductibles are met.

You can use this notice to help with your claim for any other health insurance you may have.

C. You are responsible for a cash deductible, in the amount shown in item 2 on the front of this form, for medical insurance services received in a calendar year. In addition, you are responsible for replacing, or paying for, the 1st 3 pints of blood furnished under Medical Insurance. (This is in addition to the 3-pint blood deductible you must meet for blood furnished under Hospital Insurance.) The Medical Insurance program will pay 80% of the remaining covered charges for Medical Insurance services furnished in a calendar year. You are responsible for the other 20% of such charges.

Further information about the Medical Insurance program is given in "Your Medicare Handbook."

D. Hospital outpatient services are covered by the Medical Insurance program. A participating hospital may charge you the full amount of outpatient charges, if they are not more than the total amount of the annual cash deductible and the hospital does not know to what extent you have met your cash deductible and Medical Insurance blood deductible for the year. Where the hospital collected the charges in full and we later find the deductibles were fully or partially met, you will receive payment, along with a notice, for 80% of the paid hospital charges in excess of the cash deductible and any excess charges for the Medical Insurance blood deductible.

E. If you have any questions about the way your claim was handled, or if you believe Medicare should have paid more of the bill, ask us for an explanation. Our address is shown on the other side of this form. If you are not satisfied with the explanation, you may request a formal review of your claim. If you want a review, request it no later than 6 months from the date shown on this notice.

F. Your Social Security office will be glad to help you with any questions you may have about Medicare benefits which are not answered in "Your Medicare Handbook." The people there will be glad to help you in any way possible.

3728. PROCESSING UNDELIVERABLE EOMB's AND NOTICES OF DENIAL AND PARTIAL DENIAL

3728.1 You Receive an Undeliverable Notice.--Medicare Benefit Notices, EOMBs or notices of denial or partial denial may be returned to you when the beneficiary has moved or died.

A. Beneficiary Deceased.--

1. Notice Does Not Include Check.--If the returned notice indicates the beneficiary is deceased and no payment is due, destroy the notice unless it is an EOMB on an assigned claim. These must be retained for investigation per §3728.3.

2. Notice Includes Check.--If the returned notice indicates the beneficiary is deceased and payment is due, void the check and destroy the notice. If the amount due is $50 or more, develop an underpayment claim in accordance with §3715.1.

B. Beneficiary Alive.--

1. Notice Does Not Include Check.--Do not develop for a better address. If the returned notice represents an assigned claim, retain the notice for investigation per §3728.3. If the returned notice is for an unassigned claim, destroy it.

2. Notice Includes Check.--If the returned notice includes a check, review the notice for accuracy of the name and address. If it is clerically correct, i.e., spelling is correct, review the notice for an address change. The Carrier Alphabetic State List (CAST), if available, can be used as a source for address changes. (See §3505.) City and telephone directories can also be checked. Remail the EOMB and check if a new or corrected address is located. Use a new envelope marked "Second Mailing."

If the returned check is $50 or more and a more current address is not available, retain the check and send the notice to the SSO with a request for assistance in accordance with local arrangements. Furnish the SSO the reason(s) the notice and check were not delivered.

If the returned check is for less than $50 and a more current address is not available, void the check and hold the EOMB pending investigation per §3728.3. If a check for less than $50 is returned after a "Second Mailing", void the check and hold the notice pending investigation per §3728.3.

3. SSO Response.--The SSO will repond according to the situation:

- When the address on the notice is incorrect and the correct address is established, the SSO returns the notice to you for remailing with the check.

- If the SSO cannot locate the beneficiary, it returns the notice to you. If it is determined that the beneficiary is deceased, the SSO develops a claim for the underpayment if the amount is $50 or more.

3728.2 Notices Returned Directly to the SSO.--

A. Beneficiary Deceased.--

1. Notice Does Not Include Check.--The SSO destroys notices or EOMBs on unassigned claims without checks. The SSO returns EOMBs on assigned claims to you for investigation per §3728.3.

2. Notice Includes Check.--Attached or accompanying checks are stamped "Not Negotiable" and returned to you with the notice. The SSO gives the person returning the check a receipt and develops an underpayment claim for amounts of $50 or more. The SSO generally takes an underpayment claim regardless of the amount if a check is returned by an individual entitled to the underpayment who wishes to file for it. If a check for less than $50 is returned by a person not entitled to receive it, the SSO explains the underpayment provisions but does not solicit a claim from a qualified person.

B. Beneficiary Alive.--

1. Notice Does Not Include Check.--The SSO destroys undeliverable notices on unassigned claims. The SSO returns notices on assigned claims to you for investigation per §3728.3.

2. Notice Includes Check.--If the SSO can locate the beneficiary, it will send the EOMB and check to the correct address. If the SSO cannot locate the beneficiary, it will return the EOMB and check to you with a statement to that effect. The check is stamped "Nonnegotiable" by the SSO. Void the check and retain the notice for investigation per §3728.3.

3728.3 Use of Undeliverables for Quality Control.--Treat undeliverable notices as a ready source for investigating the quality of your operation. Also, use them as a guide to possible fraud situations. Investigate continued undeliverables involving the same provider.

3730. PROVIDER LETTERS TO ESTABLISH BENEFICIARY NOTICE OF MEDICARE NONCOVERAGE

The following letters must be used by providers and as required by §3440 Establishing When Beneficiary is on Notice of Noncoverage.

3730.1 Completion of SNF Denial Letters (Exhibits 1-5).--The letters serve as notices to the beneficiaries of noncovered SNF services and contain the required noncoverage information. (See §§3421.B.2 and 3439.1.) Where the PRO is not making utilization determinations about SNF care, these letters must be used. The letters notify the beneficiary of noncovered services and contain the required noncoverage information.

NOTE: These letters do not apply to swing-bed determinations.

The provider makes an original and two copies. (If you require a copy, one more copy will be made.) The provider gives or, where this is not possible, mails the original to the beneficiary (or person acting in his behalf); sends the first copy to the patient's attending physician, and keeps the second copy. When a copy is given a beneficiary (or person acting on his behalf) the provider's copy should contain the signature of the beneficiary (or person acting on his behalf) acknowledging the date he received the notice. Where personal delivery is not possible, the provider copy should reflect the date the beneficiary was notified by telephone and the date the notice was mailed.

A. Heading of Letter.—The appropriate letter is selected.

1. Provider Designation.—The SNF's name and address appears at the top.

2. Date Line.—The date the letter is given or mailed to the beneficiary or his representative.

3. Address Line.—The name of the beneficiary (or the person acting on his behalf) and if the letter was mailed, the address of the beneficiary (or the person acting on his behalf) is entered.

4. Re Line.—Where the letter is addressed to a person acting on behalf of the beneficiary, this shows the name of the beneficiary. In all cases, the beneficiary's HICN and the date of admission are shown.

B. Body of Letter.—

1. Dates.—These are inserted following the instructions below.

2. Reason Noncovered.—This may be specific citing the medical facts in the case, or a SNF denial paragraph selected and inserted which best describes the reason the services are noncovered.

3. Notification.—The letters must include all required notifications as stated in the contents of the appropriate letter.

Letter 1. Used where you advised the SNF of the noncoverage of services. The date inserted is the first date you determined that covered care ended.

Letter 2. Used where the SNF is advised by its URC that the stay was not medically necessary upon admission. The date is the first day on which the stay is not medically necessary.

Letter 3. Used where the URC finds and advises the SNF that further stay is not medically necessary. The date is the first day on which the stay is not medically necessary.

NOTE: This notice of noncoverage is not a replacement for, but in addition to required URC notices. It protects the SNF from liability in the event the beneficiary, for some reason, does not receive the URC notice.

Letter 4. Used where the SNF determined prior to, or upon admission, that the services to be furnished the beneficiary are not covered.

Letter 5. Used where the SNF determined that further services to be furnished the beneficiary are not covered. The date inserted is the date of the first day on which the services are not covered, usually the day following the date of the notice.

C. Phone Contact.—Unsuccessful.

An in-person or phone contact could not be made with the beneficiary or the person acting on behalf of the beneficiary. The letter is mailed on the same day that the contact was attempted. (See §3440.1A.)

D. Signature of Administrative Officer.—The SNF's administrative officer or his agent signs.

E. Beneficiary Acknowledgements.—

- Request for Medicare Intermediary Review - The beneficiary or the person acting on the beneficiary's behalf checks one of the boxes indicating whether or not a bill is to be submitted.

- Verification of Receipt - One of the items is completed to verify that the notice of noncoverage was issued to the beneficiary or to the beneficiary's agent. (If the beneficiary or the person acting on the beneficiary's behalf refuses to sign the verification, the provider's copy of the letter is annotated. It indicates the circumstances and persons involved.)

DATE OF ADMISSION

On (Date), the Medicare intermediary advised us that the services you receive beginning (Date) will no longer qualify as covered under Medicare.

The Medicare intermediary will send you a formal determination as to the noncoverage of your stay after (Date). If you wish to appeal, the formal notice will contain information about how this can be done. The intermediary will inform you of the reason for denial and your appeal rights.

We regret that this may be your first notice of the noncoverage of services under Medicare. Our efforts to contact you earlier, in person or by telephone, were unsuccessful.

Please verify receipt of this notice by signing below.

Sincerely yours,

Signature of Administrative Officer

DATE OF ADMISSION

On (Date), our Utilization Review Committee reviewed your medical information available at the time of, or prior to your admission, and advised us that the services (you or beneficiary's name) needed do not meet the requirements for coverage under Medicare. The reason is:

(Insert specific reason the services were determined to be noncovered.)

This decision has not been made by Medicare. It represents the Utilization Review Committee's judgment that the services you needed did not meet Medicare payment requirements. Normally, under this situation, a bill is not submitted to Medicare. A bill will only be submitted to Medicare if you request us to submit one. Furthermore, if you want to appeal this decision you must request that a bill be submitted. If you request a bill be submitted, the Medicare intermediary will notify you of its determination. If you disagree with that determination you may file an appeal.

You must also request that a bill be submitted to Medicare if you have questions concerning your liability for payment for the services you received.

Under a provision of the Medicare law, you do not have to pay for noncovered services determined to be custodial care or not reasonable or necessary unless you had reason to know the services were noncovered. You are considered to know that these services were noncovered effective with the date of this notice.

We regret that this may be your first notice of the noncoverage of services under Medicare. Our efforts to contact you earlier in person or by telephone were unsuccessful.

Please check one of the boxes below to indicate whether or not you want your bill submitted to Medicare and sign the notice to verify receipt.

Sincerely yours,

Signature of Administrative Officer

REQUEST FOR MEDICARE INTERMEDIARY REVIEW

☐ A. I do want my bill submitted to the intermediary for a Medicare decision. You will be informed when the bill is submitted.

You are not required to pay for services which could be covered by Medicare until a Medicare decision has been made.

If you do not receive a formal Notice of Medicare Determination within 90 days of this request you should contact: (Name and address of intermediary).

☐ B. I do not want my bill submitted to the intermediary for a Medicare decision.

I understand that I do not have Medicare appeal rights if no bill is submitted.

VERIFICATION OF RECEIPT OF NOTICE

C. This acknowledges that I received this notice of noncoverage of services under Medicare on (date of receipt).

(Signature of Beneficiary or Person acting on the Beneficiary's behalf)

D. This is to confirm that you were advised of the noncoverage of the services under Medicare by telephone on (date of telephone contact).

(Name of Beneficiary or Representative contacted)

(Signature of Administrative Officer)

TO: NAME
ADDRESS

RE: NAME OF BENEFICIARY
HICN
DATE OF ADMISSION

On (Date), we reviewed your medical information and found that the services furnished (you or beneficiary's name) no longer qualified as covered under Medicare beginning (Date).

The reason is: (Insert specific reason services are considered noncovered.)

This decision has not been made by Medicare. It represents our judgment that the services you needed no longer met Medicare payment requirements. A bill will be sent to Medicare for the services you received before (Date). Normally, the bill submitted to Medicare does not include services provided after this date. If you want to appeal this decision, you must request that the bill submitted to Medicare include the services we determined to be noncovered. Medicare will notify you of its determination. If you disagree with that determination, you may file an appeal.

Under a provision of the Medicare law, you do not have to pay for noncovered services determined to be custodial care or not reasonable or necessary unless you had reason to know the services were noncovered. You are considered to know that these services were noncovered effective with the date of this notice.

We regret that this may be your first notice of the noncoverage of services under Medicare. Our efforts to contact you earlier in person or by telephone were unsuccessful.

Please check one of the boxes below to indicate whether or not you want your bill submitted to Medicare and sign the notice to verify receipt.

Sincerely yours,

Signature of Administrative Officer

REQUEST FOR MEDICARE INTERMEDIARY REVIEW

☐ A. I do want my bill for services I continue to receive to be submitted to the intermediary for a Medicare decision. You will be informed when the bill is submitted.

You are not required to pay for services which could be covered by Medicare until a Medicare decision has been made.

If you do not receive a formal Notice of Medicare Determination within 90 days of this request you should contact: (Name and address of intermediary).

☐ B. I do not want my bill for services I continue to need to be submitted to the intermediary for a Medicare decision.

I understand that I do not have Medicare appeal rights if a bill is not submitted.

VERIFICATION OF RECEIPT OF NOTICE

C. This acknowledges that I received this notice of noncoverage of services under Medicare on (date of receipt).

(Signature of Beneficiary or Person acting on the Beneficiary's behalf)

D. This is to confirm that you were advised of the noncoverage of the services under Medicare by telephone on (date of telephone contact).

3730.2 Completion of HHA Model Letter (Exhibit 1).--Model letter, Exhibit 1, serves as notice to the beneficiary of noncovered home health services. The provider makes an original and two copies. (If you require a copy, one more will be made.) The provider gives, or where this is not possible, mails the original to the beneficiary (or the person acting on his behalf); sends the first copy to the beneficiary's attending physician, and keeps the second. When a copy is given a beneficiary (or person acting on his behalf) the provider's copy contains the signature of the beneficiary (or person acting on his behalf) acknowledging the date he received the notice. Where personal delivery is not possible, the provider's copy reflects the date the beneficiary was notified by telephone, and the date the notice was mailed.

A. Heading of Letter.—

1. Provider Designation.—The HHAs name and address appears at the top.

2. Date Line.—The date the letter is given or mailed to the beneficiary or his representative is shown.

3. Address Line.—Shows the name of the beneficiary (or the person acting on his behalf) and if the letter was mailed, the address of the beneficiary (or the person acting on his behalf).

REFERRED TO SERVICES: ______________

The item checked below explains that the above indicated home health services which the Medicare beneficiary received, or was to receive, from this Home Health Agency are not covered by Medicare.

__ 1. The medical information available at the time of, or prior to, the start of care shows that the specific services to be furnished by this agency do not meet the requirements for coverage under Medicare. However, should you request us to file a claim with Medicare, you will receive a formal determination from the Medicare intermediary as to the coverage of the home health services.

__ 2. The specific services furnished you no longer qualify as covered under Medicare, beginning ___________. The Medicare intermediary will send you a formal determination as to the noncoverage of the home health services.

__ 3. The Medicare intermediary advises that the type of services furnished you no longer qualify as covered under Medicare beginning _________. The Medicare intermediary will send you a formal determination as to the noncoverage of the home health services. The Medicare intermediary servicing this agency is (Name and address of Medicare intermediary).

__ 4. We regret that this may be your first notice of the noncoverage of the home health services under Medicare. Our efforts to contact you earlier in person or by telephone were unsuccessful.

VERIFICATION OF RECEIPT OF NOTICE

__ A. This acknowledges that I received this notice of noncoverage of services under Medicare on (date of receipt).

____
(Signature of Beneficiary or Person acting on the Beneficiary's behalf)

__ B. This confirms that you were advised of the noncoverage of the services under Medicare by telephone on (date of telephone contact).

____
(Signature of Administrative Officer)

KEEP A COPY OF THIS FOR YOUR RECORDS
No action on your part is required

4. Re Line.--Where the letter is addressed to a person acting on behalf of the beneficiary, this shows the name of the beneficiary. In all cases, the beneficiary's HICN and the date of start of care appear.

5. Referred to Services.--The type and number of services referred to in the letter is specified. For example, if the beneficiary received 8 nursing visits per month and it was determined that only 2 were medically necessary, this item indicates, "6 nursing visits per month."

If the beneficiary received both nursing services and physical therapy services and the nursing services were not covered, the provider indicates "nursing services only."

If all services were determined not to be medically necessary, "all services" is entered.

B. For Body of Letter.--Appropriate item(s) are checked:

ITEM 1.
Checked where a HHA determined prior to, or at the start of care, that the services to be furnished are not covered.

ITEM 2.
Checked where a HHA determines that further services to be furnished will not be covered. The date inserted is the first day on which the services are no longer covered.

ITEM 3.
Checked where you advised the HHA of the noncoverage of services. The date inserted is the first date you determine that the home health services are no longer covered.

After the above items, your name and address is shown.

ITEM 4.
Checked where an in-person or phone contact could not be made with the beneficiary or the person acting on behalf of the beneficiary. When this item is checked, the model letter is mailed on the same day as the contact was attempted. (See §3440.1A.)

C. Signature of Administrative Officer.—The letter is signed by an administrative officer of the agency or his/her agent.

D. Verification of Receipt.—The appropriate item is checked and completed to verify that notice of noncoverage was issued to the beneficiary or to the person acting on behalf of the beneficiary. Only one item is checked.

ITEM A.
Checked and completed where contact was made in person (i.e., the notice was personally delivered). If the beneficiary or the person acting on behalf of the beneficiary refused to sign the verification, the provider's copy of the model letter is annotated accordingly, indicating the circumstances and persons involved.

ITEM B.
Checked and completed where only telephone contact was made.

Congressional Inquiries

3735. CONGRESSIONAL INQUIRIES CONCERNING RECONSIDERATIONS.

You are responsible for responding to congressional inquiries which constitute requests for reconsideration of Part A claims. Such inquiries may be received directly from congressional staffs, through SSOs, ROs, and the Health Insurance Inquiries Branch (HIIB).

The steps outlined below describe the procedures to follow when processing congressional inquiries. Although these steps relate to HIIB generated inquiries, they apply to all congressional inquiries.

3735.1 Processing Reconsideration Cases Having Congressional Interest.--HIIB notifies you by telephone (followed by Form Letter HI-2 illustrated in Exhibit 1) that it has received a congressional inquiry about a fully or partially denied Part A claim. When you receive the notice:

- Flag the case to identify the source of the referral, i.e., "HIIB Referred Congressional Inquiry--Direct Response Required;"
- Unless a reconsideration is in progress, complete and forward a form HCFA-2649 to the Reconsideration Branch as required per § 3782.1C;
- Expedite the request for reconsideration. If a reconsideration is in progress as a result of a prior request, remove the case from the routine processing cycle and expedite it;

NOTE: If a reconsideration has been completed and a notice released to the beneficiary or a request for reconsideration has been or is being dismissed because it was not timely filed, send the Member of Congress a copy of the determination under a cover letter explaining the situation.

- Send an interim response (Exhibit 2) to the Member of Congress if a final decision has not been reached within 30 days after the receipt of the request;
- Prepare substantive interims (letters which give status information about the case; e.g., Exhibits 3 and 4) at 30 day intervals thereafter until the final response is prepared;
- Ensure that the response conforms with established guidelines as to format, tone, etc.;
- When a final decision is reached, send the Member of Congress a copy under a covering letter 5 days before the release of the notice to the beneficiary or to the person acting as his representative (Exhibits 5, 5A, 6, and 7);

- Forward to the referral source and the appropriate RO a dated copy of the interims and final responses sent to the Member of Congress and a dated copy of the notice sent to the beneficiary. Address the copies for HIIB to:

  Health Care Financing Administration
  Reconsideration Control Supervisor
  HIIB
  East Bldg.
  Baltimore, MD 21235

  File a copy in the case folder.

- Notify the RO of problems which are expected to cause an inordinate delay in completing the reconsideration.

NOTE: Where you have an arrangement with another intermediary to process your reconsiderations, the intermediary writing the reconsideration takes the above steps.

3735.2 RO Responsibilities.—The RO is responsible for monitoring your peformance in preparing congressional replies. This responsibility includes:

- Providing assistance in closing difficult cases;
- Reviewing the final replies prepared to assure that the replies are accurate, responsive, clear, and timely;
- Furnishing recommendations and suggestions concerning your performance with respect to your responses; and
- Acting as liaison between HIIB and you if any problems arise.

____

Gentlemen:

Re: ____(C)________
____

We consider the enclosed inquiry to be a request for reconsideration. The substance of the inquiry indicates that the issue in question is ____(D)____ stay at __(E)__ from ___(F)___.

Please initiate and expedite a reconsideration action, using §3735. Complete a form HCFA-2649 and send it to the Reconsideration Branch. (See §§ 3782.2 and 3782.3.) If a PRO is involved, process in accordance with §§ 3790ff.

As soon as the reconsideration is completed, please write to ____(C)____. In preparing your reply, be sure to follow the provisions of the Privacy Act.

Forward copies of the interim response(s) and the final response you send to the Member of Congress and to the beneficiary to the Reconsideration Control Supervisor, HIIB, East Building, Baltimore, MD 21235, and to the regional office.

Sincerely yours,

Enclosure

3736. REPLYING TO CORRESPONDENCE FROM MEMBERS OF CONGRESS.

Follow these instructions when preparing replies to correspondence from Members of Congress.

A. Congress Recessed.—Generally, send the original and the courtesy copy of the reply to the Washington office of the Member of Congress. However, if it is clear that the inquiry was sent from a home office, direct the original and the courtesy copy there.

B. Reply to a Letter Signed by More Than One Member of Congress.—When replying to a letter signed by more than one Member of Congress, prepare a reply for each Member and enclose a courtesy copy with each. State in the opening paragraph that the same reply is being sent to each person who signed the letter. Make an official file copy for each Member of Congress.

C. Replying to More Than One Member of Congress on Same Case.—Release the replies to each Member of Congress at the same time. Indicate that similar information is being sent to the other Member. You may use the following in your final reply: "Similar information is being sent to (Senator or Representative) (name of Member of Congress) who also inquired on behalf of (name of beneficiary)."

D. Reply to a Letter Signed by an Employee in a Congressional Office.—Address replies to the Members of Congress even when the inquiries are signed by staff members.

E. Replying Directly to a Constituent at the Request of a Member of Congress.—When addressing a reply to a constituent, send a tissue letterhead copy to the Member of Congress, along with a copy of the constituent's letter.

F. Replies to Inquiries from Former Members of Congress.—Unless the former Member of Congress requests otherwise, address the reply to the constituent.

G. Replying to Congressional and Noncongressional Inquiries.—Release the congressional reply one working day before the release of the noncongressional reply. Indicate in the reply to the Member of Congress that similar information is being sent to the constituent (or third party, if applicable) in response to an inquiry sent directly to us by that person.

H. Teletyping and Telephoning Award Information.-- As a general rule don't call or write a congressional office about a check which was released more than 1 week previously. Send a letter, instead.

I. Forms of Address.-- When replying to the Washington office, address the letter:

Honorable ____________________
United States Senate
Washington, D.C. 20510

Dear Senator ____________________:

or

Honorable ________________
House of Representatives
Washington, D.C. 20515

Dear Mr. ________________:

Address replies to the home office:

Honorable ____________________
United States Senator
(local address)
City, State, ZIP Code

Dear Senator ____________________:

or

Honorable ________________
Member, United States House
of Representatives
(local address)
City, State, ZIP Code

Dear Mr. ________________:

J. Courtesy Copies.—Prepare a courtesy copy for each congressional response (including those requiring special handling).

K. Constituent's Letter.—Members of Congress frequently forward the constituent's letter for assistance in replying. Return the constituent's letter, if it is an original, with your first written response.

When the constituent's letter is the only enclosure, on the courtesy copy and all other copies of the reply (but NOT ON ORIGINAL), type:

Enclosure:
Constituent's inquiry

When an enclosure in addition to the constituent's letter is forwarded to the Member of Congress:

- On the original only, at the left margin two lines below the signer's title, type:

  Enclosure

- On the copies, beginning at the same place (at the left martin), type:

  Enclosures 2:
  Including constituent's inquiry

Do not mention the constituent's inquiry in the body of your response.

Disclosure of Information

3760. DISCLOSURE OF INFORMATION-- GENERAL.

The following sections contain instructions concerning the confidentiality and disclosure of information acquired and maintained by HCFA, SSA, intermediaries, providers, and State agencies in the administration of the health insurance program. They comply with the statutes and regulations governing disclosure of information, specifically section 1106 of the Social Security Act, the Freedom of Information Act, the Public Information Regulation, and Social Security Regulations Nos. 1 and 22.

3760.1 Procedures for Handling Requests.--The FOI Act requires that within 10 working days of the receipt of a written request for information, a determination must be made as to whether the information will, or will not, be disclosed. Accordingly, inform anyone requesting information in writing within 10 working days of the receipt of the request whether the request will be wholly or partially fulfilled.

You are not permitted to issue a written denial of any request for information under any circumstances.

Determine within 2 days of the receipt of a written request for information whether you are clearly authorized by the guidelines below to disclose the information. If you are not, notify the RO immediately by telephone. If the RO instructs you to refer the request to it for handling, send the request immediately to the RO by telegram, teletype, or special delivery mail (depending upon the distance), or have it delivered by hand if the RO and you are in the same city. Identify the request as a Freedom of Information request.

Acknowledge any request referred to the RO, using the following language:

Dear

We have referred your request for (specify type of information requested) to

(address of HCFA RO)

Any questions you may have relative to your request should be directed to that office.

Sincerely yours,

Send a copy of the acknowledgement with the request to the RO.

Oral requests may be denied orally. If the requester is dissatisfied with the oral denial, advised him of his right to submit a request in writing, to the RO; tell the requester to write "Freedom of Information Request" on the envelope to ensure prompt handling.

You are not required to create records to comply with requests for information. Refer requests which would create records to the RO. (See also § 3775.)

When able to furnish the requested materials under the guidelines below, furnish it whenever possible, within 10 working days of receipt of payment. If it is not possible to furnish the materials within 10 working days, acknowledge the request immediately. Explain the reason for the dealy.

3760.2 Processing Freedom of Information (FOI) Requests.--Form HCFA-3179 serves as a cover sheet for FOI requests. It is designed to expedite the handling of requests, to capture processing and mailing costs, and to provide the information necessary for reporting purposes. For each FOI request complete a form HCFA-3179. Completion instructions are included on the reverse. If it is not practical to furnish actual postage costs, you may furnish estimated costs.

Supplies of form HCFA-3179 are available through the RO.

3760.3 Reporting FOI Activity.—Maintain completed forms HCFA-3179 for the preparation of a summary annual report of FOI activity. Submit the report, with completed forms SSA-3179, to the RO no later than 5 working days after the close of the calendar year.

Include the number of inquiries resulting in the release of information. Show the number inquiries according to the type of information requested and the category of requester (see § 3776, exhibit 2, for sample report).

Blank spaces have been provided for including other specific and miscellaneous types of material. Space is also provided for indicating total amounts of processing and postage costs and the amounts of fees, both collected and not charged (e.g., under the $5 minimum). These costs include total costs incurred during the calendar year in administering the FOI Act. These costs include:

- Direct costs—personnel and non-personnel costs of responding to FOI requests. (See form HCFA-3179 to calculate these costs.)
- Indirect costs—operations management, control, mail, filing, and supervision associated with the direct personnel costs.
- Staff costs—personel costs involved with procdure, systems, and administrative matters directly related to FOI activities.

3761. FEES FOR INFORMATION

Certain fees and charges have been established to recover some of the cost of disclosing information to the public. Providers, contractors, and State agencies are required to pay appropriate fees for copies of reports they request pertaining to other providers, contractors, or State agencies. Such fees are not reimbursable administrative costs under the Medicare program for contractors or State agencies. A provider may claim such fees as allowable costs only if it demonstrates to you that the information is necessary in developing and maintaining the operation of patient care facilities and activities.

Members of Congress, when clearly requesting information on behalf of a constituent or other third party, are subject to the same fees and charges that would apply to the person represented. They are exempt from charges in all other cases.

Charges for disclosing information under the provisions of Regulation No. 1. In general, the fees will be the same as those charged for disclosing information under the FOI Act.

Do not charge the public for inspection of disclosable documents, for normal mailing of requested materials, for time spent in deciding whether to provide information or securing approval, or for requests which result in charges of $5 or less.

3761.1 Fees.—Unless otherwise specified in SS 3761ff., charge the following fees for disclosing information:

A. Photocopying.--Charge 10 cents per page (one side of a sheet) for photocopying documents or records. If the page to be photocopied is too large to be printed on one photocopy, charge 10 cents per photocopy.

B. Searching.—When a request results in searching time in excess of one-half hour, charge $1.50 for each half-hour, excluding the first half-hour. This charge is in addition to any charges for photocopying materials. There is no searching fee for time spent photocopying.

C. HCFA-Printed Material.-- $.01 per printed page.

D. Preparation of Materials from Punchcards, Magnetic Tape, or Microfilm.—Base charges for preparing materials from magnetic tape, microfilm, or punchcards on the actual cost, as determined on a case-by-case basis. Prepare an estimate of such costs and refer requests requiring preparation of materials from machine sources to the RO for determination of the fee. The RO determines the fee based upon the cost information submitted including the following:

1. Personnel Salaries.—Compute the time spent by all staff members (including analysts, supervisors, and clericals) in searching, compiling, and preparing materials. Translate manhours into personnel salary costs using the most current schedule of salary rates. Use the form to aid in this computation.

2. Direct Equipment Costs.—Pro-rate equipment costs with other uses of the equipment.

3. Direct Material Costs.—Estimate costs of all supplies, paper, special holders, etc., used in preparing the materials.

4. Other Direct Costs.—Include any costs not covered in other items listed above.

E. Certification.—Three dollars for each certification or authentication.

F. Special Forwarding Arrangements.—Actual cost. This includes special delivery, airmail, registered mail, etc.

3761.2 Collections and Disposition of Fees and Charges.—You are responsible for billing and accounting for revenues resulting from providing disclosable information. Deposit income from the release of information in the special Medicare bank account (see Part I, § 1404). Give receipts for payments received for material for which fees are collected. Send the receipt and the material within 10 working days of the day payment is received. Show the following information:

- A title indicating that it is a receipt for fees collected in response to requests for specific information (such as provider financial or prevailing charge information).
- Name, address, and, if known, the organization or profession of the requester.
- Date of request and date material is released.
- A description of the material requested, including the number of pages.
- The total charge for copies.
- The total charge for searching fees or other preparation of the materials.
- Your name and address.

Prepare the original and a copy of the receipt. Retain the original, with the incoming request, for 1 year to serve as a record of payment in the event the material is not received. Give the copy to the requester.

3763.3 Requests Received Without Remittance.—Collect fees and charges before furnishing requested material. When requests for information are received without the required fees, notify the requestor of the total charges, using language similar to the following:

> The Health Care Financing Administration regulations require that a charge be made to recover some of the costs incurred in the disclosure of information. This charge covers costs of searching for, preparing, and reproducing the material you have requested. The total (estimated) cost for the material is $ ______. The cost consists of the following charges: (list here breakdown of charges; e.g., "Photocopying: $10; Searching: $450). Please send a check or money order for the total amount made out to the (your name) and mail it to (your address).
>
> For your information, regulations provide that waiver or reduction of fees may be made upon a determination that the waiver or reduction is in the public interest because furnishing the information can be considered as primarily benefiting the general public. Requests for waiver or reduction in fees should be made in writing and addressed to (name and address of RO).
>
> The material will be mailed to you upon receipt of payment.

Forward a fee schedule to the requestor, if appropriate, so that he is aware of the charges for various services. If a check or money order for the wrong amount is received, return it and request a remittance for the correct amount.

3762. DISCLOSURE OF PROGRAM MATERIALS

The FOI Act deals with the right of the public to information about government rules and methods of operating. It requires that every Federal agency make available for inspection and copying:

> "522(a)(2) . . . (B) those statements of policy and interpretations which have been adopted by the agency and are not published in the Federal Register; and (C) administrative staff manual and instructions to staff that affect any member of the public, unless such materials are promptly published and copies offered for sale."

3762.1 Manuals. PMs and Other HCFA Materials.—The information available to the public at your office includes the Intermediary Letters, the Part A Program Memorandums, (Part 1 - Fiscal Administration, Part 2 - Audits-Reimbursement - Program Administration, Part 3 - The Claims Process), Part 4 - Audit Procedures, the provider manuals (Hospital Manual, SNF Manual, HHA Manual, OPT/CORF Manual, RDF Manual, Coverage Issues Manual, and the Provider Reimbursement Manual.)

Do not retain obsolete manual pages and letters to have available to the public.

When an inquirer asks to see manuals and letters that you do not maintain (e.g., the claims manual or Part B Program Memorandums), refer him to the proper entity. Fulfill requests for copies resulting in 50, or fewer, photocopied pages.

Requests to examine manuals or letters usually arise where a beneficiary calls at your office to discuss his claim. In such situations, abstain from engaging in interpretative analysis or discussion of the material.

3762.2 Internal Guidelines.—You must release all interpretive materials, guidelines, and clarification of policies which relate to payment of Medicare benefits.

Upon request, release written guidelines you use to evaluate and make payment decisions on claims subject to MR. You may withhold precise information on the screens, parameters and computer edits used to identify claims for MR.

EXAMPLE: You have a screen which identifies for review any SNF claim with more than 30 covered days. Your written MR policy contains the documentation standards and guidelines which assist the reviewer in the decision to pay or deny the claim.

You are required to release the policy guidelines, but you could withhold the review screen.

You may withhold guidelines that use specific criteria and tolerances intended to identify claims that raise a strong possibility of fraud or abuse because of a pattern of payment requests for excessive or duplicate services, or services not rendered. If, in your judgement, disclosure of such guidelines would adversely affect the program by allowing violators to go undetected, refer the request to the RO with your recommendations.

Acknowledge requests for physicians' prevailing or customary charge screens and refer them to the appropriate carrier.

3763. DISCLOSURE OF INFORMATION ABOUT IDENTIFIABLE BENEFICIARIES

Sections 3764 - 3769 set the guidelines for disclosure of information about a named beneficiary, to whom it may be disclosed, and the purposes for which it may be disclosed. In general, no information may be released except to the beneficiary (or his legal guardian) without the beneficiary's (or legal guardian's) explicit written authorization.

In cases requiring the beneficiary's consent, the authorization may be in any form, but it must:

- Be signed and dated;
- Specify the individual, organizational unit, class of individuals or organizational units that the information may be disclosed;
- Specify the record(s), information, or type(s) of information which may be disclosed; and
- Indicate whether the consent is a one-time or on-going release of records.

Do not honor a blanket consent to disclose all beneficiary records to unspecified individuals or organizational units.

The disclosure of information about beneficiaries is governed by the provisions of S 1106 if the Social Security Act as implemented by Regulation No. 1, the Privacy Act, the FOI Act, and the DHHS Public Information Regulation.

3763.1 Prohibition Against Disclosure.—Section 1106 of the Social Security Act prohibits disclosure of any file, record, report, or other paper, or any information obtained at any time by the Secretary or an officer or employee of HHS in the course of discharging his duties under the Act, except as prescribed by regulations. The same prohibition applies to information received by any person outside HHS from the Secretary or an officer or employee of HHS.

The prohibition applies to any agency, organization (e.g., you), or institution, or any of its officers or employeees, in the fulfillment of a contract or agreement with the Secretary.

A. Disclosure of Provider or Physician Records.—The prohibition also relates to any information received from HHS, you or any person or entity that furnishes services under arrangements with a provider or accepts an assignment under the program. However, patient records in the possession of a provider or physician are not subject to the prohibition against disclosure or to the Departmental rules and regulations concerning confidentiality merely because the patient is entitled to Medicare benefits. Disclosure of provider or physician records not in the possession of HCFA or you may, however, be subject to applicable State or local laws, or to hospital rules governing disclosure.

B. Authority for Refusal to Disclose Information.—When you receive an oral request for information, disclosure of which is prohibited under these guidelines, decline to comply on the basis of the provisions of § 1106(a) of the Social Security Act, as amended, and Regulation No. 1 of the Social Security Administration (20 CFR 401). However, when an oral denial is not acceptable to the requester or a written request is received, follow § 3760.1.

If any officer, employee, agent, or subcontractor is served with a subpoena or other compulsory process requiring the production of records or information, the disclosure of which is prohibited, decline to produce the records or information. The refusal on § 1106 of the Social Security Act and Regulation No. 1 of the Social Security Administration (20 CFR 401). Notify the RO immediately.

C. Penalty for Failure to Comply With the Rules Relating to Disclosure of Information Obtained in the Administration of the Act.--Section 1106(a) of the Act provides that any person who violates the disclosure provisions shall be deemed guilty of a misdemeanor and, upon conviction thereof, shall be punished by a fine not exceeding $1,000, by imprisonment not exceeding 1 year, or both.

3763.2 The Authority for Disclosure.—Regulation No. 1 defines the basic authorization for disclosure of information obtained in the administration of the program. The general rule is that information about an individual obtained in the administration of the program may not be disclosed without the authorization of that individual. Medical information relating to an individual will generally be disclosed under more restrictive conditions than other information and, where permitted,ususally may be furnished only upon the written authorization of the individual. Specific exceptions to this rule are detailed in the following sections. As far as program operations are concerned, information about an individual may be disclosed without his authorization when the disclosure is necessary in connection with any claim, or other proceeding, under the Social Security Act.

Information will be disclosed for other than program purposes only if the disclosure is authorized by Regulation No. 1 and is consistent with the proper and efficient administration of the program.

3764. DISCLOSURE NECESSARY FOR PROPER ADMINISTRATION OF THE HEALTH INSURANCE PROGRAM.

A. Information About an Individual.—Disclosure of any record, report, or information about an individual is authorized without the individual's authorization connection with any claim, or other proceeding, under the Act when it is necessary for the proper performance of duties of:

- Any officer or employee of the Department; or
- Any officer or employee of a State agency, intermediary, provider of services, or other agency or organization participating in the administration of the program by contract or agreement in carrying out such contract or agreement.

SSOs have a responsibility for public information activities. In their development of a human interest story concerning health insurance, a SSO may, on occasion, request you to provide claims reimbursement information about a specific beneficiary. Honor such a request when it comes from a SSO employee having authority for liaison with you.

Depending upon the agreements made with the parallel SSO, the employee authorized may be the manager, assistant manager, staff assistant, and/or HI coordinator. Do not honor requests by other employeees for beneficiary claims information.

B. Disclosure to Third Parties.-- In the administration of the program, you may want to avail yourself of the services of third parties such as auditors, court reporters, public stenographers, microfilm processors, or companies developing stenographers, microfilm processors, or companies developing equipment for use in the program.

The arrangement between you and such third parties, even where it is of short duration, is in the nature of an agreement supplementing your contract wsith the Secretary. Under such an arrangement, disclosure to these parties of necessary information which relates to, and is used in, the administration of title XVIII of the Social Security Act is permitted as provided by S 1106 of the Social Security Act and Regulation No. 1. However, when you enter into an agreement with these parties, inform them that § 401.1 of Regulation No. 1 precludes the disclosure of any information on identifiable individuals. Call their attention to the penalty clause of § 1106(a). Attention should be called to these provisions by letter (see below), and obtain a written agreement to comply with the disclosure provisions before releasing any information.

Sample Letter to Third Party

Dear

We are prepared to make available to your organization certain social security records so that (state reason).

However, before making these records available, we must point out that by law, all information derived on identifiable individuals in the administration of the Social Security Act is confidential and may be disclosed to others only under very restrictive circumstances. Regulation No. 1 of the Social Security Administration which governs disclosure of official records and information precludes you from disclosing any information on identifiable individuals.

You should also note that section 1106(a) of the Social Security Act imposes criminal penalties for unauthorized disclosure.

Any social security records which do not identify or make identifiable any individuals are not subject to these restrictions, but may be restricted under the provisions of the Freedom of Information Act.

In order to comply with the requirements of the Social Security Act and Freedom of Information Act you must agree to the following conditions before we can make any social security records available to you:

- Any information which is turned over to you will be used only for the specific purpose intended.
- All employees having access to this material will be instructed as to its confidential nature.
- An official of your company will assume the responsibility for ensuring that the information is not revealed to another.
- The material must be returned to us as soon as you have finished the job.
- We must have a letter from a responsible official in your office agreeing to these conditions and assuming responsibility for carrying them out.

Upon receipt of such letter, the social security records will be made available to you.

Sincerely yours,

authorized the provider or supplier to pursue a Medicare claim, the release of information may be treated as a disclosure made with the beneficiary's consent.

3767. DISCLOSURE OF INFORMATION AFTER THE DEATH OF A BENEFICIARY

Information concerning the fact, date, or circumstances of death may be disclosed when efficient administration permits. The request must be in writing and must state why the information is sought. Additional information may be disclosed to a surviving relative or an authorized representative of that relative, the legal representative of the estate, or to a probate court for the purpose of appointing a legal representative of the decedent's estate. Care should be exercised, however, to see that no information which would appear to be detrimental to the individual or his estate is disclosed, i.e., unusual place or manner of death or information which could create a liability to the individual's estate.

Medical information may be disclosed, in form and detail consistent with proper and efficient administration of the program, when reasonably necessary for a title XVIII purpose. (See § 3764 for further information concerning the disclosure of nonmedical and medical information when necessary for a program purpose.)

Medical information obtained in the administration of title XVIII may be disclosed to a surviving relative or legal representative of the estate of the individual or to others for other than a title XVIII purpose, when such information is necessary for a determination as to what supplementary benefits or services such deceased individual was eligible to receive under a private or public hospital or medical insurance program which is consistent with the purposes and objectives of title XVIII. Such information may be disclosed only if the individual has consented to such disclosure or a surviving relative or the legal representative of the estate consents. (See § 3768C "Release of Title XVIII Claims Information for Complementary Insurance Purposes.")

3768. DISCLOSURE TO THIRD PARTIES FOR OTHER THAN PROGRAM PURPOSES

(See § 3767 for disclosure of information after beneficiary's death.)

A. Nonmedical Information.--Nonmedical information about an individual may be disclosed for other than a program purpose, to persons or organizations designated by the individual, if the individual authorizes disclosure, and if disclosure is consistent with the proper and efficient administration of the Act.

B. Disclosure of Medical Information to a Physician, Institution, or Other Supplier of Services.--Medical information may be disclosed to a supplier of medical services solely for purposes of the beneficiary's care or treatment. Such supplier will be informed that the information is being furnished in connection with the treatment of the beneficiary and that its use should be restricted to that purpose.

1. Disclosure to the Source of Medical Evidence.--Occasionally in the course of reviewing medical evidence submitted to substantiate a claim, intermediary medical personel may discover a medical condition

of which the source of the information is unaware. (For purposes of this section, the "source" of the information is the party submitting the evidence.) In cases where a serious or potentially serious condition is found, the intermediary may wish to inform the source of the information. If the source of the information indicates that the beneficiary is not institutionalized and the identity of his current physician is not known, the source should recommend that the beneficiary consult a physician or institution of his choice for further treatment.

2. Disclosure to a Source of Medical Services Other Than the Source of the Information.--Medical information may also be disclosed, upon request, to the beneficiary's physician or to a medical institution at which the beneficiary is or was a patient when such physician or institution is not the source of the information. However, consent for the release must be obtained from the beneficiary.

C. Release of Title XVIII Claims Information for Complementary Insurance Purposes.--Do not release or use information obtained in the administration of the Medicare program for nonprogram activities. However, when the beneficiary has given written authorization you are permitted to release certain information to your complementary insurance program under specific conditions in your capacity as insurance writer or administrator, or to other insurers for complementary health benefits purposes (see § 1601, Part 1). Under no circumstances use the knowledge of an individual's entitlement or benefit utilization information for purposes of dropping an individual from a group health insurance plan.

1. Information Which May be Released.--Subject to necessary authorizations, copies, extracts, or summaries of only the following records may be released:

a. Provider billing forms (e.g., HCFA-1453, HCFA-1487, and HCFA-1483);

b. Explanation of benefits for Part B Provider Services, or denial letters;

c. Information on date of entitlement to Part A or date of enrollment under Part B, or the date Part B coverage began;

However, requests for other information desired for complementary insurance purposes should be referred to the RO.

2. Form of Authorization.--Make certain that information is not released without the required authorization. This authorization may be either indicated on the billing and admission form or on a dated statement from the beneficiary. Where the authorization is on a dated

statement, it must:

a. Authorize release of information about his title XVIII Medicare claim; and

b. Designate to whom the release is authorized; and

c. Show that the release authorized is for complementary insurance purposes (this may be implied by the designation in b above); and

d. Indicate whether the authorization is for a one-time or ongoing release of data (i.e., for the duration of the claims and appeals process, but not to exceed 2 years);

e. Bear the signature of the beneficiary, his legal guardian, or his authorized representative.

Where the bill contains a beneficiary signature or indicates that the beneficiary's signature authorizing release of information is contained in the provider's records, the bill must contain the name of the complementary insurer unless a dated statement as outlined above is already on file.

Where you have a dated statement on file, information may not be released for individual claims when the beneficiary indicated that he does not want disclosure on that claim. This may be indicated on certain claims forms by the beneficiary checking an appropriate block, or by attaching a separate statement.

If someone other than the beneficiary, legal guardian, or authorized representative authorized disclosure to a third party by filling out the appropriate item on the billing form, do not release the information unless an authorization from the beneficiary is on file. Instead, where feasible, you may wish to inform the beneficiary (or legal guardian or authorized representative) that the signature on the claims form does not constitute a proper authorization for disclosure and that, if he desires information to be disclosed to a third party, he should send to either you or the third party a statement authorizing release. (Indicate the necessary contents of a proper authorization or enclose an appropriate form or statement for use by the proper party in authorizing release.)

If invalid authorizations are a frequent problem, advise third party payers to obtain appropriate ongoing consent statements from enrollees.

3. Methods of Handling Requests.--Where the complementary insurers desire title XVIII information for certain claims only, either the complementary insurer or the beneficiary may request its release.

The complementary insurer must furnish the required authorization(s) for release and must pay any charges. (The Medicare program will absorb charges for supplying duplicate EOMB's or billing forms to beneficiaries, their authorized representatives, and to social security offices.) In the absence of a standing arrangement, the mere presence of an "authorization" to release and the identification of a complementary insurer on a title XVIII billing form does not constitute a request for the "release" of information. There must be a specific request for the information.

You may enter into a standing arrangement with a complementary insurer to provide and charge for title XVIII information, such as EOMB or deductible non-met letter, in every case in which you receive a title XVIII claim which contains the necessary authorizations and identifies the complementary insurer.

4. Release of Title XVIII Claims Information for Complementary Insurance Purposes by Providers.--Intemediaries should be aware that, subject to specific written beneficiary authorization, providers are permitted to furnish certain limited information about Medicare eligibility status and related claims information to third party payers for complementary insurance purposes. (See Hospital Manual § 191.3.)

3769. INTEGRATION OF TITLE XVIII CLAIMS PROCESSING WITH COMPLEMENTARY INSURANCE CLAIMS PROCESSING

A. General.--If you wish to merge the processing of title XVIII claims with the processing of complementary claims, obtain HCFA approval of the integrated processing system and of the method of cost allocation. The cost allocation in the integration of a complementary insurance claims process with title XVIII claims requires you to share in the cost of all functions which are determined to be integrated and from which you derive some benefit.

Submit a request for approval if you use as the input to your complementary claims process the claims form submitted under title XVIII, or any by-product of the title XVIII claims process (e.g., a magnetic tape or punchcard; or an EOMB taken directly from the Medicare claims process). (See Part 1 §§ 1600 ff. for fiscal policy requirements for an acceptable integrated system.)

B. Program Identity.--Since title XVIII program identity must be maintained, notices and forms for title XVIII purposes must clearly identify their title XVIII origin. The complementary insurance notices and forms must be free of implication that the coordination of benefits constitutes an official endorsement by HCFA of the complementary insurance plan. Also, they must not imply that title XVIII entitlement or enrollment is dependent upon the individual's retention of his complementary insurance policy.

C. Records and Information.--Records and information obtained in the operation of title XVIII are subject to rules of HCFA and to other Federal rules on maintenance and destruction, availability for inspection, disclosure, etc. This means, for instance, that the complementary insurance record must be separate and distinct from the title XVIII record if disclosure of the complementary insurance record is required or permitted under State or local laws. Furthermore, commingling of records is not permitted if it would prevent conformance with government rules covering the maintenance, transfer, or destruction of records.

Information to which you have access for complementary insurance purposes, except for physician fee profiles, must be disclosed (in accordance with Regulation No. 1) to other complementary insurers, whether or not you use such information to process complementary claims.

D. Matching Complementary Subscriber Files Against Medicare Claims Files.--In using an integrated claims processing system, it is permissible to match a currently updated subscriber file against a run of currently processed Medicare claims to extract information required to pay the complementary claim provided:

1. When routinely securing beneficiary authorization for an ongoing release of information safeguards are maintained to ensure that, where a beneficiary revokes the authorization on the billing form or by a separate statement, there will be no release of information;

2. When a statement is not routinely secured for the ongoing release of information, controls ensure that there is an authorization per § 3768C2 from each Medicare beneficiary with complementary insurance before information is released; and

3. Controls ensure that no information will be released in the matching process for any Medicare beneficiary who does not have complementary insurance.

Update the subscriber file to incorporate all terminations before each match with the Medicare claims file so that information will not be passed to your private business sector for beneficiaries who are not entitled to the complementary insurance plan.

Do not permit your private business sector to have access to the Medicare claims history file and use only information concerning the current claim from the current run of processed claims.

3770. DISCLOSURE TO STATE AGENCIES OR TO INTERMEDIARIES ACTING FOR STATE AGENCIES ADMINISTERING PROGRAMS RECEIVING GRANTS-IN-AID

A. Information That May Be Disclosed and Authorization Required.--Information on such matters as entitlement, benefit payment, or benefit utilization relating to an individual who has applied for benefits administered by the State welfare departments may be disclosed. Such disclosure may be made without the authorization of the individual or his legal representative (i.e., legal guardian appointed by a court or a parent of a minor) to any duly authorized officer or employee of a State agency administration of grants-in-aid programs under titles IV, V, or XIX or in the case of Puerto Rico, Guam, or the Virgin Islands, titles I, X, or XVI of the Social Security Act with the authorization of the individual or his authorized representative. Medical information beyond that shown on billing forms relating to an individual (and obtained in the administration of the Medicare program) may be disclosed to a State agency administering the grants-in-aid program cited above if the State agency shows a special need for the information and the file contains a written authorization by the beneficiary specifically consenting to disclosure of medical information.

Title XVIII billing forms and instructions for their completion provide for authorization by the beneficiary for the release of information to State agencies or their agents. Where you or a third party organization other than you is administering the medical payment program under a contract or underwriting arrangement with the State, release information to yourself or to the third party organization on the same basis as information may be released to a State agency.

B. Procedures for Supplying Title XVIII Information to State Agencies.--The type of billing and payment information concerning individual beneficiaries needed by State agencies depends on the nature of the State program and the extent to which the program provides for the payment of deductibles, coinsurance, and supplementary benefits. Subject to necessary payment of charges by the State in accordance with cost principles set by HCFA (see §1602 in Part I), you may make arrangements to release individual payment data such as copies, extracts, or summaries of Part A and Part B billing forms, explanation of benefits, denial letters, or equivalent special forms.

Because of the variations among State programs, detailed procedures for the release or use of information must be established by arrangements between the State agency and you. Such arrangements may include transfer of information on magnetic tape. For example, you could match the updated State buy-in files or a current Medicaid master file or other file prepared by the State. (See §3769D.) Obtain approval for this procedure with appropriate cost allocation from HCFA RO similarly to the approval required for integrated processing. (See §3769A.)

(See §§1603 and 1604 for instructions about the common provider audit program for titles V, XVIII, and XIX and release of final settlement data.)

C. Electronic Reporting of Crossover Claims.--Provide to State agencies a magnetic tape file of adjudicated claims for which Medicaid has some responsibility. Provide this data in the UNIBILL file and record format in §§3880ff.

If the State agency will accept crossover claims on magnetic tape, but requires additional data, or requires a format other than the UNIBILL format, arrange to report these claims to the State agency, but the State agency is required to absorb additional costs incurred by you for this service. (See Part 1, §1602.1.)

(See Part 1, §§1603 and 1604 for instructions about the common provider audit program for titles V, XVIII, and XIX and release of final settlement data.)

3770.1 Disclosure to Peer Review Organizations (PROs).—Furnish the PRO responsible for MR for the hospital a copy of your UNIBILL record for:

o All inpatient hospital bills, including specialty hospitals and swing-bed claims for SNF level services. (Furnish all Record Identification (RIC) type C and all (RIC) type I with a U in the 3rd position of the provider number, fields 1 and 8 of the UNIBILL.) Include initial bills, adjustments and RTI corrections.

o Any outpatient hospital (RIC) type D record identified as bill type 83x by OCE.

o Any outpatient hospital bill (RIC) type D (bill types 13x) with CPT-4 surgery code in field 33, (CPT-4 codes 10000-69999 and any local codes which are defined); and one or more of the following:

— A revenue code of 360-369 (operating room services) in field 32;

— A revenue code of 49x (ambulatory surgical care) in field 32; and

— A revenue code of 75x (gastrointestinal services) in field 32.

Prepare the PRO copy of the UNIBILL record as a part of your UNIBILL preparation operations. Send it to the PRO within 5 working days of your UNIBILL preparation date.

A. Editing of PRO Data

1. Data Provided by Hospital Requiring Editing.—Your and HCFA's edits specified in §§3825.1 and 3871 are sufficient for most of the information contained in the PRO record. However, the following additional edits are required. They must be accomplished before payment. Correct bill records failing these edits before paying the provider. Be alert to large numbers of errors coming from any hospital, so that you may begin working with it to correct its problems and prevent a substantial reduction in its cash flow.

HCFA permits deviations from specified edit criteria, i.e., the presence of blanks or zeros in fields, without returning a bill to you. The PRO is relying on your adherence to UNIBILL specifications in establishing its electronic system. The PRO will return records that do not meet edit specifications and notify the RO when the appropriate edits have not been performed.

Data Element	Edits
Admission Type (inpatient only)	a. Must be present. b. One position numeric field. c. Valid codes are: 1-Emergency 2-Urgent 3-Elective

Admission Source	a. Must be present. b. One position numeric field. c. Valid codes are: 1-Physician Referral 2-Clinic Referral 3-HMO Referral

4-Transfer from a Hospital
5-Transfer from an SNF
6-Transfer from another Health Care Facility
7-Emergency Room
8-Court/Law Enforcement
9-Information Not Available

Admitting Diagnosis Code

a. Must be present not later than April 1, 1985.
b. Five position alpha/numeric field.
c. Must be valid ICD-9-CM code.

NOTE: The admitting diagnosis must be validated against a complete ICD-9-CM file to insure that the coding represents an acceptable ICD-9-CM code. Use the EBCDIC table "EBCDXTAB" in the Grouper software program or the "DXTAB" in the Medicare code editor to validate this code prior to processing. If the admitting diagnosis cannot be located on this table return the claim and instruct the provider to resubmit the claim with a valid ICD-9-CM admitting diagnosis code.

Attending Physician ID

a. Must be present.
b. Twelve alpha numeric positions.
c. Left justified.

NOTE: Most State Uniform Billing Committees have agreed to identification of physicians by their State license numbers. If this is the convention that has been chosen, the first two positions of this field will be alpha and will contain the post office abbreviation of the State having issued the license. The following ten positions will contain the license number itself, which may be numeric or alpha/numeric depending on the State's numbering system. If you are also capturing physician name for Medicaid cross over claims, you cannot begin entering the name before the 13th position of the field.

If another convention has been chosen, develop appropriate edits for it to assure that the data received from hospitals and transmitted to PROs is valid.

Work with the PRO to develop a file of valid physician ID numbers which should be updated periodically (at least quarterly). Use this file to edit physician numbers received from hospitals. You and the PRO must develop a system of periodically updating the file and also processing records where the ID numbers for new physicians have not been entered on the file. If you and the PRO are unable to develop this file, ask the RO for instructions for editing physician numbers.

Some States have designated a State level condition code for the hospital's use to indicate a newly assigned physician number. The code permits processing of the claim and alerts the PRO to the need to update the master physician file with the new number. This note also applies to operating physician ID below.

Operating Physician ID

a. Must be present if there is a principal surgical procedure also reported.

	b. Twelve position alpha/numeric field. See "Note" under Attending Physician ID above. c. Left justified.
Patient's Zip Code	a. Must be present. b. Nine position numeric field. c. First three positions must be valid in accordance with the table in §3770.1D.
Medical Record Number	a. If provided by the hospital must be captured for the PRO. b. Must be left justified.
Patient Control Number	a. If provided by the hospital must be captured for the PRO. b. Must be left justified.

2. **Data Provided by Your System**

Readmission Indicator	a. One position alpha/numeric field. b. Valid codes in PATBILL format are: 1-Readmitted within 7 days of prior hospital stay. 0-Not a readmit c. Valid codes in UNIBILL are: Y-Readmitted within 7 days of prior hospital stay N-Not a readmit

3. HCFA provides you with HMO data in the R trailer query reply. (See §3512.8 for description of R trailer.) Include this data in UNIBILL for the PRO as reported in the R trailer. The following edits assure that your system has not distorted the data.

HMO Identification	First position is always H; 2nd through 5th position are numeric.
HMO Option Code	Must be 1, 2, A, B, or C.
HMO Election Date (MMYY)	Month must be 01-12. Year must be greater than 75.
HMO Termination Date (MMYY)	Month must be 01-12. Year must be greater than 75. Date must be later than election date.

B. Content of PRO Records.—The physical characteristics (header and trailer labels, density, track size, etc.) for the record you give the PROs are identical to your UNIBILL requirements except that your external label (address) directs the record to the PRO and the first data record contains the acronym PROBILL in the first 7 positions.

The PRO file is limited to inpatient hospital (both acute and long term) records (discharges, no pays, and adjustments). The PRO file includes all swing bed, distinct part psychiatric, rehabilitation, alcohol, and drug units. These bills are identified by an S, T, U, or V in the third positions of the provider number. The PRO file also includes all hospitals exempt from PPS.

The PRO file does not include Christian Science Sanatoria.

See §3635 for content of the return record you receive from the PRO. Return records are furnished to you only where the DRG, or day outlier days or cost outlier charges are changed or where the entire admission is denied. Changes in diagnoses or procedure coding that do not change the DRG will not be furnished. The PRO may want to develop a capability to use your Grouper program. This is encouraged where feasible as otherwise, the PRO would need to obtain and install its own Grouper.

With respect to the data exchange between you and PROs, the tapes on which you furnish data are your property. The PRO, however, may use them for supplying the return record described above. Where the number of tapes forwarded from you to the PRO exceeds the number returned, work out arrangements for their return.

C. Working Relationships with the PRO.—You are responsible for supplying the PRO with the UNIBILL formats. Answer any questions about these formats the PRO may have. Include an explanation of our RTI and adjustment systems so that the PRO will understand the meaning of the data it receives. If any HCFA initiated changes are made in the record format(s), inform the PRO about them on a timely basis and answer any questions it may have regarding accommodation of the new data into its system. You are a technical resource for the PRO with reference to HCFA record specifications. In working with the PRO you will want to assure that the PRO understands:

1. How to recognize adjustment records and RTI corrections so that they can be differentiated from original bill records.
2. When changes require submission of adjustment bills, e.g., change in DRG, utilization, deductibles.
3. How to recognize and determine when interim bills are valid (includes any valid PPS bills with discharge status coded "30").
4. When you have changed the provider's original coding (open biopsies, outliers, etc.).
5. How to recognize an outlier.

6. Limitations in your ability to identify readmissions when bills are submitted out of sequence.

7. The edits you applied to the hospital's data including any over-ride or force codes.

8. Any other areas that you, the RO, or the PRO believe will impact on your exchange of information with the PRO.

D. PRO/Intermediary Agreements

In (re)negotiating agreements with PROs include the following points:

1. Reference the appropriate sections of this and the hospital manual concerning the hospital's reporting the results of PRO review prior to billing. The PRO should also be required to validate this information.

2. The frequency with which the PROBILL file will be furnished.

3. To keep agreements current, reference the appropriate sections in this manual for UNIBILL record specifications rather than spelling them out in the agreement. Thus, as manual requirements change, they are automatically included as requirements in the PRO agreement.

4. Define invalid, erroneous, or incomplete records and reference to the edits in this section for determining valid data.

5. Define adjustments so that the PRO understands when changes will require an adjustment bill (e.g., where DRG is changed).

6. Stipulate what assistance you will provide to the PRO in determining program savings.

7. What access to PRICER and GROUPER will be provided and how.

8. Incorporate data exchange and processing specifications found in §§3634-3635 by reference.

D. Valid Zip Codes

Below is the range of valid zip codes. The numbers shown are the first three positions. They are followed by their respective State or Territory or post office abreviation. The remaining portion of the code (2 or 6 positions) is locally assigned.

006-009	PR & VI	430-458	OH	730-731	OK
010-027	MA	460-479	IN	734-741	OK
028-029	RI	480-499	MI	743-749	OK
030-038	NH	500-508	IA	750-799	TX
039-049	ME	510-516	IA	800-816	CO

3770.2 Disclosure to Carriers.—Provide the carrier with a copy of all hospital inpatient UNIBILL records, SNF inpatient, and outpatient UNIBILL records that contain value codes 12, 13, 14, 15, or 16. Accumulate SNF denials and send monthly. If agreeable to both you and the carrier, send them electronically. Carriers extract data for Medicare secondary payer development (see §3689) for identification of PRO denials requiring medical review (see §3618.1) and to assure that they do not pay for nonphysician services to inpatients. (See §§3618.2 and 3618.3). Furnish the records within 31 calendar days of preparation of the UNIBILL.

3771. DISCLOSURE TO THE INTERNAL REVENUE SERVICE.

Information may be disclosed to the Internal Revenue Service when requested for investigation of a possible violation of the F.I.C.A., S.E.C.A., F.U.T.A., or any Federal income tax law. Any problem in complying with the IRS request (e.g., machine capability, cost, etc.) should immediately be brought to the attention of the RO.

3772. DISCLOSURE TO THE OFFICE FOR THE CIVILIAN HEALTH AND MEDICAL PROGRAM OF THE UNIFORMED SERVICES (CHAMPUS).

A. General.--HCFA may disclose certain information to CHAMPUS for use in administering the CHAMPUS program. The type of information to be made available parallels that made available to noncomplementary title V and XIX State agencies and intermediaries. (See §3770.)

B. Type of Information.--It is expected that most requests from CHAMPUS for information will involve primarily Part B Medicare operations in such areas as identification of physicians and other medical practitioners who may be engaging in providing excess services or fraud. Before this information is released to a requesting CHAMPUS contractor that is not also a Medicare contractor, certain criteria must be met. The information must previously have been released by intermediaries or carriers in the administration of title XVIII to an official of a medical or other applicable professional society or to an official of a State licensing board (§3480) or to any officer, agency, establishment, or department of the Federal Government charged with the duty of conducting an investigation to determine whether there has been a violation of any provision of a Federal law (§3771).

The types of data covered in §3770B may also be disclosed to CHAMPUS upon request when authorized by the beneficiary or his legal representative. In addition, Economic Index Data (as prescribed by §§405.502(a) and 405.504(a) of Regulations No. 5) which might affect the limits on prevailing charge levels will be made available upon request.

C. Procedures for Release.--CHAMPUS fiscal agents desiring Medicare information will usually request it either through the CHAMPUS headquarters in Denver or through the parallel RO. The CHAMPUS headquarters will refer the request to the parallel RO. Should a Medicare contractor receive a request directly, it will refer the request to the RO. The RO will meet with the CHAMPUS fiscal agent and the Medicare intermediary to determine exactly what is needed, impress upon the CHAMPUS carrier that the information cannot be further disclosed, and the cost involved, if any. (See Part A, Part I, §1602; also note that payment may be estimated or waived if collection would interfere with efficient administration.) At the ROs discretion, the Medicare intermediary and the CHAMPUS fiscal agent may meet to discuss data and cost requirements without regional involvement. Upon agreement about data and cost requirements, the RO will authorize release of the information from the Medicare intermediary to the CHAMPUS fiscal agent.

3773. DISCLOSURE OF INFORMATION ABOUT PROVIDERS AND SUPPLIERS.

A. General.--In keeping with the spirit of the Freedom of Information Act and growing consumer interest in health care facilities and suppliers, the Health Care Financing Administration has made available to the public various final reports and other information regarding providers and suppliers. Disclosure to the public by a contractor is limited, but the following guidelines indicate what information is available, to whom it may be released, and the source to which a requestor should be directed for information that the contractor is not authorized to release.

B. Disclosure Necessary for Proper Administration of the Medicare Program.--

1. Disclosure of Survey Information of the Joint Commission on Accreditation for Hospitals (JCAH), American Osteopathic Association (AOA), or any other National Accreditation Organization.--HCFA may not disclose any accreditation survey made and released by the JCAH, AOA or other national accreditation organization except as prescribed by regulations. Accreditation letters and accompanying Recommendations and Comments prepared by the JCAH, AOA or other national accreditation organization for the provider's accreditation survey are confidential and exempted from public disclosure.

A copy of the provider's most recent accreditation survey may be disclosed with the provider's authorization to any authorized representative, employee or agent of HCFA for official use only in connection with the Medicare sample validation or substantial allegation survey program.

2. Information About Hospitals, Skilled Nursing Facilities, Home Health Agencies, and Independent Laboratories.--Information about a hospital, skilled nursing facility, or home health agency, as well as information about independent laboratories, providers of outpatient physical therapy (rehabilitation and public health agencies and clinics) and portable X-ray suppliers, may be disclosed without the authorization of the institution or organization when such disclosure is required for the proper performance of the duties of:

a. An officer or employee of the Department;

b. An officer or employee of an intermediary; or

c. An officer or employee of a State agency when necessary to carry out his duties under State law in the licensing or approving of hospitals, skilled nursing facilities, home health agencies, or independent laboratories, etc.

Information obtained in the provider certification process is not to be disclosed to those not included in the above three categories, except as indicated in C below.

However, information that a particular institution is participating in the program may be released; and information indicating the specialties for which title XVIII payment may be made for services of a particular independent laboratory may be released. This information is usually available from the Directory of Medical Providers and Suppliers of Services published by the Government Printing Office.

3. Intermediaries Disclosure to Third Parties.-- Disclosure to third parties for program purposes of information about identifiable physicians and other suppliers who are natural persons is governed by the same restrictions and procedures as disclosure about named beneficiaries to third parties for program purposes. See § 3764B.

Information about unidentifiable individuals or about providers or corporate entities (e.g., clinics or independent laboratories), is not exempt from disclosure by section 1106 and regulations at 42 CFR, Part 401. However, it is not to be disclosed by third parties to which information is disclosed for program purposes.

If the information the intermediary discloses to third parties for program purpose is solely information which does not identify, or make identifiable, individuals (e.g., aggregate statistics or records on providers and other corporate entities) the following sample letter is to be used instead of the letter in § 3764B.

Sample Letter from Intermediary to Third Party

Dear

We are prepared to make available to your organization certain social security records so that (state reason).

However, before making these records available to you, we must point out that by law all information derived in the administration of the Social Security Act is subject to the provisions of the Freedom of Information Act, which exempts from disclosure certain categories of records. In order to assure that no records held confidential under the Freedom of Information Act are disclosed, you must agree to meet the following conditions before we make any social security records available to you:

1. Any information which turned over to you will be used only for the specific purpose intended and for no other purpose.

2. All employees having access to this material will be instructed as to its confidential nature.

3. An official of your company will assume responsibility for ensuring that the information is not revealed to any other party.

4. The material must be returned to us as soon as you have finished the job and no copies may be retained.

5. We must have a letter from a responsible official in your office agreeing to these conditions and assuming responsibility for carrying them out.

Upon receipt of this letter from your organization, the social security records will be made available to you.

Sincerely yours,

C. Disclosure of Medicare Reports.--

1. Provider Survey Report and Related Information.-- Information concerning survey reports of providers or facilities, as well as statements of deficiencies based on survey reports are available at the local social security office or the public health assistance office in the area where the facility is located. The following data may be released under this provision.

a. The official Medicare survey report;

b. Statement of deficiencies which have been conveyed to the provider following a survey;

c. Plans of correction, and pertinent comments submitted by the provider relating to Medicare deficiencies cited following a survey.

2. Program Validation Review Reports and Other Formal Evaluation.-- Upon request in writing, official reports and other formal evaluations of the performance of providers are made available to the public. After the survey reports and other formal evaluations are prepared by HCFA personnel, the provider evaluated must be given an opportunity (not to exceed 30 days) to review the report and submit comments on the accuracy of the findings and conclusions. The provider's comments must be incorporated in the report if pertinent.

Program validation review reports are generally released from the RO serving the area in which the provider is located. In order that intermediaries will be informed of the findings of the program validation review, the completed survey report and the provider's comments will be made available to the intermediary servicing the provider.

Informal reports and other evaluations of the performance of providers which are prepared by the intermediary may also be available to the public, subject to certain possible exemptions. Requests for these reports are to be referred to the Medicare regional office with a copy of the information requested.

3. Provider Cost Reports.--

a. Requests for Disclosure.--Requests by the public either to inspect or to obtain a copy of a provider cost report must be in writing and must identify the provider or class of providers and specific cost reports requested.

b. 10-Day Notice Requirement.--Intermediaries are required to respond in writing within 10 working days after receipt of the written request, advising the requestor of the date the reports will be available. This date should be no earlier than 10 working days from the date of the intermediary's response. (For exceptions, see c below.) A copy of this response must be sent simultaneously to the provider, thus putting it on notice that its report has been requested and by whom. (For exception, see 4 below.) (The notification and delay in furnishing the data satisfies a court stipulation.) If the request is for a report submitted by a former owner of a participating facility, copies of the intermediary's response should go to both the present and former owners. If the request is for a report submitted by a provider no longer participating in the program, a copy of the intermediary's response should be sent to the former provider. (For both former owners and former providers the copy of the response should be sent to the last known address of the party.)

If the information cannot be made available within a reasonable period of time, the response should include a brief explanation for the delay (e.g., because of the extent of searching, photocopying, or delay in securing reports from records retention centers). In addition to the provider's copy, a copy must also be sent to the Medicare regional office servicing the provider.

If an intermediary receives a request for information concerning providers that it does not service, such request should immediately be forwarded to the Medicare regional office servicing the provider and the requester so informed. The regional office forwards the request to the servicing intermediary.

c. Exceptions to 10-Day Notice Requirement.--No 10-day delay in furnishing cost reports is necessary in the case of requests from:

(1) Federal or State agencies that need cost report information to carry out requirements of the Social Security Act (e.g., a State health planning agency under title XI (§ 1122), or a Medicaid State agency under title XIX).

(2) The Congress. Requests from Congress are limited to those from the Congress as an official body (e.g., the Speaker of the House or the President of the Senate, or from the chairman of a committee or subcommittee of the House or Senate with jurisdiction related to the information requested). Requests from individual members of the House or Senate are considered as requests from the public.

d. Information That Can Be Disclosed.--Disclosure is limited to cost report documents that providers are required by regulations and instructions to submit. In the case of a settled cost report, this includes the intermediary's notice of program reimbursement. Cost report documents include the statistical page, the settlement pages, trial balance of expenses, cost finding schedules, balance sheet, statement of income and expenses, and other schedules or documents required as part of the regular cost report process. (Where a provider, after first obtaining program approval, submits equivalent documents in lieu of official program documents, they are subject to the same disclosure rules as apply to official forms.)

If a provider chooses to submit with its cost report additional information not specifically required by regulations or instructions, the intermediary should not disclose such information unless it is contained within an official document or the equivalent thereof. For example, some providers may submit supplementary analyses of certain expenses, details of the professional component adjustment, financial statements (other than the statement of income and expenses and the balance sheet as required in accordance with cost reporting instructions), or income tax returns that are not required by the program. These would not be disclosable by the intermediary. Except where a provider has not submitted an acceptable cost report and supplements are required to complete the report, any additional documents or schedules that the intermediary requires the provider to submit in support of its cost representations are also not to be disclosed. In addition, do not disclose audits, schedules, letters, notes, and comments; comments on results of desk reviews (including copies of the actual desk review documents); intermediary notes and comments (including transmittal letters); audit adjustment summaries that intermediaries and auditors are required to prepare; and information pertaining to an individual patient. Requests for this type of information are to be acknowledged and referred to the regional office.

> NOTE: Any of the cost report information that the intermediary may not disclose may be disclosed under the Freedom of Information Act by the Medicare regional office, central office or, upon appeal of a denial, by the Administrator, HCFA. Disclosure may also be ordered by a U.S. District Court upon judicial review.

When an intermediary discloses a settled report, it may disclose schedules applicable to the settlement that have been reworked. The general rule is that if the intermediary has reworked any of the schedules that the provider is required to submit with its original submission, these schedules become an integral part of the report for disclosure purposes. However, any details containing intermediary or auditor comments concerning the settlement, details of specific adjustments, or supporting schedules applicable to the settlement of the provider's operation are not to be disclosed by the intermediary.

Prior to the release of cost report information to the requestor, the intermediary servicing the provider must screen each cost report and remove nondisclosable documents and information. If the intermediary is uncertain whether a particular document must be disclosed it should consult the regional office in the region in which the provider is located. Further, if you discover as a result of review that the cost report reflects information which might result in adverse program publicity, alert the RO immediately. However, do not delay disclosure.

The above instructions do not negate in any manner the requirement that you submit cost reports to HCFA that contain full and complete information, including the details of all intermediary and auditor adjustments, comments, and any supporting schedules that may be needed to verify the settlement.

e. Responding to Requests for Inspection of Cost Reports.--Cost reports will be made available for inspection by the requestor at the intermediary's office during regular business hours. In addition, arrangements will be made to make copies available upon specific request at any RO, or at central office. Provide appropriate space for such inspections. Procedures must be established to ensure that all reports inspected are properly accounted for. Under no circumstances should any requester be permitted to remove cost reports from the place of inspection.

If the requester has questions with respect to the interpretation or analysis of cost report information, such requests for more than routine explanations should be submitted by the requester in writing to the regional office.

f. Disclosure of Cost Reports.--If a request is received to inspect or to obtain a copy of a report that has not been settled, i.e., the final settlement notice of program reimbursement has not been sent, disclose a copy of the report as submitted by the provider. If settlement has been made, disclose the settled report. If a requester specifically asks for both the settled and unsettled cost reports of a provider, comply with such request. When a report is made available for inspection or copying, it should be clearly marked with one of the following captions, as applicable (see Part A, Part 2, § 2043).

(1) Cost report as submitted

(2) Settlement subject to audit

(3) Audited settlement

Requests for reproduction of all or part of a provider's cost report may be subject to photocopy fees. If it is determined that a fee must be charged, prepare the written response to the requester in accordance with § 3760.2.

g. Responding to Requests for Information.--A requester may desire only selected cost report information of a provider or several providers. However, the HEW Freedom of Information Regulation specifies that agencies are not required to create a record by compiling selected items from the files; such requests will be met by furnishing copies of specific documents which contain the information requested. In addition when you receive a request that requires selecting documents from various cost reports, the request should be honored. Follow the written response procedure in "b" above even though the entire report is not being disclosed. Advise the requester that a searching fee will be charged and give an approximate date when the documents will be ready.

4. Medicare Payment and Cost Data.--You may release Medicare payment or Medicare cost data concerning a named provider without giving the provider the 10-day notice required in section 3b above. However, do not give the requester enough information to calculate provider non-Medicare data as well. For example, do not tell a requester that Medicare payments to the provider represent 30 percent of its total revenues.

The Medicare payment or Medicare cost data may be extracted from such documents as cost reports or Form HCFA-3286, Monthly Actuarial Sample of Hospital Reimbursement. Any extraction of data is subject to the instructions in 3f above concerning creation of records.

5. Waiver of Liability Status.--The waiver of liability status of a particular provider and the statistics used to determine that status may be disclosed.

D. Disclosure of Information About Named Physicians and Other Suppliers of Services.--Generally, requests for information about a specific physician or other supplier of services, or for information which would identify such a physician or other supplier of services are not to be honored, except as noted in B above. Acknowledge such requests and refer them to the RO for response.

If you receive a written request for a physician's or supplier's customary charges, acknowledge the request and send it to the appropriate carrier, when known. If not known, send the request to the RO.

Requests for information about amounts of program payments made to physicians, whether an individual or a member of groups, or to other suppliers, should also be referred to the appropriate carrier.

E. Disclosure of Names of Providers, Physicians, and Suppliers of Services.--

1. Names of Providers Terminated from Program Participation.--The fact that a provider no longer participates in the program may be disclosed to the public upon request. Inquiries as to why a provider no longer participates in the program are to be referred to the RO.

2. Names of Providers, Suppliers, and Physicians Found Guilty of Fraud.--HCFA publishes the names of providers, physicians, other suppliers of services, or any other persons who have been found by a Federal court to have been guilty of submitting false claims in connection with title XVIII. Refer requests for such names to the RO for response.

3. Names of Physicians on Second Opinion Lists.--The DHEW Second Opinion Campaign has led to requests under the Freedom of Information Act for the lists of physicians who have volunteered to accept referrals for second opinions. If an intermediary has a list, it should disclose it upon request.

3774. DISCLOSURE OF REPORTS ABOUT NAMED CONTRACTORS.

A. Annual Contract Evaluation Reports (ACER's).-- ACER's are available to the public at the RO servicing the contractor. Refer requests for ACER to the RO for response. Refer requests for an ACER of a multi-State contractor to the RO servicing the home office of the contractor.

Refer requests for supporting documentation for the ACER contained in the Contractor Performance and Evaluation Program (CPEP) reports to the RO.

B. Disclosure of Medicare Audit Reports to the Press and Public.-- HHS Audit Agency reports issued to Medicare intermediaries are available if requested, to members of the press and the public. Refer requests for HHS Audit Agency reports directly to the Audit Agency, which is responsible for decisions regarding the release of these reports.

3775. DISCLOSURE OF STATISTICS.

Statistical data and similar information which does not relate to any identifiable person or persons may be disclosed. However, HCFA and its agents are not required to create records for requestors by compiling selected items from the files, nor must records be created to provide such data as ratios, proportions, percentages, per capitas, frequency distributions, trends, correlations or comparisons.

Such records, however, may be created when efficient administration permits. Final authority to determine when "efficient administration permits" rests with HCFA. Refer requests for information which can be created by hand to the RO unless the requestor is willing to accept copies of the pages containing the data needed to compile the requested information (i.e., to do the necessary compilation himself). Refer requests for information which must be created by machine, i.e., information on punchcards, microfilm, or tape, to the RO.

HCFA and the intermediaries have a joint obligation to ensure that the program is clearly and accurately represented and that the public is given a complete picture of program performance.

There are certain problems in accurately representing program performance by means of statistical data alone, since some groupings of statistics are subject to inadvertent inaccuracies or are susceptible to misinterpretation. Careful judgment is, therefore, essential in presenting information on operating and payment activities.

A. Information That the Intermediary May Disclose.-- When you consider it appropriate, you may release operating, payment, and cost data listed below without prior approval of the health insurance regional representative. Forward a copy of information under this guideline promptly to the RO.

In releasing any data under this guideline, the intermediary must insure that the data are related specifically to the geographical area for which the intermediary is responsible. For example, if a press inquiry is clearly for the purpose of presenting program operating data for a geographical area beyond the jurisdiction of the intermediary, and such data have not been made available by HCFA for public release, the requestor should be advised that the intermediary does not have the responsibility for release of information beyond its operational jurisdiction. The request should be referred to the RO (see § 3775B).

In releasing payment data, the intermediary must indicate that the information refers only to the area it services and does not include payments to direct dealing providers, group practice prepayment plans, or railroad beneficiaries.

If it is not clear whether information can be released under this guide, any doubt should be resolved in favor of obtaining prior clearance from the RO.

The data released under this guideline should be based on the figures furnished to HCFA in the monthly financial report and the monthly workload report. The administrative cost information should be the same as in the quarterly Operations Schedule-Cumulative Interim Expenditure Report.

The following data, relating only to your own title XVIII workload, may be released:

1. Benefit amounts paid by the intermediary, including:

a. aggregate amounts, or

b. amounts broken out by category; e.g., inpatient hospital, outpatient hospital, etc., or

c. amounts broken out by provider, including interim rates, and cost reports (see also § 3773Be).

2. Total number of bills or claims paid by the intermediary, either as an aggregate or broken out by category.

3. Total number of bills processed.

4. Admission notices, by category--inpatient hospital, skilled nursing facility, home health agency. (Extreme caution must be exercised to assure that this statistic is properly related to the items shown above.)

5. Claims volume as an aggregate amount, or broken out by category.

6. Median claims processing time, by category. Processing time should be derived by subtracting date of receipt from date of approval for payment using the dates shown on the bills.

7. Any data determined from the data in items 1-6 above and related data available to the public (e.g., average payment per paid claims).

8. Total administrative cost.

9. Average (arithmetic mean) cost per bill or claim processed.

10. Number or percentage of claims requiring contact with providers for further development.

11. Intermediary-completed SSA forms and reports listed chronologically by form number. Refer requests for BHI generated reports to RO.

a(1) Form SSA-1522 (Monthly Intermediary Financial Report)

(2) Form SSA-1523 (Estimate of Administrative Costs and Credits)

(3) Form SSA-1566 (Intermediary Workload Report)

(4) Form SSA-1566 Supplement (1972 Amendment Supplement to Intermediary Workload Report)

(5) Form SSA-1615 (Operations Schedule - Final Administrative Cost Proposal)

(6) Form SSA-1822 (Monthly Provider Audit Activity Report--Schedule I)

(7) Form SSA-1822A (Final Summary of Audits Completed During Quarter--Schedule II)

(8) Form SSA-1822B (Costs Accrued During Quarter, Cumulative Costs by Contract and FY, Schedule III)

(9) Form SSA-2580 (Cost Classification Report)

(10) Form HCFA 2582 (Plan of Expenditures)

(11) Form HCFA 2598 (Budget Distribution)

(12) Form HCFA 3208 (Provider Audit Cost Report)

b Form HCFA 1527 (Operations Schedule - Cumulative Interim Expenditure Report and Budget)

Release of the last form should be accompanied by a qualifying statement such as the following:

> "This report is based on prelimimary data and is subject to adjustment by subsequent cumulative reports and a final cost proposal."

Release only the data listed above without prior clearance. A request for data not included in the above list may, in your judgment, requdre an immediate response. If so, you may furnish general comments but do not provide statistics. You need not take further action on these requests unless the requester asks for additional information. When additional information is requested, the request should be referred to the RO.

B. Information That May Be Released Upon Authorization by the Regional Office.—

1. Total man-years (or man-quarters, etc.) employed per report period.

2. Man-hours per claim or bill processed.

3. Number of weeks' work on hand.

4. Denial rates.

5. Percent of claims or total payments involving reduction in charges.

Data which contrast one intermediary's performance with the performance of any other intermediary, or which compare an intermediary's performance with any set of national, regional, or other combined intermediary performance data, may not be released by the intermediary without prior approval by the RO. Requests for such information must be referred to the RO. Generally, data of this type will be made available in periodic

HCFA releases when sufficient to permit valid statistical inferences. When the release of this kind of information is considered valuable for intermediary or program public relation, telephone request and approval for intermediary release may be appropriate.

This section applies only to data compiled in the administration of the health insurance program; compilations created by BCA or NABSP, for example, may be disclosed by the intermediary without prior RO approval.

Data pertaining to more than one intermediary or which compare intermediary performance may be released only in proper perspective. Essentially, cost information alone is not an accurate indication of an intermediary's performance and, therefore, is not to be publicized without other relevant data accompanying it, e.g., information pertaining to workload volume and processing time. Moreover, release should always be accompanied by an interpretive statement indicating the limitations of the data and the known variables, e.g., wage differentials, etc.

Requests which include a provider population beyond the jurisdiction of the intermediary may involve data which have not been made available by HCFA for public release. Requests for such combined data will be handled by the RO, which, if it approves the release, will furnish the requestor with the appropriate combined data and alert the other intermediaries involved regarding the release.

FREEDOM OF INFORMATION INQUIRY

Hand carry - *Do Not* Put in Interoffice Mail

Use Telephone Where Possible

REQUESTOR'S NAME AND ADDRESS

ORGANIZATION OR PROFESSION

The law requires a final decision within 10 working days. Failure to meet the deadline enables the inquirer to take the matter into Federal court. If the court finds that records were improperly withheld, it may order them produced and require HCFA to pay the court costs and the complainant's attorney fees.

If the court orders payment of such fees and costs and finds that records were withheld "arbitrarily and capriciously," the Merit Systems Protection Board (MSPB) will investigate to determine whether disciplinary action is warranted against the officer or employee who was primarily responsible for the withholding. HCFA is then required by the law to take whatever action the MSPB decides is appropriate.

INSTRUCTIONS: Each person who handles this request must fill in the appropriate information below so that the actual cost of processing can be determined.

GUIDELINES FOR MAILING MATERIAL IN RESPONSE TO FREEDOM OF INFORMATION REQUESTS

When responding to Freedom of Information (FOI) requests, use the following guidelines to mail material and furnish postage cost information in section 3 of form SSA-3179.

Letters must be mailed first class. It is not economical, however, to mail more than 35 sheets of material at first class rates. For this reason, responses which total more than 35 sheets of material, including the responding letter, will be mailed as follows. The letter will be mailed first class and the remaining material will be mailed under separate cover as third class mail. (Envelopes containing third class mail must be prominently marked "THIRD CLASS" above the addressee information.)

Use letter-size envelopes (normally 4 1/8" x 9 1/8") for items 1 and 2 below; use larger size envelopes (normally 9 1/2" x 12 1/2") for items 3, 4, and 5; and package material described in item 6, as indicated.

When total sheets of material. including the letter, amount to:	Use this class of mail:	Postage Cost:	Total Cost Incl Letter:

3776 Exhibit 5

Collection and Use of Medicare Information

Under the Privacy Act of 1974, individuals being asked to furnish information must be advised of the statutory authority for the request, why the information is needed, whether it is voluntary or mandatory to furnish the information, what the result would be if the requested information were not furnished, and the uses which may be made of the information furnished.

- The statutory authority for requesting information under the Medicare program is Section 1872 of the Social Security Act, as amended, which incorporates by reference the provisions of Section 205(a) and Section 1875 of the Act.

- Information requested under the Medicare program is needed to identify the individual making a claim for benefits, to determine eligibility under the program, to decide if the services or supplies received are covered by Medicare, and to insure proper payment.

- All information requested is voluntary with the one exception described in the next paragraph. Failure to provide information on services received or amounts charged would, however, prevent payment of a claim. Failure to provide other information, such as name or claim number, would delay and could prevent payment of a claim.

(over)

- The one exception to voluntary submittal of information requested is that, under Section 1877 (a) (3) of the Social Security Act, it is a criminal offense to withhold information for the fraudulent purpose of securing benefits or payments in a greater amount or quantity than is due or where no benefit or payment is authorized by law. For example, it is mandatory that you tell us if you are being treated for a work related injury, so that we can determine whether workmen's compensation will pay for your treatment.

- The information we receive may be given to a Professional Standards Review Organization, peer review groups, or State licensing boards if they need to review the medical services you received to determine program coverage. Information about your Medicare status—such as whether you have met the deductible or how many hospital days you have used—may be given to physicians, hospitals and other providers of service, but only to the extent they need to know in order to submit Medicare claims for services rendered to you. Information may also be given to State agencies when necessary to process claims for medical reimbursement if both Medicaid and Medicare are involved.

Health Care Financing Administration
HCFA Pub. No. 031 (8-78)

Appeals

3780. APPEAL PROCESSES--GENERAL

3780.1 Questions Involving Entitlement or Emergency Services or Reasonable Cost Determinations.--

A. Entitlement or Emergency Services in Nonparticipating Hospitals.--Questions and complaints involving the individual's entitlement to hospital or medical insurance benefits and cases in which there is doubt as to jurisdiction must be referred to the social security office for resolution.

Some issues involve the question of whether the beneficiary:

1. Had attained age 65 or is entitled to Medicare benefits under the disability or renal disease provisions of the law;
2. Is entitled to a monthly retirement, survivor, or disability benefit;
3. Was qualified as a railroad beneficiary;
4. Met the deemed insured provisions;
5. Met the eligibility requirements for enrollment under the supplementary medical insurance program or for hospital insurance obtained by premium payment.

Where the issue concerns emergency inpatient hospital services in a nonparticipating hospital, the request for reconsideration should be sent to the Medicare Bureau regional office (RO) for a determination of accessibility. After the RO makes its determination, it routes the request for reconsideration to the Medicare Bureau Reconsideration Branch.

Acknowledge any questions and complaints relating to these issues and inform the individual that due to the nature of the subject, the matter must be handled by the Social Security Administration.

If you receive a Request for Reconsideration filed on Form SSA-2649, Request for Reconsideration of Part A Health Insurance Benefits, which involves either an entitlement issue or emergency services as described above and which was sent to you in error by a social security office, notify the Reconsideration Branch, Medicare Bureau, to cancel their pending controls. Transfer the SSA-2649 to the proper office as specified in § 3782.6.

B. Services in a Participating "Excess Cost" (Section 223) Provider.--

1. Emergency Services.--Under certain circumstances a provider designated as an "excess cost" provider (see the Provider Reimbursement Manual, §§ 2570ff.) may charge beneficiaries for excess costs over Medicare reimbursement. It may not charge, however, where the services were emergency services. A beneficiary may dispute a provider decision to bill for services as nonemergency. (See PRM § 2574.) If you receive a request for reconsideration of an RO determination that services do not constitute emergency services, search your records for any data which might bear upon the matter and forward it to the RO along with the request for reconsideration. If you are currently conducting a reconsideration of the same claim, forward legible copies of any pertinent material. If a PSRO or PSR State Council is currently conducting a reconsideration of the emergency services, forward the request for reconsideration to the RO with a notation that records potentially relevant to the reconsideration have been requested from the PSRO (or Council) and will be forwarded to the RO as soon as they are received. You should then request all pertinent data from the PSRO or Council and forward it. If there has been an appeal beyond the reconsideration stage on a coverage issue, notify the RO that potentially relevant information is in the possession of some other office such as the Reconsideration Branch, Medicare Bureau, or BHA.

2. Beneficiary Complains About Charges.--Where a beneficiary complains that an excess cost provider is charging more than the allowable excess costs, there is no appeal available. However, such complaints should be referred to the RO for investigation and corrective action.

C. Provider Hearing on Reasonable Cost Determination.--Effective with cost reporting periods ending on or after December 31, 1971, a provider has the right to request a hearing on an intermediary's determination of reasonable cost. (See Code of Federal Regulations, Title 20, Chapter III, Part 405, sections 405.1800ff.) Details of the provider appeals procedure are included in Part A, Part 2, Chapter VII.

Part A Appeals

3781. APPEALS OF PART A PAYMENT DETERMINATIONS

3781.1 Steps in the Appeals Process.--Under title XVIII of the Social Security Act and the regulations issued by the Secretary of Health, Education, and Welfare (Code of Federal Regulations, Title 20, Chapter III, Part 405, sections 405.701-405.750), a party who is dissatisfied with an initial determination (see §§ 3781.3 and 3781.4) may appeal the decision. The mandatory first step of the appeals process is the reconsideration. After the reconsideration, if the party is still dissatisfied and the amount in controversy (see § 3785.1) is $100 or more, a hearing before an administrative law judge (ALJ, formerly called hearing examiner) of the Bureau of Hearings and Appeals may be requested.

The cover letter to the reconsideration determination (see exhibit 10) notifies the beneficiary that he has a right to a hearing. If a hearing is desired, it must be requested within 60 days of the date of receipt of the reconsideration notice (see § 3781.7).

At the hearing, oral testimony or other evidence may be presented in person or the party may request that the case be reviewed by the ALJ on the evidence of record. If the dissatisfaction continues after the ALJ's decision, the party may request that the Appeals Council of the Bureau of Hearings and Appeals review the decision. The Appeals Council may on its own motion review an ALJ decision. After Appeals Council review or denial of review, a party who is still dissatisfied may file a civil action in the U.S. District Court for a review of the final administrative decision if the amount in controversy is $1,000 or more.

3781.2 Party Defined.—A party to an initial determination is a beneficiary with regard to issues listed in § 3781.3 below or a provider with regard to issues listed in § 3781.4. (Refer to § 3789, Beneficiary's Right to Representation under Part A.)

3781.3 Initial Determinations with Respect to Beneficiaries.—An initial determination with respect to a beneficiary is any determination concerning a request for payment under Part A relating to:

A. Coverage of furnished items and services;

B. Amount of deductible;

C. Application of the coinsurance provision;

D. The number of inpatient hospital days used during a benefit period towards the 190-day lifetime limitation of inpatient psychiatric hospital covered days;

E. The number of lifetime reserve days utilized;

F. The number of SNF days utilized;

G. The number of home health visits utilized;

H. The physician certification requirement;

I. The request for payment requirement;

J. The beginning and ending of a benefit period;

K. The medical necessity of the services;

L. A determination with respect to the limitation of liability (§1879) provision; or

M. Any other issue(s) affecting the amount of benefits paid (at present or in the future) including whether there has been, and the amount of, an overpayment or an underpayment.

3781.4 Provider's Right to Appeal Initial Determination.--Section 1879(d) of the Act establishes that the provider has a right to challenge through the appeals process and the courts: (1) an intermediary's decision that items or services furnished are not covered because they are not reasonable and necessary or constitute custodial care (§1862(a)(1) or (9)) or (2) coverage denials occurring on or after July 1, 1987 and before November 1, 1990 involving the failure to meet the requirement that a patient be homebound or the requirement that the patient be in need of skilled nursing care on an intermittent basis (§1814(a)(2)(C) and §1835(a)(2)(A)). Such challenge may be made where the ultimate liability rests with the provider or, under certain circumstances, with the beneficiary. The provider may appeal an initial determination as described above when either the beneficiary or the provider knew or could reasonably have been expected to know that such items or services were not covered and the beneficiary does not exercise his appeal rights.

If the beneficiary appeals such initial determinations, then the provider is made a party to the appeal.

3781.5 Situations Where Provider May Initiate Appeal.-- A provider may initiate an appeal only if the ultimate liability rests with the provider or with the beneficiary and it has been determined that the beneficiary will not exercise his appeal rights. A determination will be made that the beneficiary will not exercise his appeal rights if (1) the beneficiary's liability was not waived for a portion of the items or services and the beneficiary or his representative has stated in writing that he does not intend to request a reconsideration; or (2) the beneficiary's liability was entirely waived in the initial determination.

3781.6 Appeals That Involve an Adverse Utilization Review Committee (URC) Decision.-- A decision rendered by a URC is essentially a medical decision made by the provider to assure proper utilization of inpatient facilities. Inherent in such a decision are certain coverage implications for the Part A hospital insurance program, e.g., that the individual requires only a noncovered level of care, or that no further care of any kind is necessary. While the findings of the URC are evidence which must be considered in making a determination, and should be given great weight, they are not determinations made by HCFA or the intermediaries and, therefore, the beneficiary may not appeal the URC's findings per se, nor any provider actions resulting from such findings (e.g., a request by the hospital to the beneficiary to leave).

While the URC has responsibility for making a medical finding, you have the responsibility, under the term of your contract with the Secretary, for determining the coverage of services on a claim. In most cases, through an exchange of information among institutions, physicians, URCs and your medical staff, the medical finding made by the UR committee and your coverage determination will coincide. Regardless of whether your adverse coverage determination is precipitated by a negative finding of a URC, the beneficiary has a right to file a request for reconsideration.

Time limits on Appeals

3781.7 Time Limits for Filing Appeals.-- The time limit for filing a request for reconsideration is 60 days from the date of receipt of the utilization notice or denial letter, whichever is later. (See §3781.8 for clarifications and exceptions to this rule.) The reverse side of all notices of utilization furnishes an explanation of the time limit. In the event no benefits are payable, a disallowance letter is sent which refers to the 60 day time limit. (See §3721.) The time limit for filing a request for hearing is 60 days from the date of receipt of the reconsideration notice. The time limit for filing for a review by the Appeals Council of the decision of the administrative law judge presiding at the hearing is 60 days from the date of the judge's notice of decision. The time for filing for judicial review is 60 days from the date of the Appeals Council's decision. A request filed with you is considered to have been filed with SSA as of the date of filing.

Compute the 60 day limit for requesting a reconsideration and a hearing by allowing 65 days from the date of the previous notice. This allows a 5-day period for mail delivery.

These time limits may be extended if good cause is shown. (See §3781.8.) When a reconsideration request appears to be filed late, make a finding of good cause using the guidelines in § 3781.8 before taking any other action on the reconsideration. (If the request is for a hearing, the administrative law judge will make the good cause determination; if the request is for judicial review, the Appeals Council will make the determination on good cause.)

3781.8 Finding Good Cause for the Late Filing of Reconsideration Requests.--

A. General.--If a reconsideration request is filed late, the issue of whether good cause exists for the delay in filing is to be resolved prior to taking any other action on the reconsideration.

The time limit for filing for reconsideration is 60 days from the date of receipt of a utilization notice or denial letter, whichever is later. Allow 5 days beyond the date of the notice for mail delivery. (See B below.) For example, a beneficiary who received a notice dated June 15, 1976, had through August 19, 1976 (60 days from June 16 through August 14 plus 5 days for mail delivery) to file timely. If, however, the request is filed late and you determine that good cause exists, the reconsideration request is accepted and handled as a regular case throughout the remainder of the reconsideration process.

B. Establishment of Time Limit for Filing.--The end of the 60 day period will be computed as follows:

1. Full Denial.--When the initial determination is a full denial, count the 60 days from the date of receipt by the party of the determination, normally 5 days after the date of the denial notice (SSA-1954). Ordinarily, a copy of the notice will have been attached to the reconsideration request form by the claimant or by social security office personnel. However, since some beneficiaries will not have kept the notice or included it with the reconsideration request, it is essential to have a copy of the SSA-1954 in the intermediary file (see § 3721).

2. Partial Denial.--When an initial determination is a partial denial, count the 60-day period from the date the party receives the utilization notice, normally 5 days after the date of the notice. (Although the beneficiary will also have received an SSA-1955, the time limit is counted from the later utilization notice because this notice contains an appeal paragraph.) Ordinarily, a copy of either the partial denial notice (SSA-1955) or the utilization notice will be furnished by the beneficiary and attached to the reconsideration request form.

If neither notice is attached, the request will be deemed to be filed timely if it is filed within 8 months and 5 days of the date of the partial denial notice (SSA-1955). For this reason, it is essential to have a copy of the SSA-1955 in the intermediary file (see § 3721). When the partial denial notice is used to establish timely filing, 8 months is allowed to assure that the beneficiary is given at least 60 days from the date of the utilization notice. This is necessary because normally the utilization notice is not mailed simultaneously with the SSA-1955, since all processing must be completed before the utilization notice is prepared. (In a rare case, the beneficiary may make attachments indicating the partial denial notice was sent after the date of the utilization notice. If this occurs, count the 65 days from the later date.).

If the request was not filed within 8 months and 5 days of the date of the SSA-1955, make a written request to the Social Security Administration, Part A Systems Branch, BHI, Bay A-5 Gwynn Oak Building, 1710 Gwynn Oak Avenue, Baltimore, Maryland 21235, for the date of the utilization notice (SSA-1533, SSA-1533A, RR-100, and RR-100A).

3. Full Allowance.--If a beneficiary should appeal a full allowance, the 65-day period will be counted from the date of the utilization notice. If a copy is not attached, the request will be deemed to have been filed timely if it was filed within 8 months and 5 days of the date you approved the bill for payment. If the request was not filed within 8 months and 5 days of this date, then you must make a written request to the address in the paragraph above, for the date of the utilization notice (SSA-1533, SSA-1533A, RR-100, and RR-100A).

4. Alternative Method in Full or Partial Allowance Cases.--This method may be applied where the utilization notice is not attached to the request and the request was filed more than 8 months and 5 days after the date of the notice of utilization or SSA-1955. You may develop the case for good cause without requesting the information from BHI as described in 2 and 3 above. If good cause is found to exist, the reconsideration will be processed and the SSA-2649 will be annotated in Item 10, Remarks, of page 4 with the remark "timely filing questionable" and the reason for good cause will be explained. If good cause is not found to exist, this alternative method may not be used and a query on timely filing must be sent to the Social Security Administration.

5. Beneficiary Alleges Later Date of Receipt.--Where the beneficiary establishes that he could not have received the notice advising him of his appeal rights until a date later than the presumed delivery date (e.g., beneficiary was away from home for an extended period), count the 60 days from the earliest date on which receipt could reasonably be established.

C. Conditions Which Establish Good Cause.--Good cause may be found when the record clearly shows, or the claimant alleges and the record does not present any reason to question that the delay was due to one the following conditions:

1. circumstances beyond the individual's control, including mental or physical impairment (e.g., disability, extended illness), or significant communication difficulties;

2. the death of the individual or his advanced age (advanced age will be met automatically if the individual attains age 75 prior to the date services began in the contested claim);

3. incorrect or incomplete information about the subject claim furnished by official sources (SSA, intermediary, or carrier) to the individual, e.g., whenever a beneficiary is not notified of his appeal right or of the time limit for filing, good cause must be found;

4. delay resulting from efforts by the individual to secure supporting evidence, where the individual did not realize that such evidence could be submitted after filing a request;

5. unusual or unavoidable circumstances, the nature of which demonstrate that the individual could not reasonably be expected to have been aware of the need to file timely; or

6. destruction by fire, or other damage, of the individual's records, when such destruction was responsible for the delay in filing.

NOTE: When the beneficiary's claim is being handled by a representative (§ 3789), the above conditions for finding good cause should be applied to such representative.

D. Procedure to Establish Good Cause.--When a request for reconsideration is filed after the expiration of the time period, the following procedure should be utilized:

1. If the request contains a statement of the reasons for delay (or other evidence which establishes the reason), the determination of whether good cause may be found will be based primarily on that statement. When there is no adequate statement and there is no other sufficient evidence in the file, obtain an explanation of the reason(s) for delay from the claimant through the use of the SSA-1980, Carrier or Intermediary Request for Assistance. (See § 3706.)

2. Annotate the SSA-2649, Request for Reconsideration of Part A Health Insurance Benefits, in Item 10 on page 4 with the remark "60 days expired." Where the alternative method for finding good cause is used, enter the remark "timely filing questionable."

3. The good cause finding is to be made on the basis of a review of (a) the statement by the beneficiary or his representative of the reasons for delay, (b) any other evidence either already in file or

received with the request which relates to the late filing issues, and (c) any documentation in file regarding the particular claim. (Additional documentation regarding the claim need not be requested from the provider until the good cause finding is made.)

4. Where the statement of reasons for delay is not controverted by any other evidence and/or is substantiated by the record, the statement will be accepted as written in finding good cause. If evidence in the record of a particular case leads you to doubt the veracity of the statement, refer the issue—using the SSA-1980—to the social security office for an investigation of the facts. The SSO will obtain a statement from the beneficiary on an SSA-795, Statement of Claimant or Other Person. Evidence that a proper notice was mailed would not be sufficient reason to conclude that the notice was received.

5. On the SSA-2649, page 4, in Item 10, Remarks, enter the reason for the delay and the finding relative to good cause.

E. Examples of Situations Where Good Cause Exists.—Following are examples of cases where good cause for late filing should be found. This list is illustrative only and not exclusive.

1. Beneficiary is an amputee, and has no representative. Statement indicates that he planned to file for reconsideration. Request was filed less than 60 days late. Good cause is found by reason of disability.

2. Beneficiary is deceased. Her husband, who would be the likely person to file as her next of kin, died during the 60-day period. Request was filed 2 months late by the deceased husband's executor. Good cause is found by reason of the death of the death of the representative.

3. Beneficiary is 76 years old and is not represented. Good cause is found by reason of his advanced age.

4. Evidence substantiates that the beneficiary was collecting additional documentation prior to filing. Good cause is found by reason of lack of awareness that evidence could be submitted after filing for reconsideration.

5. Beneficiary is deceased. His wife, who would be the likely person to file as his next of kin, is not fluent in English and did not comprehend the denial notice. Her daughter-in-law filed immediately on learning that no appeal had been made. Request was 3 months late. Good cause is found by reason of circumstances demonstrating that the individual could not reasonably be expected to be aware of the need to file timely.

6. The denial notice sent to the beneficiary did not specify the time limit for filing for reconsideration. Good cause is found by reason of incomplete information furnished by official sources.

NOTE: Whenever a beneficiary is not notified of his appeal right or of the time limit for filing, good cause must be found.

7. The initial notice denied payment; a subsequently issued SSA-1533 incorrectly indicated that payment was allowed. The beneficiary assumed the second notice was correct. Good cause is found by reason of the incorrect information furnished to him.

8. The beneficiary is 73, partially blind, and resides in a remote district of Alaska, where communication was dependent upon the availability of dog sled travel. Request was 7 months late. Good cause is found by reason of circumstances beyond the individual's control (i.e., significant communication difficulties).

F. Where Good Cause Is Not Found.—Where good cause for the late filing of a reconsideration request is not found, the beneficiary must be so advised. Send a written notice to the beneficiary stating that the request for reconsideration has been dismissed and giving (1) the reason for the dismissal, i.e., the reconsideration request was not filed within the 60-day time limit as required and good cause was not found for the failure to file timely. (2) An explanation of the initial determination. A copy of this notice must be attached to page 4 of the SSA-2649, Request for Reconsideration of Part A Health Insurance Benefits.

NOTE: Where good cause is not established, examine the case to determine whether there would be any basis for reopening and revising the initial determination. If reopening and revision are undertaken (see §§ 3799ff.), the notice of dismissal of the reconsideration request need not be sent.

Request for Reconsideration

3782. FILING THE REQUEST FOR RECONSIDERATION OF A PART A PAYMENT DETERMINATION

3782.1 Place and Manner of Filing Requests for Reconsideration.—The request for reconsideration must be made in writing and may be filed at any social security office, or in the case of a railroad retirement beneficiary, at an office of the Railroad Retirement Board, or at the office of the servicing intermediary. Most of the requests will be filed on the prescribed Form SSA-2649, Request for Reconsideration of Part A Health Insurance Benefits. (See § 3784, exhibit 1.) However, any signed, written statement whether it is on form SSA-2649, form SSA-795 (Statement of Claimant), or letter, etc., indicating that the beneficiary, or his authorized representative, or a provider is expressing disagreement with the initial determination or indicating that a review, a second look, or a reexamination should be made, constitutes a request for reconsideration. (See §§ 3789-3789.3 for definition of authorized representative and a party's right to representation.)

A. Oral Contacts and Unsigned Written Requests.—If the explanation you supplied at the time of the party's (as defined in § 3781.2) personal visit to, or telephone conversation with, your office answers the complaint to the satisfaction of the party, no further action is required on the case. If, after the explanation has been given, the party still believes that the determination made on the claim was incorrect (i.e., not in accordance with the law and regulations), your representative will assist the party in filing a Request for Reconsideration of Part A Health Insurance Benefits, Form SSA-2649. If this form is not available, your representative may take a dated written statement signed by the beneficiary expressly requesting that the initial determination be reconsidered and stating briefly the reason for dissatisfaction.

If the initial contact was by telephone, or if the party failed to sign the written request, send him a form SSA-2649 and explain that the form must be completed and signed.

The party should also be instructed that the local social security office or railroad retirement office will provide assistance if desired in filing the request.

B. Written Complaint or Inquiry.—A written communication from a party relating to a claim for payment may constitute an expressed request for reconsideration, an implied request for reconsideration, or simply a request for information. The first two warrant a "reconsideration" of the determination which may result in further appeal rights, while the request for information does not. The distinction between an implied request for a reconsideration and a request for information may, in some cases, be a difficult one to make.

A letter or note bearing the beneficiary's or his representative's signature will serve as an acceptable basis for a request for reconsideration when it asks either explicitly or implicitly that further action on the claim be taken, or when it indicates dissatisfaction with the intermediary's decision. Examples of the phrasing of such letter requests are:

1. "Please reconsider (review) my claim."

2. "Will you please review this denial to see if more payment can be made."

3. "I am not satisfied with the payment decision; please look at it again."

4. "Your decision is illogical."

5. "My neighbor got paid for the same kind of claim. Mine should be paid also."

6. "Last year I was hospitalized for the same condition and the claim was paid for by Medicare."

7. "According to my doctor I needed hospitalization and yet my claim was denied."

All letters which contain such phrases should be treated as valid requests for reconsideration. This list is not all-inclusive, since there are innumerable ways in which a party may express dissatisfaction or request that the initial determination be looked at again. In those instances where the reviewer is not certain whether the party has requested additional information or a reconsideration, the letter should be treated as a request for reconsideration and should be processed accordingly.

If it is determined that the communication is neither an expressed nor implied request for reconsideration, it requires an answer which is responsive to the issues raised by the writer. Simple matters may be responded to by telephone. In that case a report of contact should be prepared and included in the claim file along with the written inquiry. Similarly, a copy of any written response is to be included with the inquiry in the claim file. All such communications and responses must be retained in accordance with the instructions in Part A Intermediary Manual, Part 2, § 2982, Item 4 to protect the beneficiary's filing date if, later, it is determined that a request for reconsideration was intended or the same issues are raised. If during the course of a telephone conversation a claimant indicates a desire for a reconsideration, send the appropriate form with instructions for completing and signing it.

C. Provider Involvement as a Party to the Reconsideration.—When an intermediary receives a request for reconsideration from the beneficiary or his representative, the case must be reviewed to determine whether the provider is a party. Even if the provider takes no action, it is by definition a party if the conditions in § 3781.4 are met. When the provider is a party, it should be given written notice that the request has been received (see exhibit 3). The provider must also be sent a copy of the completed reconsideration determination.

If the initial determination is such that Medicare payment is made for all of the noncovered items or services under the waiver of liability provision (section 1879(a)), then the provider has no right to an appeal, nor is it made a party to the determination if the beneficiary appeals. However, the provider retains the right to appeal (or, it is made a party to the determination if the beneficiary appeals) an initial determination when Medicare payment is made for part of the noncovered items or services. Even if the provider is not a party to the determination if a beneficiary appeals, it may submit additional information on its own initiative in such a case. It may do so even though the beneficiary has not requested an appeal. Such information should be reviewed by the intermediary to determine if it constitutes new and material evidence and is submitted within the appropriate time limits and therefore warrants a reopening of the determination (§§ 3799ff.).

D. Beneficiary's Complaint Concerns His Discharge.—If the beneficiary complains that he was discharged by the provider and he believes he should have been permitted to remain in the institution longer, it is a matter between the beneficiary and the provider. Inform the beneficiary that the Medicare program makes reimbursement for covered services but does not determine which services should be provided or the length of an inpatient stay. Refer the beneficiary to the provider or his physician for an explanation.

E. Dismissed Request for Hearing Is an Implied Request for Reconsideration.—When an Administrative Law Judge of the Bureau of Hearings and Appeals dismisses a request for hearing on the grounds that no reconsideration has taken place, the dismissed request for hearing constitutes an implied request for reconsideration. When the Reconsideration Branch, BHI, receives the dismissed request for hearing, it will notify the responsible intermediary to institute reconsideration action. The intermediary will notify the party who requested the hearing that it is processing the dismissed request as a request for reconsideration.

A request for hearing dismissed for any other reason (e.g., lack of timeliness or the party is not eligible to request a hearing on beneficiary's behalf) does not constitute an implied request for reconsideration.

3782.2 Instructions for Completing Form SSA-2649, Request for Reconsideration of Part A Health Insurance Benefits.—Following are guides for completing the SSA-2649 when the intermediary receives only a signed statement (see § 3782.1) or assists a beneficiary in filing for reconsideration:

ITEM 1. BENEFICIARY'S NAME.
Enter the name of the beneficiary who received the services.

ITEM 2. HEALTH INSURANCE CLAIM NUMBER.
Show the claim number (including the suffix) of the beneficiary.

ITEM 3. REPRESENTATIVE'S NAME.
If the claimant has a representative, show his name and his relationship to the claimant. If a provider is filing, check the appropriate box.

ITEM 4. A COPY OF THE NOTICE.
If available, attach a copy of the denial letter or utilization notice the claimant received.

NOTE: Most information required in Items 1-9 may be ascertained from the notice.

ITEM 5. THIS CLAIM IS FOR.
Check the appropriate box. Check "emergency hospital" when the services are covered only under the emergency services or border resident services provisions. (See § 3013.) Check "health maintenance organization" in every case where the services were rendered or covered by an HMO, or where the issue is HMO coverage of services.

ITEM 6. NAME AND ADDRESS OF PROVIDER.
Give the complete name and address of the provider and provider number.

ITEM 7. NAME OF INTERMEDIARY.
Give the name, city, State, and the number of the intermediary which made the initial determination on the claim in question.

ITEM 8. DATE OF ADMISSION OR START OF SERVICES.
Show the date that the inpatient stay began or (for home health) the date that services were first rendered.

ITEM 9. DATE(S) OF THE NOTICE(S) YOU RECEIVED.
Show the date of any notice received by the claimant about his claim.

ITEM 10. REASON FOR DISAGREEMENT.
The claimant or his representative should state specifically why he believes the initial determination to be incorrect. If a provider is filing, the following language should be used: "Filed by (provider's name) in accordance with section 1879 because ____________________."

ITEM 11. ADDITIONAL EVIDENCE.
Indicate what additional evidence, if any, the claimant is submitting.

ITEM 12. TIMELY FILING.
If the request is not made within 65 days of the date of the claimant's notice, check "No" and obtain from the claimant a statement of the reason(s) for delay so that a determination on good cause can be made.

ITEM 13. SIGNATURE.
The form may be signed by either the beneficiary or his representative if applicable, or by the provider's representative. Check the appropriate block. NOTE: When a written communication forms the basis of the reconsideration request, the check in the signature block will indicate whether the written communication (which should be attached to the SSA-2649) was signed by the beneficiary or the representative. On the signature line, the following phrase should be clearly printed or typed: FORM COMPLETED BY INTERMEDIARY--SIGNED REQUEST ATTACHED. When the provider files, the appropriate block should be checked. The name and title of the provider's representative should be typed or printed in the signature area in addition to the required signature.

ITEM 14. ADDRESS.
Show the address of the person who signed the request for reconsideration.

ITEM 15. WITNESSES.
The witness block is on the reverse side of page 1 of the form. If the request is signed by mark, the signature and addresses of two persons witnessing the signing must appear in block 15B and 15C.

NOTE: Intermediary employees may act as witnesses when a request is completed in the intermediary's office.

ITEM 16. ROUTING.
Check the block which indicates the component with jurisdiction over the reconsideration. Space is provided to show the name of the intermediary.

NOTE: The name of the resident intermediary (i.e., the one making the initial determination on the claim) will be shown, even if another intermediary will prepare the reconsideration determination.

ITEM 17. ADDITIONAL INFORMATION.
Use this space to provide any other information which may be pertinent to the request.

ITEM 18. DATE STAMP.
Every request will be date stamped with the date of receipt of the request. Be sure this is reproduced on all copies. (On intermediary-completed forms, this is the date of receipt of the written communication.)

3782.3 Routing the Reconsideration Request.--As stated above, whenever you receive the reconsideration request directly (that is, not through a social security office), return page 2 of the request with the acknowledgment letter, and forward page 3 of the SSA-2649 immediately to this address:

Health Care Financing Administration
Reconsideration Branch, Medicare Bureau
Pending Control
P.O. Box 770
Baltimore, Maryland 21203

Pages 1 and 4, plus any additional information, statements, etc., become the basis for the reconsideration and should be routed according to the intermediary's regular system for processing such requests.

(See § 3782.6 for instructions on transferring, dismissing, and cancelling controls on requests for reconsideration filed on form SSA-2649 which involve issues or services over which you have either no jurisdiction or only partial jurisdiction.

3782.4 Acknowledging Receipt of Request for Reconsideration.--Upon initial receipt of a written request for reconsideration, acknowledge receipt to the beneficiary or his representative, or the provider, depending upon who signed the request. A short form letter may be used, but it must advise the person that the case will be reviewed and that he will receive official notice of the results of the reconsideration. Page 2 of the form SSA-2649 should be enclosed. Include a copy of this acknowledgment in the reconsideration file.

Also take the following steps when a request for reconsideration is initiated by the provider: (1) If the beneficiary's liability was waived entirely, send him or his representative a letter notifying him of the receipt of the provider's reconsideration request and telling him that he is a party to the determination. Advise him that he may submit any additional information if he so desires and that a copy of the completed determination will be sent to him; (2) If the beneficiary's liability was not waived for any part of the stay, ask the beneficiary or his representative whether he intends to file for reconsideration. The letter should explain that even if the beneficiary does not actually file a reconsideration request, he still will be a party to the determination and therefore may submit any additional information he desires and will receive a copy of the determination.

Advise the beneficiary that if he does not respond and indicate his intent within 2 weeks of the date of your letter, you will proceed with the reconsideration based on the provider's request. (If the beneficiary decides to file for reconsideration and so advises you, the provider becomes a party.)

In some cases, the initial determination of noncoverage for an inpatient stay allows Medicare payment under the waiver of liability provision for part of the stay but finds either the beneficiary or the provider liable for the remainder. If the provider requests a reconsideration for the entire noncovered stay, the request should be accepted and treated as described in § 3781.5.

3782.5 Procedures for the Resident Intermediary and the Reconsideration Intermediary.—

A. Functions of the Resident Intermediary.--Resident intermediaries are those which do not normally process their own Part A reconsideration requests, instead, the reconsideration determination is made by a reconsideration intermediary.

1. All Cases Except Full Reversals.—A resident intermediary uses the following procedures except where it determines it can fully reverse its initial denial decision:

a. All the procedures from §§ 3781.1 through 3783.9 and § 3784.10 are to be followed, as needed;

b. After the resident intermediary has assured itself that complete documentation has been obtained, or if such documentation is not available, has furnished detailed written explanation to that effect, the entire reconsideration file containing the original documents is then forwarded to the reconsideration intermediary for processing and adjudication of the reconsideration request.

2. Full Reversal Cases.--Upon receipt of additional evidence during the reconsideration process from the treating physician, provider, or other source, the resident intermediary may find that a complete reversal (i.e., from a fully or partially unfavorable determination to a fully favorable determination) is in order. In such cases, the resident intermediary:

a. Completes all the items of the form SSA-2649;

b. Prepares and issues the reconsideration determination and notices to the beneficiary or to his representative using the format of the model letter shown in exhibit 4;

c. Notifies the provider of the reversal using the format of the model letter shown in exhibit 6; and

d. Completes Items 10 through 20 of page 4 of the form SSA-2649 and sends the entire file to the Reconsideration Branch, Medicare Bureau.

B. Functions of the Reconsideration Intermediary.--Reconsideration intermediaries are those intermediaries which have been designated to process reconsiderations on claims initially adjudicated by resident intermediaries. These intermediaries, when processing reconsiderations for resident intermediaries, use the procedures listed in §§ 3783.5, 3783.6, 3783.9 through 3784.8, and 3784.10 with the following additions:

1. The reconsideration intermediary sends a copy of the reconsideration determination and cover letter to the resident intermediary at the same time the beneficiary or the representative is notified.

2. In situations involving a full or partial reversal of the resident intermediary's initial decision, the reconsideration intermediary instructs the resident intermediary to inform the provider of this reconsideration reversal.

3782.6 Transferring and Dismissing Requests for Reconsideration Which Involve Partial or No Jurisdiction, More Than One Component, Stay, or Issue.--The intermediary may receive a form SSA-2649 which involves multiple issues or matters over which it has no jurisdiction. In both situations, it is necessary to update or correct the case control established by the Reconsideration Branch, and to insure that adjudicative action will be taken by the proper office(s). Such situations may involve emergency services (RO jurisdiction); entitlement issues (which must be referred to a social security office); services which must be adjudicated by another intermediary who serves a different provider (which must be referred to that intermediary); more than one stay at a provider (which requires separate SSA-2649's); more than one period of home health services (requiring separate SSA-2649's) or a Part B claim for services (which requires transfer of information to a Part B carrier).

A. Acknowledging Receipt of Form SSA-2649.--Where multiple issues are raised on a form SSA-2649, additional SSA-2649(s) must be completed and transferred or the original form must be transferred to the component(s) responsible for making determinations on such issue(s). Send an acknowledgment letter to the beneficiary or person who filed the request for reconsideration advising him of the transfer(s) and reasons for the transfers, and that he will receive a separate determination in each issue. Attach page 2 of the original form SSA-2649 if you receive it and all page 2's of any additional SSA-2649's that you complete (as indicated in B and C below) to the acknowledgment letter. Send a copy of the acknowledgment letter with the copies of the request for reconsideration and copies of any related material to the other components having jurisdiction. Where the receiving intermediary has no jurisdiction, is transferring the request, and is required to send the Reconsideration Branch one photocopy of each of pages 1 (effective June 19, 1978) and 4 of the SSA-2649(s) being transferred, include a copy of the acknowledgment letter and copies of any related material. (See § 3782.6C(1), (2), (3), and (4).)

B. Receiving Intermediary Has Partial Jurisdiction.--When you have verified all form SSA-2649 data, and there are issues involving other jurisdictions, keep and adjudicate the original form SSA-2649. This should consist of pages 1 and 4, since page 2 has been detached and given to the filer, and page 3 forwarded to the Reconsideration Branch to establish the case control. Also take the following actions.

1. Reconsideration Issues Involve Another Intermediary.--The intermediary that adjudicates the original form SSA-2649 prepares separate form SSA-2649's for each partial jurisdiction. Additional forms SSA-2649 need not be signed, provided the beneficiary's signature appears on the original SSA-2649, letter, or statement requesting reconsideration. Attach photocopies of the signed request to pages 1, 3, and 4 of all unsigned SSA-2649's and forward to the other intermediary with a copy of the letter to the filer acknowledging receipt of the request for reconsideration and advising him of its disposition. Detach page 2 of the additional form SSA-2649's and send to the filer with the acknowledgment letter. Upon receipt of the referred material, the second intermediary will immediately dispatch page 3 to the Reconsideration Branch to establish a new control.

2. Reconsideration Issues Involve HI Regional Office.--Prepare a separate form SSA-2649 for the HIRO where emergency services are involved. Forward pages 1 and 4 to the HIRO with a copy of the letter to the filer acknowledging receipt of the request for reconsideration. Detach page 2 and send it with the letter to the filer. Discard page 3 of the SSA-2649 since the Reconsideration Branch is not notified in this situation. Branch controls will be completed when the original form SSA-2649 is forwarded after all issues are settled.

3. Reconsideration Issues Involve Social Security Office.--Photocopy page 1 of the original form SSA-2649 you are retaining, and forward the copy to the appropriate social security office with a copy of the acknowledgment letter advising the filer of this referral and the reason for it. Also instruct the social security office to handle and resolve the issue being referred.

4. Reconsideration Issues Involve Part B Carrier.--Photocopy page 1 of the original form SSA-2649 you are retaining, and forward the copy to the appropriate Part B carrier with a copy of the acknowledgment letter. Also instruct the carrier to handle and resolve the issues being referred.

C. Receiving Intermediary Has No Jurisdiction.--When the intermediary has verified all form SSA-2649 data and established that it has no jurisdiction over any issue, the following actions should be taken:

1. Reconsideration Issues Involve Another Intermediary.--Forward the original form SSA-2649 (pages 1 and 4) to the intermediary having

jurisdiction over the issue under appeal with a copy of the acknowledgment letter advising the filer of the transfer of the request for reconsideration and reasons for it. Photocopy pages 1 and 4 of the form SSA-2649 being transferred and route it to the Reconsideration Branch with a copy of the acknowledgment letter and copies of any related material. On the photocopy, annotate Item 10 "WRONG JURISDICTION--SSA-2649 TRANSFER," and check the "DISMISSAL" box in Item 17. Prong-file the material in a properly labeled case folder, as with any completed case file, and route immediately to the Reconsideration Branch (use the address in § 3782.3.)

2. Reconsideration Issues Involve Regional Office.--Forward the original form SSA-2649 (page 1) to the regional office having jurisdiction over the emergency services issue under appeal. Attach a copy of the acknowledgment letter advising the filer of the transfer of the request for reconsideration and the reasons for it. Detach page 4 of the form SSA-2649 being transferred and route it and 1 photocopy of page 1 of the SSA-2649 to the Reconsideration Branch, Medicare Bureau, with a copy of the acknowledgment letter and copies of any related material. On page 4, annotate Item 10 "EMERGENCY SERVICES--FORM SSA-2649 TRANSFER TO RO," and check the "DISMISSAL" box in Item 17. Prong-file the material in a properly labeled case folder, as with any completed case file, and route the folder immediately to the Reconsideration Branch (use the address in § 3782.3).

3. Reconsideration Issues Involve Social Security Office.--Forward the original form SSA-2649 (page 1) to the social security office for processing of the entitlement issues under appeal. Attach a copy of the acknowledgment letter which advised the filer of the transfer of the request for reconsideration and the reasons for it. Detach page 4 of the form SSA-2649 being transferred and route it and 1 photocopy of page 1 of the SSA-2649 to the Reconsideration Branch with a copy of the acknowledgment letter and copies of any related material. On page 4 annotate Item 10, "ENTITLEMENT ISSUE--FORM SSA-2649 TRANSFER TO DO," and check the "DISMISSAL" box in Item 17. Prong-file the material in a properly labeled case folder, as with any completed case file, and route it immediately to the Reconsideration Branch (use the address in § 3782.3).

4. Reconsideration Issues Involve Part B Carrier.--Forward the original form SSA-2649 (page 1) to the appropriate Part B operation for processing of the Part B medical insurance claim issue under appeal. Attach a copy of the acknowledgment letter which advised the filer of the transfer of the request for reconsideration and the reasons for it. Detach page 4 of the form SSA-2649 being transferred and route it and 1 photocopy of page 1 of the SSA-2649 to the Reconsideration Branch with a copy of the acknowledgment letter and copies of any related material. On Page 4 annotate Item 10, "PART B ISSUE--FORM SSA-2649 TRANSFER TO CARRIER," and check the "DISMISSAL" box in Item 17. Prong-file the material in a properly labeled case folder, as with any completed case file, and route it immediately to the Reconsideration Branch (use the address in § 3782.3).

3782.7 Processing a Reconsideration Request That Was Filed Before Initial Determination Issued.--Occasionally a beneficiary may express dissatisfaction or request reconsideration before the intermediary receives the bill (e.g., the form SSA-1453), before the initial coverage determination is made, or before a disallowance letter is sent. This may occur if he feels strongly, either on the basis of his own opinion or notification by the provider and/or utilization review committee, that an adverse initial determination will be made. In such cases, the reconsideration intermediary processes the reconsideration concurrently with the initial determination in the same manner as any other properly filed request for reconsideration. The reconsideration cover letter is to be modified to show that the initial and reconsideration determinations have been combined as a result of the beneficiary's request.

3782.8 Dismissal of Reconsideration Request--No Amount in Controversy--Beneficiary Appeals After Initial Favorable Coverage Determination Is Made, But Before He Is Notified.--A request for reconsideration may be filed after you make a favorable initial coverage determination but before the beneficiary is notified that full payment has been made on his behalf. In such a case, send the beneficiary a letter explaining that because full payment has been made, no further action will be taken on the reconsideration. This letter of explanation must include a paragraph informing the beneficiary of his right to request a reconsideration if he is still dissatisfied with the coverage determination.

On the form SSA-2649, enter "No Amount in Controversy" in Item 10 and check the block "Dismissal" in Item 17 of page 4. The beneficiary's or representative's original request for reconsideration (if informal), a copy of any letter of explanation, and pages 1 and 4 of the form SSA-2649 should be prong-filed in a case folder, as in a completed case file, and the folder immediately routed to the Reconsideration Branch. This procedure permits cancellation of the central case control established with the original filing of the form SSA-2649.

3782.9 Withdrawal of Request for Reconsideration.--A request for reconsideration may be withdrawn by the person who filed the request, by his authorized representative, or by the provider. The request for withdrawal must be in writing, signed, and filed with the intermediary, HCFA, SSA, or the Railroad Retirement Board.

When you receive such a request either directly or from any of the above sources, send a letter to the beneficiary, representative, or provider acknowledging receipt of the withdrawal request, and advising that reconsideration action will be terminated. Check the block entitled "WITHDRAWAL" on page 4, Item 17 of the SSA-2649. The original withdrawal request, a copy of the intermediary's acknowledgment letter, and pages 1 and 4 of form SSA-2649 will be prong-filed in a case folder similar to a completed case file, and the folder immediately routed to the Reconsideration Branch. This will permit effective cancellation of the central case control established with the original filing of the HCFA-2649.

If a provider wishes to withdraw more than one request, one letter of acknowledgement to the provider is sufficient, so long as it includes the name and H.I. number of each beneficiary and the stays involved. A photocopy of the request and acknowledgement should be made a part of each individual's file.

3782.10 Notifying Provider or Beneficiary Where There Is a Withdrawal.--

A. If a provider was made a party to a request for reconsideration (see § 3781.4) which is subsequently withdrawn, it may then request reconsideration per § 3781.5. It is, therefore, necessary that you advise the provider of its appeal rights. This can be done via a short notice similar to the following:

> "This is to advise your facility that (beneficiary's name) has withdrawn his/her request for a reconsideration of the claim about which we advised you in our letter (exhibit 3) on (date).
>
> "Since the Medicare program has not assumed full liability for payment of the noncovered services rendered at your facility, you now have the right to file a request for reconsideration on behalf of your institution.
>
> "You may file such a request within 60 days of the date you receive this letter."

B. If a provider submits a request for withdrawal, prepare a short notice to the beneficiary or his representative similar to the following:

> "This is to advise you that (facility's name) has withdrawn its request for reconsideration of the claim about which we advised you in our letter (dated)." (See § 3782.4.)
>
> "Since the Medicare program has not assumed full liability for payment of the noncovered services you received at (facility's name), you now have the right to file a request for reconsideration. You may file such a request within 60 days of the date you receive this letter."

Documentation

3783. DOCUMENTING PART A RECONSIDFRATION REQUESTS

A. General.--The reconsideration of the amount of payment under Part A is based on (1) information in your possession at the time the initial determination was made; (2) any statements or information that may be submitted by the party or parties; and (3) the medical and other records that are found to be required during the course of the reconsideration. In cases where the evidence taken as a whole is not clear and convincing, a statement from the treating physician is to be obtained in which the points at issue are discussed. (See § 3784.1B.)

B. Documentation Sources.--Contact the provider to obtain any clarifying information needed if the beneficiary's allegation in the request for reconsideration raises an issue which has not been sufficiently documented.

The written request to the provider for additional information should mention that the photocopying services of the local social security office may be utilized if the provider lacks photocopy equipment. Social security offices have been instructed to honor requests for use of their photocopying facilities when a provider states that it does not have photocopy equipment.

There may be cases where contact with the physician involved is necessary. (See § 3783.3C.) There may also be cases in which contact with the beneficiary is necessary to obtain additional information. In most cases, contacts with the claimant and his physician can be by letter, although you may desire to use your own representative to secure information. In some instances, the social security office may be utilized where necessary to assist you to obtain additional information. Since the provider prepares the bill and submits the claim, the medical documentation supporting the claim is generally provided by the hospital, skilled nursing facility, or home health agency.

C. Complete Documentation.—Complete documentation is vital to the total claims process. It is the foundation upon which determinations are made and sustained. Inadequate documentation leads to improper and inconsistent determinations, delays in the claims process and reversals at the higher appellate levels. All written materials in the intermediary's possession at the time of initial claims action together with all written materials obtained during the course of the reconsideration should be included in the file sent to SSA after the reconsideration action has been completed. It is also important that the documents included in any file should be responsive to the claimant's allegation of covered services.

D. Medical Evidence.—In the vast majority of cases, the medical evidence required would generally include some diagnostic information, information relative to the condition of the patient, the therapeutic regimen, and any other information which discloses the medical needs of the patient and the services rendered to meet these needs. No complete listing can be devised covering all possibilities since the amount of documentation needed varies with each case.

It is imperative that the need for medical documentation be promptly recognized and requests be followed-up without delay. Follow-up requests may be made by telephone and, as a last resort, by personal contact. Memorandums of personal contacts or telephone calls should be included with the medical documentation if the information relates to the condition of the patient or the services furnished.

3783.1 Listing of Documentation Required for Reconsideration.—The listing below shows the minimum documentation which should be obtained before a reconsideration decision is made. Additional suggested items that may be warranted depending on the particular issue involved are also listed. Any evidence listed or any other evidence which the intermediary feels is necessary to make a review of its initial claims action should be requested by the intermediary. If any of the evidence deemed necessary is not in existence or is otherwise unobtainable, this should be fully documented and explained.

The documentation should include the following:

A. Documentation Pertaining to Inpatient Hospital Care.—

1. Report of Eligibility

2. Billing forms, including the last payment bill preceding a disallowed bill. In no-payment situations where the beneficiary is still an inpatient, the notice of admission form should be in the file. When a patient has not been discharged, the reconsideration case should be processed even though the no-payment bill has not yet been received. (See § 3783.9 for necessary documentation where the no-payment bill has not been received.)

3. Admission History and Physician Examination

4. Doctor's Orders and Progress Notes

5. Nurses' Notes, Medication, and Graphic Charts

6. Utilization Review Committee Reports, Minutes of Meetings, and Notices of Decisions. (If there are no utilization review committee documents, a statement should be included explaining their absence.)

7. Discharge Summary or cause of death where applicable.

B. Additional Records Pertaining to Inpatient Hospital Care.—The following additional records should also be included if pertinent to the issues in the case:

1. Special Studies and Reports (i.e., blood and urine analysis, radiology, pathology, etc.)

2. Emergency Service Sheets

3. Consultation Reports

4. Operative and Anesthetic Reports

5. Social Service Notes

6. Doctor's Certification and Recertification, if at issue

7. Therapy Treatment Plan and Treatment Record, if available.

C. Documentation Pertaining to Noncovered Dental Stays.—In addition to the documentation required under A and B above, evidence establishing the existence, severity, and relationship of a non-dental impairment alleged to require proper medical management, control, or treatment must be contained in the file. This may involve obtaining a record of prior treatment of the non-dental impairment as well as assuring that records of all treatment for such an impairment during the stay in question are included in the file. In writing the determination, the issue of relationship between the non-dental condition and the services provided must be substantively addressed.

D. Documentation Pertaining to Skilled Nursing Facility Care.—

1. Report of Eligibility

2. Billing Forms (see Item A2)

3. Hospital Discharge Summary, Transfer Evaluation Sheet, or Skilled Nursing Facility (SNF) Admission Record

4. Doctor's Orders and Progress Notes

5. Nurses' Notes, Medication, and Graphic Charts

6. Utilization Review Committee Reports, Minutes of Meetings, and Notices of Decisions

7. Medical Information Questionnaire, where applicable.

E. Additional Records Pertaining to SNF Care.—The following additional records should also be included if pertinent to the specific issue in the case under reconsideration:

1. Special Studies and Reports (i.e., blood and urine analysis, radiology, pathology, etc.)

2. Consultation Reports

3. Social Service Notes

4. Disposition Transfer Sheet

5. Discharge Summary or cause of death where applicable

6. Therapy Treatment Plan and Treatment Record

7. Doctor's Certification and Recertification, if certification is at issue.

F. Documentation Pertaining to Home Health Services Care.—

1. Report of Eligibility

2. Billing Forms (see Item A2)

3. Plan of Treatment

4. Nursing, Physical Therapy, or Speech Therapy Notes

5. HHA Referral Form

6. Doctor's Orders.

3783.2 Documentation Pertaining to Private Room Issue.—In addition to the documentation itemized above under the hospital or SNF level of care, if the beneficiary or his representative protests a charge for a private room on the grounds that the privacy was medically necessary, the following additional evidence must be in file: (Also see § 3101.1B and C.) A statement from the admitting officer of the facility concerning the circumstances with regard to the private accommodations furnished. The evidence in file should also indicate whether the doctor's order for the private room (either oral or written) existed at the time the patient was admitted to the private room. If the doctor did not order the private room at the time of admission, an explanation should be secured from the facility or from the physician.

3783.3 Beneficiary Waiver of Liability Documentation.—In cases which fall under § 3781.3L (items or services excluded from coverage because they constitute custodial care or are not reasonable and necessary) the original coverage determination must be evaluated prior to a consideration of the liability question. If after this evaluation it is found that the items or services are not covered because they were not reasonable and necessary or were custodial in nature, the following documentation is also to be obtained if it is not in the file:

A. From the Provider.--

1. A dated copy of any written communication which the provider may have furnished the beneficiary or his representative.

2. A dated copy of the URC's notice to the beneficiary, if applicable.

B. From the Intermediary's Own Files.--

1. Where available, evidence that the intermediary sent the beneficiary a denial notice in connection with a prior claim for the same noncovered service as currently under reconsideration,

2. Indication of whether or not the provider meets the criteria for presumption of waiver.

3. If not, information indicating whether or not a nonwaiver provider meets the denial criterion.

C. From Other Sources (If Applicable).--

1. Evidence from the beneficiary himself if he or she states that pertinent evidence is in his possession or the facts of the case indicate that the beneficiary has such evidence.

2. Evidence from the beneficiary's attending physician if the facts of the case warrant such a contact.

3783.4 Provider Waiver of Liability Documentation.--The intermediary should document the file:

A. Indicating whether or not the provider has met the criteria for presumption of waiver.

B. Regardless of whether or not it meets the presumption criteria, whether it is clear and obvious that the provider should have known that the services were not covered, that is, the intermediary advised the provider in a previous case that payment for the same type of services or items could not be made. (If this is the case, the reconsideration file is to be documented with a dated copy of the prior notice to the provider.)

C. Include evidence of notification to the provider, (i.e., telephone and/or written contacts) of coverage or noncoverage of the services rendered.

3783.5 Obtaining Evidence from Providers Serviced by Other Intermediaries.--To fully document the reconsideration file, it is sometimes necessary for one intermediary (the requesting intermediary) to obtain evidence from a provider serviced by another intermediary (the servicing intermediary). For example, in a skilled nursing facility case, a hospital discharge summary is needed in order to adjudicate the reconsideration action, but a different intermediary (the servicing intermediary) services the hospital. In such instances, the requesting intermediary should contact the servicing intermediary in writing. The request should state the beneficiary's name, the health insurance claim number, the provider name, the dates of the stay, and the nature of the evidence required.

The servicing intermediary should process the request as expeditiously as possible. If the requesting intermediary has not received a reply within 21 days from the date of mailing the request, it will send a copy of the request to its regional office for assistance. That RO will contact the servicing intermediary or, if the servicing intermediary is not in its region, it will contact the servicing intermediary's regional office for assistance. If after an additional 15 days (20 days when another region is involved) the requesting intermediary has still not received a reply from the servicing intermediary or a status report from the RO, the requesting intermediary should follow-up by telephoning its RO.

Those intermediaries, which have found that it is more expeditious to have the provider which submitted the original claim contact the other provider in question, may continue to do so.

3783.6 Additional Documentation--Follow-up Procedures.--It is imperative that the need for medical documentation be promptly recognized and requests be followed up without delay. Except for unusual circumstances, no more than 14 days should be allowed to elapse before a follow-up request by mail or by telephone. If these follow-ups are unsuccessful, a personal or telephone contact by an intermediary provider relations specialist is to be undertaken no later than 14 days after the last follow-up.

3783.7 Prohibition Against Marking on Claim Files.--Intermediary personnel must not in any way mark, underline, write on , alter, obliterate, or otherwise deface any record, document, letter, or other paper received in support of a claim for health insurance benefits, except see § 3605.4 for situations in which corrections on billing forms may be made. The use of coding entries is also acceptable if they do not obliterate other information on the bill. Also, the date stamping required by & 3783.8 is an acceptable marking on a claim file. Such claims materials are subject to both the administrative appellate process within SSA and to judicial review; and to the extent that documents are underlined or editorial comments are added, the claims adjudication process is compromised.

The provisions with regard to the improper marking and the obtaining of legible evidentiary documents must be applied beginning with the initial claim and not deviated from throughout the entire claims process.

3783.8 Assembling the Reconsideration File.--The reconsideration file is assembled by the intermediary which is responsible for making the reconsideration determination. All reconsideration requests (formal or informal) are to be placed in manila folders as soon as possible. Each folder will bear the beneficiary's HI claim number (the numeric and suffix letter) on the top line of the folder tab in the upper right-hand corner and the beneficiary's last name, first name, and middle initial, if any, is to be shown directly beneath the number. Example:

H.I. 300-00-7777A
Doe, Mary A.

All claims material pertaining to the services in question, including the envelope in which the request for reconsideration was received in cases where the postmark would have a bearing on the timeliness for filing an appeal, will be prong-filed in this folder in chronological order by type of evidence (see below). The file should include only the original documents whenever possible and should not include any duplicate papers.

The date of receipt must be stamped on each document or category of documents received at the initial claims level and at the reconsideration level. Unless the format of a particular document or the intermediary's claim processing system dictates otherwise, the date of receipt is to be stamped in the upper right-hand corner of each document or category of documents.

All papers are to be grouped by individual categories and arranged in chronological order within each category, building the file from the oldest piece of a particular category on the bottom and the most recent on the top.

The major categories are as follows (listed in order--category 1 would appear on the bottom of all other documents):

1. All billing forms or summary in lieu thereof (see § 3783.9)
2. Report of Eligibility
3. Doctor's orders
4. Progress notes
5. Nurses' notes
6. Medication charts
7. Laboratory reports and other studies
8. Therapy treatment plan and treatment record

9. Utilization Review Committee reports

10. In beneficiary waiver cases

    a. Provider and/or URC notices to the beneficiary

    b. Copies of prior intermediary notices to the beneficiary, if available

11. In provider waiver cases--documentation that the provider was previously notified that similar services were not covered, if applicable

12. Other evidence, such as medical information forms, questionnaires

13. Intermediary denial notices

14. The request for reconsideration (page 1 of Form SSA-2649)

15. Copy of the reconsideration acknowledgment letter

16. Request(s) for further evidence

17. Intermediary physician evaluation and worksheet

18. Reconsideration determination and cover letters

19. Page 4 of Form SSA-2649
